

# Applied Behavioral Analysis Specialization

---

## Program Learning Outcomes

### Program Learning Outcomes

Students who successfully complete this program shall be able to:

1. Demonstrate an understanding of basic concepts and principles from the field of Applied Behavior Analysis (ABA).
2. Learn single-subject design and how to collect, display, analyze, and interpret data using continuous and discontinuous measures.
3. Implement procedures and systems related to behavior change from the perspective of applied behavior analysis (ABA).
4. Conduct personnel supervision that is behavior analytic in nature.
5. Apply the industry's ethical guidelines to their practice in the field of applied behavior analysis (ABA).
6. Conduct functional behavior assessment. This includes descriptive assessment (review of records, interview, observation, interpretation), functional analysis, and developing intervention plans.
7. Apply coursework in a fieldwork setting, supervised by a qualified professional.
