

# Minor in Business Administration (Professional)

---

21 units

Today's business leaders must be agile and able to adapt to a rapidly changing business world while leading employees by modeling character, integrity, and compassion. Relevant coursework addresses current issues in business and encourages the integration of real-world work experiences and hands-on projects. Students may combine these experiences with internships or international study opportunities to further expand their portfolio and network.

## Benefits of Adding a Minor

A minor can help students complement their bachelor's degree and stand out to future employers, helping them expand their employment opportunities as they study an additional area of interest. The versatility of the business administration minor complements any major, giving students the opportunity to demonstrate management expertise in any field and possibly providing an edge in their job search, while also adding knowledge that can be used throughout an individual's career.

## Certificates, Credentials, and Microcredentials

Throughout the program, students build on existing experience while gaining a strong foundation in business management and leadership. Students in this program also have the opportunity to earn internationally recognized certificates, credentials, and microcredential badges that can be added to résumés and uploaded to online portfolios, certifying and showcasing their mastery of certain skills or abilities to potential employers.
