

# BS in Applied Mathematics

59-63 units

Students in the applied mathematics major (<https://www.apu.edu/clas/programs/applied-math-major/>) learn to solve problems from a variety of disciplines by developing mathematical models, applying computational algorithms, and analyzing results. The applied mathematics major allows students to choose either the standard track or one of four concentrations:

- Actuarial Science Concentration
- Computer Science Concentration
- Physics Concentration
- Statistics and Data Science Concentration

Students majoring in applied mathematics are encouraged to consider a minor in statistics. For qualified students, an advising pathway is available to pursue a BS in Applied Mathematics with computer science concentration and an MS in Applied Statistics and Data Science in a total of 5 years. Ask your academic advisor for details.

## Career Opportunities

This major prepares students to be quantitative experts in a variety of fields: actuarial science, computer science, physics, university teaching, mathematical research (for business, government, or the academy), cryptography, finance and economics, statistics and data analysis, or operations research and management consulting. APU mathematics graduates have advanced to prestigious graduate schools and have moved into attractive industry positions.

Students preparing to teach mathematics at the secondary level or to pursue graduate studies in pure mathematics are encouraged to consider the mathematics major instead of the applied mathematics major.

## Requirements

Code	Title	Units
MATH 165	Calculus I	3
MATH 166	Calculus II	3
MATH 167	Sequences and Series <sup>F</sup>	1
MATH 250	Data Analysis <sup>F</sup>	3
MATH 268	Multivariable Calculus	3
MATH 270	Ordinary Differential Equations <sup>S</sup>	4
MATH 295	Applied Linear Algebra <sup>F</sup>	3
MATH 361	Introduction to Modeling with Probability	3
MATH 455	Numerical Analysis <sup>ES</sup>	3
MATH 480	Writing 3: Mathematical Reading, Writing, and Presentation <sup>1, F</sup>	3
MATH 496	Mathematics Senior Seminar <sup>2, S</sup>	3
CS 120	Introduction to Computer Science I <sup>3</sup>	4
<b>Choose the standard track or one of the concentrations below</b>		<b>23-27</b>

- <sup>1</sup> Meets the General Education Writing 3 requirement.
- <sup>2</sup> Meets the General Education Integrative and Applied Learning requirement.
- <sup>3</sup> Meets the General Education Oral Communication requirement if taken with CS 290 and CS 480, or ENGR 240 and ENGR 480.
- <sup>4</sup> Meets the General Education Natural Sciences requirement. Students must complete both PHYC 165 and PHYC 145 to fulfill the GE Natural Sciences requirement.
- <sup>5</sup> Meets the General Education Social Sciences requirement.
- <sup>6</sup> Meets the General Education Oral Communication requirement if taken with CS 120 and CS 480.

F	Offered in Fall only
S	Offered in Spring only
F/S	Offered in both Fall and Spring terms
EF	Offered in Fall in even years
ES	Offered in Spring in even years
OF	Offered in Fall in odd years
OS	Offered in Spring in odd years

## Program Learning Outcomes

### Program Learning Outcomes

Students who successfully complete this program shall be able to:

1. Master fundamental mathematical methods and problem solving strategies.
2. Communicate mathematical ideas in speech and writing, combining precise language and notation with insightful explanation.

3. Use mathematical models to analyze cross-disciplinary problems.
4. Employ appropriate technology and computational techniques.
5. Articulate how Christian perspectives and the study of mathematics and its applications mutually inform and enhance each other.
