Master of Science in Athletic Training

For more information: (626) 815-5086

The Master of Science in Athletic Training (MSAT) is an intense, demanding, and rewarding program of study. The MSAT is a full-time residency program that prepares students for successful completion of the national Board of Certification, Inc. (BOC) examination and for careers in athletic training. Multiple clinical experiences provide students with practical learning designed to strengthen professional preparation and career placement, and a Christian worldview is woven throughout the program, giving students a Christ-centered perspective of this service profession.

The MSAT is a 63-unit, two-year program including two 8-week summer terms and four traditional 16-week semesters. Through academic coursework and hands-on clinical experiences integrated with a Christian worldview, students learn to provide immediate and follow-up care to patients while under the direct supervision of a preceptor. Students observe, learn from, and interact with a variety of healthcare personnel and members of the public, including physicians, nurses, physical therapists, patients, athletes, coaches, and parents.

Students enrolled in this program complete coursework in the areas of acute care and emergency management of injuries, orthopedic assessment and diagnosis, therapeutic modalities, therapeutic exercise, biomechanics, pharmacology, general medical conditions, strength and conditioning, healthcare administration, psychological and spiritual aspects of injury and illness, and research methodology.

Program requirements are compliant with the current Standards for the Accreditation of Professional Athletic Training Programs established by the Commission on Accreditation of Athletic Training Education (CAATE). Students who apply must successfully complete prerequisite courses and other admissions requirements prior to enrolling. Following completion of the program, students are eligible to sit for the BOC examination to become a certified athletic trainer.

Mission Statement

The mission of the Master of Science in Athletic Training (MSAT) program is to fully equip athletic training students with a quality education that includes a Christian perspective to become lifelong learners. The program incorporates current research and scholarly instruction in both the clinical and didactic portions of the program, preparing athletic training students to enter the profession as entry-level athletic trainers upon successfully passing the BOC examination.

Values and Beliefs

We value:

1. The use of Christian principles in teaching and athletic training.
2. Student-centered teaching and learning, and providing all the resources necessary to equip students to enter the athletic training profession.
3. Experiential and clinical learning with impact on the greater community.
4. Educating the whole student: spiritually, intellectually, and physically.

Goals

1. To provide an accredited athletic training program in a Christian environment for athletic training students seeking Board of Certification, Inc. certification.
2. To offer diverse clinical education experiences that expose athletic training students to the variety of employment settings available in the field of athletic training.
3. To produce entry-level athletic training professionals who conduct themselves ethically and make decisions using a Christian worldview.

Objectives

1. To provide athletic training students with the required knowledge and skills to become competent entry-level athletic trainers.
2. To assist athletic training students in becoming true servants of God as they minister to injured persons.
3. To provide athletic training students with the ability to critically analyze evaluation, treatment, and rehabilitation protocols to ensure efficient and high-quality care for every athlete/patient/client.
4. To help athletic training students learn how to effectively communicate and interact with others.
5. To foster an understanding of multiple perspectives to facilitate learning, particularly within the clinical setting.
6. To impart the ability to make informed decisions regarding the prescribed standards of practice and ethics in the profession of athletic training.
7. To equip athletic training students with the skills necessary to seek, assimilate, analyze, and interpret data and other information vital to continued growth and understanding of the ever-changing field of athletic training.

Admission

University graduate admission and program acceptance requirements must be met before an application is complete (see Admission to the University (http://catalog.apu.edu/graduateprofessional/admission-policies/graduate-admission-university) section of this catalog). Program-specific application requirements are available online (http://www.apu.edu/graduateprofessionalcenter/admissions/requirements/program).

International students have a separate application procedure. Contact the International Center at +1-626-812-3055 or online (http://www.apu.edu/international).

Prerequisite Courses

The following prerequisites must be completed before entry:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td><strong>BIOLOGY: Two required courses</strong></td>
<td></td>
</tr>
<tr>
<td></td>
<td>Human Anatomy with lab</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Human Physiology with lab</td>
<td></td>
</tr>
<tr>
<td></td>
<td><strong>ADDITIONAL COURSES: (recommended, but not required)</strong></td>
<td></td>
</tr>
<tr>
<td></td>
<td>Exercise Physiology with lab</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Research Methods</td>
<td></td>
</tr>
</tbody>
</table>

Note: The application for the 2021 cohort will open in July 2020. In line with the 2020 CAATE Standards (https://caate.net/wp-content/uploads/2019/02/2020-Standards-Final-2-20-2019.pdf), students seeking admission to the 2021 or later cohorts will have the following required prerequisite courses: anatomy with a lab, physiology with a lab, general biology, general chemistry, general physics, and general psychology.

Other Admission Criteria

- Application cycles begin in July for the following year's cohort. Application review begins in the fall, and students are accepted on a year-round, rolling admission basis. However, to ensure consideration for the summer start date, completed applications should be submitted early in the admission cycle (https://www.apu.edu/bas/programs/athletic-training-masters/admission/#applicationdeadlines).
- No more than 20 percent (13 units) of the total amount of units for this program may be transferred in from a comparable graduate program. Each request will be evaluated according to the established transfer credit requirements. Refer to the Transfer Credit (http://catalog.apu.edu/graduateprofessional/academic-policies-procedures/transfer-credit) requirements listed in the Academic Policies and Procedures (http://catalog.apu.edu/graduateprofessional/academic-policies-procedures) section of the Graduate and Professional Catalog. Specific questions regarding eligibility for transfer credit can be directed to the Graduate and Professional Center (http://www.apu.edu/graduateprofessionalcenter) at (626) 815-4570.
- Once a student is offered admission into the program, a nonrefundable deposit of $500 for the program is due within 21 days of receipt of the acceptance letter. This will be applied to the first term’s tuition fee. The deposit should be submitted to:

  Azusa Pacific University  
  Graduate and Professional Center Cashier  
  901 East Alosta Avenue  
  PO Box 7000  
  Azusa, CA 91702-7000

- In addition, accepted students must submit the following items to the program:
  a. Documentation of the following up-to-date immunizations: HBV series, MMR, Tdap, chicken pox, and meningococcal.
  b. Verification of a recent (within the last 12 months) negative TB test.
  c. Copy (with instructor’s signature or QR code) of current, valid certification card(s) for Adult, Child, and Infant CPR.
  d. Copy (with instructor’s signature or QR code) of current, valid certification card for Standard First Aid.
  e. Documentation of ability to meet MSAT Technical Standards (http://www.apu.edu/live_data/files/241/msat_technical_standards.pdf) (PDF) with or without reasonable accommodations.

Postacceptance materials should be submitted to:

Azusa Pacific University
International applicants send additional forms to:

International Center  
Azusa Pacific University  
PO Box 7000  
Azusa, CA 91702-7000 USA  
+1-626-812-3055  
Fax: +1-626-815-3801  
international@apu.edu  
apu.edu/international

In addition to meeting the admission requirements, students whose first language is not English must meet the required English proficiency standard as demonstrated by passing the following minimum international iBT (internet-based TOEFL) scores:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Reading: 25</td>
<td></td>
</tr>
<tr>

### Year 2, Spring (16 weeks)
Clinical Education

Clinical education experiences provide students with the opportunity to practice and integrate their cognitive learning with the associated psychomotor skill requirements of the profession, and to develop entry-level clinical proficiency and the professional behavior required of an athletic trainer as defined in the 2020 Standards for Accreditation of Professional Athletic Training Programs (https://caate.net/wp-content/uploads/2019/02/2020-Standards-Final-2-20-2019.pdf). These clinical experiences are completed under the direct supervision of a qualified preceptor in an appropriate clinical setting. The primary settings for clinical experiences include athletic training and allied healthcare facilities, athletic practices, and competitive events. Ample opportunities are provided for students to gain clinical experience associated with a variety of populations including both genders, diverse age groups, and varying levels of risk, protective equipment, and medical experiences that address the continuum of care that would prepare students to function in a variety of settings and meet the domains of practice delineated for a certified athletic trainer.

Clinical experiences are accomplished through several clinical rotation assignments that expose students to a variety of athletic training settings, sports, and patient populations. Clinical rotations include a diversity of professional settings such as on-campus varsity athletics, high schools, colleges, professional sports, physician offices, and rehabilitative clinics. Students complete multiple rotations purposefully scheduled to complement coursework, introduce students to several types of employment settings, and provide perspectives from multiple professionals.

As required by CAATE, students complete two academic years of clinical experiences, including clinical immersive experiences.

Graduation Requirements

Graduation requirements include successfully completing all coursework with at least a 3.0 GPA and a B- or better in all courses. See the current MSAT Student Handbook for details on academic probation and dismissal. See also Grading (http://catalog.apu.edu/graduateprofessional/academic-policies-procedures/grading) in the Academic Policies and Procedures (http://catalog.apu.edu/graduateprofessional/academic-policies-procedures) section of this catalog.

Additional graduation requirements include:

1. Completion of a minimum of 1,000 clinical experience hours.
2. Completion of all Clinical Integration Proficiencies.
3. Completion of all required professional development units (attendance at and participation in regional and national athletic training conferences, in-services, community service events).

Program Learning Outcomes

Students who successfully complete this program shall be able to:

1. Acquire and apply the core competencies and curricular standards as outlined in the 2020 Standards for Accreditation of Professional Athletic Training Programs by the Commission on Accreditation of Athletic Training Education (CAATE).
2. Describe, design, analyze, and assess evaluation, treatment, and rehabilitation protocols to ensure efficient and high-quality care for every patient.
3. Apply the curricular content standards in a variety of clinical settings with diverse patient populations.
4. Communicate (in written and verbal format) and interact effectively with peers, medical professionals, injured individuals, and others with whom they come into contact.
5. Utilize evidenced-based practice to make decisions in the application of athletic training core competencies and curricular standards.
6. Operate modern technology in the practice of athletic training.
7. Describe and integrate relevant standards of professional practice and codes of ethics from the profession of athletic training to formulate clinical decisions.
8. Examine a Christian worldview as it relates to the care of injured persons.

AT 511, Foundations of Athletic Training, 5 Units

This course provides students with basic information and skills necessary in the clinical practice of athletic training. Topics include acute care, risk management, orthopedic taping and wrapping, and equipment fitting. Students will also learn the roles and responsibilities of a certified athletic trainer and the sports medicine team. Students are also introduced to evidence-based practice concepts. A laboratory component is included.

AT 515, Anatomical Basis of Athletic Training, 4 Units

This course provides an in-depth look at human anatomy, with an emphasis on musculoskeletal anatomy, functional anatomy, and basic kinesiology principles. The lab component will include the use of cadavers.
AT 521, Orthopedic Assessment and Diagnosis I, 3 Units
This is the first of two courses that include an in-depth inquiry into the pathophysiology of injuries to the physically active. This course emphasizes injuries to the trunk and lower extremity. Mechanisms of injury will be addressed as well as specific evaluation techniques and methods standard to the practice of athletic training. A laboratory component is included.

AT 523, Therapeutic Modalities, 3 Units
This course focuses on the theory and operation of various therapeutic modalities as they relate to the healing process and are used in the treatment of injuries to physically active individuals. Included are hydrotherapy, electrotherapy, thermotherapy, cryotherapy, therapeutic massage, and other manual and mechanical techniques. A laboratory component is included.

AT 525, Research Methods I, 3 Units
This is the first of two courses in research methodology. The focus of this course is the critical reading of athletic training and sports medicine literature, the interpretation of research, and the analysis of research methodology appropriate to the field. In addition, each student creates a research proposal as the first step in their research project.

AT 527, Clinical Integration I, 2 Units
This is the first of five clinical education courses. Each student will be assigned to a preceptor who directly supervises them as they practice and refine their skills in an athletic training setting. As students display competence with/through the Clinical Integration Proficiencies in Athletic Training, they will be given increased responsibility in directly working with patients.

AT 532, Orthopedic Assessment and Diagnosis II, 3 Units
This is the second of two courses that include an in-depth inquiry into the pathophysiology of injuries to the physically active. This course emphasizes injuries to the upper extremity, head, and cervical spine. Mechanisms of injury will be addressed as well as specific evaluation techniques and methods standard to the practice of athletic training. A laboratory component is included.

AT 534, Biomechanics, 3 Units
This course focuses on qualitative and quantitative analysis of human movement. Screenings and calculations will focus on skills common in sport and physical activity as well as gait analysis by the application of principles of anatomy, kinesiology, and physics.

AT 536, Research Methods II, 3 Units
This is the second of two courses in research methods. The focus of this course is on statistical concepts with the emphasis on correct usage and interpretation, using spreadsheets and computer analysis. In addition, students will have the opportunity to explore advanced research methodology, specific to their chosen research.

AT 538, Clinical Integration II, 2 Units
This is the second of five clinical education courses. Each student will be assigned a preceptor who directly supervises them as they practice and refine their skills in an athletic training setting. As students display competence with/through the Clinical Integration Proficiencies in Athletic Training, they will be given increased responsibility in directly working with patients.

AT 541, Nutrition for Active People, 2 Units
This course focuses on nutrition related to exercise and physical performance. These aspects include the energy systems in exercise, nutritional aspects of substrate utilization (digestion, absorption, metabolism, etc.), assessment of nutritional needs, and diet modification. Dietary development for weight loss, body composition changes, and performance will be covered from a nutritional viewpoint.

AT 543, Strength and Conditioning, 3 Units
This course uses a scientific and integrated approach to the assessment, development, implementation, and management of strengthening and conditioning. A laboratory component is included.

AT 545, Topics in Athletic Training, 3 Units
Students in this course explore topics necessary to maintaining relevant competence and enabling future growth as an athletic training professional. Topics include the role of the Athletic Trainer in public health outcomes, healthcare delivery strategies, quality assessment and improvement of healthcare systems and practitioners, professional ethics, emerging evaluation and intervention strategies, and the use of technology in medicine.

AT 547, Clinical Integration III, 2 Units
This is the third of five clinical education courses. Each student will be assigned to a preceptor who directly supervises them as they practice and refine their skills in an athletic training setting. As students display competence with/through the Clinical Integration Proficiencies in Athletic Training, they will be given increased responsibility in directly working with patients.

AT 549, Applied Research I, 1 Unit
In this course, students meet with their research team and mentor to identify a clinical question of interest, conduct a literature review, and plan the methods and data collection for their research project.
AT 551, Medical Conditions and Pharmacology, 3 Units
This course covers the knowledge, skills, and values that the entry-level certified athletic trainer must possess to recognize, treat, and refer, when appropriate, the general medical conditions and disabilities of those involved in athletics or other physical activities. Pharmacology is included as related to medical conditions and disabilities of the active, as well as ergogenic aids common to the population. A laboratory component is included.

AT 553, Psychological and Spiritual Aspects of Injury and Illness, 3 Units
The purpose of this course is to provide the necessary knowledge and skills to manage psychosocial issues in athletic training. Psychological and spiritual interventions and referral strategies specific to the role of an athletic trainer will be discussed for common problems such as: eating disorders, anxiety issues, substance abuse, catastrophic injuries, ergogenic aids, peer pressure, depression, and response to injury.

AT 555, Therapeutic Exercise, 3 Units
This course focuses on the theory and operation of various contemporary methods of therapeutic exercise in the rehabilitation of injuries to the physically active. The student is introduced to manual as well as mechanical testing and other primary components of comprehensive rehabilitation designs and implementation, including determining therapeutic goals, progress, and ability to return to participation. A laboratory component is included.

AT 557, Clinical Integration IV, 2 Units
This is the fourth of five clinical education courses. Each student will be assigned to a preceptor who directly supervises them as they practice and refine their skills in an athletic training setting. As students display competence with/through the Clinical Integration Proficiencies in Athletic Training, they will be given increased responsibility in directly working with patients.

AT 559, Applied Research II, 1 Unit
In this course, students meet with their research team and mentor to collect and synthesize data for their research project.

AT 562, Health Care Administration, 3 Units
This course addresses the organization and administration aspects of health care in a variety of athletic training settings including interscholastic, private clinics, and others. Students study topics such as medical record keeping (paper and electronic), facility design and maintenance, leadership strategies, insurance issues, public relations, and legal and ethical issues related to health care.

AT 564, Seminar in Athletic Training, 1 Unit
This course provides an integration of prior coursework and expertise in athletic training preparation for the BOC Certification Exam, and a forum for discussion of current athletic training issues.

AT 566, Clinical Integration V, 2 Units
This is the fifth of five clinical education courses. Each student will be assigned to a preceptor who directly supervises them as they practice and refine their skills in an athletic training setting. As students display competence with/through the Clinical Integration Proficiencies in Athletic Training, they will be given increased responsibility in directly working with patients.

AT 569, Research Capstone, 3 Units
Students will work with their research team and mentor to complete their research project. The project will be presented in print and poster format following appropriate professional guidelines.
