The purpose of this course is to help students learn to utilize a lifespan perspective in their work as marriage and family therapists. The course focuses on the important developmental issues and milestones for each stage of the lifespan, paying particular attention to the aspects of context, culture, and environmental issues. Students are encouraged to consider how development occurs within a specific social context and learn how social stress, poverty, low educational attainment, abuse and neglect, and inadequate housing impact development. Biological, social, and psychological aspects of aging and long-term care are included in this course. Models of psychological development are presented and the processes of change and adaptation are examined, including clinical issues such as grief and loss. The clinical application of the material is highlighted through case examples, group discussion, and hands-on application during class activities.
Prerequisite: Human Development or equivalent

PPSY 561, Child and Adolescent Therapy, 3 Units
This course equips students with an understanding of the broad range of childhood and adolescent problems and disorders. A variety of psychotherapeutic modalities is presented, giving students an opportunity to develop knowledge of basic child and adolescent therapy skills, assessments, and treatment strategies. The impact of developmental aspects, family dynamics, social environments, and multicultural issues is addressed. In addition, legal and ethical issues, including child abuse reporting, suicide assessment and intervention, and the role of hospitalization, are considered.

PPSY 563, Psychopathology, 3 Units
This course reviews the role and categories of psychopathology utilized in the assessment and treatment of individual, marriage, and family dysfunction. Students develop diagnostic skills through a master of the concepts in the Diagnostic and Statistical Manual of Mental Disorders (DSM 5), and review available community resources for those with severe mental disorders.

PPSY 571, Family Therapy, 3 Units
This course is an overview of current theories and methods of family therapy interventions. There is an emphasis on how family therapy integrates diversity issues (e.g., ethnicity, socioeconomic status, spirituality, blended families) during the clinical hour. The major theories, their founding clinicians, and some of their contemporaries are reviewed. Clinical application of the material is emphasized in coursework.

PPSY 572, Research Methodology, 3 Units
This course surveys the major social science research methods, preparing students to read, understand, and evaluate psychological research. This course provides students with the basic knowledge and experience of conducting psychological experiments and how and when to use statistical procedures. Students build skills in how to apply clinical outcome research to clinical treatment planning and interventions. Sensitivity to issues of diversity in psychological research is stressed.

PPSY 577, Psychological Assessment, 3 Units
This course provides students with a broad understanding of the clinical use of psychological tests, including objective personality tests, intelligence tests, and projective testing techniques. Emphasis is on developing skills in administering tests, interpreting test findings, and applying test findings through report writing. Current research regarding psychological testing is also reviewed.

PPSY 580, Introduction to Clinical Practice: Basic Skills, 3 Units
This course introduces the student to basic skills in attending behavior, clinical interviewing, and clinical intervention. It is designed to stimulate self-awareness as related to the therapeutic relationship, as well as the integration of spirituality and the interpersonal process. Coursework includes reading, observation, role-play, and student audio/videotaped clinical practice. A grade of B or better must be achieved in order to advance to PPSY 581.

PPSY 581, Introduction to Clinical Practice: Advanced Skills, 3 Units
This course is designed to further develop the psychotherapeutic skills of students prior to their entry into a clinical placement. Students focus on developing proficiency in the core interviewing qualities, deriving goals for a clinical session, and in making contracts with clients for change. Additionally, students are encouraged to begin developing a theoretical and conceptual understanding of cases, and trained to work with diverse populations. Students are also encouraged to address issues regarding the integration of their faith with the practice of psychotherapy. These goals are addressed through experiential learning, lecture, readings, discussion, and reflection.
Prerequisite: PPSY 580

PPSY 582, Group Skills, 3 Units
This course introduces students to the theories and techniques utilized in group counseling. The course includes information about principles of group dynamics, group process, and developmental stages. Students explore the therapeutic factors of group work and group leadership style. Content also includes current research and literature, methods, and evaluation of effectiveness. Ethical, legal, and professional issues as well as special needs such as multiculturalism, life-span development concerns, and the therapist's personal leadership style are addressed.
Prerequisite: PPSY 580 and PPSY 581

PPSY 585, Psychobiology and Psychopharmacology, 3 Units
This course introduces the biological and neurological bases of human behavior and use of psychotropic medications as an adjunctive therapy to psychotherapy. Current information on the use of medications in the treatment of psychological disorders is provided. Consideration is given to the special needs of certain populations (e.g., the elderly, substance abuse patients) when psychotropic medications are prescribed. Students develop skills in case management when referral to medical doctors or neuropsychologists is part of therapeutic practice.
PPSY 592, Introduction to Clinical Placement, 1 Unit
This course is designed to support and equip students with entry-level practice management skills for clinical placement within community mental health and private practice settings. Students develop knowledge and gain practice in identifying diagnoses, presenting problems, documentation, and treatment planning. This course also provides program oversight of students' clinical placement experiences.
Prerequisite: PPSY 580 and PPSY 581

PPSY 593, Clinical Consultation, 1 Unit
This course is designed as an adjunct to the advanced-level students' clinical placement and supervision experiences. The primary purpose of this course is to provide an opportunity for students to discuss their clinical caseload, and to provide program oversight of clinical placement experience.
Prerequisite: PPSY 597, PPSY 598, and current placement in a clinical site

PPSY 595, Special Topics, 1-6 Units
Special topics courses offer graduate-level content that is typically scheduled in an intensive format. These courses include a range of specialized topics that are of interest to mental health professionals. The unit values of these courses range from 1-6 unit credits, depending upon the specific contact hours and workload involved in the course.

PPSY 597, Clinical Placement I, 3 Units
This course provides oversight of students' clinical placement and supervision experiences, focusing on enhancing students' clinical skills and knowledge of the interpersonal process of psychotherapy. Special attention is given to case management issues, documentation, community-based resources, integration of faith, health promotion, legal and ethical issues, and treatment planning. Treatment planning, utilizing many theoretical approaches including the recovery model, includes instruction and practice in determining the presenting problem, diagnosis, prognosis, client goals, and clinical interventions. Clinical skills and the processes of psychotherapy and supervision are addressed through experiential learning, readings, discussion, reflection, and assignments. This course also provides students with a forum for discussing their clinical caseloads (individuals, children, couples, families, and groups) and their interactions with placement supervisors. Students must be serving at an approved training site to be enrolled in this course.

PPSY 598, Clinical Placement II, 3 Units
This course is an adjunct to students' clinical placement, building on PPSY 597 to provide oversight and consultation for students' clinical placements and the further development of clinical skills. Emphasis is on management of crisis issues, legal/ethical practice, diagnosis, prognosis, multicultural treatment, treatment planning, application of theory to actual clients, integration of faith, and case management services. Clinical work is discussed from a public mental health and private practice perspective. Students must be serving at an APU-approved training site to be enrolled in this course.

PPSY 599, Readings in Psychology, 1-4 Units

PPSY 786, Global Psychology, 2 Units
This course provides a systematic overview of existing approaches to working globally. Theory, research, and intervention are highlighted, and the history of globalization, current trends, and common problems and issues are examined. Students are encouraged to develop their clinical skills in applying psychology to significant global concerns in diverse countries and cultures and practically apply their knowledge during an intensive, three-week practicum in Kenya, East Africa.

The Substance Use Disorders Certificate (https://www.apu.edu/bas/programs/substance-use-disorders-certificate/) is designed for students already enrolled in the MFT program, and for program alumni wishing to return and enhance their knowledge base. The certificate comprises 11 additional units taken over the course of a year (students who have not already taken PPSY 511 as part of the MFT program must complete it as part of their certificate), allowing students time to work in the field while gaining expertise. This program expands on the skills and knowledge needed to improve the health and wellness of individuals struggling with substance use, giving students access to a competency that historically has been afforded only to those working in the substance use disorder field.

Admission

University graduate admission and program-specific requirements must be met before an application is complete (see Admission to the University (p. 1092)). Program-specific application requirements are available online (https://tracking.cirrusinsight.com/74647a2d-e9a2-412f-9b55-9959c7aa4ec/apu-edu-graduateprofessionalcenter-admissions-requirements-program/).

International students should contact Graduate and Professional Admissions (https://www.apu.edu/graduateprofessionalcenter/admissions/) for application procedures.

MA in Clinical Psychology: Marriage and Family Therapy (MFT)

Mission Statement

The MFT program (https://www.apu.edu/mft/) is dedicated to the education and training of competent, self-aware, and culturally sensitive family therapists. Using a foundation in Christian faith, a systemic family psychology approach, and an integration of theories of psychotherapy, students explore personal, ethical, and social values as they prepare to serve the needs of their communities.

Licensed Professional Clinical Counselor (LPCC) Option

The MFT program offers one additional course that provides for students interested in dual licensure as an LPCC and an MFT. Coursework meets California education requirements for both licenses.

Gottman Couples Therapy Level 1 Certificate

The Couples Therapy course includes the completion of Gottman Level 1 training, which equips students with new insight into couples' struggles using research-based assessments and effective interventions based on the Gottman Sound Relationship House Theory. Students receive a certificate of completion and are then eligible to take the Level 2 training.

Substance Use Disorders Certificate

Upon completion of the MFT program, students may choose to take 11 additional units that fulfill the requirements for a certificate in substance use disorders. This certificate allows students to establish a competency that historically has been afforded only to those working in the substance use disorders field. As primary care physicians, mental health providers, and substance use treatment providers coalesce into whole-person care, you will be a part of cutting-edge treatment.

Program Goals

Diversity

Students will recognize the importance of diversity and its impact on clinical practice. Students will be equipped with awareness of beliefs and customs of diverse cultural groups and how to implement this knowledge when treating clients and interacting with agency personnel.

Identity Formation

Students will articulate their personal narrative inclusive of values, beliefs, behaviors, and traditions of faith that inform their worldview.

Ethical Practice

Students will understand the ethical guidelines and legal requirements within the field of marriage and family therapy. Students gain knowledge of when to use resources and seek consultation if faced with ethical or legal dilemmas in the context of therapy.
Competency

Students will be trained to become practitioners in marriage and family therapy with professional competencies in relationship, intervention, diversity, integration of faith and practice, and systemic family psychology.

Admission

Admitted students typically begin in the fall semester. To be considered for fall enrollment, the deadline for submission of a completed application is March 1. Students who apply earlier will be given priority consideration for admission.

Applicants may also apply to begin in the spring semester. The deadline for submission of a completed application for spring enrollment is October 1. Applicants for the spring semester will be considered based on space available at the Azusa campus and the Orange County, San Diego, and Inland Empire regional campuses.

Admission to the program does not guarantee that students will obtain a license or credential in marriage and family therapy or as an LPCC. Licensure and credentialing requirements are set by agencies that are not controlled by or affiliated with Azusa Pacific University and requirements can change at any time. For example, licensure or credentialing requirements can include evidence of the right to work in the United States (e.g., Social Security number or taxpayer identification number) or successfully passing a criminal background check. Students are responsible for determining whether they can meet licensure or credentialing requirements. Azusa Pacific will not refund tuition, fees, or any associated costs to students who determine, subsequent to admission, that they cannot meet licensure or credentialing requirements.

Application Requirements

• To be admitted into the program, students must hold a bachelor’s degree from a regionally accredited university or college (or an equivalent degree from a college or university in another country) with a minimum 3.0 grade-point average on a 4.0 scale. At the discretion of the university, a higher professional degree such as an MD or DC may be accepted as a substitute for the bachelor’s degree.
• Students who enter the program with a bachelor’s degree in a major other than psychology will be required to take Abnormal Psychology with a grade of B or better before beginning the program. Prerequisites may be waived on an individual basis.
• International applicants whose first language is not English must submit an iBT (internet-based TOEFL) score of 90 minimum; the minimum subsets are: Reading 22, Speaking 22, Listening 22, and Writing 24. Students may also submit results of the Test of Written English (TWE) and the Test of Spoken English (TSE). Because written and verbal English language skills are crucial to the education, training, and practice of psychology, further testing for spoken and written English will be required for all international students upon entrance to the program or as deemed necessary at any point in the program. If applicants do not meet the minimum requirement, they must first go through an English training program to raise their proficiency. Students may be mandated to do this if they are not meeting the language and writing standards for the program.

Personal and Group Psychotherapy

During the course of the program, students must complete 40 hours of individual psychotherapy. Students have the option of completing 20 sessions (40 hours) of group therapy in lieu of 20 of the 40 required individual psychotherapy hours.

Clinical Placement

Students develop therapeutic skills through required hours of direct clinical experience. Clinical placements may range from 12-30 months depending upon course track sequences.

While students are responsible for securing a placement site, assistance is provided by the director of clinical training, site directors, and in the Introduction to Clinical Practice courses. In addition, students receive support from and opportunities to discuss clinical issues and problems with supervisors and faculty in clinical placement and supervision courses.

For students seeking licensure, the clinical placement sequence meets MFT and LPCC requirements in California. To ensure the highest quality in clinical placements, the director of clinical training maintains contact with offsite supervisors and evaluates the student’s experience. Any violations of professional ethics codes may be grounds for dismissal from the degree program.

Students are required to obtain 300 hours of direct client experience for the MFT license, and 300 hours of direct client experience for the LPCC license. To meet graduation and licensure requirements, the student must receive one hour of individual or two hours of group supervision for every five hours of direct client experience. These hours count toward the 3,000 hours required for MFT licensure in California. Hours for the LPCC license begin postgraduation.

Comprehensive Examination

As a final evaluative component of the MFT program, each student must pass the Comprehensive Examination, which includes two elements:

1. A law and ethics exam
2. A clinical exam
Failure to pass the Comprehensive Examination may prevent graduation from the program.

**Program Locations**

The Department of Marriage and Family Therapy offers its master’s degree program on APU's Azusa campus as well as at the Orange County, San Diego, and Inland Empire regional campuses. More information may be obtained by contacting the program director, the local site administrator, or a program representative.

**Azusa Campus**
Program Administrator and Director: Vicki Ewing, MA, MFT  
vewing@apu.edu  
Azusa Pacific University  
PO Box 7000  
Azusa, CA 91702-7000  
(626) 815-6000, Ext. 5523

**Orange County Regional Campus**
Director: Melissa Zwart, MS, MA, LMFT  
mzwart@apu.edu  
1915 Orangewood Ave., Suite 100  
Orange, CA 92868-2046  
(714) 935-0260

**San Diego Regional Campus**
Director: Rebecca Kenyon, PsyD, LMFT  
rkenyon@apu.edu  
5353 Mission Center Rd., Suite 300  
San Diego, CA 92108-1306  
(619) 718-9655

**Inland Empire Regional Campus**
Director: Hilary Catling, MA, LMFT  
hcatling@apu.edu  
375 W. Hospitality Lane  
San Bernardino, CA 92408  
(909) 888-9977

**Course Requirements**

The degree must be completed in a minimum of two years and a maximum of six. Any extensions beyond six years must be requested as an exception to APU policy and must be submitted in writing on an Academic General Petition. A three-year course of study is recommended for most working students. The program is composed of 63 units of coursework. A maximum of 12 units of selected coursework, which meet the following criteria, may be transferred:

- Taken within the past eight years and completed with a grade of B or better  
- Obtained at a regionally accredited institution  
- Received from a graduate program in clinical psychology, counseling psychology, or marriage and family therapy  
- Acceptable for California MFT licensing requirements  
- Approval by the program director

Students in the program must maintain a 3.0 GPA with no course grade lower than a C-. Course resulting in grades lower than a C- will be retaken. In order to graduate, students may not have more than two instances of a C+/− on their transcript. If a student receives a third C+/−, the student will be required to retake one of the courses and receive a B- or better.

A student who receives two NO CREDIT grades in a CREDIT/NO CREDIT course (e.g., PPSY 593) will be referred to the Clinical Training Committee (CTC), which will meet to review the student’s situation and issue a recommendation. The CTC recommendation may include: 1) academic and/or clinical probation, 2) postponing clinical placement, 3) a recommended leave of absence, or 4) dismissal from the program.

PPSY 517  Motivational Interviewing with the SUD Population  1

Optional Electives  0-5
PPSY 555  Career Development Theories and Techniques  3
PPSY 786  Global Psychology  2

Total Units  63-91

1  Students who elect to take the optional concentration in substance use disorders must complete the master’s degree prior to enrolling in the concentration coursework. Additionally, PPSY 511 must have been completed with a grade of B- or better, and students must have completed their practicum at an APU-affiliated substance use disorder clinical placement site. Upon completion of the concentration, students receive a Substance Use Disorders Certificate.

2  Students who have not completed their hours of experience must enroll in this course until their hours are completed. This course may be taken up to three times. Students who have already completed their hours of experience are not required to take this course.

3  This course must be taken twice during a student’s course of study, with different special topics.

4  To participate in this course, students must apply and be accepted to it. Due to international requirements, other policies may be applicable.

Admission

University graduate admission and program-specific requirements must be met before an application is complete (see Admission to the University (p. 1092)). Program-specific application requirements are available online (https://tracking.cirrusinsight.com/74647a2de9a2-412f-9b55-9959c7aac4ec/apu-edu-graduateprofessionalcenter-admissions-requirements-program/).
International students should contact Graduate and Professional Admissions (https://www.apu.edu/graduateprofessionalcenter/admissions/) for application procedures.

**Program Learning Outcomes**

**Program Learning Outcomes**

Students who successfully complete this program shall be able to:

1. **Diversity:** The program will produce graduates who can apply their knowledge of family therapy in a culturally appropriate manner to a wide range of demographic groups.

2. **Identity Formation:** The program will produce graduates who demonstrate an awareness of their personal narrative and how it impacts their contribution to the field of marriage and family therapy.

3. **Ethical practice:** The program will produce graduates who will become clinicians who are ethically grounded, demonstrate integrity, and operate within the laws of the profession.

4. **Competency:** The program will prepare graduates to effectively utilize a variety of theoretical approaches to marriage and family therapy.

Courses

PT 701, Human Anatomy, 8 Units
This intensive course in clinically oriented human anatomy from a regional approach. Microscopic and gross human anatomy are explored utilizing lectures, classroom demonstrations, human cadaver dissections, dissection videos, and hands-on functional demonstrations. Biomechanics are studied from functional and clinical approaches. Emphasis is on histology, head, neck, upper extremity, and thorax during the first half of the term; emphasis in the second half is on the spine, pelvis, lower extremity, spinal cord, and internal organs.
Corequisite: PT 702

PT 702, Clinical Skills I, 6 Units
First in a series of courses designed to examine basic evaluation and clinical skills of the physical therapist, this course focuses on objective techniques of assessment for the upper and lower extremity and spine through measurement of range of motion (ROM), muscle testing (MMT), general neurological screening, and palpation. Kinesiology of all joints is studied from functional and clinical approaches, concluding in the assessment of normal gait mechanics. An introduction to body mechanics and documentation is provided to prepare the student for safe clinical practice. Learning takes place through laboratory activities, homework, online videos, and practical examination using a problem-solving approach.

PT 703, Clinical Neuroscience, 6 Units
This course covers in depth the anatomy and physiology of the central and peripheral nervous systems and neuromuscular function, serving as a foundation for PT 704. It includes correlation of pathology with neurological symptoms and diagnostic tests.

PT 704, Neurorehabilitation, 8 Units
This course focuses on developing skills used for differential diagnosis, functional evaluation, treatment theory, and management of neurologically impaired adults. Students examine the neurophysiologic rationale for treatment approaches commonly used in physical therapy for neurologically impaired patients. Emphasis is placed on integration and development of hands-on skills in a laboratory setting. Major areas investigated include spinal cord injury, stroke, traumatic brain injury, Parkinson's disease, polyneuropathies, and common degenerative diseases.

PT 705, Orthopedics I, 6 Units
This course emphasizes the general principles and methodology of rehabilitation of orthopedic patients. Examination of the spine and lower quarter is emphasized. Mobilization, therapeutic exercise programs, and complete evaluation, treatment, and documentation are addressed specifically per diagnosis.

PT 706, Seminar I, 2 Units
(30 contact hours) This course introduces the student to the physical therapy profession. Historical and legal issues, as well as practice settings and health care trends are addressed. Emphasis is placed on professional development and responsibility of the physical therapist as a lifelong learner.

PT 707, Professional Relationships, 2 Units
This course introduces the role of the physical therapist as a professional health educator. Emphasis is on developing interpersonal and communication skills in relation to the interaction between therapist and patient, other health professionals, and within groups.

PT 711, Wellness, 3 Units
This course focuses on the promotion of optimal health, and disease and injury prevention, in the general adult and pediatric populations. It addresses screening techniques and risk assessment, as well as tests and measures related to aerobic capacity, balance, flexibility, strength and endurance, and posture. Findings are applied to exercise prescription.
PT 724, PT Clinical Skills II, 3 Units
(60 contact hours) This is the second in a series of clinical skills courses and discusses the visual and electromagnetic spectrum instrumentation for the treatment of dysfunction. The focus is on physical agents in relation to treatment.

PT 726, PT Clinical Skills III, 1 Unit
This clinical skills laboratory course involves 45 contact hours and introduces students to assistive devices, bed mobility, and transfer training. Students perform measurement, selection, and adaptation of assistive devices, and implement bed mobility and transfer training based on patient diagnosis and need. Emphasis is on patient safety with handling, as well as body mechanics and safety of the therapist. Information is reiterated with laboratory activities, case studies, and a practical and written examination using a problem-solving approach.

PT 742, Prosthetics and Orthotics, 2 Units
(60 contact hours) This course provides foundational knowledge of the types, uses, and fitting of prosthetic and orthotic devices. Rehabilitation intervention is addressed in regard to functional use, measurements, care, adjustments, precautions, and patient education for the appropriate device. Case studies, literature review, lecture, problem-solving models, videos, and laboratory practice are used.

PT 744, Professional Ethics, 2 Units
Students in this course examine the major ethical issues affecting physical therapists and the healthcare profession. It involves an exploration of ethical decision making through examination of moral development, ethical theories and worldviews with specific instruction in ethical problem solving, application of the physical therapy code of ethics, as well as analysis of ethical dilemmas and case studies. Through class and small group discussions the student will examine his/her own moral values, be able to identify ethical problems and dilemmas and effectively evaluate and determine a moral course of action. It will include the ethical obligation for patient and professional advocacy as well as guidelines in spiritual care.

PT 748, Orthopedics II, 6 Units
This course emphasizes the general principles and methodology of rehabilitation of orthopedic patients. Examination of the shoulder, elbow, wrist, hand, and temporomandibular joint is emphasized. Mobilization, therapeutic exercise programs, complete evaluation, disease processes, and documentation are addressed specifically per diagnosis.

PT 750, Comprehensive Exams, 1 Unit
This course gives the student an opportunity to demonstrate their qualifications to enter the clinical section of their physical therapy education.

PT 752, Cardiopulmonary Patient Management, 3 Units
This course presents basic cardiac and pulmonary pathology and theories leading to decision-making skills in cardiopulmonary rehabilitation. Presentation of case studies reinforces management of patients with cardiopulmonary dysfunction. Practical application of theoretical concepts is emphasized.

PT 754, General Medicine, 3 Units
This course gives students experience in the management of general medicine patients with acute, chronic, and terminal diseases. The laboratory portion of the course assists in developing clinical skills and reasoning to determine appropriate and safe therapeutic procedures and protocols for this population.

PT 755, Research Methods in Physical Therapy, 3 Units
This course introduces the student to the concepts of Physical Therapy research. A survey of major research methods is conducted and statistical methods are examined.

PT 760, Pediatrics, 4 Units
This course provides the background knowledge needed to assess functional status, evaluate, and develop appropriate treatment programs for infants and children from premature birth to adolescence. Lab sessions allow for observation and assessment of typical development and the opportunity to experience a variety of intervention strategies.

PT 762, Seminar II, 2 Units
(30 contact hours) The clinical performance instrument is reviewed in this course, and written and oral communication skills specific to the clinic are refined. Expectations of clinical professional behavior are also emphasized. The student presents an in-service on a specific evaluation or treatment approach to be used in the clinic, incorporating lecture and lab into instruction. The student's performance is self assessed, peer assessed, and evaluated by the instructor.

PT 764, Current Concepts in Chronic Pain, 2 Units
In this course students participate in evidence-based discussions incorporating critical appraisal of the evidence, as well as in critical problem solving discussions with case studies. Students also discuss and apply knowledge of abnormal pain mechanisms to common case scenarios incorporating lecture material with current evidence. Further, students evaluate their problem solving strategies through self reflective assignments, peer interaction and evaluation by the course instructor to facilitate self directed learning.

PT 768, Administration, 3 Units
(75 contact hours) This course presents the basic components of administration, financial and staff management, marketing strategies, and public relations for clinical directors and/or owners. Administrative and contractual legal issues and reimbursement mechanisms are explored.
PT 769, Pharmacology, 3 Units
This is an introduction to pharmacology which includes pharmacokinetics and pharmacodynamics. Emphasis is on drugs commonly encountered during rehabilitation. Side effects that alter physical performance and drug effects influenced by exercise are studied.

PT 771, Clinical Experience I, 8 Units
PT 771, PT 773, and PT 775 are three clinical experiences which provide integration of prior didactic work with full-time clinical exposure under the supervision of a licensed physical therapist. Courses may be taken in any order as offered in the curriculum.

PT 773, Clinical Experience II, 8 Units
PT 771, PT 773, and PT 775 are three clinical experiences which provide integration of prior didactic work with full-time clinical exposure under the supervision of a licensed physical therapist. Courses may be taken in any order as offered in the curriculum.

PT 774, Capstone I, 3 Units
In the first of the capstone course series, students choose a clinical question of interest and conduct an extensive literature review.

PT 775, Clinical Experience III, 8 Units
PT 771, PT 773, and PT 775 are three clinical experiences which provide integration of prior didactic work with full-time clinical exposure under the supervision of a licensed physical therapist. Courses may be taken in any order as offered in the curriculum.

PT 776, Capstone II, 3 Units
In this, the second course in the capstone series, research of the clinical question continues through faculty-supervised collection and synthesis of data.

PT 778, Diagnostic Imaging, 3 Units
(45 contact hours) This course familiarizes the Doctor of Physical Therapy student with the indications, instrumentation, and clinical interpretation of orthopedic imaging techniques including plane film X-ray, magnetic resonance, computerized tomography, and radiisotope imaging. Selection protocols for each are discussed to acquaint the student with advantages and disadvantages of each method and what type of information each technique best presents. This course focuses on the clinical interpretation and practical integration of imaging data into rehabilitation treatment regimen design and communication with other medical professionals.

PT 779, Special Topics II, 2 Units
This is the second of two courses that examine specialized topics/techniques of current interest for physical therapists. Material includes men's and women's health, performing artist dysfunction, sport-specific taping and rehabilitation, and on-field support for athletes. Lectures and hands-on lab sessions give students opportunities to evaluate and to develop and administer a plan of care in each of the specialty areas, under faculty supervision.

PT 781, Integrated Clinical Decision-Making, 2 Units
This course allows students to integrate didactic learning with a part-time clinical experience under the supervision and mentorship of a licensed physical therapist.

PT 783, Integrated Community Service, 0 Units
In this course, students integrate didactic and clinical learning with clinical service to the global or local community under the mentorship and supervision of a licensed physical therapist.

PT 785, Advanced Patient Management, 2 Units
This is the last in a series of patient management courses. Within a strong clinical reasoning framework, students evaluate and plan intervention strategies for more complex patient problems, as well as for patient impairments complicated by the involvement of multiple other factors/systems. Students integrate analysis skills, manual skills, motor control and motor learning concepts, therapeutic exercise, physical agents, and patient education into the management of the patient's movement. In addition to refining their existing skills, students are introduced to more advanced examination and intervention techniques. Students also employ clinical reasoning to formulate management plans that require prioritization and collaboration with the patient/client in order to accommodate environmental, financial, cultural, psychosocial, and time-restriction factors typical of current clinical practice. The patient problems encountered and analyzed throughout the course, and the clinical reasoning process applied to all components of these clinical problems, facilitate the development of clinical reasoning and clinical pattern recognition.

PT 790, Physical Diagnosis Screening, 4 Units
This course prepares students to utilize various methods of physical examination to identify which pathologies are and are not amenable to physical therapy intervention. Students gain experience with EKG interpretation, heart and lung sounds, otoscopic and ophthalmic examination, basic hematological and serum chemistry analysis, HEENT exams, peripheral vascular exams, psychological screening, abdominal palpation, and dermatological examination.

PT 794, Fellowship I, 2 Units
This course is an integration of key movement approaches advocated by Shirley Sahrmann PT, Ph.D.; Vladimir Janda, MD, D.Sc.; and Pavel Kolar, PT, Ph.D., focusing on specific movement impairments in the spine and upper and lower quarters, including the interaction between the central nervous system and motor system in the production of movement, stability, and/or controlled mobility. This course also includes instruction in principles of biomechanics, ergonomics, and body proportions and their relationship to movement impairments that limit optimal performance of function.
PT 795, Fellowship II, 3 Units
This course builds on clinical reasoning skills with instruction/problem-solving discussion on intervention strategies for patients with complex rehabilitation issues including chronic pain. Application of the movement approach and strength and conditioning are applied to athletes with focus on running, rotation and overhead sports, contact sports, and performing artists.
Prerequisite: PT 794

PT 796, Fellowship III, 3 Units
This course builds on clinical reasoning skills with instruction/problem-solving discussion on intervention strategies for patients with complex rehabilitation issues, including rotation and overhead sports, contact sports, and performing artists. Application of the movement approach and strength and conditioning are applied to athletes.

PT 797, Fellowship IV, 2 Units
This course builds on clinical reasoning skills with instruction/problem-solving discussion on intervention strategies for patients with complex rehabilitation issues including concussions and vestibular issues.
Prerequisite: PT 796

PT 798, Special Topics I, 2 Units
This is the first of two courses which examine specialized topics/techniques of current interest for physical therapists. This course includes topics of movement science, basic taping techniques for the orthopedic and neurologic populations, ergonomics, wound care and lymphedema management. Lecture and hands-on lab sessions will provide opportunities for the student to evaluate, develop, and administer a plan of care in each of the specialty areas under faculty supervision.

PT 799, Independent Study, 1-6 Units
Students enroll in this course to pursue independent study investigating subjects and interests that lie beyond regular course offerings. The student explores topics in greater depth than in other courses and/or initiates an individual project. Readings are pursued in accordance with a study plan, which is developed in consultation with a sponsoring faculty member and approved by the department chair.

RMS 702, Basic Biostatistics I, 3 Units
This course focuses on introductory and advanced analysis of variance (ANOVA) methods and their relation to rehabilitation and movement science research. Advanced ANOVA methods covered in this course include repeated measure, mixed design, ANCOVA, and MANOVA. Specifically, students learn to implement, analyze, and report ANOVA findings for APA-style journal publications. Use of SPSS is emphasized.

RMS 703, Teaching, Learning, and Assessment Theory and Methods, 3 Units
This course equips future academicians with knowledge and skills in teaching, learning, and assessment, preparing them to fulfill their roles as instructors in a way that promotes high levels of student engagement and growth. Students in this course develop a coherent personal philosophy of teaching and learning, and create a unit of study reflecting that philosophy that includes meaningful assessments of learning.

RMS 704, Research for the Rehabilitation and Movement Scientist, 3 Units
This course introduces the concepts of research in rehabilitation and movement science: research design and statistical methods, critical evaluation of published research relevant to rehabilitation science, scientific writing, and preparation for conducting clinical research.

RMS 705, Instrumentation and Measurement in Rehabilitation and Movement Science, 3 Units
This course covers the basic principles of how to design and utilize assessment measures and instrumentation, and how to scrutinize their psychometric properties. In addition, students gain greater insight regarding how to select the assessments and instrumentation they intend to use in their PhD field of study.

RMS 706, Leadership Theories Applied to Rehabilitation Education and Administration, 3 Units
In this course students explore leadership theories related to organizational leadership and apply them to the context of higher education. In doing so, students discover and define their individual leadership philosophy and competency model.

RMS 707, Ethics in Education and Research, 3 Units
This course provides a foundation for future educators and researchers to promote responsible conduct in education, health care, and research. Students become familiar with current issues and debates in healthcare education and research ethics, and prepare for the kinds of ethical issues and federal requirements they will encounter throughout their careers. The course starts with a review of the history of and debate over ethics and research, focusing on those involved in the healthcare field and analyzing the various ethical dimensions of different types of research and academia in health care, in particular informed consent, risk-benefit assessment, ethical review, and research with special populations. It then offers the opportunity to study, in more detail, subjects such as research with children and animals, ethics review committees, and research integrity.
RMS 708, Literature Appraisal: Systematic Reviews and Meta-analysis, 3 Units
This course helps students develop important skills in engaging with the literature in the field. Students systematically extract the relevant literature in an area of interest, develop protocols, then critically appraise and succinctly summarize the main findings and relate them to the focus of their doctoral study.

RMS 709, Grant and Scientific Writing, 3 Units
Students in this course develop valuable skills in designing research studies for grant applications. The course includes a step-by-step introduction to identifying gaps in research and potential funders in the area of interest, crafting research aims and objectives, developing protocols, and creating collaborative grant proposals worthy of funder consideration.

RMS 710, Intermediate Biostatistics II, 3 Units
This course focuses on introductory and advanced regression methods, the latter of which includes hierarchical regression, mediation, moderation, and logistic regression. Students learn to implement, analyze, and report regression findings for APA-style journal publications. Use of SPSS is emphasized.
Prerequisite: RMS 702

RMS 711, Concentration Independent Inquiry, 3 Units
This independent inquiry course is designed by the PhD student and approved by the instructor. The course covers an area of inquiry—via research, reading, study, or learning activity—that contributes a dimension of knowledge or understanding to the student’s doctoral focus, in addition to that provided in the general program curriculum.

RMS 712, Mixed Methods, 3 Units
This course provides an in-depth study of how to plan, conduct, and analyze studies that use mixed-methods research designs, including correlational, survey, and qualitative methods. Students identify core areas of mixed-methods research in behavioral and applied sciences research and begin building a strong research concept about those areas. This course also emphasizes scale development methods used in behavioral and applied sciences.

RMS 714, Motor Control and Motor Learning, 3 Units
Students in this course explore the science of motor control/motor learning, including the neuromotor processes that underlie normal and abnormal movement. Course material also covers theories of motor learning, mechanisms for acquisition of skill, neuromotor and neuropsychological research, and clinical implications.

RMS 715, Current Concepts in Pain Science, 3 Units
Students in this interactive course learn how to integrate the physiological and biological mechanisms that cause acute and chronic pain, and evaluate the evidence for the various factors—epigenetic, social, psychological, emotional, and environmental—that contribute to normal and abnormal pain. They also learn about the common tools used for measuring pain, as well as intervention techniques. By applying their understanding of pain manifestation, measurement, and intervention, students acquire the skills needed to manage pain effectively.

RMS 716, Biomechanical Assessment of Movement, 3 Units
This course focuses on the theoretical concepts and methodologies related to the study of biomechanics, and helps students develop a theoretical biomechanical research question informed by scientific evidence and knowledge gained throughout the course. Students review traditional and current biomechanical research methods, with a focus on interpretation of previous research and its application to future research questions, and also examine biomechanical demands on tendons, joints, and muscles, as well as whole-body movement patterns. Students participate in hands-on application using biomechanical assessment tools such as 3D motion capture, force-plates, EMG, dynamometers, and clinically relevant biomechanical tests. They also discuss and analyze a variety of available methods for biomechanical analysis, and design appropriate procedures to assess kinematic and kinetic outcomes.
Prerequisite: RMS 705

RMS 717, Frontiers in Rehabilitation and Movement Science, 3 Units
This course explores new frontiers in research, education, and healthcare in the field of rehabilitation and movement science. Topics may include justice, equity, diversity, and inclusion, social determinants of health, health equity, health literacy, movement biomarkers, technology, COVID-19, mental health, and wellness among diverse populations. Active discussion of new research literature and developing trends in additional areas of interest will provide students with an opportunity to improve their research agenda.

RMS 719, Qualifying Examination and Research Prospectus, 1 Unit
In this course, students prepare for and complete a qualifying exam and write a research prospectus for a future study. The qualifying exam is composed of an oral presentation of the written research prospectus and a comprehensive written exam.
Prerequisite: RMS 702, RMS 703, RMS 704, RMS 705, RMS 706, RMS 707, RMS 708, RMS 709, RMS 710, RMS 711, RMS 712, RMS 714, RMS 716, RMS 724

RMS 720, Dissertation I: Introduction and Literature Review, 3 Units
This course, the first in a series addressing the dissertation, supports students’ development of the dissertation proposal, focusing on the preparation and critique of chapter one (the introduction) and chapter two (the literature review).
RMS 721, Dissertation II: Methods and Research Proposal, 3 Units
This course, the second in a series addressing the dissertation, assists students with the continuing development of the first three dissertation chapters and with obtaining Institutional Review Board (IRB) approval, culminating in the proposal defense.
Prerequisite: RMS 720

RMS 722, Dissertation III: Data Collection, Results, and Analysis, 3 Units
This course, the third in a series addressing the dissertation, supports students’ continued writing of the first four chapters of the dissertation, including data collection, data entry, and analysis.
Prerequisite: RMS 720, RMS 721, and successful proposal defense.

RMS 723, Dissertation IV: Discussion and Research Defense, 3 Units
This course, the fourth in a series addressing the dissertation, supports students’ completion of the dissertation process, including discussion of the main findings in comparison to published literature, final conclusions, and preparation for the dissertation defense.
Prerequisite: RMS 720, RMS 721, and RMS 722

RMS 724, Qualitative Analysis, 3 Units
This course focuses on the design and application of qualitative methods and analysis to address research issues in Rehabilitation and Movement Science. Lectures emphasize the knowledge and skills required to apply qualitative analysis to clinical research. Computer applications of statistical software packages for qualitative data analyses are emphasized in an experiential laboratory component.

RMS 749, Dissertation Continuation I, 1 Unit
This course is a self-directed continuation of the student's dissertation work on their methods and research proposal. Course may be repeated until the work is complete.

RMS 750, Dissertation Continuation II, 1 Unit
This course is a self-directed continuation of the student's dissertation work. Course may be repeated until the work is complete.
Prerequisite: RMS 723

RMS 799, Readings in Rehabilitation and Movement Science, 1-3 Units
Students enroll in this course to pursue independent study investigating subjects and interests that lie beyond regular course offerings. The student explores topics in greater depth than in other courses and/or initiates an individual project. Readings are pursued in accordance with a study plan, which is developed in consultation with a sponsoring faculty member and approved by the department chair.

Doctor of Physical Therapy

For more Information: (626) 815-5020

The Doctor of Physical Therapy program (https://www.apu.edu/bas/programs/dpt/) is a 3-year (including summers), entry-level professional program emphasizing the scientific basis of human structure and human movement, the spiritual basis of human worth, and the integration of these foundational elements into a comprehensive, problem-solving, evidence- and consensus-based approach to artful evaluation and skillful treatment.

Mission Statement
The Doctor of Physical Therapy program prepares graduates to practice as competent generalist physical therapists who have a solid foundation for postprofessional specialization. These graduates are guided by Christian principles and ethical values. They are critical thinkers and lifelong learners, supporting the global community and the physical therapy profession by functioning as service-oriented practitioners. They promote excellence in patient care, are guided by a belief in human worth and dignity, and are dedicated to the optimization of human health and function.

Admission
University graduate admission and program-specific requirements must be met before an application is complete (see Admission to the University (p. 1092)). Program-specific application requirements are available online (https://tracking.cirrusinsight.com/74647a2d-e9a2-412f-9b55-9959c7aad4ec/apu-edu-graduateprofessionalcenter-admissions-requirements-program/).

International students should contact Graduate and Professional Admissions (https://www.apu.edu/graduateprofessionalcenter/admissions/) for application procedures.

Admission Requirements
University graduate and program admission requirements must be met before an application is complete (see Graduate Admissions (p. 1113)):

1. The applicant must have an officially posted bachelor’s degree from a regionally accredited college or university by the time he or she matriculates to APU.
2. Prerequisite courses must be similar in value to courses offered by an accredited four-year college or university. Grades of C or better are required. Science courses must have laboratories. No prerequisite work may be taken on a pass/no pass basis. Hybrid online science courses that combine online lectures and in-person labs may be acceptable. Courses can be taken at any regionally accredited college or university. All science prerequisite coursework more than seven years old is not accepted.
3. A cumulative baccalaureate or master’s degree GPA of at least 3.0.
4. A cumulative science GPA of at least 3.0 (a science GPA below 3.0 will not be considered for admission).

Prerequisites
The following prerequisites must be completed by the end of the fall term before entry:
### Code | Title | Units
--- | --- | ---
**BIOLOGY:** Four courses  
- Human Anatomy with lab (required)  
- Human Physiology with lab (required)  
- Cell Biology or General Biology with lab (required)  
- Biology—any additional course (lab not required)

**CHEMISTRY:** One year with lab  
- General Chemistry or Organic Chemistry

**PHYSICS:** One year with lab (must include electro, hydro, and magnetic physics)

**EXERCISE PHYSIOLOGY:** One course

**STATISTICS:** One course

**PSYCHOLOGY:** Two courses  
- General Psychology (required)  
- Any other Psychology course

**HUMANITIES AND ARTS:** Three courses  
- English Composition (required)  
- English Literature  
- History/Political Science/Sociology  
- Music/Art Appreciation  
- Philosophy/Ethics  
- Speech/Communication

**ADDITIONAL COURSES** (recommended but not required):  
- Athletic Training  
- Exercise Science  
- Kinesiology/Biomechanics  
- Nutrition  
- Writing Course

### Other Admission Criteria

- The Department of Physical Therapy participates in the Physical Therapist Centralized Application Service (PTCAS). To apply to the APU DPT program, visit the PTCAS website (https://www.ptcas.org/) and follow all instructions. Early applications are encouraged. Final deadline is October 1.
- The DPT program reviews applications on a rolling basis, and acceptances are processed year-round. To ensure consideration for the January start date, completed applications should be submitted early in the admissions cycle.
- International students have a different application procedure; to learn more, visit the International Admissions (https://www.apu.edu/international/enrollment/apply/) site.
- Submit to PTCAS all supporting documents, including:
  - Official transcripts from all institutions leading to and awarding the applicant's baccalaureate degree and all postbaccalaureate study. Mail transcripts to APU's Graduate and Professional Center only if admitted into the program. (To be considered official, a transcript must be sent directly from the Office of the Registrar of the school attended to the Graduate and Professional Center: Admissions at Azusa Pacific University. Students' sealed copies will not be considered official.)
  - Three recommendation forms from persons well-suited to evaluate qualifications for graduate study and/or physical therapy: one must be from a registered/licensed physical therapist, and two from faculty members familiar with academic work in areas closely related to the proposed field of study or responsible persons well-informed about relevant work completed by the student.
  - 100 hours of clinical experience in a physical therapy setting.
  - GRE taken within the last five years; submit self-reported GRE scores with PTCAS application and follow up with official scores. Use APU Institution Code 4596 and Department Code 0619.
  - Essay

Students admitted into the DPT program will be required to provide a $1,200 nonrefundable enrollment deposit to reserve a seat. Deposit is due within 10 days of receipt of the acceptance letter. This will be applied to the first term’s tuition fee.

**If applicable, any additional materials should be submitted to:**

Student Services Center: Admissions  
Azusa Pacific University
In addition to meeting the admission requirements, those students whose first language is not English must meet the required English proficiency standard as demonstrated by passing the following minimum international iBT (internet-based TOEFL) scores:

### Course Requirements

Graduation requirements include maintaining a minimum 3.0 program and cumulative grade-point average (GPA). The calculation is based upon courses taken in fall, spring, and summer semesters. See Grading (p. 1238) and Academic Probation and Dismissal (p. 1230) in the Academic Policies and Procedures (p. 1226) section of this catalog.

Program Learning Outcomes

Students who successfully complete this program shall be able to:
1. Deliver physical therapy as competent generalists in a variety of community settings to patients of diverse age, gender and cultural backgrounds.
2. Pursue lifelong learning through professional growth and specialization.
3. Incorporate knowledge of the Christian worldview into their understanding of current ethical, legal, and social issues in professional physical therapy practice.
4. Analyze research to solve clinical questions, encourage critical thinking, and promote evidence-based practice.
5. Provide for the medical and spiritual needs of the community as service-oriented practitioners who value human worth and seek to advance total patient care and the optimization of health and function.

PhD in Rehabilitation and Movement Science

Mission Statement

The Doctor of Philosophy (PhD) in Rehabilitation and Movement Science (https://www.apu.edu/bas/programs/phd-rehabilitation-movement-science/) program at Azusa Pacific University prepares graduates to practice as academic faculty and clinical researchers in the fields of rehabilitation and movement science. These graduates are guided by Christian principles and ethical values, and are critical thinkers and lifelong learners, supporting the global community and the rehabilitation and movement science profession as service-oriented practitioners. They promote excellence in patient care, are guided by a belief in human worth and dignity, and are dedicated to the optimization of human health and function.

Total Units  61  

1  For students who have successfully completed RMS 711, RMS 719, RMS 720, RMS 721, RMS 722, and RMS 723, courses RMS 749 and RMS 750 will be available for enrollment each semester.

2  If students do not successfully complete their research proposal at the end of RMS 721 Dissertation II, they must register for RMS 749 Dissertation Continuation I for 1 unit every term until it is successfully completed.

3  After enrolling in RMS 722 Dissertation III for one semester, and RMS 723 Dissertation IV for one semester, students must enroll in RMS 750 Dissertation Continuation II for 1 unit each semester from the time their research proposal is accepted until their dissertation is approved for ProQuest submission.

Suggested Plan of Study

The following is a suggested sequence of study for students who are interested in part-time study in the rehabilitation and movement science program. This sequence is a suggestion only and can be modified based on student need and course offerings.

**Admission**

University graduate admission and program-specific requirements must be met before an application is complete (see Admission to the University (p. 1092)). Program-specific application requirements are available online (https://tracking.cirrusinsight.com/74647a2d-e9a2-412f-9b55-9959c7aac4ec/apu-edu-graduateprofessionalcenter-admissions-requirements-program/).

International students should contact Graduate and Professional Admissions (https://www.apu.edu/graduateprofessionalcenter/admissions/) for application procedures.

**Program Learning Outcomes**

**Program Learning Outcomes**

Students who successfully complete this program shall be able to:
1. Critically evaluate and synthesize literature in rehabilitation and movement science.
2. Disseminate and effectively communicate research findings through conferences, peer-reviewed journals and/or other appropriate recognized professional reports including oral presentations, research proposals, grant writing, dissertation, and publication.
3. Design and implement ethical research which is innovative, methodologically sound, and contributes to the body of knowledge and/or service delivery in their individual discipline.
4. Provide servant leadership which is effective, innovative and collaborative in education, research, service delivery, and/or policy development in their individual fields.
5. Critically examine and apply theories and principles of effective pedagogy to deliver and assess student learning in their discipline.
6. Apply principles of the Christian worldview to the science of education and research in their individual discipline.
Department of Psychology

The Department of Psychology (https://www.apu.edu/bas/psychology/) at Azusa Pacific University assists students in developing the skills necessary for the observation, understanding, and analysis of human behavior. In their study of psychology, students are trained to employ systematic methods of inquiry to explain normal and abnormal behavior, examining a number of factors including neural, cognitive, developmental, cultural, interpersonal, and individual differences. Students also engage in the development of their strengths and skills in personal, intellectual, and spiritual areas.

Each faculty member is a committed Christian with an interest in the individual student. As a department, the faculty are committed to preparing students for a wide range of postbaccalaureate work in psychology or related disciplines, and helping students reflect upon the relationship of psychology to the Christian faith. Programs and activities associated with psychology are planned by the faculty, the Psychology Club, and the Psi Chi honor society to create a spirit of community. These activities include graduate school forums in which students interact with Christian psychology professionals, as well as informal gatherings where psychology majors receive information to help them successfully navigate their program requirements, meet other students, and understand career opportunities.

The design of the undergraduate curriculum reflects the extensive breadth of psychology and provides internship experience in applied field or research settings. There are two undergraduate degrees offered: the Bachelor of Arts (BA) (p. 570) and the Bachelor of Science (BS) in Psychology (p. 575). While the degrees overlap in their core courses, the focuses in terms of elective courses are different—the BA program focuses on the applied areas of understanding the human condition, and the BS program focuses on the scientific methods used to study behavior, emphasizing research skills.

The department also offers undergraduates a psychology minor (p. 580) and an alcohol and drug counseling minor (p. 578).

At the graduate and professional level, the department comprises an energetic community of scholars equipping students to understand the field of psychology through academically rigorous coursework, hands-on laboratory research, internships with community agencies, and individual research projects. The department offers a Master of Science in Research Psychology and Data Analysis (p. 585), a Master of Science in Child Life (p. 582) (including an Advanced Standing (p. 583) option), a Master of Science in Counseling Psychology with Specialization in Children and Adolescents (p. 584), a Play Therapy Certificate (p. 578), a bachelor’s completion program in psychology (p. 573) for transfer students who have at least 30 units of college credit, and professional minors in psychology (p. 581) and alcohol and drug counseling. (p. 579)

Mission Statement

The Department of Psychology at APU is a community of Christian scholars who, with their diverse backgrounds and expertise in understanding human behavior in society, are committed to enhancing the development of our students through intellectual challenge, experiential learning, personal growth, and spiritual discovery so that each student develops his or her potential and is prepared for where God is leading them to serve.

Career Opportunities

Study in psychology provides a foundational background for a broad variety of careers in which the understanding of human behavior and social processes is useful. Graduates with a bachelor’s degree in psychology have a foundational background for entry-level jobs in mental health or community service agencies, business, and human resources. For advanced positions requiring testing, counseling, or consulting, a master’s degree is generally the minimum requirement, while psychologists with doctoral degrees qualify for more advanced counseling, research, and teaching positions. Psychology majors with advanced degrees may pursue careers in developmental, family, health, educational, sports, industrial/organizational, ministry, and experimental psychology, as well as neuropsychology. They may also pursue licensure as clinical, counseling, or school psychologists, or marriage and family therapists. Other areas in which students seek careers include social work, marketing, law, physical therapy, and medicine. In a recent alumni survey, 85% completed postgraduate study, with two-thirds of those in a discipline-related position, and half of the alumni surveyed achieved national licensure or certification in the field. All students planning to major in psychology are urged to make an appointment at the department office (Wynn 109 (https://www.apu.edu/map/114695/)) and to continue visiting the department for help with progressing in the major and beyond.

Programs

Majors

- Psychology (BA) (p. 570)
- Psychology (BS) (p. 575)

Minors

- Alcohol and Drug Counseling (p. 578)
- Psychology (p. 580)
Professional Programs

• Psychology, BA (Bachelor’s Completion) (p. 573)
• Psychology Minor (p. 581)
• Alcohol and Drug Counseling Minor (p. 579)

Master’s

• Master of Science in Research Psychology and Data Analysis (p. 585)
• Master of Science in Child Life (p. 582)
  • Advanced Standing Master of Science in Child Life (p. 583)
• Master of Science in Counseling Psychology with Specialization in Children and Adolescents (p. 584)

Certificate

• Play Therapy (p. 578)

Courses

PCLS 501, Advanced Child Development, 3 Units
This course is an in-depth examination of physical, cognitive, emotional, moral, and social development from infancy through adolescence. Content includes developmental theory and practice of early childhood education, as well as assessment of child development and impairments in developmental functioning.

PCLS 502, Applied Child Development and Medical Terminology, 3 Units
This course reviews psychosocial and clinical aspects of disease and injury for the hospitalized and medically fragile child. Course content includes medical terminology, charting, complementary medicine, and physiological, cognitive, social, and emotional impacts of disease and injury on the patient and family.

PCLS 511, Family Systems Theory and Applications, 3 Units
This course explores family systems and therapeutic models with a focus on family psychology. Emphasis is on family-centered care and the effects that terminal illnesses have on the family system. Course content covers parenting medically fragile children, parenting and family relationships with a seriously ill or terminal parent, diversity issues and children with special needs, therapeutic models in family psychology, and integration of Christian faith and theology with family psychology.

PCLS 512, Theories and Practices of Grief and Loss, 3 Units
Students in this course develop understanding of the family-centered care model and explore therapeutic interventions and techniques aimed at benefitting patients and families affected by death and serious illness. Course content focuses on death, grief, and bereavement and their effects on the family system. Each student learns hands-on interventions to guide patients and families through death, grief, loss, and healing.

PCLS 512L, From Grief to Healing: Strategies and Application Lab, 1 Unit
In this lab course, students apply understanding of grief theories and explore practical therapeutic interventions and approaches aimed at benefitting children and families affected by death or serious illness. Focus is on historical and current views on death, grief, bereavement, and the effects on family system. Each student learns hands-on interventions to guide children and families from grief to healing process.

Prerequisite: PCLS 521;
Corequisite: PCLS 512

PCLS 520, Infants and Toddlers: Development and Interventions, 3 Units
This course offers an in-depth exploration of the growth and development of infants and toddlers. Content includes developmental theories and developmentally appropriate interventions, as well as assessment of development and impairments in developmental functioning.

PCLS 521, Introduction to Child Life, 3 Units
This course gives students a broad understanding of the field of child life, including the history and trends of the child life profession, as required by the Association of Child Life Professionals (ACLP). Course content includes: 1) scope of practice in child life, 2) child life documents, 3) impact of Illness/injury and health care on patients and families, 4) family-centered care, 5) therapeutic play, and 6) preparation. Additional topics include, but are not limited to, the history of child life, clinical assessment, child life theoretical foundations, development and hospital stressors, and introduction to exceptional and medically challenged children.

PCLS 522, Therapeutic Interventions and Play-Based Techniques, 3 Units
This course is designed for students to develop an understanding of the history and theories of play and play-based therapies. Students gain knowledge of therapeutic play techniques, and explore research and theories on the importance of psychosocial preparation for medical procedures. Post- and preprocedural coping techniques and therapeutic interventions are taught as well. Students create hands-on interventions to prepare patients of all developmental levels for a variety of procedures.
PCLS 523, Coping Strategies for Children Experiencing Stress and Trauma, 3 Units
This course is designed for students to explore the best evidence-based practices in play therapy, with an emphasis on psychosocial and therapeutic interventions for children with special needs (cognitive intellectual and/or pervasive developmental disabilities). This course focuses on the effects of traumatic situations have on the patient/client and their family. Students explore a variety of play therapy techniques and therapeutic interventions to help patients and families work through trauma and PTSD.

PCLS 524, Adolescent Development and Interventions, 3 Units
This course is an in-depth examination of the physical, cognitive, emotional, moral, and social development of adolescents. Content includes developmental theory and interventions, as well as assessment of development and impairments in developmental functioning.

PCLS 525, Assessment, Preparation, and Documentation, 3 Units
This course reviews historical and current perspectives on techniques and outcomes of preparing children for healthcare encounters and life-changing events. The emphasis is on students developing proficiency in setting goals during child life assessments to plan developmentally appropriate preparation interventions and gain competencies with documentation. This course also addresses coping strategies for pain management. Achievement of course objectives is addressed through experiential learning, lectures, readings, discussion, and reflection.

PCLS 527, Supporting Children with Special Needs in the Healthcare System, 3 Units
In this course, students explore a variety of developmental conditions and diagnoses, including physical, intellectual, and learning disabilities, psychiatric diagnoses, and behavioral conditions. Child life services with intensive care and rehabilitation populations are a particular focus, alongside supporting the educational needs of hospitalized children. Students become familiar with adaptive technologies, tools, toys, and equipment designed for children with special needs, as well as with legal rights, protections, and accommodations for individuals with disabilities, and gain insight into adapting child life services to the needs of unique populations.

PCLS 531, Ethics, Diversity and Professional Issues, 3 Units
This course covers legal, ethical, moral, cultural, religious, and gender issues within a family-centered context. Theories and concepts of culture and cultural diversity are explored. This course also examines issues related to parenting medically fragile children, including legal and ethical considerations. An integration of faith is implemented in the course in regards to professional ethics and multicultural competence.

PCLS 532, Child Life Administration and Leadership, 3 Units
Students gain understanding of child life program development and acquire the leadership skills to manage a child life program. Course content includes outreach and technology in the field of child life; child life administration, supervision, and mentoring; group facilitation skills; leadership skills; and program evaluation.

PCLS 541, Pre Practicum in Child Life, 3 Units
This course is designed to further develop the therapeutic tools of students prior to child life practicum placement. Students focus on developing proficiency in the core goals during crisis assessment and interventions, gain competencies in therapeutic dynamics, gain competencies in communication and listening to be applied when working with a diverse population of patients, families, and members of the multidisciplinary team. Additionally, students are encouraged to begin developing a theoretical and conceptual understanding of working with hospitalized and medically fragile children. Students are also encouraged to address issues regarding the integration of their faith with the practice of child life. These goals are addressed through experiential learning, lecture, readings, discussion, and reflection.

PCLS 542, Practicum in Child Life, 3 Units
This field experience course is taught by a certified child life specialist and is designed and evaluated according to the specific clinical and academic standards set forth by the Association of Child Life Professionals (ACLP). According to the ACLP, “The Child Life Practicum is designed as an introductory experience for individuals interested in pursuing a career in child life. Through experiential learning and observation of Certified Child Life Specialists, child life practicum students begin to increase their knowledge of basic child life skills related to play, developmental assessment, and integration of child life theory into interventions with infants, children, youth and families.” All students are required to participate in weekly mentor meetings with the instructor throughout the semester.

PCLS 543, Internship in Child Life, 6 Units
This course and its clinical experiences are facilitated by a certified child life specialist and are designed and evaluated according to the specific clinical and academic standards set forth by the Association of Child Life Professionals (ACLP). According to the ACLP, “The Certified Child Life Specialist (CCLS) credential is the exclusive certification issued by the Association of Child Life Professionals. The CCLS credentialing program is a rigorous, examination-based professional certification credential to increase the proficiency of child life professionals by identifying a body of knowledge; establishing a level of comprehension and performance necessary for certification; and increasing the value of practitioners to their employers.” All students are required to participate in mentor/supervision meetings with the instructor throughout the semester. This course is a blend of didactic and experiential learning, combining coursework and required internship hours to integrate theory and application of child life principles and practices.

**Prerequisite:** Only for those students with a clinical child life internship.
PCLS 545, Internship in Child Life II, 1 Unit
This course and clinical experiences are facilitated by a certified child life specialist and are designed and evaluated according to the specific clinical and academic standards set forth by the Association of Child Life Professionals (ACLP). According to the ACLP, "The Certified Child Life Specialist (CCLS) credential is the exclusive certification issued by the Association of Child Life Professionals. The CCLS credentialing program is a rigorous, examination-based professional certification credential to increase the proficiency of child life professionals by identifying a body of knowledge; establishing a level of comprehension and performance necessary for certification; and increasing the value of practitioners to their employers." All students are required to participate in biweekly mentor meetings with the instructor throughout the semester.
Prerequisite: By permission only and for non-matriculating graduate students of APU's MS Child Life program.

PCLS 551, Research Methods and Statistical Analysis, 3 Units
This course surveys the major social science research methods, preparing students to read, understand, and evaluate psychological research. This course will provide students with the basic knowledge and experience of developing research proposals. Students will also learn to understand survey methods, data collection, and research analysis. This course is designed for students to identify his or her thesis topic and/or project and prepare students for PCLS 552.

PCLS 552, Thesis/Project Seminar, 3 Units
This master's thesis seminar is intended to provide students with a theoretical and methodological foundation necessary for completing their MS thesis/project in Child Life Science within the Psychology Department. The main objective of this seminar course is to help students develop and implement the theoretical foundation and methodological procedures needed to complete a MS graduate thesis or clinical project. CR/NC grading.

PCLS 599, Readings in Child Life Psychology, 1-3 Units
Students may enroll in an independent study for unit credit to investigate subjects and interests that lie beyond regular course offerings, explore topics in greater depth, and/or initiate individual projects. Such requests must be developed in consultation with a sponsoring faculty member and be approved by the graduate program chair and dean. Unit credit varies depending on the scope of the study plan.

PSYC 110, General Psychology, 3 Units
Students in this general survey course explore the field of psychology, including human development, social psychology, learning, perception, cognition, motivation, personality, psychological testing, and nervous system functioning. Meets the General Education Requirement: Social Science.

PSYC 110H, General Psychology - Honors, 3 Units
This general survey course explores the field of psychology. It includes human development, social psychology, learning, perception, cognition, motivation, personality, psychological testing, and nervous system functioning. Meets the General Education Requirement: Social Science.
Prerequisite: To enroll in the course, must be a student admitted to the Honors Program and be considered a member in "active" status.

PSYC 250, Data Analysis in Psychology, 3 Units
This course introduces students to statistical analyses that are common in psychological research. Students learn to identify the appropriate analysis, how to run the statistical analysis in SPSS, and how to interpret SPSS output. Students are also introduced to writing results in American Psychological Association (APA) style.
Prerequisite: MATH 130

PSYC 280, Introduction to Certified Alcohol Drug Counselor Credentialing, 3 Units
Students in this course examine the effects of alcoholism and drug dependency, specifically as they relate to cultural/lifestyle considerations, human behavior, and family dynamics. Course material also considers the substance use system of care, including its programs, policies, and procedures for the treatment and recovery of individuals suffering from substance use disorders. This is the first course in a series designed to meet the educational requirements for California Consortium of Addiction Programs and Professionals (CCAPP) credentialing.

PSYC 290, Human Growth and Development, 3 Units
This study of human development across the life span emphasizes a multidisciplinary perspective, including such areas as psychology, sociology, processes as social interaction, and the tools for applying developmental psychology to life situations. Meets the General Education Requirement: Social Science.

PSYC 290H, Human Growth and Development - Honors, 3 Units
This study of human development across the life span emphasizes a multidisciplinary perspective, including such areas as psychology, sociology, processes as social interaction, and the tools for applying developmental psychology to life situations. Meets the General Education Requirement: Social Science.
Prerequisite: To enroll in the course, must be a student admitted to the Honors Program and be considered a member in "active" status.

PSYC 292, Introduction to Brain and Behavior, 3 Units
This course covers the foundation for the physiological basis of human behavior. Topics include the structure and function of different brain regions, how neurons communicate, sensory and motor function, and complex brain functions such as speech and cognition. This course also serves as an introduction to the neurobiology of various psychological and neurological diseases.
PSYC 299, Applied Statistics, 3 Units
This is an elementary course in basic statistical concepts. Students are introduced to the understanding and use of necessary computational procedures to attain basic skills in the following: frequency distributions, graphs, central tendency, variability, normal curve, probabilities, correlation, hypothesis testing, and chi square. Understanding and use of the above statistics are stressed over mathematical development. Students enrolled in this course may be required to share information regarding their personal life, family, or relationships.
Prerequisite: MATH 110 or equivalent

PSYC 301, Global-Local Cultural Psychology Integration I, 1 Unit
This course prepares students for their semester of study away, introducing them to the cultural, multicultural, social, and ecosystemic contexts of the local study-away culture, including the history, major cultural values, and cultural, sociopolitical, and interpersonal dynamics that inform and situate their study away. Students develop an understanding of the cultural bases for psychological processes of individuals they are likely to engage with during their time abroad, and also develop awareness, self-knowledge, and self-assessment of their skills for engaging in intercultural and multicultural contexts. Students are prepared to advance their cultural self-knowledge and knowledge of diverse others in the formation of cultural competence.
Prerequisite: Enrollment in the South Africa Semester and a psychology major

PSYC 302, Global-Local Cultural Psychology Integration II, 2 Units
This course facilitates student re-entry from a semester abroad. Students critically analyze their international study experience, synthesizing their gained awareness, knowledge of self and other, and skills in engaging with diverse others during their semester abroad. This course facilitates students translating their advanced knowledge and skills from the cross-cultural context into knowledge and skills that are effective for use in navigating their domestic multicultural context, facilitating their identity formation into ethical and responsible local citizens and emerging professionals.
Prerequisite: Students will have returned from study abroad South Africa the previous semester and are psychology majors

PSYC 305, Educational Psychology, 3 Units
Educational psychology is a broad field of study focusing on the various factors that influence learning and human knowledge. This course provides an overview of the principles and theories used throughout other psychological fields, but in the context of educational psychology. Specifically, this course covers development, culture, motivation, learning, cognition, and learner differences.

PSYC 320, Social Psychology, 3 Units
How are individuals' thoughts, feelings, and behaviors influenced by other people? In this course, students become careful observers of social influences on human behavior by learning the theories and methods employed by social psychologists, in order to apply these perspectives in everyday social interactions.

PSYC 330, Sports Psychology, 3 Units
Sports psychology is a survey course that explores the role of psychology as it is related to the enhancement of athletic performance. Students will spend time on areas related to sports and physical activity such as motivation, self-confidence, goal setting, burnout, anxiety, healthy attitudes toward sports participation, and other sports-related activity. Emphasis is on critically reviewing sports psychology literature and research in an attempt to separate effective and ineffective psychology-related approaches to sport activity.

PSYC 340, History of Psychology, 3 Units
The historical growth of psychological science is surveyed here. This course focuses on major theorists and their ideas in relation to the historical context as well as current psychological issues.

PSYC 345, Psychology of Child and Adolescent Development, 3 Units
This course is an advanced examination of emotional, cognitive, physical, and social development from infancy through adolescence. The process of human development as a complex interaction of biological and sociocultural factors is reviewed. Contemporary research topics focusing on genetics, fertility, attachment, communication, and cognitive and moral aspects of development are examined. Meets the General Education Requirement: Social Science.

PSYC 355, Psychology of Adult Development, 3 Units
This course is an advanced examination of the emotional, cognitive, physical, and social development of individuals from young adulthood through the end of life. The process of adult development as an interplay of biological, psychological, cognitive, and psychosocial aspects is examined. Emphasis is on normal patterns in personal and emotional development in adulthood, as well as on contemporary research in areas of health, gender, marriage and relationships, family and parenting, ethnic/ecological systems, work, ethics, and morality.

PSYC 360, Abnormal Psychology, 3 Units
The major focus of this course is mental illness and abnormal behavior, in light of modern theory and knowledge. Current trends and modern methods of diagnosis, understanding, treatment, and prevention are discussed.

PSYC 362, Research Methods in Psychology, 3 Units
Students engage in a comprehensive overview of quantitative and qualitative research methods used in psychological research, and gain an understanding of the ethical considerations and other challenges involved in good research design. Students also complete a research project and learn to write utilizing the style adopted by the American Psychological Association.
Prerequisite: PSYC 250 and WRIT 260
PSYC 370, Industrial/Organizational Psychology, 3 Units
Students survey basic behavioral science research and thinking as they contribute to industrial and organizational psychology, including worker attitudes and theories of motivation, organizational structure and communication, theories of leadership and decision making, conflict resolution, and methods of personnel selection and appraisal.

PSYC 375, Psychology of Conflict Management and Mediation, 3 Units
Students in this course develop a psychological understanding of the dynamics of human conflict, the differences between constructive and destructive conflict, and the different ways in which conflict can be managed, resolved, and transformed. Students also learn basic skills in the management and resolution of conflict.

PSYC 380, Psychology of Personality, 3 Units
Students in this course become familiar with the various basic elements of personality and their integration, exploring concepts regarding the basic components of personality and the processes that undergird an individual's growth and behavior. Course material also covers current and traditional theories of personality.

PSYC 380H, Psychology of Personality - Honors, 3 Units
This course acquaints students with the various basic elements of personality and their integration. Students explore concepts regarding the basic components of personality and the processes that undergird an individual's growth and behavior. The course also reviews current and traditional theories of personality.
Prerequisite: PSYC 110 and PSYC 290 or SOCW 310 + SOCW 311. Must also be a student admitted to the Honors College and be considered a member in "active" status.

PSYC 383, Psychology of Suicide, 3 Units
This course gives students an overview of suicidal behavior, including terminology, statistics, theories, and interventions, that addresses this sensitive topic from a biopsychosocial-spiritual perspective. Students also have opportunities to learn fundamental skills in suicide assessment, safety planning, and interventions to reduce suicide.

PSYC 385, Health Psychology, 3 Units
This is a survey course exploring the role of psychology as it relates to human physiology and the health field. Topics include basic neurology, stress management, nutrition, addictive substances, immunological disorders, and other relevant psychophysiological areas.

PSYC 386, Community Psychology, 3 Units
This course introduces students to the field of community psychology, which is concerned with the scientific study of social structures and their influence on individuals, groups, and organizations. The main focus is on the development and application of community-based psychological theory and research toward understanding, designing, implementing, and evaluating social change and empowerment. The roles of research and social action at multiple levels of analysis to facilitate social change are examined.

PSYC 390, Cognition, 3 Units
This course offers an overview of cognitive psychology. Students discuss theories and research concerning sensation, perception, memory, and other higher-order mental processes including imagery, language, creativity, concept formation, and decision-making.

PSYC 400, Multicultural Psychology, 3 Units
This course introduces students to cultural and multicultural psychology sub disciplines in psychology. Students develop knowledge of the history, major tenets, theories, research findings and behavioral practices in multicultural psychology. Students also gain understanding of the cultural bases for psychological processes. Students develop awareness, knowledge and skills for engaging in intercultural and multicultural contexts. Students are also asked to advance their cultural self-knowledge as well as knowledge of diverse others in order to develop multicultural competence in working with individuals from diverse backgrounds. Meets the General Education Requirement: Intercultural Competence.

PSYC 400H, Cultural Psychology- Honors, 3 Units
This course presents major psychological theories and practices from a multicultural perspective, emphasizing shared components across cultures. A historical overview of different minority groups in the United States and how these people groups have adjusted and adapted to new cultures is presented. Students explore major psychological theories and practices from a multicultural perspective, with an emphasis on the cultural sources of diversity in thinking, emotion, motivation, self, development, and psychopathology. This course is designed to help individuals begin to understand the need for issues of being culturally competent in working with individuals from diverse backgrounds. Meets the General Education Requirement: Intercultural Competence.
Prerequisite: PSYC 110. Must be an Honors Program student or non-honors student with a GPA > 3.4

PSYC 405, Psychology of Learning, 3 Units
This course examines several major theories and research in the psychology of learning, as well as how learning theories have developed historically and how learning principles apply to psychological problems.

PSYC 410, Psychology of Exceptional Children, 3 Units
Students in this course examine and analyze the problems faced by the exceptional child. Course material covers physical and emotional adjustment, speech and language disorders, and other physical and mental disorders.
PSYC 415, Group Process, 3 Units
Students in this course survey the basic behavioral science research and thinking as applied to human interaction in groups. This includes such topics as group formation, phases, structure, types and uses of groups, group communication, group conflict resolution, and methods of group leadership. Course includes the observation and evaluation of group interaction.

PSYC 420, Political Psychology, 3 Units
This course addresses political phenomena from a psychological perspective, and students are encouraged to develop civic knowledge, apply psychological theory within political contexts, and identify determinants of political behavior. Course content includes political attitudes and identity, leadership and group influence, voting behavior, nationalism, social movements, terrorism, and international conflict/resolution. Meets the General Education Requirement: Civic Knowledge and Engagement.

PSYC 430, Intervention Strategies with Children, 3 Units
This course introduces a broad range of assessment and intervention strategies designed to meet the developmental, psychomotor, language, behavioral, and education needs of children. Issues of normative and non-normative child and family functioning in child assessment and intervention planning are considered. Observational techniques, standardized tests, informal assessment measures, developmental assessments, and alternatives to current testing practices are discussed and reviewed from the viewpoints of the multiple disciplines impacting child assessment and intervention. The broad range of modalities utilized in intervention with children is given strong emphasis, with observation and student practice required at an intervention site.

PSYC 432, Psychosocial Interventions in Pediatric Health Care, 3 Units
This is a core course in the child life specialist curriculum, covering a wide range of recreational and psychosocial interventions for children who are hospitalized, chronically ill, or have disabilities. Students learn various intervention techniques using developmental play, music, art, dance, and other forms of recreation, and gain understanding of the role of the child life specialist as a member of an interdisciplinary medical team.

PSYC 440, Psychology of Religion, 3 Units
This course investigates the common ground between psychology and religion. Values, mature religion, the nature of humanity, and religious experience are all areas of study for this purpose.

PSYC 445, Psychology of the Family, 3 Units
This course provides an overview of the field of family psychology. The three primary areas of study are: family systems theory, the family lifecycle, and several theoretical frameworks for the study of families. Students are given the opportunity to apply these concepts to their own family of origin.

PSYC 450, Counseling Theory, 3 Units
This course is an introduction to counseling and psychotherapy, with students exploring the underlying assumptions and practices of traditional and contemporary counseling theories. Students also explore common ethical concerns that emerge in counseling relationships.

PSYC 451, Interventions in Counseling, 3 Units
This course introduces counseling methods and practices; legal and ethical codes of conduct for counseling professionals; community prevention, education, and early intervention methods; interviewing; screening; and interventions in counseling. Students practice basic counseling assessment and intervention methods, including crisis management and safety practices. This course meets criteria for Domain IV of the CCAPP certification requirements.

PSYC 453, Bilingualism, Biculturalism, and Cognition, 3 Units
This course provides students with an overview of issues in bilingualism and biculturalism from a cognitive perspective. Theories and research concerning knowledge representation, bilingual cognition (language acquisition, production, comprehension, and variations in executive functions), and bicultural cognition (cognitive consequences of culture-specific knowledge) are discussed. Students enrolled in this course may be required to share information regarding their personal life, family, or relationships.

PSYC 454, Counseling in the Christian Community, 3 Units
Students in this course explore the practice of counseling in Christian and ministry settings, engaging in an interdisciplinary examination of the psychological, cultural, theological, and biblical understandings of mental health care and counseling. Course material also incorporates a survey of counseling theory and practices from an integrative perspective, with attention given to ministry and Christian culture and tradition-based issues.

PSYC 455, Field Experience, 3 Units
This course is for students who have completed most of the psychology or sociology major requirements. Each student participates in one or more endeavors that offer an opportunity to apply former training in a professional setting while acquiring new knowledge, and students may be required to share information regarding their personal life, family, or relationships. This course can be repeated to a total of 6 units counted toward the major, 9 units toward the degree. Meets the General Education Requirement: Integrative and Applied Learning.

PSYC 462, Research Methods II, 3 Units
The course is designed to further develop students’ understanding of research design and the research process in the behavioral sciences. Students investigate at an advanced level the validity threats inherent in the research process and explore a variety of advanced research designs. Students have the opportunity to utilize various designs in their own research endeavors and learn to use SPSS for the analysis of their own research endeavors and data.
PSYC 463, Drugs, Behavior, and Society, 3 Units
This course provides an overview of drug use historically and in contemporary society from community and biopsychosocial perspectives. Students engage in an in-depth study of various psychoactive drugs of abuse, considering the physiological, psychosocial, health, legal, and political aspects of drugs. Course material covers drug-taking risk behaviors and issues related to dependence among high-risk populations. Strategies for drug abuse prevention/education and intervention approaches are also examined.

PSYC 464, Substance Use Assessment and Interventions, 3 Units
Students in this course gain an in-depth understanding of empirically driven and theoretically grounded assessments and interventions for substance use issues, focusing on how to engage in effective screening and assessment protocols for substance use problem identification and service planning. Students participate in practical application of evidence-based interventions, including the use of case studies and a variety of practice exercises. Course material integrates foundational assessment and intervention models for addressing co-occurring mental health needs, family system issues, and patient-centeredness, including spirituality.

PSYC 466, Case Management in Mental Health and Substance Use Disorders, 3 Units
This course offers an overview of the theory, structure, and practice of case management. Students gain an understanding of the professional practice of case management, including scope and responsibilities, multidisciplinary and ecological systems engagement, cultural and diversity factors, and ethical and legal issues. Students develop skills in effective communication, clinical documentation, case management facilitation, managing interpersonal and individual dynamics, case management interviewing, intervention planning, and implementation of services.

PSYC 470, Cognitive Neuroscience, 3 Units
Cognitive neuroscience is the study of the relationship between cognitive processes and the brain. Students first learn about the major research methods in this field, such as lesion studies, brain imaging, and animal models, then learn how these methods have been used to inform our understanding of the neural correlates of memory, decision making, perception, and social cognition.

PSYC 472, Neurological and Behavioral Disorders, 3 Units
This course examines the neurobiology of various psychological and neurological diseases. Neurological disorders covered include developmental, tumors, seizures, strokes, traumatic brain injury, neurodegenerative, and infectious disease. Behavioral disorders include schizophrenia, major affective disorders, anxiety disorders, autism, attention-deficit hyperactivity disorder, stress disorders, sleeping and eating disorders. The neurobiology of drug abuse will be analyzed based on common features of addiction, pathways affected by commonly abused drugs and heredity factors.

PSYC 475, Research Experience, 3 Units
This course helps students improve their research skills by providing an opportunity to integrate knowledge, skills, and interests while conducting a comprehensive research project. Successful completion of the course results in an APA-style paper or submission of a paper or poster presentation to a professional organization or in a professional setting. Concurrent enrollment in another research practicum course is permitted. Twelve (12) units of research experience (PSYC 475) can be counted toward the bachelor's degree requirements. Meets the General Education Requirement: Integrative and Applied Learning.

PSYC 480, Psychological Testing and Measurement, 3 Units
Students gain a thorough background in objective tests and measurements. A brief survey is offered in intelligence, personality, organization, and industrial psychological measures. Terminology is developed, dangers and advantages of psychological instruments are discussed, and each student is required to administer and interpret a number of instruments. Special materials fee applies. Course is offered to juniors, seniors, and graduate students only.

PSYC 485, Stress and Coping, 3 Units
This course provides an overview of stress and coping theory as it has developed in the research literature in the last century. The interrelationships between stress and mental illness, medical diseases, and industrial-organizational factors are discussed. Students develop a basic understanding of stress as it relates to trauma and posttraumatic symptomology. Students gain an understanding of basic stress management and coping techniques and their clinical applications.

PSYC 494, Professional Studies in Child Life, 3 Units
This course helps students gain a broad understanding of the field of child life and equips them with the knowledge of the history and trends of the child life profession, as required by the Association of Child Life Professionals. Course content includes: 1) Scope of practice in child life, 2) child life documents, 3) impact of illness/injury and health care on patients and families, 4) family-centered care, 5) therapeutic play, and 6) preparation. Additional topics include, but are not limited to, clinical assessment, child life theoretical foundations, development and hospital stressors, and introduction to exceptional and medically challenged children.

PSYC 495, Special Topics in Psychology, 3 Units
This course engages students in focused study of particular topics of direct relevance or urgency in the field of psychology which are not already discussed in the curriculum. Topics vary from semester to semester and may reflect new practices, theories, or faculty research interests in the field. This course may be taken more than once as topics change.
PSYC 496, Writing 3: Senior Seminar in Psychology and Christian Integration, 3 Units
Students in this course discuss and critically evaluate the core ideas in the integration of psychology and the Christian faith, exploring the 4-5 established approaches for how to integrate what is known from psychological science and what is known from biblical hermeneutics and theology. Upon completion of the course, students are able to define and communicate an awareness of the issues and various approaches for integration, as well as identify and communicate the application of the integration of psychology and the Christian faith in their own lives and practice of psychology. This writing-intensive course develops students’ ability to think critically and construct complex arguments related to psychology and Christianity. Meets the General Education Requirement: Writing 3: Writing in the Disciplines.
Prerequisite: Senior standing and WRIT 260.

PSYC 496H, Senior Seminar: Psychology and Christian Integration - Honors, 3 Units
This class discusses and critically evaluates the core ideas in the integration of psychology and the Christian faith by teaching the four to five established approaches for how to integrate what is known from psychological science and what is known from Biblical hermeneutics and theology. Upon completion of the course, students are able to define and communicate an awareness of the issues and various approaches for integration. Students are also able to identify and communicate the application of the integration of psychology and the Christian faith in their own lives and practice of psychology.
Prerequisite: Senior standing, PSYC 110, completion of the UDWI req (PSYC 362), and completion of the units required for God’s Word and the Christian Response. Must be a student admitted to the Honors College and be considered a member in “active” status

PSYC 497, Readings, 1-4 Units
This course offers a program of study concentrating on assigned readings, discussions, and writing arranged between, and designed by, a student of upper-division standing and a full-time professor. An independent-study fee is assessed for each enrollment in this course.

PSYC 498, Directed Research, 1-4 Units
This course provides instruction in research design and technique and gives students experience in the research process. The 1-unit expectation encompasses no fewer than 30 hours of work with accompanying reading, log, writing, and seminar presentation within the department or in a university research symposium. No more than 1 unit may be used to fulfill preparatory readings requirement. An independent-study fee is assessed for each enrollment in this class.

PSYC 498H, Directed Research- Honors, 1-4 Units
This course provides instruction in research design and technique, and gives students experience in the research process. The one-unit expectation encompasses no fewer than 30 hours of work with accompanying reading, log, writing, and seminar presentation within the department or in a university research symposium. No more than one unit may be used to fulfill preparatory readings requirement. An independent-study fee is assessed for each enrollment in this class.
Prerequisite: Honors College, PSYC 110, and Junior or Senior standing

PSYC 499, Thesis/Project, 1-4 Units
This is a senior-level “capstone” type of independent study/research experience, involving the student in a unique project with a sophisticated level of research, synthesis, analysis, and communication. The 1-unit expectation encompasses no fewer than 30 hours of work with accompanying readings, log, instructor discussions, and writing of summary analysis and conclusions. The thesis or project may result in formal thesis, published article, electronic media, or artistic creation of a material form. No more than 1 unit may be used to fulfill preparatory readings requirement. An independent study fee is assessed for each enrollment in this class.

PSYC 501, Theory, Research and Practice in Psychology, 3 Units
This course provides an intensive review of major historical and contemporary theories, research and practice approaches in the field of psychology. Emphasis is on examining the key questions, proposed models, methods, findings, ideological controversies, and issues within the field of psychology. The course covers the various grand and emergent theories to foster dialogue that evaluates the science across psychological sub-disciplines, spanning general principles of human development, neurological bases of behavior, cognitive functioning, systemic socio-cultural factors, and individual health differences. Students engage in theoretical analyses of current trends in basic and applied theory, research, and practices of psychology across various sub-disciplines, as well as how individuals function with consideration of a Christian worldview.
Prerequisite: Must be first year student in the Master of Science in Research Psychology and Data Analysis program or instructor approval.

PSYC 511, Experimental Research Methods, 3 Units
This course will build on your knowledge of the information learned in your undergraduate research methods course with an emphasis on experimental methodology. This course will cover a variety of topics including the basics of conducting experimental designs, ethical guidelines for conducting experimental psychological research, validity issues associated with different experimental research designs, and various methods of both collecting and analyzing data, including psychometric issues associated with different psychological measures. This will be accomplished by combining traditional lectures with application of principles through application and demonstration.

PSYC 512, Non-Experimental Research Methods, 3 Units
This course provides an in-depth study of how to plan, conduct, and analyze studies that use non-experimental research designs, including correlational, survey, and qualitative methods. This course encourages students to identify core areas of descriptive psychological research and begin building a strong research concept about those areas-especially in regard to the application of non-experimental observational research designs.
PSYC 517, Program Evaluation, 3 Units
This course provides students with foundational knowledge and skills in the basic methods of evaluation research. Course topics include common methods of evaluation, including systematic needs assessments, formative research, program performance, and outcome effectiveness, using mixed-methods research approaches. Students also engage in discussions about ethical considerations and other challenges involved in good evaluation design and methods. Through class lectures, reading, and interactive skill-building applications, students apply course material in group and individual assignments.
Prerequisite: PSYC 511, PSYC 512

PSYC 518, Analysis of Variance, 3 Units
Analysis of variance (ANOVA) is a common statistical technique used by research psychologists to analyze differences in their data. This course focuses on introductory and advanced ANOVA methods and ANOVA’s relation to psychological research; advanced ANOVA methods covered in this course include repeated measure, mixed design, ANCOVA, and MANOVA. Students learn to implement these methods, analyze findings, and report the findings for APA-style journal publications. Use of multiple popular statistical software programs is emphasized.
Prerequisite: MATH 110 or equivalent;
Corequisite: PSYC 518

PSYC 518L, Analysis of Variance Lab, 1 Unit
In this course, the lab component to PSYC 518, students apply the statistical analysis knowledge from PSYC 518 to computational procedures using popular social science statistical software. Additionally, this course can be used to fulfill requirements for the JMP/SAS certification.
Corequisite: PSYC 518

PSYC 519, Regression, 3 Units
This advanced statistics course covers introductory and advanced regression analyses utilized throughout psychological research. Some of the topics covered are correlation, multiple regression, hierarchical regression, mediation/moderation, and logistic regression. Students learn to identify the appropriate regression analysis for different types of research questions, practice interpreting the results of the analyses in popular statistical software, and learn how to clearly report regression findings for APA-style journal publications. Use of multiple popular statistical software programs is emphasized.
Prerequisite: B- or better in PSYC 518;
Corequisite: PSYC 519L

PSYC 519L, Regression Lab, 1 Unit
This is the lab component to PSYC 519. In this lab course, students apply the statistical analysis knowledge from PSYC 519 to computational procedures using popular social science statistical software. Additionally, this course can be used to fulfill requirements for the JMP/SAS certification.
Corequisite: PSYC 519

PSYC 520, Psychometrics: Assessment and Measurement, 3 Units
Students in this course learn to apply classical and modern psychometric theories to develop and validate psychological tests and scales for data collection. Some of the topics included are instrument construction, reliability, validity, factor analysis, and item response theory. Students gain hands-on experience in developing a psychological instrument and analyzing the psychometric properties of previously created scales. Use of multiple popular statistical software programs is emphasized.
Prerequisite: B- or better in PSYC 518;
Corequisite: PSYC 520L

PSYC 520L, Psychometrics: Assessment and Measurement Lab, 1 Unit
This is the lab component to PSYC 520. In this lab course, students apply the statistical analysis knowledge from PSYC 520 to computational procedures using popular social science statistical software. Additionally, this course can be used to fulfill requirements for the JMP/SAS certification.
Corequisite: PSYC 520

PSYC 521, Faith Integration and Research Seminar, 3 Units
This course explores the nature of integrating psychology and religion/faith. It considers the functions and skills, as well as the theoretical modes of thought necessary for understanding the relationship between psychological research and religion. Focus is placed on the skills of research, constructive dialogue and writing. The course is intended to provide students with resources for developing their own approach to integration while also helping students clarify their own faith, morals and values that intersect with psychological research.

PSYC 522, Seminar in Ethical, Professional, and Diversity Issues, 3 Units
This course introduces students to research and professional issues in psychology, with an emphasis on ethics and diversity. Students will learn to recognize the importance of ethical behavior in all aspects of science as well as how sociocultural factors and personal biases may shape the practice of psychology. Emphasis is given to the integration of the student's spiritual and sociocultural philosophy with professional ethics. Historical and contemporary issues in basic and applied psychological research and interventions are reviewed.
PSYC 523, Interventions for Trauma and Crisis, 3 Units
This course helps students understand the neurobiological, cognitive, and emotional dynamics that underlie trauma-related mental health disorders. Students identify and apply effective interventions for the treatment of children and adolescents impacted by trauma, grief, and/or crisis, as well as the common co-occurring behavioral concerns. This course prepares students to effectively select appropriate evidence-based counseling interventions with diverse children and youth. The contextual dynamics of crises and trauma, family, social environments, and multicultural issues are addressed.
Prerequisite: PSYC 527, PSYC 532, and PSYC 558

PSYC 524, Counseling Adolescents, 3 Units
This course helps students understand the broad range of adolescent problems and disorders. A variety of psychotherapeutic modalities is presented, providing students an opportunity to develop basic adolescent-therapy skills and effective treatment strategies. The impact of development, family dynamics, social environments, and multicultural issues is addressed, and legal and ethical issues unique to adolescent populations are considered.
Prerequisite: PSYC 527, PSYC 532, and PSYC 558

PSYC 525, Principles and Practice of Assessment and Evaluation, 3 Units
Students in this course gain a broad understanding of the clinical use of psychological tests, assessment, and evaluation in the treatment of emotional, behavioral, and mental health concerns within the context of human diversity and social contexts and systems. Emphasis is on understanding the reliability, validity, and utility of psychological testing, developing skills in administering and interpreting appropriate assessment measures, and utilizing findings in treatment planning and report writing. Particular attention is given to the assessment of children and youth and to diversity issues, and the course meets BBS requirements for spousal or partner abuse assessment, detection, and intervention strategies; same-gender-abuse dynamics; and suicide risk assessment and intervention.
Prerequisite: PSYC 527

PSYC 526, Multicultural Counseling, 3 Units
Students in this course learn multicultural counseling theories and techniques as they explore the counselor’s role in developing cultural self-awareness, identity development, and promoting cultural social justice. Individual and community strategies for working with and advocating for diverse populations, and eliminating biases and intentional and unintentional oppression and discrimination, are discussed. Students develop an understanding of the effects of socioeconomic status on treatment and available resources, as well as cultural competency and sensitivity, and are introduced to the racial, cultural, linguistic, and ethnic backgrounds of people living in California.

PSYC 527, Diagnosis and Treatment Planning, 3 Units
This course helps students understand the role and categories of psychopathology utilized in the assessment and treatment of individuals broadly and with an emphasis on children and adolescents. Students develop their diagnostic and analytical skills through a mastery of the concepts in the Diagnostic and Statistical Manual of Mental Disorders. Special consideration is given to co-occurring and comorbid disorders that are common in substance users and among children and youth. This course also introduces the basics of treatment planning, including diagnostic conceptualization, ecosystemic assessment, and the formulation of treatment goals and intervention strategies. Diversity issues in diagnosis and treatment planning are also considered.

PSYC 528, Treatment of Substance Use Disorders in Youth and Families, 3 Units
This course prepares students to engage in counseling practices related to substance abuse recovery, addiction, and co-occurring disorders. Students learn the major approaches to identification, evaluation, treatment, and prevention of substance abuse and addiction, the legal and medical aspects of substance abuse, what populations are at risk, and the role of case management, including the involvement of support people and support systems and the utilization of community resources. Issues of substance use are considered within diverse communities and family dynamics.
Prerequisite: PSYC 527, PSYC 532, and PSYC 558

PSYC 529, Group Counseling, 3 Units
This course helps students understand group counseling theories and techniques, including principles of group dynamics, group process components, group developmental stage theories, therapeutic factors of group work, group leadership styles and approaches, pertinent research and literature, group counseling methods, and evaluation of effectiveness. Students consider group counseling children and youth from a variety of clinical, cultural, community/milieu, and developmental contexts. Identifying, planning, and implementing best practices in group counseling is addressed.
Prerequisite: PSYC 527, PSYC 532, and PSYC 558

PSYC 530, Evidence-Based Practices in the Treatment of Children and Youth, 3 Units
This course helps students understand the importance of utilizing evidence-based interventions and techniques that are consistent with current professional research and practice with children and adolescents. Evidence-based practice in psychology is the integration of the best available research with clinical expertise in the context of patient characteristics, culture, and preferences. This course prepares students to effectively select appropriate evidence-based counseling interventions with diverse children and youth, as a variety of psychotherapeutic intervention strategies are presented. The contextual dynamics of development, family, social environments, and multicultural issues are addressed.
Prerequisite: PSYC 532 and PSYC 558
PSYC 531, Ethics and Professional Issues, 3 Units
This course helps students understand professional, ethical, and legal issues in counseling and psychotherapy from ACA and APA professional lenses. Students are introduced to California laws and regulations governing the practice of counseling and licensing as a professional clinical counselor. Students learn to navigate common ethical and legal situations that arise in counseling generally, as well as those that emerge when counseling children and youth specifically. Clinical case management, professionalism, and professional self-care are also considered.
Prerequisite: PSYC 527, PSYC 532, and PSYC 558

PSYC 532, Theories of Counseling and Therapy, 3 Units
This course helps students understand the broad range of counseling and psychotherapeutic theories and techniques that are consistent with current professional research and practice. Students learn to effectively engage counseling processes in a multicultural society, select appropriate counseling interventions, develop a personal model of counseling, effectively respond to crises, and promote human wellness and the prevention of emotional and behavioral disorders. A variety of psychotherapeutic modalities is presented. The contextual dynamics of development, family, social environments, and multicultural issues are addressed.

PSYC 533, Externalizing and Dysregulation Disorders, 3 Units
This course helps students understand the neurodevelopmental basis of behavioral dysregulation, deficits of executive functioning, common comorbid disorders with neurodevelopmental issues, mental health disorders characterized by externalizing behavior, and disorders with primary behavioral symptoms. Students learn to identify and apply effective and appropriate evidence-based counseling interventions for the treatment of diverse children and adolescents with behavioral disorders. Various psychotherapeutic intervention strategies are presented, and the contextual dynamics of development, family, social environments, and multicultural issues are addressed.
Prerequisite: PSYC 527, PSYC 532, and PSYC 558

PSYC 534, Family Systems Theory and Counseling, 3 Units
This course is an overview of current theories and methods of family therapy interventions, with an emphasis on how family therapy integrates diversity issues (e.g., ethnicity, socioeconomic status, spirituality, blended families) during the clinical hour. Coursework explores the major theories, their founding clinicians, and some of their contemporaries, and emphasizes clinical application of material through working with families with children and youth.
Prerequisite: PSYC 532 and PSYC 558

PSYC 535, Therapies for Attachment and Internalizing Disorders, 3 Units
This course helps students understand the developmental relational, social, and emotional dynamics that underlie internalizing mental health disorders. Students identify and apply effective interventions for the treatment of children and adolescents with anxiety, depressive, and attachment disorders, as well as the common co-occurring behavioral concerns. This course prepares students to effectively select appropriate evidence-based counseling interventions with diverse children and youth. Various psychotherapeutic intervention strategies are presented. The contextual dynamics of development, family, social environments, and multicultural issues are addressed.
Prerequisite: PSYC 527, PSYC 532, and PSYC 558

PSYC 536, Play Therapy: History, Theories, and Interventions, 3 Units
Students in this course learn the principles and practices of play therapy, and are prepared to effectively engage in developmentally and clinically appropriate play-based counseling with children, select appropriate interventions, develop a personal model of play therapy, and effectively respond to a variety of clinical concerns utilizing play-based assessment and treatments.
Prerequisite: PSYC 532 and PSYC 558

PSYC 537, Family Therapy II: Advanced Training, 3 Units
This course features intensive training in evidence-based and best-practice models of couples therapy. Students receive certification in Gottman Method Couples Therapy Level 1 (12 hours) and Level 2 (18 hours), as well as certification in Dr. Sue Johnson's Emotionally Focused Therapy: Attachment-Based Interventions for Couples in Crisis (17 hours). Students participate in the trainings online between class sessions, and engage in active processing and application of the material during course meetings.

PSYC 538, Jungian Therapy and Sandplay, 3 Units
Students in this course examine and analyze Jungian therapy and the use of sandplay, which is a nonverbal therapeutic process for children and families. Students will explore applications to a variety of populations and therapeutic contexts.
Prerequisite: PSYC 536

PSYC 539, Play and Play Therapy Across the Lifespan, 3 Units
This course is taught through experiential and lecture methods to provide knowledge and skill competencies to facilitate play therapy as a therapeutic intervention for children and families. Students learn principles and applications of play therapy with children, adolescents, adults, and the aging population, and become familiar with theories of play therapy microskills used at each stage of life.
Prerequisite: PSYC 536
PSYC 540, Gestalt Play Therapy and Interventions, 3 Units
This course is taught through experiential and lecture methods to provide knowledge and skill competencies to facilitate play therapy as a therapeutic intervention for children and families. Course material gives students the philosophical basis for play therapy, including a review of the history of Gestalt play therapy, how to develop a relationship with a child through a Gestalt theoretical framework, and an introduction to various theoretical applications and play therapy best practices.

PSYC 541, Play Therapy with Special Populations, 3 Units
Students learn theoretical and applied play therapy skills for the assessment and treatment of clients with mental health issues associated with trauma and complex trauma, medical illness and comorbid diagnoses, developmental considerations (such as autism spectrum), psychosis, and other types of psychopathology.
Prerequisite: PSYC 536

PSYC 542, Practicum I, 3 Units
This course gives counseling psychology graduate students an initial clinical counseling experience, requiring them to verify 140 hours of face-to-face clinical experience counseling individuals, families, or groups under the supervision of on-campus faculty and BBS-qualified site supervisors. This course provides oversight and consultation for students' clinical placement, and further development of clinical skills, focusing on management of crisis issues, legal/ethical practice, diagnosis, prognosis, multicultural treatment, treatment planning, application of theory to actual clients, integration, and case management services. Clinical work is discussed from public mental health and private practice perspectives. Students must be serving at an APU-approved training site to be enrolled in this course.
Prerequisite: Program director permission

PSYC 543, Practicum II, 3 Units
As the final evaluative component of the M.S. in Counseling Psychology program, this course includes a capstone clinical project in which students formally present a clinical case including the following elements: case assessment and conceptualization, treatment plan and process, evidence-based support for treatment strategy, and outcomes and prognosis based on identified factors related to risk and resilience as specified by the literature base. This course also requires students to verify 140 hours of face-to-face clinical experience counseling individuals, families, or groups under the supervision of on-campus faculty and Board of Behavioral Sciences-qualified site supervisors, who also offer students consultation and the further development of clinical skills. Course emphases include management of crisis issues, legal/ethical practice, diagnosis, prognosis, multicultural treatment, treatment planning, application of theory to actual clients, integration, and case management services. Clinical work is discussed from public mental health and private practice perspectives.
Prerequisite: PSYC 542

PSYC 544, Practicum Extension, 2 Units
This course gives counseling psychology graduate students a clinical counseling experience. Students in this course must verify completion of 280 hours of face-to-face supervised clinical experience counseling individuals, families, or groups under the supervision of on-campus faculty and site supervisors who are qualified as Board of Behavioral Sciences (BBS) supervisors. This course provides oversight and consultation for student clinical placement and the further development of clinical skills, focusing on management of crisis issues, legal/ethical practice, diagnosis, prognosis, multicultural treatment, treatment planning, application of theory to actual clients, integration, and case management services. Clinical work is discussed from public mental health and private practice perspectives. Students must be serving at an APU-approved training site to be enrolled in this course.

PSYC 545, Play Therapy with Bereaved Children and Families, 3 Units
Students learn principles and applications of play therapy with children and families, and take skills learned in the course and apply them in the field during a weeklong grief and loss camp for the community. Students assess camp participants at intake, use therapeutic interventions to provide space for children to express their grief and loss, and apply therapeutic skills throughout the camp. Hours gained in the field are directly applied to practicum experience.
Prerequisite: PSYC 536

PSYC 551, Research Methods in Counseling, 3 Units
Students in this course survey the major social science research and statistical methods used in conducting research, needs assessments, and program evaluation. Course material equips students to read, understand, and evaluate psychological research, and prepares them to use research to inform evidence-based practice and understand the importance of research in advancing the profession of counseling.

PSYC 555, Career Development, 3 Units
This course helps students understand the role of the professional counselor in facilitating career planning and development of youth and emerging adults. Students explore occupational and career education trends and career counseling theories and practices that promote equity and diversity. This course prepares students to facilitate individual education and career planning and implementation of plans. Students explore the relationship between general well-being, mental health, and education and career trajectories. Career counseling needs of special populations (e.g., mid- and late-life career changes, persons with disabilities) and at-risk populations are addressed.
Prerequisite: PSYC 527, PSYC 532, and PSYC 558
PSYC 558, Advanced Developmental Psychology, 3 Units
This course helps students understand human growth and development across the lifespan, including normal and abnormal behavior, developmental crises, disability, psychopathology, and situational and environmental factors that affect normal and abnormal behavior. Students consider the impact of socioeconomic status and other contextual issues affecting social position and development, and explore the assessment and treatment of clinical concerns related to human sexuality and domestic violence across the lifespan and among diverse populations. Students also complete their Board of Behavioral Sciences-required study of aging and long-term care in this course.

PSYC 578, Research Practicum, 1-3 Units
This course gives students the opportunity to apply their research and statistical skills in a professional research setting at a practicum site. These skills include, but are not limited to, data cleaning, data analysis, research preparation, and report writing.
Prerequisite: PSYC 518 and PSYC 518L

PSYC 585, Psychopharmacology and Psychobiology, 3 Units
This course introduces students to the biological and neurological bases of human behavior, and to psychotrophic medications as an adjunct to psychotherapy. Current information on the use of medications in the treatment of psychological disorders is provided, and consideration is given to the special needs of certain populations (e.g., the elderly and substance abuse patients) when prescribing psychotropic medications. Students develop skills in case management by gaining an understanding of psychotropic medication indications, dosage scheduling, effects, and side effects as part of the therapeutic practice.

PSYC 588, Research Internship, 3 Units
Students in this course obtain an internship in which they apply knowledge acquired during their master's program, helping them develop their skills in the field of research and/or data analytics. All internship sites must be preapproved and satisfy the learning outcomes of this course.
Prerequisite: 6 units of PSYC 578

PSYC 595, Special Topics, 3 Units
This course engages students in focused study of particular topics of direct relevance or urgency in the field of psychology which are not already discussed in the curriculum. Topics vary from semester to semester and may reflect new practices, theories, or faculty research interests in the field. This course may be taken more than once as topics change.

PSYC 597, Introduction to Grant and Professional Writing, 3 Units
This seminar course helps students develop and implement the theoretical foundation and methodological procedures needed to complete a Master of Science thesis in the Department of Psychology by the end of the academic year. This course guides students through the planning and execution of a master's thesis, including topic selection/refinement, thesis planning, training in the responsible conduct in research and human subjects regulatory protocols, grant funding for student research, thesis-driven data collection, data analysis, and writeup/dissemination in an organized, coherent form. The course also helps students develop their theses into scholarly presentations and manuscripts suitable for publication. A thesis is completed when the student has successfully defended it to a two-person committee comprising the thesis faculty advisor and one full-time faculty second reader.

PSYC 598, Thesis Seminar, 1-3 Units
The main objective of this seminar course is to help students develop and implement the theoretical foundation and methodological procedures needed to complete a master's thesis in the Department of Psychology by the end of the academic year.

PSYC 599, Independent Study: Psychology Research, 1-6 Units
This course provides instruction in research and gives students experience in research processes related to their area of study. An independent study fee is assessed for each enrollment in this class.

PRPS 110, General Psychology, 3 Units
This general survey course explores the field of psychology. It includes human development, social psychology, learning, perception, cognition, motivation, personality, psychological testing, and nervous system functioning. Meets the General Education Requirement: Social Science.

PRPS 250, Data Analysis in Psychology, 3 Units
This course introduces students to statistical analyses that are common in psychological research. Students learn to identify the appropriate analysis, how to run the statistical analysis in SPSS, and how to interpret SPSS output. Students are also introduced to writing results in American Psychological Association (APA) style.
Prerequisite: PRMA 130

PRPS 280, Introduction to Certified Alcohol Drug Counselor Credentialing, 3 Units
Students in this course examine the effects of alcoholism and drug dependency, specifically as they relate to cultural/lifestyle considerations, human behavior, and family dynamics. Course material also considers the substance use system of care, including its programs, policies, and procedures for the treatment and recovery of individuals suffering from substance use disorders. This is the first course in a series designed to meet the educational requirements for California Consortium of Addiction Programs and Professionals (CCAPP) credentialing.
PRPS 290, Human Growth and Development, 3 Units
This study of human development across the life span emphasizes a multidisciplinary perspective, including such areas as psychology and sociology, processes as social interaction, and the tools for applying developmental psychology to life situations. Meets the General Education Requirement: Social Science.

PRPS 292, Introduction to Brain and Behavior, 3 Units
The purpose for this course is to provide a foundation of the physiological basis of human behavior. Topics include the structure and function of different brain regions, how neurons communicate, sensory and motor function, and complex brain functions such as speech and cognition. This course serves as an introduction to the neurobiology of various psychological and neurological diseases.

PRPS 305, Educational Psychology, 3 Units
Educational psychology is a broad field of study focusing on the various factors that influence learning and human knowledge. This course provides an overview of the principles and theories used throughout other psychological fields, but in the context of educational psychology. Specifically, this course covers development, culture, motivation, learning, cognition, and learner differences.

PRPS 320, Social Psychology, 3 Units
How are individuals' thoughts, feelings, and behaviors influenced by other people? In this course, students are encouraged to become careful observers of social influences on human behavior by learning the theories and methods employed by social psychologists in order to apply these perspectives in everyday social interactions.

PRPS 330, Sports Psychology, 3 Units
Sports psychology is a survey course that explores the role of psychology as it is related to the enhancement of athletic performance. Students will spend time on areas related to sports and physical activity such as motivation, self-confidence, goal setting, burnout, anxiety, healthy attitudes toward sports participation, and other sports-related activity. Emphasis is on critically reviewing sports psychology literature and research in an attempt to separate effective and ineffective psychology-related approaches to sport activity.

PRPS 340, History of Psychology, 3 Units
The historical growth of psychological science is surveyed here. This course focuses on major theorists and their ideas in relation to the historical context as well as current psychological issues.

PRPS 345, Psychology of Child and Adolescent Development, 3 Units
This course is an advanced examination of emotional, cognitive, physical, and social development from infancy through adolescence. The process of human development as a complex interaction of biological and sociocultural factors is reviewed. Contemporary research topics focusing on genetics, fertility, attachment, communication, and cognitive and moral aspects of development are examined. Meets the General Education Requirement: Social Science.

PRPS 355, Psychology of Adult Development, 3 Units
This course is an advanced examination of the emotional, cognitive, physical, and social development of individuals from young adulthood through the end of life. The process of adult development as an interplay of biological, psychological, cognitive, and psychosocial aspects is examined. Emphasis is on normal patterns in personal and emotional development in adulthood, as well as on contemporary research in areas of health, gender, marriage and relationships, family and parenting, ethnic/ecological systems, work, ethics, and morality.

PRPS 360, Abnormal Psychology, 3 Units
The major focus of this course is mental illness and abnormal behavior in light of modern theory and knowledge. Current trends and modern methods of diagnosis, understanding, treatment, and prevention are discussed.

PRPS 362, Research Methods in Psychology, 3 Units
Students engage in a comprehensive overview of quantitative and qualitative research methods used in psychological research, and gain an understanding of the ethical considerations and other challenges involved in good research design. Students also complete a research project and learn to write utilizing the style adopted by the American Psychological Association.
Prerequisite: PRPS 250 and PRWR 260

PRPS 370, Industrial/Organizational Psychology, 3 Units
Students survey the basic behavioral science research and thinking as they contribute to industrial and organizational psychology, including worker attitudes and theories of motivation, organizational structure and communication, theories of leadership and decision making, conflict resolution, and methods of personnel selection and appraisal.

PRPS 375, Psychology of Conflict Management and Mediation, 3 Units
Students in this course develop a psychological understanding of the dynamics of human conflict, the differences between constructive and destructive conflict, and the different ways in which conflict can be managed, resolved, and transformed. Students also learn basic skills in the management and resolution of conflict.
PRPS 380, Psychology of Personality, 3 Units
Students in this course become familiar with the various basic elements of personality and their integration, exploring concepts regarding the basic components of personality and the processes that undergird an individual's growth and behavior. Course material also covers current and traditional theories of personality.

PRPS 383, Psychology of Suicide, 3 Units
This course gives students an overview of suicidal behavior, including terminology, statistics, theories, and interventions, that addresses this sensitive topic from a biopsychosocial-spiritual perspective. Students also have opportunities to learn fundamental skills in suicide assessment, safety planning, and interventions to reduce suicide.

PRPS 385, Health Psychology, 3 Units
This is a survey course exploring the role of psychology as it relates to human physiology and the health field. Topics include basic neurology, stress management, nutrition, addictive substances, immunological disorders, and other relevant psychophysiological areas.

PRPS 386, Community Psychology, 3 Units
This course is designed to give students an introduction to the field of community psychology. This area of psychology is concerned with the scientific study of social structures and their influence on individuals, groups, and organizations. The main focus will be on the development and application of community-based psychological theory and research to understanding, designing, implementing, and evaluating social change and empowerment. The roles of research and social action at multiple levels of analysis to facilitate social change will be examined.

PRPS 390, Cognition, 3 Units
This course offers an overview of cognitive psychology. Students discuss theories and research concerning sensation, perception, memory, and other higher-order mental processes including imagery, language, creativity, concept formation, and decision making.

PRPS 400, Multicultural Psychology, 3 Units
This course introduces students to cultural and multicultural psychology sub disciplines in psychology. Students develop knowledge of the history, major tenets, theories, research findings and behavioral practices in multicultural psychology. Students also gain understanding of the cultural bases for psychological processes. Students develop awareness, knowledge and skills for engaging in intercultural and multicultural contexts. Students are also asked to advance their cultural self-knowledge as well as knowledge of diverse others in order to develop multicultural competence in working with individuals from diverse backgrounds. Meets the General Education Requirement: Intercultural Competence.

PRPS 405, Psychology of Learning, 3 Units
This course examines several major theories and research in the psychology of learning, as well as how learning theories have developed historically and how learning principles apply to psychological problems.

PRPS 410, Psychology of Exceptional Children, 3 Units
Students examine and analyze the problems faced by the exceptional child. Course material covers physical and emotional adjustment, speech and language disorders, various childhood disorders such as mental retardation and depression, and other childhood mental and physical disorders.

PRPS 415, Group Process, 3 Units
Students in this course survey the basic behavioral science research and thinking as applied to human interaction in groups. This includes such topics as group formation, phases, structure, types and uses of groups, group communication, group conflict resolution, and methods of group leadership. Course includes the observation and evaluation of group interaction.

PRPS 420, Political Psychology, 3 Units
This course addresses political phenomena from a psychological perspective, and students are encouraged to develop civic knowledge, apply psychological theory within political contexts, and identify determinants of political behavior. Course content includes political attitudes and identity, leadership and group influence, voting behavior, nationalism, social movements, terrorism, and international conflict/resolution. Meets the General Education Requirement: Civic Knowledge and Engagement.

PRPS 430, Intervention Strategies with Children, 3 Units
This course introduces a broad range of assessment and intervention strategies designed to meet the developmental, psychomotor, language, behavioral, and education needs of children. Issues of normative and non-normative child and family functioning in child assessment and intervention planning are considered. Observational techniques, standardized tests, informal assessment measures, developmental assessments, and alternatives to current testing practices are discussed and reviewed from the viewpoints of the multiple disciplines impacting child assessment and intervention. The broad range of modalities utilized in intervention with children is given strong emphasis, with observation and student practice required at an intervention site.

PRPS 432, Psychosocial Interventions in Pediatric Health Care, 3 Units
This is a core course in the child life specialist curriculum, covering a wide range of recreational and psychosocial interventions for children who are hospitalized, chronically ill, or have disabilities. Students learn various intervention techniques using developmental play, music, art, dance, and other forms of recreation, and gain understanding of the role of the child life specialist as a member of an interdisciplinary medical team.
PRPS 440, Psychology of Religion, 3 Units
This course investigates the common ground between psychology and religion. Values, mature religion, the nature of humanity, and religious experience are all areas of study for this purpose.

PRPS 445, Psychology of the Family, 3 Units
This course provides an overview of the field of family psychology. The three primary areas of study are: family systems theory, the family lifecycle, and several theoretical frameworks for the study of families. Students are given the opportunity to apply these concepts to their own family of origin.

PRPS 450, Counseling Theory, 3 Units
This course is an introduction to counseling and psychotherapy, with students exploring the underlying assumptions and practices of traditional and contemporary counseling theories. Students also explore common ethical concerns that emerge in counseling relationships.

PRPS 451, Interventions in Counseling, 3 Units
This course introduces counseling methods and practices; legal and ethical codes of conduct for counseling professionals; community prevention, education, and early intervention methods; interviewing; screening; and interventions in counseling. Students practice basic counseling assessment and intervention methods, including crisis management and safety practices. This course meets criteria for Domain IV of the CCAPP certification requirements.

PRPS 453, Bilingualism, Biculturalism, and Cognition, 3 Units
This course provides students with an overview of issues in bilingualism and biculturalism from a cognitive perspective. Theories and research concerning knowledge representation, bilingual cognition (language acquisition, production, comprehension, and variations in executive functions), and bicultural cognition (cognitive consequences of culture-specific knowledge) are discussed. Students enrolled in this course may be required to share information regarding their personal life, family, or relationships.

PRPS 455, Field Experience, 3 Units
This course is for students who have completed most of the psychology or sociology major requirements. Each student participates in one or more endeavors that offer an opportunity to apply prior training to a professional setting while acquiring new knowledge. This course can be repeated for a total of 6 units counted toward the major and 9 units toward the degree. Meets the General Education Requirement: Integrative and Applied Learning.

PRPS 463, Drugs, Behavior, and Society, 3 Units
This course provides an overview of drug use historically and in contemporary society from community and biopsychosocial perspectives. Students engage in an in-depth study of various psychoactive drugs of abuse, including physiological, psychosocial, health, legal, and political aspects of drugs. Course material covers drug-taking risk behaviors and issues related to dependence among high-risk populations. Strategies for drug abuse prevention/education and intervention approaches are also examined.

PRPS 464, Substance Use Assessment and Interventions, 3 Units
Students in this course gain an in-depth understanding of empirically driven and theoretically grounded assessments and interventions for substance use issues, focusing on how to engage in effective screening and assessment protocols for substance use problem identification and service planning. Students participate in practical application of evidence-based interventions, including the use of case studies and a variety of practice exercises. Course material integrates foundational assessment and intervention models for addressing co-occurring mental health needs, family system issues, and patient-centeredness, including spirituality.

PRPS 466, Case Management in Mental Health and Substance Use Disorders, 3 Units
This course offers an overview of the theory, structure, and practice of case management. Students gain an understanding of the professional practice of case management, including scope and responsibilities, multidisciplinary and ecological systems engagement, cultural and diversity factors, and ethical and legal issues. Students develop skills in effective communication, clinical documentation, case management facilitation, managing interpersonal and individual dynamics, case management interviewing, intervention planning, and implementation of services.

PRPS 470, Cognitive Neuroscience, 3 Units
Cognitive neuroscience as a field studies the relationship between cognitive processes and the brain. Students will first learn about the major research methods in this field, such as lesion studies, brain imaging, and animal models. The majority of the course will then describe how these methods have been used to inform our understanding about the neural correlates of memory, decision-making, perception, and social cognition.

PRPS 472, Neurological and Behavioral Disorders, 3 Units
This course examines the neurobiology of various psychological and neurological diseases. Neurological disorders covered include developmental, tumors, seizures, strokes, traumatic brain injury, neurodegenerative, and infectious disease. Behavioral disorders include schizophrenia, major affective disorders, anxiety disorders, autism, attention-deficit hyperactivity disorder, stress disorders, sleeping and eating disorders. The neurobiology of drug abuse will be analyzed based on common features of addiction, pathways affected by commonly abused drugs and heredity factors.

PRPS 475, Research Experience I, 1-3 Units
Students in this course improve their research skills and integrate their knowledge, skills, and interests by conducting a comprehensive research project. Successful completion of the course results in an APA-style paper or submission of a paper or poster presentation to a professional organization or in a professional setting. Concurrent enrollment in another research practicum course is permitted, and 12 units of research experience in PRPS 475 can be counted toward the bachelor's degree requirements. Meets the General Education Requirement: Integrative and Applied Learning.
PRPS 480, Psychological Testing and Measurement, 3 Units
Students gain a thorough background in objective tests and measurements. A brief survey is offered in intelligence, personality, organization, and industrial psychological measures. Terminology is developed, dangers and advantages of psychological instruments are discussed, and each student is required to administer and interpret a number of instruments. Special materials fee applies. Course is offered to juniors, seniors, and graduate students only.

PRPS 485, Stress and Coping, 3 Units
This course provides an overview of stress and coping theory as it has developed in the research literature in the last century. The interrelationships between stress and mental illness, medical diseases, and industrial-organizational factors are discussed. Students develop a basic understanding of stress as it relates to trauma and posttraumatic symptomology. Students gain an understanding of basic stress management and coping techniques and their clinical applications.

PRPS 494, Professional Studies in Child Life, 3 Units
This course helps students gain a broad understanding of the field of child life and equips them with the knowledge of the history and trends of the child life profession, as required by the Association of Child Life Professionals. Course content includes: 1) Scope of practice in child life, 2) child life documents, 3) impact of illness/injury and health care on patients and families, 4) family-centered care, 5) therapeutic play, and 6) preparation. Additional topics include, but are not limited to, clinical assessment, child life theoretical foundations, development and hospital stressors, and introduction to exceptional and medically challenged children.

PRPS 495, Special Topics in Psychology, 3 Units
This course engages students in focused study of particular topics of direct relevance or urgency in the field of psychology which are not already discussed in the curriculum. Topics vary from semester to semester and may reflect new practices, theories, or faculty research interests in the field. This course may be taken more than once as topics change.

PRPS 496, Writing 3: Senior Seminar in Psychology and Christian Integration, 3 Units
Students in this course discuss and critically evaluate the core ideas in the integration of psychology and the Christian faith, exploring the 4-5 established approaches for how to integrate what is known from psychological science and what is known from biblical hermeneutics and theology. Upon completion of the course, students are able to define and communicate an awareness of the issues and various approaches for integration, as well as identify and communicate the application of the integration of psychology and the Christian faith in their own lives and practice of psychology. This writing-intensive course develops students’ ability to think critically and construct complex arguments related to psychology and Christianity. Meets the General Education Requirement: Writing 3: Writing in the Disciplines.
Prerequisite: Junior standing and PRWR 260

PRPS 497, Readings, 1-4 Units
This is a program of study concentrating on assigned readings, discussions, and writing arranged between, and designed, by a student of upper-division standing and a full-time professor. An independent study fee is assessed for each enrollment in this class.

PRPS 498, Directed Research, 1-4 Units
This course provides instruction in research design and technique, and gives students experience in the research process. The 1-unit expectation encompasses no fewer than 30 hours of work with accompanying reading, log, writing, and seminar presentation within the department or in a university research symposium. No more than 1 unit may be used to fulfill preparatory readings requirement. An independent study fee is assessed for each enrollment in this class.

PRPS 499, Thesis/Project, 1-4 Units
This is a senior-level "capstone" type of independent study/research experience, involving the student in a unique project with a sophisticated level of research, synthesis, analysis, and communication. The 1-unit expectation encompasses no fewer than 30 hours of work with accompanying readings, log, instructor discussions, and writing of summary analysis and conclusions. The thesis or project may result in formal thesis, published article, electronic media, or artistic creation of a material form. No more than 1 unit may be used to fulfill preparatory readings requirement. An independent study fee is assessed for each enrollment in this class.

Faculty
Interim Chair
Alan Oda (http://www.apu.edu/faculty/aoda/), PhD

Chair Emeritus
Brian Eck (http://www.apu.edu/faculty/beck/), PhD

Professors
Rachel Castaneda (http://www.apu.edu/faculty/rcastaneda/), PhD, MPH
Brian Collisson (http://www.apu.edu/faculty/bcollisson/), PhD
The BA in Psychology (https://www.apu.edu/bas/programs/psychology-majors/) program helps students learn about human behavior through the development of critical thinking skills, and gives them experience in methods of research and conducting scientific inquiries. Students who complete the program are well equipped to pursue graduate education and/or careers in clinical/counseling areas of psychology and child life, and in a variety of applied psychology and allied areas (e.g., organizational psychology, educational psychology, and social work).

Requirements

The Bachelor of Arts in Psychology is ideal for students interested in clinical/counseling or other applied areas of psychology. The core requirements (Domain 1) give students grounding in the discipline and an understanding of the basics of human behavior. The career-focus electives (Domain 2) provide students with clear applications of psychology, clustered by common themes and areas of employment. And the applied-learning electives (Domain 3) provide students with internship and/or research experience.

**Total Units**: 48

1. Meets the General Education Quantitative Literacy requirement.
2. Meets the General Education Natural Sciences requirement.
3. An AP Psychology score of 3, 4, or 5 will be accepted for PSYC 110.
4. Meets the General Education Social Sciences requirement.
5. Meets the General Education Writing 2 requirement.
6. Meets the General Education Writing 3 requirement.
7. Meets the General Education Intercultural Competence requirement.
8. Meets the General Education Civic Knowledge and Engagement requirement.
9. Requires senior standing and departmental permission.
11. Can be double-counted toward the alcohol and drug counseling minor.
12. Students may petition to take PSYC 475 instead of PSYC 455.
13. PADM 399 counts for 3 units of PSYC 455 and 3 units of nonmajor elective credit, and meets the General Education Civic Knowledge and Engagement requirement.

**Program Learning Outcomes**

**Program Learning Outcomes**

Students who successfully complete this program shall be able to:

1. **DISCIPLINARY KNOWLEDGE-** Students demonstrate a working knowledge of psychology's content domains, key theories, concepts, principles, themes, and applications of psychology in society.

2. **CRITICAL THINKING, SCIENTIFIC INQUIRY AND EFFECTIVE COMMUNICATION-** Students demonstrate effective expression of critical thought and scientific inquiry in their engagement with (a) psychology literature, (b) conduct of psychological research, and (c) written, (d) oral, and interpersonal communication.
3. VALUES AND ETHICS- Students (a) demonstrate knowledge of the APA ethical (a.1) and multicultural ethical (a.2) standards for the practice of psychology and are able to utilize those standards in decision making and actions in scientific inquiry (a.3), sociocultural (a.4), and interpersonal contexts (a.5). Students (b) articulate and behaviorally express values that build and enhance interpersonal relationships and community engagement at local, multicultural, and cross cultural levels.

4. APPLICATION TO VOCATION- Students demonstrate the ability to utilize and apply psychological knowledge and professional skills to: (a) develop vocational post-baccalaureate goals, (b) work collaboratively with diverse others, (c) serve others needs, (d) self-regulate and manage projects successfully, and (e) solve increasingly complex problems.

5. FAITH INTEGRATION- Students demonstrate skill in the integration of Christian faith and theology with the science of psychology as it relates to the nature and content of: humanity (F1), knowledge (F2), values and ethics (F3), and vocational and spiritual formation (F4).

BA in Psychology (Bachelor’s Completion Program)

48 units

Azusa Pacific’s bachelor’s completion program in psychology (https://www.apu.edu/bas/programs/psychology-bachelors-completion/) is designed for transfer students who have at least 30 units and are interested in completing a Bachelor of Arts in Psychology at the High Desert, Inland Empire, Monrovia, Murrieta, Orange County, or San Diego regional location, or online. Students gain hands-on field experience as they learn about human behavior and how to analyze and solve problems in various settings, preparing them to make a difference in the lives of others.

Azusa Pacific’s bachelor’s completion programs allow students who began a program of study at another higher education institution to finish their degree at APU. In order to graduate, students must complete the required program units and General Education (p. 1063) units, for a total of 120 units.

Requirements

The Bachelor of Arts in Psychology degree completion program is ideal for students interested in clinical/counseling or other applied areas of psychology. The core requirements (Domain 1) give students grounding in the discipline and an understanding of the basics of human behavior. The career-focus electives (Domain 2) provide students with clear applications of psychology, clustered by common themes and areas of employment. And the applied integrative learning electives (Domain 3) offer internships and/or research experience.

## Domain 2: Career Focus

Choose any six courses (18 units) from any of the following clusters. A course may be used to meet the requirement of Domain 1 or Domain 2, but not both.

### Business and Community Cluster
- PRPS 320 Social Psychology
- PRPS 370 Industrial/Organizational Psychology
- PRPS 375 Psychology of Conflict Management and Mediation
- PRPS 386 Community Psychology
- PRPS 400 Multicultural Psychology
- PRPS 420 Political Psychology

### Clinical and Counseling Cluster
- PRPS 280 Introduction to Certified Alcohol Drug Counselor Credentialing
- PRPS 380 Psychology of Personality
- PRPS 383 Psychology of Suicide
- PRPS 415 Group Process
- PRPS 430 Intervention Strategies with Children
- PRPS 445 Psychology of the Family
- PRPS 450 Counseling Theory
- PRPS 451 Interventions in Counseling
- PRPS 464 Substance Use Assessment and Interventions
- PRPS 466 Case Management in Mental Health and Substance Use Disorders

### Development and Education Cluster
- PRPS 290 Human Growth and Development
- PRPS 305 Educational Psychology
- PRPS 345 Psychology of Child and Adolescent Development
- PRPS 355 Psychology of Adult Development
- PRPS 410 Psychology of Exceptional Children
- PRPS 432 Psychosocial Interventions in Pediatric Health Care
- PCLS 501 Advanced Child Development
- PCLS 511 Family Systems Theory and Applications
- PCLS 523 Coping Strategies for Children Experiencing Stress and Trauma

### Methods Cluster
- PRPS 340 History of Psychology
- PRPS 475 Research Experience
- PRPS 480 Psychological Testing and Measurement
- PSYC 501 Theory, Research and Practice in Psychology
- PSYC 511 Experimental Research Methods
- or PSYC 512 Non-Experimental Research Methods
- PSYC 518 Analysis of Variance

### Neurocognition Cluster
- PRPS 292 Introduction to Brain and Behavior
- PRPS 390 Cognition
- PRPS 405 Psychology of Learning
- PRPS 453 Bilingualism, Biculturalism, and Cognition
- PRPS 470 Cognitive Neuroscience
- PRPS 472 Neurological and Behavioral Disorders

### Restoring Wholeness Cluster
- PRPS 330 Sports Psychology
- PRPS 385 Health Psychology
- PRPS 440 Psychology of Religion
PRPS 463  Drugs, Behavior, and Society  
PRPS 485  Stress and Coping

**Domain 3: Applied Integrative Learning**

Choose one of the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>PRPS 455</td>
<td>Field Experience</td>
</tr>
<tr>
<td>PRPS 475</td>
<td>Research Experience</td>
</tr>
</tbody>
</table>

**Total Units: 48**

1. Meets the General Education Quantitative Literacy requirement.
2. Meets the General Education Natural Sciences requirement.
3. Astronomy with lab, geology with lab, or physics with lab may count for biology with lab requirement.
4. An AP Psychology score of 3, 4, or 5 will be accepted for PRPS 110.
5. Meets the General Education Social Sciences requirement.
6. Meets the General Education Writing 2 requirement.
7. Meets the General Education Writing 3 requirement.
8. Meets the General Education Intercultural Competence requirement.
10. Requires senior standing and departmental permission.
11. Distance-learning course.
13. Can be double-counted toward the alcohol and drug counseling minor.

**Program Learning Outcomes**

**Program Learning Outcomes**

Students who successfully complete this program shall be able to:

1. **DISCIPLINARY KNOWLEDGE** - Demonstrate a working knowledge of psychology's content domains, key theories, concepts, principles, themes, and applications of psychology in society.
2. **CRITICAL THINKING, SCIENTIFIC INQUIRY AND EFFECTIVE COMMUNICATION** - Demonstrate effective expression of critical thought and scientific inquiry in their engagement with (a) psychology literature, (b) conduct of psychological research, and (c) written, (d) oral, and interpersonal communication.
3. **VALUES AND ETHICS** - (a) demonstrate knowledge of the APA ethical (a.1) and multicultural ethical (a.2) standards for the practice of psychology and are able to utilize those standards in decision making and actions in scientific inquiry (a.3), sociocultural (a.4), and interpersonal contexts (a.5). Students (b) articulate and behaviorally express values that build and enhance interpersonal relationships and community engagement at local, multicultural, and cross cultural levels.
4. **APPLICATION TO VOCATION** - Demonstrate the ability to utilize and apply psychological knowledge and professional skills to: (a) develop vocational post-baccalaureate goals, (b) work collaboratively with diverse others, (c) serve others needs, (d) self-regulate and manage projects successfully, and (e) solve increasingly complex problems.
5. **FAITH INTEGRATION** - Demonstrate skill in the integration of Christian faith and theology with the science of psychology as it relates to the nature and content of: humanity (F1), knowledge (F2), values and ethics (F3), and vocational and spiritual formation (F4).

**BS in Psychology**

48 units

The BS in Psychology (https://www.apu.edu/bas/programs/psychology-majors/) program helps students understand psychological science and the various statistical and research methodologies used to study human thought and behavior, equipping them with strong foundational knowledge in areas of applied psychological science, as well as a strong skill set in research. Students who complete the program are well equipped to pursue graduate education and/or careers in psychology and allied health fields (e.g., physician’s assistant, physical therapy, occupational therapy, speech therapy, nutrition), as well as a variety of research-related careers.

**Requirements**

The Bachelor of Science in Psychology is ideal for students interested in psychological research and related careers. The core requirements (Domain 1) give students grounding in the discipline and an understanding of the basics of human behavior. The career-focus electives (Domain 2) provide students with applications of psychology, clustered by common themes and areas of employment. And the applied-learning electives (Domain 3) provide students with internship and/or research experience.

Total Units 48

1. Meets the General Education Quantitative Literacy requirement.
2. Meets the General Education Natural Sciences requirement.
3. An AP Psychology score of 3, 4, or 5 will be accepted for PSYC 110.
4. Meets the General Education Social Sciences requirement.
5. Meets the General Education Writing 2 requirement.
6. Meets the General Education Writing 3 requirement.
7. Meets the General Education Intercultural Competence requirement.
8. Meets the General Education Civic Knowledge and Engagement requirement.
9. Requires senior standing and departmental permission.
Students may petition to take PSYC 455 instead of PSYC 475.

Program Learning Outcomes

Students who successfully complete this program shall be able to:

1. **DISCIPLINARY KNOWLEDGE** - Demonstrate a working knowledge of psychology’s content domains, key theories, concepts, principles, themes, and applications of psychology in society.

2. **CRITICAL THINKING, SCIENTIFIC INQUIRY AND EFFECTIVE COMMUNICATION** - Demonstrate effective expression of critical thought and scientific inquiry in their engagement with (a) psychology literature, (b) conduct of psychological research, and (c) written, (d) oral, and interpersonal communication.

3. **VALUES AND ETHICS** - Students (a) demonstrate knowledge of the APA ethical (a.1) and multicultural ethical (a.2) standards for the practice of psychology and are able to utilize those standards in decision making and actions in scientific inquiry (a.3), sociocultural (a.4), and interpersonal contexts (a.5). Students (b) articulate and behaviorally express values that build and enhance interpersonal relationships and community engagement at local, multicultural, and cross cultural levels.

4. **APPLICATION TO VOCATION** - Demonstrate the ability to utilize and apply psychological knowledge and professional skills to: (a) develop vocational post-baccalaureate goals, (b) work collaboratively with diverse others, (c) serve others needs, (d) self-regulate and manage projects successfully, and (e) solve increasingly complex problems.

5. **FAITH INTEGRATION** - Demonstrate skill in the integration of Christian faith and theology with the science of psychology as it relates to the nature and content of: humanity (F1), knowledge (F2), values and ethics (F3), and vocational and spiritual formation (F4).

Certificate in Play Therapy

9 units

To earn this certificate, you must complete 9 semester units (minimum of 150 hours of coursework) over a two-year period to meet the Association for Play Therapy’s instructional-hours requirement toward becoming a Registered Play Therapist (RPT) or Registered Play Therapist Supervisor (RPT-S).

To be eligible for registration as an RPT, students must complete the certificate program and be enrolled in, or have completed, a graduate clinical degree program that enables graduates to be eligible for licensure.

Students who complete the coursework without an appropriate graduate clinical degree can still obtain the certificate from APU, but will not be eligible for registration as an RPT with the Association for Play Therapy.

Total Units: 9

Minor in Alcohol and Drug Counseling

24 units

The minor in alcohol and drug counseling prepares students to pursue alcohol and drug counselor credentialing with the California Consortium of Addiction Programs and Professionals (CCAPP). Students who finish this minor complete the educational requirements for certified alcohol and drug counselors, and have the foundational knowledge, understanding, and skills needed to join this ever-expanding field that allows for bachelor-level entry. **Note:** There are other requirements, however, to qualify for the alcohol and drug counseling credential, as outlined and determined by CCAPP.

For students interested in completing the Bachelor of Arts (BA) in Psychology (p. 570) or the Bachelor of Science (BS) in Psychology (p. 575), 6 units of the minor can be used to meet the requirements of the BA or BS; 15 units of the minor, including 3 units of PSYC 455, must be completed at Azusa Pacific University.

Total Units 24

¹ Graduate courses (500-level and above) require senior standing and departmental permission.
² Three units of PSYC 455 can be used to meet requirements of the minor and the BA or BS in Psychology.
³ PSYC 455 meets the General Education Integrative and Applied Learning requirement.
⁴ Meets requirements of the minor and the BA or BS in Psychology.

Program Learning Outcomes

Program Learning Outcomes

Students who successfully complete this program shall be able to:

1. Develop entry level mastery of knowledge of substance use, misuse, and effective treatment for substance use problems.
2. Demonstrate entry level skills in engagement and facilitation of substance use recovery strategies.
3. Apply knowledge and skill related to Alcohol and Drug counseling in field experiences.
4. Demonstrate the ability to integrate faith into a comprehensive conceptualization of substance use problems.

Minor in Alcohol and Drug Counseling (Professional)

24 units

Substance use treatment is an ever-expanding career field, and the professional minor in alcohol and drug counseling gives individuals the foundational knowledge, understanding, and skills needed to enter the field as a bachelor-level staff member. This program prepares students to pursue alcohol and drug counselor credentialing with the California Consortium of Addiction Programs and Professionals (CCAPP), as students who complete this minor satisfy the educational requirements for certified alcohol and drug counselors—although, to qualify for the alcohol and drug counseling credential, additional efforts are required, as outlined and determined by CCAPP.

Note: 6 units of the alcohol and drug counseling professional minor can be used to meet requirements of the psychology bachelor’s completion (BA) program. Specifically, PRPS 455 and PRPS 485 can be used to meet the requirements for both the psychology bachelor’s completion (BA) program and the professional minor. 15 units of this minor, including 3 units of PRPS 455, must be completed at Azusa Pacific University.

Minor in Psychology

18 units

The psychology minor introduces students to the study of human thought and behavior. Specifically, students minoring in psychology are exposed to disciplinary knowledge, critical thinking skills, scientific inquiry, and applications of psychology. This minor is ideal for students from a wide variety of education and career paths who wish to bolster their understanding of, and interactions with, people.

2. CRITICAL THINKING, SCIENTIFIC INQUIRY AND EFFECTIVE COMMUNICATION- Students demonstrate effective expression of critical thought and scientific inquiry in their engagement with (a) psychology literature, (b) conduct of psychological research, and (c) written, (d) oral, and interpersonal communication.

3. VALUES AND ETHICS- Students (a) demonstrate knowledge of the APA ethical (a.1) and multicultural ethical (a.2) standards for the practice of psychology and are able to utilize those standards in decision making and actions in scientific inquiry (a.3), sociocultural (a.4), and interpersonal contexts (a.5). Students (b) articulate and behaviorally express values that build and enhance interpersonal relationships and community engagement at local, multicultural, and cross cultural levels.

4. APPLICATION TO VOCATION- Students demonstrate the ability to utilize and apply psychological knowledge and professional skills to: (a) develop vocational post-baccalaureate goals, (b) work collaboratively with diverse others, (c) serve others needs, (d) self-regulate and manage projects successfully, and (e) solve increasingly complex problems.

5. FAITH INTEGRATION- Students demonstrate skill in the integration of Christian faith and theology with the science of psychology as it relates to the nature and content of: humanity (F1), knowledge (F2), values and ethics (F3), and vocational and spiritual formation (F4).

MS in Child Life

The master's degree in child life (https://www.apu.edu/bas/programs/masters-in-child-life/) is designed to prepare graduates to successfully complete credentialing as child life specialists, who are allied health care professionals with expertise in helping children and their families navigate traumatic and challenging experiences, particularly health crises.

This is an applied/clinical program, with students required to complete a 120-hour practicum in child life followed by a 600-hour hospital internship, in addition to rigorous coursework. The program comprises 42 units and can be completed in 18 months, with available start times in spring and fall. Courses take place primarily in the evenings. There is also online synchronous learning for the Advanced Standing (p. 583) option.

Total Units 42

1 These courses may serve as electives for the MS in Child Life program, or be used as substitutes for required courses by students who enter the program with previous completed coursework that meets the student learning outcomes for required courses. Departmental permission is required for such a substitution.

Admission

University graduate admission and program-specific requirements must be met before an application is complete (see Admission to the University (p. 1092)). Program-specific application requirements are available online (https://tracking.cirrusinsight.com/74647a2d-e9a2-4121-bb55-9859c7aad4ec/apu-edu-graduateprofessionalcenter-admissions-requirements-program/).

International students should contact Graduate and Professional Admissions (https://www.apu.edu/graduateprofessionalcenter/admissions/) for application procedures.

Program Learning Outcomes

Program Learning Outcomes

Students who successfully complete this program shall be able to:

1. Disciplinary Knowledge – Demonstrates theoretical and conceptual knowledge to apply Child Life practices.
2. Critical Thinking, Scientific Inquiry, and Effective Communication – Able to examine and engage in scholarly inquiry and critical thinking, including evaluation and application of evidence based research relevant to child life practices and healthcare delivery system, as a basis to develop, implement and communicate effective interventions.
3. Values and Ethics – Apply knowledge of child life operating principles, code of ethical responsibilities, standards of practice, respect and value for diversity, and factors impacting infants, children, youth and families.
4. Application to Vocation – Develop professional identity demonstrating the ability to integrate and apply Child Life competencies learned in professional settings of practicum and internship.
5. Faith integration – Articulate the intersection of Christian traditions with the Child Life profession using a Christian worldview to integrate faith, beliefs, values, ethics, and service in personal and professional life.

Admission

University graduate admission and program-specific requirements must be met before an application is complete (see Admission to the University (p. 1092)). Program-specific application requirements are available online (https://tracking.cirrusinsight.com/74647a2d-e9a2-412f-9b55-9959c7aacc4ec/apu-edu-graduateprofessionalcenter-admissions-requirements-program/).

International students should contact Graduate and Professional Admissions (https://www.apu.edu/graduateprofessionalcenter/admissions/) for application procedures.

Program Learning Outcomes

Students who successfully complete this program shall be able to:
1. Demonstrate entry-level competence in the core domains of practice identified by the Board of Behavioral Sciences for licensure as an LPCC.
2. Demonstrate core competence in child/youth development, assessment, diagnosis, treatment, psychoeducation, and prevention interventions.
3. Analyze and synthesize disciplinary research and professional literature.
4. Demonstrate professional-level skills in written and oral communication.
5. Demonstrate skills in the integration of Christian faith with professional conceptualization and service delivery in counseling.

MS in Research Psychology and Data Analysis

The Master of Science in Research Psychology and Data Analysis (https://www.apu.edu/bas/programs/research-psychology-data-analysis/) provides research and statistical experience needed to be competitive for doctoral programs and pursue, or advance within, careers related to psychological research. The program consists of a rigorous 36-unit curriculum that can be completed in one academic year, 18 months, or 2 academic years. Students in this program acquire skills in research methods and statistical analyses commonly used within psychological research, and complete a master’s thesis. Courses feature lectures, seminars, and hands-on research labs that incorporate various popular statistical software used within psychology. All courses are offered in a distance learning format that consists of face-to-face and remote students. Face-to-face students attend courses at the Azusa campus, and remote students join the face-to-face course using video conferencing technology. Throughout the program, a faculty advisor works closely with individual students to provide guidance on completing the thesis or practicum/internship, applying to doctoral programs, and pursuing a career in research. In addition, students have the opportunity to participate in professional events, including academic conferences.

Coursework Schedule

Fall (10-13 units): Experimental Research Methods (3), Analysis of Variance (3), Analysis of Variance Lab (1), Theory, Research, and Practice in Psychology (3), Research Practicum (3)

Spring (16 units): Thesis Seminar (3) or Research Practicum (3), Non-Experimental Research Methods (3), Regression (3), Regression Lab (1), Introduction to Grant and Professional Writing (3), Program Evaluation (3)
### Summer I (7 units): Thesis Seminar (3) or Research Internship (3), Psychometrics: Assessment and Measurement (3), Psychometrics: Assessment and Measurement Lab (1).

### Summer II (3 units): Thesis Seminar (3)

Optional Concentrations

Data Analytics
This concentration equips students with statistical and data visualization techniques. It consists of courses that develop students’ skill in statistical programming, including R and SAS, data visualization using Tableau, and data mining. Such training prepares students to pursue careers in business and/or data analytics.

Industrial/Organizational Psychology
Organizational psychology, often called industrial/organizational psychology, considers the attitudes, feelings, and behaviors of people in the workplace. At the intersection of business and psychology, courses in this concentration help you discover your ability to diagnose organizational health; develop and implement change initiatives; administer and create job satisfaction surveys; increase employee morale and expand retention strategies; advance performance management programs; hire, train, and develop talent; and advise, coach, and build successful teams.

Counseling Psychology
This concentration is for students who are interested in getting a PhD in clinical/counseling psychology and would like to take graduate courses that would expose them to this area of psychology. Students wishing to complete this concentration need to complete three courses from the MS in Counseling Psychology program (p. 584) as outlined in program requirements.

Public Health
This concentration equips students with conceptual and applied knowledge of the public health field. Students learn important areas of public health, including how health and diseases are influenced by social, economic, and political risk factors; ethical considerations and healthcare policies; epidemiological procedures; and issues in environmental health.

1 The cost per unit for the concentration is based on the cost of the concentration courses, and may be different from per-unit cost for the MS in Research Psychology and Data Analysis.

Graduation
In order to graduate, students must complete the required courses with an overall grade-point average (GPA) of at least 3.0 within five years of matriculation. This includes completing every required course with a B- or above. Students must also complete a master’s thesis according to the guidelines outlined by the program and university, or a practicum and internship as outlined by the program.

Admission
University graduate admission and program-specific requirements must be met before an application is complete (see Admission to the University (p. 1092)). Program-specific application requirements are available online (https://tracking.cirrusinsight.com/74647a2d-e9a2-4121-9b55-9959c7aac4ec/apu-edu-graduateprofessionalcenter-admissions-requirements-program/).

International students should contact Graduate and Professional Admissions (https://www.apu.edu/graduateprofessionalcenter/admissions/) for application procedures.

Program Learning Outcomes

Students who successfully complete this program shall be able to:
1. Explain the knowledge and skills used in assessment/measurement, research design, and statistical methods in psychology.
2. Apply various theories of psychology used in assessment/measurement, research design, and statistical methods in psychology.
3. Examine the integration of psychological research with a Christian worldview.
4. Articulate the APA codes, standards, and ethics of psychological research and practice in various applied settings.
5. Demonstrate graduate level APA formatting skills for writing and presentations.
Department of Social Work

Social workers help people manage and overcome some of life’s most difficult challenges, such as poverty, addiction, discrimination, physical and mental illness, and abuse. They provide individual, family, and group intervention; facilitate crisis prevention and intervention; advocate and participate in political action; provide management and leadership in social welfare and nonprofit agencies; and collaborate with communities to develop necessary social and economic resources. Social workers are especially committed to advancing social justice and increasing opportunities for vulnerable populations.

Courses

**SOCW 250, Introduction to Social Work, 3 Units**
This course introduces students to the social work profession, social welfare system, and policies in the United States. The course examines the requirements for social work practice, articulates the identity of the profession, and discovers the various settings of social work practice. Meets the General Education Requirement: Civic Knowledge and Engagement.

**SOCW 251, Social Welfare Policy and Service, 3 Units**
This course examines social welfare policies and programs developed to meet human needs in American society. The course explores diversity of political, cultural, historical, economic, and ideological influences on social welfare policy. The course explores how critical thinking advances social and economic justice and delivery of effective social work services.

**SOCW 275, Social Justice Foundations for Human Rights, 3 Units**
The Social Justice Foundations in Human Rights course will examine assumptions and biases in regards to race, age, social class, religion, gender, sexual orientation and ability. This course will evaluate causes of community concern in the areas of civil rights, immigration, poverty, human trafficking, disabilities and war. It will review issues of oppression and discrimination. This course will have students gain insight and self-awareness in their interactions with individuals of from different cultural backgrounds. Students will practice developing action plans to promote social justice in targeted groups. Meets the General Education Requirement: Intercultural Competence.

**Prerequisite:** Sophomore Standing

**SOCW 310, Human Behavior and the Social Environment I, 3 Units**
This course is a study from a multi-theoretical perspective of the interaction of cultural, biological, psychological, social, spiritual, and environmental reciprocal interactions. This course focuses on human development from birth through adolescence. The knowledge of human behavior and the social environment will be applied utilizing bio-psycho-social-spiritual frameworks to guide the process of assessment, intervention, and evaluation.

**Prerequisite:** Sophomore standing, recommended SOC 120 and PSYC 110

**SOCW 311, Human Behavior and the Social Environment II, 3 Units**
This course is a study from a multi-dimensional perspective of the interaction of cultural, biological, psychological, social, spiritual, and environmental influences that promote or deter the development of individuals from young adulthood through old age and death. This course builds upon the material presented in HBSE I, and further explores theoretical models for understanding and assessing macro systems.

**Prerequisite:** SOCW 310 and Sophomore standing
SOCW 332, Social Work Practice with Individuals and Families, 3 Units
This is the first of a two-semester, three-course practice sequence wherein the student will identify professional generalist social work practice behaviors. The course will develop the student's ability to think critically and apply social work ethical principles to guide practice. The course uses evidence-based practice methods in practice which engage, assess, intervenes, and evaluates individuals and families.
Prerequisite: Application and acceptance into the Social Work Major

SOCW 333, Social Work Practice with Communities and Organizations, 3 Units
Social Work Practice with Communities and Organizations is another course in the generalist social work practice sequence. The Course will focus on macro social work practice, community organizing, and development. The course will provide students with the knowledge and skills needed for ever-changing contexts and the social service delivery systems used to respond to such contexts.
Prerequisite: SOCW 332

SOCW 335, Community Transformation, 6 Units
This course offers a formal and experiential study of the transformation of urban, multicultural communities with the goal of developing a service ethic through a semester-long internship. Involves directed reading, reflective papers, a service practicum, and group discussions--aimed at both the transformation of the student community and the wider L.A. community. Course is available only through the L.A. Term Program.

SOCW 350, Aging: Implications for Policy and Practice, 3 Units
This course offers an introduction to social work practice with older adults with attention given to current research, policies, and problems faced by the elderly, and the impact of the older adult population on society. Resources, programs, and services which focus on the well-being for the older adult population will be introduced.
Prerequisite: SOCW 251 or instructor consent

SOCW 351, Child Welfare, 3 Units
Students explore programs and policies that have been developed to meet the well-being of children and families. The issues affecting these programs and policies are studied to determine how policy impacts the delivery of child welfare programs.
Prerequisite: SOCW 250, SOCW 251 or instructor consent

SOCW 360, Social Work Practice with Groups, 3 Units
Social Work Practice with Groups is another course in the generalist social work practice sequence. This course introduces students to utilize group theories and leadership skills in social work practice. Students will demonstrate mezzo practice knowledge and skills by identifying, analyzing, and implementing evidence-based interventions designed to achieve client goals.
Prerequisite: SOCW 250, SOCW 332

SOCW 380, Understanding International Social Problems and Services through Study Abroad, 3 Units
Through classroom instruction, time spent in an international setting, and debriefing sessions, students in this course learn about social problems and social welfare systems of service delivery outside of the United States. Emphasis is on a global perspective of social work practice, enriching cultural experiences, and a comparison of domestic and international methods of addressing human needs through social policies and programs.
Prerequisite: SOCW 333 and SOCW 360; or instructor approval.

SOCW 400, Fundraising, Grant Writing, and Fiscal Decision Making, 3 Units
This course prepares students for potential fundraising, grant writing, program design and evaluation, and fiscal decision-making responsibilities in human services organizations. Students assess local agencies and analyze funding resources, strategies, skills, and decision-making processes. Assignments focus on grant writing, developing fundraising strategies, and applying knowledge of ethical management and fiscal practices.
Prerequisite: SOCW 333

SOCW 410, Family Violence, 3 Units
Family violence is an in-depth study from a system's perspective of violence that occurs in families. This course provides an overview of child abuse, spousal abuse, abuse between intimate partners, and elder abuse. The course explores the theory and research as to the causes of abuse, including individual and family factors, elder abuse, gender issues, community and societal influences, and cultural factors. This course explores the policy and programs developed to deal with these crises. Finally, methods of assessment and intervention are investigated as applicable to both professional and personal situations.
Prerequisite: Junior or senior standing or instructor's consent

SOCW 411, Intimate Relationship Violence: Assessment and Intervention, 3 Units
This course is an in-depth study of intimate relationship violence, exploring the theory and research as to the causes of violence, gender and sexuality issues, community and societal influences, and cultural factors. Methods of assessment are investigated, as are policies and programs developed to intervene within micro and macro contexts. Course, with additional fee, meets California domestic violence counselor certification.
Prerequisite: Junior or senior standing or instructor's consent.
SOYW 415, Substance Use Disorders: Assessment and Intervention, 3 Units
This course provides an overview of substance use disorders from a bio-psycho-social-cultural-spiritual perspective. Unique issues relative to children/adolescents, women, people with disabilities, LGBT individuals, the elderly, and minorities are explored. The course focuses on a review of various types of substance use disorders; theory on the etiology and process of substance use disorders and their treatment; information on assessment, referral, and treatment resources; and exploration of the historical and current responses to substance use disorders in the community as well as in the Church.
Prerequisite: Junior or senior standing or instructor’s consent

SOYW 420, Suffering: Theological and Practical Perspectives on Disabilities, 3 Units
This course examines theological perspectives to understand the role of suffering in the human experience. Focusing on persons with disabilities, students explore their personal values, gain understanding of bio-psycho-social-spiritual components of disability, access available resources, and develop strategies to help churches/organizations develop inclusive programs.
Prerequisite: 3 units of UBBL and Junior standing

SOYW 425, Introduction to International Development, 3 Units
This course provides students with an opportunity to consider the theories and “on the ground” issues concerning international development. In addition, because non-governmental organizations are the primary organisms through which international development is conducted, students will familiarize themselves with the strengths and limitations these organisms bring to the development process.
Prerequisite: Junior or Senior Standing

SOYW 430, Introduction to Nonprofit Management, 3 Units
Students go out into the world and work for nonprofit organizations. The goals of the course are to enrich student perspective regarding nonprofits, to give them opportunity to apply their knowledge to the analysis of nonprofit managerial situations and to provide them with an understanding of the opportunities and power of nonprofit management.
Prerequisite: Junior or Senior Standing

SOYW 440, Social Work and Law, 3 Units
Students in this course gain an increased understanding of the United States legal system and learn how to apply this understanding within social work practice. Students engage with case law as it pertains to the field of social work and social services. Students also have opportunities for critical analysis, and for refining of advocacy and problem-solving skills.
Prerequisite: Junior or senior standing or instructor approval.

SOYW 466, Field Internship I, 4 Units
This social work practicum provides a setting for the development of practice skills and an opportunity for the integration of knowledge, skills, and values in social work. Students complete a minimum of 400 hours in an approved agency.
Prerequisite: SOYW 310, SOYW 311, SOYW 333 or SOYW 335, SOYW 360,
Corequisite: SOYW 467

SOYW 467, Senior Practicum Seminar I, 3 Units
This seminar course integrates the generalist practice knowledge and skills of a social work professional. Students learn how to identify and conduct themselves as professional social workers in their respective internship contexts. Evidence-based practice skills are developed to help students engage in research-informed practice and learn how practice shapes research. This course comprises the first semester of a two-semester course sequence. Meets the General Education Requirement: Integrative and Applied Learning.
Prerequisite: SOYW 310 (C or above), SOYW 311 (C or above), SOYW 333 or SOYW 335, SOYW 360.

SOYW 468, Field Internship II, 4 Units
This social work practicum provides a setting for the development of practice skills and an opportunity for the integration of knowledge, skills, and values in social work. Students complete a minimum of 400 hours in an approved agency.
Prerequisite: SOYW 466, SOYW 467
Corequisite: SOYW 469

SOYW 469, Senior Practicum Seminar II, 3 Units
This final Social Work Seminar will focus on integration of learning and practice in preparation for beginning generalist social work practice for students currently in field placement. Students will identify, critique, and apply evidence based practice models in field practice. Emphasis will be placed on practice skills of engagement, assessment, intervention and evaluation according to the NASW Code of Ethics.
Prerequisite: SOYW 310 (C grade or above), SOYW 311 (C grade or above), SOYW 333 or SOYW 335, SOYW 360, SOYW 466

SOYW 478, Social Work Research Methods, 3 Units
This course prepares students for evidence-informed practice and research by introducing a range of social science research methods, skills in research evaluation and critique, and development of a social science research proposal informed by their field internship practice experience.
Prerequisite: MATH 130.
Corequisite: SOYW 466, SOYW 467
SOCW 479, Writing 3: Social Work Research Project, 3 Units
In this course, students prepare for evidence-informed practice and research by conducting an empirical study based on the research proposal completed in the Social Work Research Methods course (SOCW 478). Students learn to apply critical thinking to inform and communicate professional judgment through the process of data collection, data analysis, and writing a research report. Meets the General Education Requirement: Writing 3: Writing in the Disciplines.
Prerequisite: MATH 130, SOCW 478, and Writing 2 or Honors course equivalency;
Corequisites: SOCW 468 and SOCW 469

SOCW 497, Readings in Social Work, 1-4 Units
This is a program of study concentrating on assigned readings, discussion, and writing arranged between, and designed by, a student of upper-division standing and a full-time professor. An independent study fee is assessed for each enrollment in this class.

SOCW 499, Special Topics, 1-6 Units
Special topics courses offer undergraduate-level content that will augment the set social work curriculum. These courses include a wide range of specialized topics relevant to professional social workers. The unit value of these courses range from one to six unit credits, depending upon the specific contact hours and course workload.
Prerequisite: Junior or Senior Standing; Acceptance into the Social Work program

SOCW 511, Introduction to the Social Work Profession, 2 Units
Content focuses on the history, identity, values, ethics, scope of practice, and knowledge base of the social work profession. Students explore ways their own backgrounds and beliefs are likely to influence professional activities, and examine the specific relationship of faith perspectives to social welfare policy and practice. Attention is given to developing professional writing and critical thinking skills.
Prerequisite: Admission to MSW program

SOCW 512, Social Welfare Policy and Policy Practice, 3 Units
The course provides an introduction to American social welfare policies, offers a historical overview of political influences on social work practice, and presents different models for political advocacy. Content focuses on political and client advocacy with attention to the relevance of professional ethical standards and faith perspectives to policy practice.
Prerequisite: Admission to MSW program

SOCW 513, Micro-theory and Human Development, 3 Units
Content will focus on theories that inform micro-level social work practice with individuals and families using a bio-psychosocial and spiritual framework. Human development across the life course is addressed with psychosocial theory’s life stages to assist with the contextualization and integration of theories to meet the needs of diverse populations in practice.
Prerequisite: Admission to MSW program

SOCW 514, Practice I - Interviewing and Assessment, 3 Units
This course begins a two-course sequence that provides the foundation for social work practice with individuals and families. Content includes legal and ethical practice, stages of the helping process, interviewing and assessment skills with adults, children, and families, clinical assessment and diagnosis using the DSM, and strategies for critically analyzing and sharing assessment information.
Prerequisite: Admission to MSW program

SOCW 515, Field Seminar I, 1 Unit
Field seminars meet in conjunction with field coursework and provide students opportunities to discuss practice situations, professional development issues, the relationship of field to classroom learning, and skills necessary for effective practice. Generalist foundation year field seminars (I and II) focus on beginning generalist social work practice skills, understanding agency and community context, and professional ethics.
Prerequisite: Admission to the Social Work program;
Corequisite: SOCW 516

SOCW 516, Field I, 3 Units
The purpose of field internship is to provide a professional setting for students to practice generalist foundation social work skills and to provide an opportunity for the integration of knowledge, skills, values, and ethical faith integration in practice. Students complete a minimum of 480 hours by the end of semester I and semester II at an approved and designated social welfare agency.
Prerequisite: Admission to the Social Work program;
Corequisite: SOCW 515

SOCW 521, Introductory Research Methods, 2 Units
Content will introduce critical evaluation of social work research and evidence informed social work practice, along with how research can ethically be used to improve practice at individual and agency levels. Concepts include: problem identification, hypothesis formulation, measurement, sampling, qualitative and quantitative research designs, data collection methods, data analysis, and program evaluation. Students will explore how science, scholarship, and the politics of knowledge development can facilitate the mission of social work.
Prerequisite: Statistics course
SOCW 522, Diversity and Social Justice, 3 Units
Content will focus on diverse populations in American society and ways historical and contemporary patterns of oppression and discrimination may influence social work practice. Specific attention is given to self-awareness and to professional commitments to marginalized groups and processes of advocacy, coalition-building, and other ways of developing effective alliances to promote social justice.
Prerequisite: Admission to MSW program

SOCW 523, Macro-theory and Communities/Organizations, 3 Units
Content will focus on macro-level theories and social work practice with organizations and communities. Models of practice that include comprehensive assessment, integrating an understanding of various forms and mechanisms of discrimination and oppression and their relevance to macro-level interventions, will be examined. Social work with organizations and communities embraces efforts to protect human and civil rights for the advancement of social and economic justice.
Prerequisite: SOCW 513

SOCW 524, Practice II - Intervention and Evaluation, 3 Units
This course ends a two-course sequence that provides the foundation for social work practice with individuals and families. Content includes goal-setting and contracting, planning and implementing change strategies, utilizing evidence-based practice research, interdisciplinary collaboration, advocacy, resource development, and practice evaluation.
Prerequisite: SOCW 514

SOCW 525, Field Seminar II, 1 Unit
Field seminars meet in conjunction with field coursework and provide students opportunities to discuss practice situations, professional development issues, the relationship of field to classroom learning, and skills necessary for effective practice. Generalist foundation year field seminars (I and II) focus on beginning generalist social work practice skills, knowledge and use of self, and professional ethics.
Prerequisite: SOCW 514, SOCW 515, and SOCW 516; Corequisite: SOCW 526

SOCW 526, Field II, 3 Units
The purpose of field internship is to provide a professional setting for students to practice generalist foundation practice skills and to provide an opportunity for the integration of knowledge, skills, values, and ethical faith integration in practice. Students complete a minimum of 480 hours by the end of semester I and semester II at an approved and designated social welfare agency.
Prerequisite: Admission to MSW program, SOCW 515, and SOCW 516; Corequisite: SOCW 525

SOCW 527, Research for Evidence-Informed Practice, 2 Units
The content of this course prepares students to critically evaluate social work research and evidence-informed social work practice, along with the ethical use of research methods to improve clinical practice. Concepts include problem identification, hypothesis formulation, measurement, sampling, qualitative and quantitative research designs, data collection methods, data analysis, and outcomes evaluation. Students explore how science, scholarship, and the politics of knowledge development can facilitate the mission of social work.
Prerequisite: Statistics course

SOCW 528, Research for Data Driven Change, 2 Units
This course will introduce critical evaluation of social work research and its ethical application towards data-driven decision-making within community practice settings. Concepts include: problem identification, hypothesis formulation, measurement, sampling, research design, data collection methods, data analysis, and program evaluation. Students will explore how science, scholarship, and the politics of knowledge development can facilitate the mission of social work.
Prerequisite: Statistics course

SOCW 529, Human Rights and Sustainable Development Policy, 2 Units
Content will focus on the relevance of human rights and sustainable development policy to macro-level social work practice in the U.S. and abroad. Topics will include advancement of human rights for social, economic and environmental justice and sustainable development strategies for poverty alleviation, universal education, public health, sanitation and housing, food security, access to clean water, population control and climate change. Analysis of existing global social policies will apply existing political, ideological, religious, cultural, age, and gender frameworks to explain current conditions and future trends. Secular and Christian perspectives will be explored.
Prerequisite: SOCW 522 and SOCW 523

SOCW 530, Organizing for Community Change, 3 Units
This course expands foundation year macro-level practice content to enhance theoretical understanding and develop skills in the promotion of community, organizational, and policy change to enhance social well-being and advance social justice. Special attention is focused on collaborative efforts, coalition building and participatory methods to facilitate sustainable change. Additional topics include assessment of social service delivery systems, advocacy, and professional ethics in macro practice. The importance of engaging diverse communities, recognition of underrepresented and underserved populations, and utilizing cultural humility in practice are emphasized.
Prerequisite: SOCW 523
**SOCW 531, Human Rights and Sustainable Development, 2 Units**
Content will focus on the relevance of human rights and sustainable development to macro-level social work practice in the U.S. and abroad. Topics will include advancement of human rights and economic justice, poverty alleviation, politics, religion, culture, age, gender, and public health conditions on human rights and development-related activities. Secular and Christian perspectives will be explored.
**Prerequisite:** SOCW 522 and SOCW 523

**SOCW 532, Advanced Community Practice, 3 Units**
This course expands foundation year macro-level practice content to include community entrance, engagement, participatory action research, and collaborative strategies to advance policies and programs supporting community interests and desired resources. Additional topics include empowerment, development of cultural competence, identification of oppressive cultural structures, globalization, and professional ethics. Engaging diverse communities and cultural humility are emphasized.
**Prerequisite:** SOCW 523

**SOCW 533, Organizational Behavior and Management, 3 Units**
This course provides an overview of organizational behavior and effective management practices within the social service sector. Topics include: human resource/legal/ethical issues; employee diversity; organizational culture; conflict resolution; group behavior; employee training/development; hiring practices; employee motivation; budgeting; and managing organizational change. Emphasis is placed on professional written and verbal communication.
**Prerequisite:** SOCW 523

**SOCW 534, Field Seminar III, 1 Unit**
Field Seminar III focuses on presentation and discussion of student experiences in specialization field internships. Specific emphasis is placed on demonstration and evaluation of advanced practice skills, interventions, supervision use, cultural responsiveness, professional ethics, and faith integration issues addressed in coursework.
**Prerequisite:** SOCW 514, SOCW 515, SOCW 516, SOCW 524, SOCW 525, SOCW 526; **Corequisite:** SOCW 527 and SOCW 539 (clinical specialization) or SOCW 528 and SOCW 535 (community leadership and program administration specialization)

**SOCW 535, Field III - Community Leadership and Program Administration, 3 Units**
The purpose of field internship is to provide a setting for students to develop advanced community practice skills and an opportunity for the ethical integration of knowledge, skills, values, and faith in social work. Students complete a minimum of 480 hours (600 hours for Advanced Standing students) by the end of semester I and semester II at an approved and designated agency.
**Prerequisite:** SOCW 514, SOCW 515, SOCW 516, SOCW 524, SOCW 525, SOCW 526; **Corequisites:** SOCW 528, SOCW 534

**SOCW 536, Adult Behavioral Health and Diagnosis, 3 Units**
This course begins a two-semester advanced clinical practice sequence focusing on adult behavioral health. Content includes advanced application of the Diagnostic and Statistical Manual for Mental Disorders (DSM-5); symptoms, diagnoses, and treatment strategies associated with psychiatric conditions; brain functioning and chemistry; psychotropic medications; and managed care expectations. Cultural and faith perspectives are integrated throughout the course using clinical best practices.
**Prerequisite:** SOCW 514 and SOCW 524

**SOCW 537, Child and Adolescent Behavioral Health and Diagnosis, 3 Units**
This course focuses on behavioral health issues experienced by children and adolescents, and discussion of the effects of trauma on social and emotional development. Diagnostic issues affecting children and related treatment interventions are explored in the contexts of child welfare, school-based behavioral health, and healthcare settings. Research-informed approaches are taught, to improve functioning and well-being of children and adolescents. Laws impacting work with minors and families, as well as ethical issues for social work practitioners, are presented. Course content meets California education requirements in the area of child abuse assessment for LCSW licensure.
**Prerequisite:** SOCW 513, SOCW 514, and SOCW 524

**SOCW 538, Clinical Practice with Groups, 2 Units**
This course presents different theoretical approaches and treatment strategies associated with clinical social work practice with groups. Topics include group development stages, professional ethics in practice with groups, leadership principles, diversity issues, and evaluation methods.
**Prerequisite:** SOCW 513

**SOCW 539, Field III-Clinical Practice, 3 Units**
The purpose of field internship in the clinical specialization year is to provide a setting for students to develop advanced practice skills and an opportunity for the integration of knowledge, skills, and social work values as applied to clinical practice across the life span continuum. Students complete a minimum of 480 hours (or 600 hours for Advanced Standing students) by the end of fall and spring semesters at an approved and designated agency.
**Prerequisite:** SOCW 514, SOCW 515, SOCW 516, SOCW 524, SOCW 525, SOCW 526; **Corequisites:** SOCW 527, SOCW 534
SOCW 540, Educational Policy, 3 Units
This course introduces policies and legislation that impact delivery of school social work services in the United States education system. Landmark local, state, and federal policies are presented for analysis and application to the public school setting, critical for gaining an understanding of the challenges for school social work practice. Historical and current perspectives including racism, equality, and access to public education are discussed.
Prerequisite: Completion of generalist foundation curriculum; admission to the PPS program (required for students seeking the PPSC).

SOCW 541, Capstone Leadership Project, 3 Units
This course prepares students for professional leadership roles in social work settings and supports completion of their capstone leadership projects. Content integrates development of leadership skills, self reflection, professional use of self, interprofessional practice, use of research to inform practice, and knowledge of program context to implement sustainable change in organizations. Professional ethics and decision making, which influence the leadership role in social work, are examined.
Prerequisite: All generalist foundation courses and completion of first semester of specialization courses.
Corequisites: SOCW 544; and SOCW 545 or SOCW 548

SOCW 542, International Social Work Policy and Practice, 2 Units
Content will focus on international social work practice at multiple systems levels. Topics will include comparison of United States’ and international social welfare policy, differing theoretical and religious perspectives, neo-liberal economic development policies, globalization, and issues immigrants and other marginalized groups. Practice content will address poverty alleviation, conflict and post-conflict reconstruction, displacement and forced migration concerns.
Prerequisite: SOCW 522, SOCW 523, SOCW 531, SOCW 532

SOCW 543, Fundraising, Grant Writing, and Fiscal Decision Making, 3 Units
This course prepares students for potential fundraising, grant writing, program design and evaluation, and fiscal decision-making responsibilities in human services organizations. Students assess local agencies and analyze funding resources, strategies, skills, and decision-making processes. Assignments focus on grant writing, developing fundraising strategies, and applying knowledge of ethical management and fiscal practices.

SOCW 544, Field Seminar IV, 1 Unit
Field Seminar IV focuses on presentation and discussion of students experiences in specialization year field internships and preparation for masters-level social work employment and licensure. Specific emphasis is placed on critical thinking and communication of professional judgments, integration of theory, assessment, intervention, and evaluation, as well as professional development issues.
Prerequisite: SOCW 514, SOCW 515, SOCW 516, SOCW 524, SOCW 525, SOCW 526, SOCW 534, SOCW 535 or SOCW 539; Corequisite: SOCW 541; and SOCW 545 or SOCW 548

SOCW 545, Field IV - Community Leadership and Program Administration, 3 Units
Field internship provides a setting for students to utilize advanced community practice skills and an opportunity for the ethical integration of knowledge, skills, values, and faith in social work. Students complete a minimum of 480 hours (600 hours for Advanced Standing students) by the end of semester I and semester II at an approved and designated agency.
Prerequisite: SOCW 514, SOCW 515, SOCW 516, SOCW 524, SOCW 525, SOCW 526, SOCW 534, and SOCW 535; Corequisite: SOCW 541, SOCW 544

SOCW 546, Family Therapy in Context, 3 Units
This course focuses on family practice contexts and theories of child welfare and family therapy. Content includes social worker roles and scope of practice in child welfare practice, and current approaches to assisting families in the child welfare system. Also included is the demonstration and practice of family therapy, application of theory, and assessment and intervention on diverse family systems. Course material also addresses legal and ethical problem solving related to contemporary professional ethics and statutes and regulations related to family law.
Prerequisite: SOCW 513, SOCW 523

SOCW 547, Health and Behavioral Health Policy, 2 Units
This course explores American social welfare policies relevant to health and behavioral health care. Course content includes the historical and social contexts of health and behavioral health care, and the roles of the public and private sectors in shaping contemporary trends and issues, particularly among vulnerable communities. Topics include healthcare reform, integrated care, access/treatment disparities, advocacy and policy reform, and the recovery model.
Prerequisite: SOCW 512

SOCW 548, Field IV - Clinical Practice, 3 Units
Field internship in the clinical specialization year provides a setting for students to develop advanced practice skills, and an opportunity for the integration of knowledge, skills, and social work values as applied to clinical practice across the life span. Students complete a minimum of 480 hours (or 600 hours for Advanced Standing students) by the end of fall and spring semesters at an approved, designated agency.
Prerequisite: SOCW 514, SOCW 515, SOCW 516, SOCW 524, SOCW 525, SOCW 526, SOCW 534, and SOCW 539; Corequisites: SOCW 541 and SOCW 544
SOCW 550, Advanced Standing: Intermediate Praxis, 3 Units
Content focuses on theory/practice integration in professional social work. Students apply different worldviews and micro- and macro-level theories to case examples drawn from professional social work, and identify implications for intervention and evaluation. Models of practice involving diverse communities and social welfare organizations are explored.
Prerequisite: Admission to advanced standing MSW program;
Corequisite: SOCW 551

SOCW 551, Advanced Standing: Social Work Ethics and Practice, 3 Units
This advanced-standing course provides overviews of the legal and ethical practice standards in social work, and addresses the skills required for effective engagement, assessment, intervention, and evaluation with individuals, families and groups. Assignments focus on social work practice skill development, application of documentation standards, use of evidence-informed practice methods, and integration of legal and ethical issues impacting practice.
Prerequisite: Completion of BSW degree; statistics course with a grade of C or higher.

SOCW 552, Program Planning and Evaluation, 3 Units
Systematic program planning with a focus on outcomes is a critical component in operating effective human service programs. Over the course of this semester, you will become familiar with program design and program evaluation methodologies, and the tools most commonly used to assess human service programs. Additional topics will include identification and use of performance measures, the roles of evaluators and stakeholders, the influence of the political environment, technology applications, and applicable ethics related to program design and evaluation. At the completion of this course you will be prepared to design and implement programs and conduct outcome evaluations to ensure program efficiency and effectiveness for clients, staff and external funding sources.
Prerequisite: Completion of generalist foundation coursework

SOCW 553, Field V Clinical: School Social Work, 3 Units
The PPSC school social work field internship provides a setting for students to develop advanced clinical practice skills in preparation for practice in school settings, and an opportunity for the ethical integration of knowledge, skills, values, and faith in social work. Students accrue field hours at an approved and designated school site in the fall and spring semesters of their specialization year; a total of 600 hours (450 in school social work and 150 in child welfare and attendance) is required by the end of the spring semester. This is the first of a two-semester course sequence with SOCW 555.
Prerequisite: MSW Students: SOCW 514, SOCW 515, SOCW 516, SOCW 524, SOCW 525, & SOCW 526. Post-MSW Students: MSW from a CSWE-accredited program, and acceptance into the APU PPSC program.
Corequisites: MSW students: SOCW 527, SOCW 554

SOCW 554, Field Seminar V Clinical: School Social Work, 1 Unit
This seminar course focuses on discussion of student experiences in the PPSC school social work field internships. Emphasis is on demonstration and evaluation of advanced practice skills, interventions, supervision use, cultural responsiveness, professional ethics, and faith integration issues addressed in the PPSC field experience. This is the first of a two-semester course sequence with SOCW 556.
Prerequisite: MSW Students: SOCW 514, SOCW 515, SOCW 516, SOCW 524, SOCW 525, & SOCW 526. Post-MSW Students: MSW from a CSWE-accredited program, and acceptance into the APU PPSC program.
Corequisites: MSW students: SOCW 527, SOCW 553

SOCW 555, Field VI Clinical: School Social Work, 3 Units
The PPSC school social work field internship provides a setting for students to develop advanced clinical practice skills in preparation for practice in school settings, and an opportunity for the ethical integration of knowledge, skills, values, and faith in social work. Students accrue field hours at an approved and designated school site in the fall and spring semesters of their specialization year; a total of 600 hours (450 in school social work and 150 in child welfare and attendance) is required by the end of the spring semester. This is the second of a two-semester course sequence with SOCW 553.
Prerequisite: MSW students: SOCW 514, SOCW 515, SOCW 516, SOCW 524, SOCW 525, SOCW 526, SOCW 553, and SOCW 554; Post-MSW students: MSW degree from a CSWE-accredited program, and acceptance into the APU PPSC program.
Corequisite: SOCW 556

SOCW 556, Field Seminar VI Clinical: School Social Work, 1 Unit
This seminar course focuses on discussion of student experiences in the PPSC school social work field internship. Emphasis is on demonstration and evaluation of advanced practice skills, interventions, supervision and consultation, cultural responsiveness, professional ethics, and faith integration issues that occur in the field internship experience. This is the second of a two-semester course sequence with SOCW 554.
Prerequisite: MSW students: SOCW 514, SOCW 515, SOCW 516, SOCW 524, SOCW 525, SOCW 526, SOCW 553, SOCW 554. For Post-MSW students: MSW degree from a CSWE-accredited program, and acceptance into APU PPSC program.
Corequisite: For all students: SOCW 541, SOCW 555

SOCW 560, Social Work Practice in Healthcare Settings, 3 Units
This elective course offers an introduction to social work practice in healthcare settings, with a focus on the specific knowledge and skills essential for effective intervention. Students critically analyze the U.S. healthcare system as compared to international models, and apply clinical skills and relevant laws to interdisciplinary practice while understanding the context of the political, societal, and economic influences that impact service delivery and available resources. The course also articulates how a Christian worldview relates to ethical social work practice within the field of health care.
SOCW 561, Treatment of Substance Use Disorders, 3 Units
This course describes substance use disorders from a biopsychosocial-cultural-spiritual perspective, emphasizing assessment and intervention skills, processes, and evidence-informed research relevant to treatment using the recovery model. Diversity issues involving policy and practice are explored. Course content meets California Board of Behavioral Sciences prelicensure requirement in the area of alcohol and other substance abuse assessment.

SOCW 562, Urban Social Welfare, 3 Units
Course integrates on-site experiential learning with classroom education focused on urban issues of homelessness, gang involvement, and immigration. Students engage in weekly on-site learning activities in high-need areas of Los Angeles and Orange County. Content includes theological and sociological perspectives on urban issues as well as urban social work practice. Elective

SOCW 563, School Social Work, 3 Units
This course uses an ecological perspective in teaching the practice of social work in schools. Topics include the historical, theoretical, legal, research, policy, and practice issues relevant to the delivery of school social work services; the roles and tasks performed by social workers in public schools; school social work practice models; and the professional code of ethics. The purpose of this course is to develop the knowledge, skills, and abilities necessary for successful and competent practice with students, families, schools, and communities.

Prerequisite: Completion of generalist foundation curriculum; admission to the PPS program (required for students seeking the PPSC).

SOCW 564, Social Work and the Bible: Christian Perspectives on Service and Professional Practice, 3 Units
This course focuses on theological and social work perspectives on the relevance of the Bible to professional practice activities. Content addresses diverse Christian perspectives on social welfare policies and faith integration in different practice environments. Distinctions between professional social work, Christian counseling, and missionary activity are explored. Elective

SOCW 565, Clinical Spanish Practice, 3 Units
This course prepares students to utilize clinical practice skills in the Spanish language, including assessment, engagement, intervention, and evaluation of services with individuals, groups, and communities. Content covers diversity issues such as cultural competence and understanding of the Latino/a culture and its intragroup differences, and equipping students to confront biases, myths, and stereotypes in the client-practitioner therapeutic relationship. Course is conducted primarily in Spanish.

Prerequisite: SOCW 514 and SOCW 524

SOCW 566, Social Work, Health, and Aging, 3 Units
This course explores concepts, social policies, resources, and interventions related to social work practice with the older adult population. Content integrates themes of diversity, ageism, empowerment, and faith, as well as community-based and cross-cultural competence. Content includes a focus on biopsychosocial assessment, with emphasis on functional and cognitive status, integrated healthcare practice, interdisciplinary practice, and end-of-life care. This course meets California Board of Behavioral Sciences requirements for clinical social work licensure.

SOCW 567, Couples Therapy, 3 Units
This course is an overview of current theories, methods, and psychological instruments used in couples therapy interventions. Content includes detection, assessment, and intervention strategies for spousal or partner abuse, meeting California requirements for training in the area of domestic and family violence for MFT and LCSW licensure. Students apply course material to role-play scenarios during class time. Attention is given to issues of ethnic diversity, blended families, and faith integration.

Prerequisite: Completion of generalist foundation coursework or admission into the Advanced Standing program.

SOCW 568, Military Social Work, 3 Units
This course helps students understand the unique and complex needs of active-duty service members, veterans, and family members of military personnel, presenting knowledge and skills essential to effective clinical social work practice with these populations. Topics include military culture, ethical issues, diversity, faith integration, trauma, assessment, family issues, reintegration, domestic violence, substance use, homelessness, suicide, building resiliency, and evidence-informed interventions for use in interprofessional settings.

SOCW 569, Human Sexuality and Sex Therapy, 3 Units
This course reviews human sexuality as a basis for sex therapy and clinical social work involving sexuality issues. Students examine and evaluate biological, psychological, social, moral, and faith perspectives on sexual development and functioning. In addition, students survey literature on sexual dysfunction, and learn treatment strategies utilized in various social work contexts and systems of marital and sex therapy. This course meets California Board of Behavioral Sciences requirements for clinical social work licensure.

SOCW 570, International Social Work Policy and Practice, 3 Units
Content focuses on international social work practice at multiple systems levels. Topics include comparison of U.S. and international social welfare policies; different theoretical, economic, cultural, ideological, and religious perspectives; neoliberal economic development policies; issues involving immigrants and other marginalized groups; and the impact of globalization and climate change on rapid urbanization and population growth. Practice content addresses poverty alleviation, conflict and postconflict reconstruction, and displacement and forced migration concerns.

Prerequisite: SOCW 522 and SOCW 523
**SOCW 595, Special Topics, 1-6 Units**
Special topics courses offer graduate-level content that is typically scheduled in an intensive format. These courses include a wide range of specialized topics relevant to professional social workers. The unit values of these courses range from 1-6 depending upon the specific contact hours and coursework load. Note: Elective offerings vary year to year.

**SOCW 599, Readings in Social Work, 1-3 Units**
Students enroll in this course to pursue independent study of professional interests/activities. Students explore topics in greater depth than in regular course offerings and/or initiate individual projects. Readings and assignments are based on learning contracts developed in consultation with a sponsoring faculty member and approved by the MSW program director. Additional fees required.

**PRSW 410, Family Violence, 3 Units**
Family violence is an in-depth study from a system's perspective of violence that occurs in families. This course provides an overview of child abuse, spousal abuse, abuse between intimate partners, and elder abuse. The course explores the theory and research as to the causes of abuse, including individual and family factors, elder abuse, gender issues, community and societal influences, and cultural factors. This course explores the policy and programs developed to deal with these crises. Finally, methods of assessment and intervention are investigated as applicable to both professional and personal situations.

*Prerequisite:* Junior or Senior Standing or Instructor's consent

Bachelor of Social Work

69 units

Mission Statement

The Bachelor of Social Work (https://www.apu.edu/bas/programs/bsw/) program at Azusa Pacific University seeks to develop competent generalist social work practitioners who can apply knowledge based on scientific inquiry, professional values, and skills of social work, integrating a Christian perspective, to enhance the well-being of diverse individuals, families, groups, organizations, and communities in the context of their environment towards advancing social justice both locally and globally.

Program Values

The BSW program is grounded in the profession’s history and commitment to racial, social, economic, and environmental justice; respect for diversity; and the university’s commitment to advancing God’s work in the world by being of service, advancing human rights, validating the importance of human relationships, demonstrating integrity, and promoting the dignity and worth of all people. The program is committed to excellence in its teaching and scholarship based on scientific inquiry, to the integration of Christian faith in learning and practice, and to the facilitation of community within the department, with students, and within the greater social environment.

BSW Program Goals

1. Equip students with generalist knowledge, values, and skills toward employment in social work practice with diverse individuals, families, groups, organizations, and communities within a global context.

2. Enhance application of knowledge through a learning environment that builds on a liberal arts foundation and promotes critical thinking, scientific inquiry, and preparation for social change through the advancement of racial, social, economic, and environmental justice.

3. Foster professional development and identity through applied learning experiences.

4. Prepare social workers who engage in ethical practice, including an understanding of ethical integration of a Christian worldview.

5. Provide a curriculum that affirms lifelong learning and is preparatory to graduate-level education, including the pursuit of an advanced-standing graduate social work degree.

6. Engage in ongoing scholarship responsive to social work goals and needs.

In their courses, BSW students learn the knowledge, values, and skills to help them engage, assess, provide intervention, and evaluate their direct practice with individuals, groups, families, organizations, and communities. Additionally, students are encouraged to think critically, become aware of their affective reactions, exercise good judgment, and use self-reflection as part of their professional development. During their senior year, students complete a supervised 400-hour internship at a community-based agency where they apply the knowledge and skills learned in the classroom to professional environments and client groups to gain experience.

Career Opportunities

Social workers provide services to individuals, families, groups, organizations, and communities. Social workers can apply their training and experience in a variety of practice areas, including:

- Addictions Prevention and Treatment
- Adoption and Foster Care
- Advocacy Consulting and Planning
- Charter/Alternative School Programs
- Child Abuse and Neglect
- Child Welfare Services
- Criminal Justice
- Crisis Intervention
- Community Mental Health
- Community Planning and Advocacy
- Delinquent/At-risk Youth
- Developmental Disabilities
- Disaster Relief
- Eating Disorders
- Homeless Individual/Families Assistance
- Hospice and Palliative Care
- Housing Assistance
- In-home Services
- International Social Work
- Law/Courts/Community
- Medical Social Work
- Mental Health Counseling
- Military Social Work
- Parent Education
- Police Work
- Political Planning and Lobbying
- Prisons and Probation
- Public Health
Employee Assistance Programs | Rural/Tribal Social Work
Genetics/Transplant | School Social Work
Gerontology/Older Adult Services | Skilled Nursing Social Work

Accreditation

The undergraduate program in the Department of Social Work has been nationally accredited since 1982 by the Council on Social Work Education (https://www.cswe.org/).

Advising and Admission

Academic Advising Policy

Any student interested in social work is encouraged to contact the BSW program for more information about the major—contact us at bsw@apu.edu or (626) 857-2410. Students who wish to major in social work should declare “Social Work Interest” as their intended major as soon as possible through the Student Services Center (https://www.apu.edu/undergraduate-enrollment-services/academic/changemajor/) in order to begin academic and professional planning. Upon declaring “Social Work Interest” as a major, students are assigned an academic success coach by the Academic Success Center (https://www.apu.edu/academic-success/). Students meet with their assigned coach to create an initial multiyear academic plan. Once admitted to the social work major, a BSW faculty-mentor advisor is assigned by the BSW program for academic and professional advising. Students are strongly encouraged to meet with their academic success coach (as “Social Work Interest”) or BSW faculty-mentor advisor (as “Social Work Major”) prior to registration each semester.

Note: Students must apply to the major (see Admission to the Program section below). Upon full admission to the program, student status is changed from “Social Work Interest” to “Social Work” by the Student Services Center (https://www.apu.edu/undergraduate-enrollment-services/academic/changemajor/). Transfer students may be required to apply to the BSW program immediately upon university acceptance. See the Admission to the Program section below for additional direction.

Academic Advising Procedure

1. Contact the BSW program to schedule an appointment, if necessary, to discuss social work as a choice of major.

2. Declare “Social Work Interest” as a major through the Student Services Center (https://www.apu.edu/undergraduate-enrollment-services/academic/changemajor/).

3. Contact the BSW office to receive your advisor assignment and the BSW Student Handbook (https://www.apu.edu/bas/programs/bsw/students/).

4. Read the BSW Student Handbook in its entirety.

5. Meet with assigned success coach to develop a multiyear academic plan and confirm choice of major.

6. Respond to the email invitation to schedule an appointment with the assigned advisor that will be sent to the student’s APU email address (during university advising period).

7. Schedule an appointment with your academic success coach (“Social Work Interest” students) and/or BSW faculty-mentor advisor (“Social Work Major” students) for academic advising prior to registration each semester.

8. Meet with your academic success coach (“Social Work Interest” students) and/or BSW faculty-mentor advisor (“Social Work Major” students) for academic advising prior to registration each semester.

Note: Advisors assist in planning, but students are responsible for coming prepared for advising and being knowledgeable regarding university requirements.

Professional Advising Policy

As outlined above, once a student is admitted to the social work major, a BSW faculty mentor-advisor is assigned by the BSW program for academic and professional advising. While the BSW faculty mentor-advisor is the primary contact person within the program, students are encouraged to utilize all BSW faculty office hours as needed for professional development. Students are invited to regularly meet with their BSW faculty mentor-advisor for professional development discussions aimed at graduate school and/or employment preparation. The BSW faculty mentor-advisor can also clarify specific content and expectations of the required social work courses, including general information about and preparation for the field internship. Students are assigned to faculty mentor-advisors upon acceptance to the major by the BSW admissions committee. Students can meet with their BSW faculty mentor-advisor by appointment during department advisement periods or through use of faculty office hours.

Additional professional advising occurs through department, program, and alumni association events as well as during the SOCW 467 Senior Practicum Seminar I and SOCW 469 Senior Practicum Seminar II courses.
Professional Advising Procedure

Students may obtain professional advising by:

1. Being accepted as a social work major by the BSW admissions committee.
2. Being assigned a BSW faculty-mentor by the BSW program coordinator.
3. Responding to the email invitation to schedule an appointment with your assigned BSW faculty mentor-advisor that will be sent to your APU email address (during university advising period) OR schedule an appointment with your BSW faculty mentor-advisor during their posted office hours.
4. Meeting with your BSW faculty mentor-advisor for professional advising.

Admission to the Program

Students are considered “Social Work Interest” by the registrar until formally accepted into the program. Prior to formal acceptance into the program, students should begin advising within the BSW program and can begin taking entry-level social work courses and the General Education courses that apply to social work, as outlined in the university catalog.

The BSW program reviews applications in the fall and spring semesters for currently enrolled students. Application deadlines are March 7 (fall admission) and November 7 (spring admission). Late applications may be considered on a case-by-case basis depending on the number of accepted students.

Transfer social work applicants planning to enter APU at the junior level (45 or more units) must submit the BSW Application for Admission (https://formstack.apu.edu/forms/bsw_program_application/) in order to be considered for full acceptance into the social work program. Submit your application to the BSW program at the same time you submit your university application. Students transferring in prior to their junior year (less than 45 units) begin the major as “Social Work Interest,” and submit applications prior to their junior year after starting at the university. Transfer students should seek academic advising through the Academic Success Center (https://www.apu.edu/academic-success/) and within the BSW program as soon as possible to begin planning coursework.

Students may be admitted fully, or on provisional status, or denied admission. If a student is admitted on provisional status, a plan for attaining full admission is provided by the BSW admissions committee. If this plan is not met in full, the student is not allowed to continue in the program and will receive notice that provisional status was not met. If denied admission, the student may initiate an appeal procedure, as outlined in the BSW Student Handbook.

University-Admitted APU Students

Students admitted to the university and interested in pursuing the social work major should submit their BSW Application for Admission (https://formstack.apu.edu/forms/bsw_program_application/) directly to the BSW program. Applications are reviewed by the Social Work Advising and Admissions Committee, composed of social work faculty, and are considered based on academic and personal readiness for the program.

Admission Requirements

1. A 2.5 overall GPA
2. Completion of or enrollment in SOCW 250 Introduction to Social Work (full acceptance requires completion of this course with a C or better).
3. Acknowledgment of the ability to adhere to the National Association of Social Workers Code of Ethics (https://www.socialworkers.org/About/Ethics/Code-of-Ethics/).
4. Acknowledgment of the ability to meet BSW Technical Standards and maintain professional behavior consistent with the Student Code of Conduct, both of which are outlined in the BSW Student Handbook (https://www.apu.edu/bas/programs/bsw/students/).
5. Submission of a personal statement providing responses to the following:
   a. What influenced your choice of social work as a profession? Include when and how you became interested in the field of social work.
   b. What personal, volunteer, and/or employment experiences have you had, and/or what characteristics do you possess, that will contribute to your work as a professional in the field of social work?
   c. Social workers practice with diverse people groups in diverse settings. What groups and/or settings may challenge you because of either your personal values, attitudes, and/or experiences? How will you handle this?
   d. Social work often involves assisting individuals, families, groups, and communities in problem-solving. Give a brief description of a problem you have encountered in an employment or volunteer situation and how you resolved it. If you have neither employment nor volunteer experience, you may discuss a personal challenge that you faced.
e. The profession of social work has identified 13 Grand Challenges (https://grandchallengesforsocialwork.org/grand-challenges-initiative/12-challenges/) that reflect the purpose and mission of the social work field. Referencing the challenges, select one or more of them that align with your personal and professional interests. Utilizing the challenge(s) selected, respond to the following:

- Discuss how your professional goals align with the efforts of the challenge(s) selected. Why is the challenge selected important and how does it connect to your interest in the social work profession?
- Discuss the significance of the challenge(s) selected based on your personal faith beliefs or values. For example, why should people who identify as Christians be concerned with the challenge selected?

Procedure

1. Completion of or enrollment in SOCW 250 Introduction to Social Work (full acceptance requires completion of the course with a C or better)
   a. Note: transfer students with more than 45 units can apply prior to completing SOCW 250 Introduction to Social Work.

2. Complete all sections of the application, including complete responses to the personal statement questions.

3. Submit an unofficial APU transcript, or transcript of coursework completed elsewhere if a transfer.

4. Submit completed application to the BSW program for review by March 7 (fall admission) or November 7 (spring admission). Late applications and transfer students are evaluated on a case-by-case basis and as space allows.

5. Submit additional materials and/or interview with the BSW program director at the request of the admissions committee.

6. Students are notified by email within three weeks of the BSW admissions committee’s decision.

Evaluation Criteria for Personal Statements

Admission decisions for the BSW program are based upon a review of academic performance, completion of SOCW 250 as a prerequisite with a C or better (can be enrolled in the course for provisional admission), relevant work or volunteer experience, quality of written personal statement, and relevant experience as indicated in the résumé submission. If needed, a student may be asked to complete a formal interview with the BSW program director and/or submit letters of reference that can support the student’s readiness for a career in social work. The admissions committee may seek additional information from the social work faculty, the applicant, or other formal sources. The committee will focus on academic achievement as well as criteria that demonstrate a commitment to social work values, beginning understanding of the social work profession, professional attitude and behavior, emotional maturity, and ability to clearly express oneself orally and in writing.

Following review by the committee, the applicant will be notified in writing via email of the committee’s decision. Committee options include full admission, provisional admission with terms outlined, or denial of admission.

Admissions Appeals Process

Any student who is dissatisfied with a decision for admission may request an in-person review with the admissions committee, in which they can supply further verbal and written evidence in regard to the committee’s actions. The committee will provide a written response to the student within one week of the hearing. If the student is still in disagreement, he/she may appeal to the dean of the School of Behavioral and Applied Sciences.

Requirements

Coursework for the social work major provides foundational social work knowledge that spans the micro-mezzo-macro practice continuum and covers subject content including practice skills, human rights and social justice, community transformation and leadership, child welfare, and aging.

A total of 69 units is required for the major, and a minimum 2.5 grade-point average (GPA) is required in all major courses, including specified General Education courses. Students must pass all required courses with a C or higher, and must maintain a 2.5 GPA to remain in the major.

**Total Units** 69

1. Meets the General Education Social Sciences requirement.
2. Meets the General Education Intercultural Competence requirement.
3. Students interested in meeting the social work major’s biology requirement at another university must ensure that the course has been articulated by the biology department or obtain prior approval from their advisor to ensure that the course they plan to take covers the required content necessary to satisfy the social work curriculum.
4. Meets the General Education Natural Sciences requirement.
Meets the General Education Quantitative Literacy requirement.
Meets the General Education Civic Knowledge and Engagement requirement.
Only social work majors may register for these courses.
Meets the General Education Integrative and Applied Learning requirement.
Meets the General Education Writing 3 requirement.
Two electives (6 units) are required for completion of the social work major; one must be taken from courses offered within the department, and the second may be taken from either group of approved courses.

Suggested Plan of Study
A minimum of 120 units is needed to graduate. This includes units toward General Education, major, and/or minor requirements.

1 Ancient and Modern Languages is a proficiency requirement that may be met by an OPIc, SAT, AP, CLEP, or FLATS test score, or completion of an APU language course numbered 102 or higher.

Field Internships
Field/practicum education is a required component of the BSW curriculum. The field/practicum application and placement process occurs during the term prior to the onset of internships. Students complete a 400+ hour internship with a focus on applying and integrating generalist professional social work knowledge, values, skills, and affective-cognitive processes in a supervised community agency setting. Students are concurrently enrolled in seminar during internship terms. **Course credit is not given for life experiences or for previous or current work experience.** Students are required to obtain their own malpractice insurance prior to entering their internship. Information regarding insurance is available through the BSW program. Students are responsible for ensuring they have reliable transportation to and from internship agencies.

Field/practicum education faculty select internship sites using strict criteria consistent with accreditation standards set forth by the Council on Social Work Education (https://www.cswe.org/), including the congruence of internship agency mission and goals with professional social work ethics and standards. Agencies must also provide student supervision consistent with accreditation requirements.

Additional information regarding field/practicum education can be found in the Field Education Manual (https://www.apu.edu/bas/programs/bsw/fieldeducation/).

Transfer of Credits
Policy Regarding Transfer of Credits
Students applying to APU who would like to transfer course credit from another institution should review the Transfer Application Requirements (https://www.apu.edu/undergraduate-admissions/transfer/requirements/) and check with their assigned admissions representative (https://www.apu.edu/undergraduate-admissions/counselors/) in the Office of Undergraduate Admissions. Students may also want to review the APU General Education Guidelines (https://www.apu.edu/undergraduate-admissions/transfer/ge-plans/) and Course-to-Course Articulation (https://www.apu.edu/undergraduate-admissions/transfer/articulation/) to get an idea of how coursework will transfer to APU.

Students transferring from CSWE-accredited undergraduate social work programs may submit to their admissions representative a list of social work courses, including practice courses and field education, completed within the last five years for evaluation for transfer of credits. This request will be further submitted to the BSW program director by the Student Services Center (https://www.apu.edu/undergraduate-enrollment-services/) for social work course credit review. Each course will be evaluated by the department on a case-by-case basis for compatibility with program requirements and competencies. This process includes a comparison of syllabi from transfer institutions to ensure course content equivalency to APU required courses.
General Education requirements for the major will be assessed by the Student Services Center. Students who leave the BSW program must reapply for admission to the BSW program if the absence is two years or more. Course credit is not given for life experiences or for previous or current work experience.

Students interested in meeting the social work biology requirement at another university are strongly encouraged to obtain prior approval from their advisor to ensure that the course they plan on taking covers the required content necessary to satisfy the social work requirement. Students may also consult with the Student Services Center regarding the transferability of biology courses.

**Course credit is not given for life experiences or for previous or current work experience.**

**Procedure Regarding Transfer of Credits (General Education Requirements)**

The following procedure is used to review transfer of credits:

1. Students create an account on Transferology (https://www.transferology.com/).
2. Select “Will My Courses Transfer?” to search for the equivalent course at APU.
3. If the course is listed on Transferology, send an official transcript to the Student Services Center.
4. If the course is not listed on Transferology, you can also check our Articulation Agreements (https://www.apu.edu/undergraduate-enrollment-services/academic/transfer/community-college/). If you find the course in an Articulation Agreement, send an official transcript to the Student Services Center.
5. If the course is not listed in either of the above options, complete a Transfer Inquiry (https://formstack.apu.edu/workflows/transfer_inquiry/?sso=5e95d3ce84f5e&ssso=5eaafa7c13831) to request articulation. For major course requirements, you will need to submit a course syllabus. For General Education requirements, you will need to submit an official course description.
6. If your Transfer Inquiry is approved, send an official transcript to the Student Services Center.

**Procedure Regarding Transfer of Credits (Social Work Requirements)**

The following procedure is used to review transfer of credits:

1. Students complete a Transfer Inquiry (https://formstack.apu.edu/workflows/transfer_inquiry/?sso=5e95d3ce84f5e&ssso=5eaafa7c13831) to request articulation and submit a course syllabus to the Student Services Center.
2. The Student Services Center routes the inquiry to the BSW program director for review.
3. The BSW program director reviews the inquiry for consistency with program standards and CSWE requirements. Courses for consideration must be transferred from a CSWE-accredited program.
4. Determination from the BSW program director is provided to the Student Services Center.
5. The Student Services Center notifies the student of the credit decision.

**Social Work Student Conduct Code**

In addition to maintaining academic standards, students must demonstrate professional expectations and adherence to the Department of Social Work conduct code. Violation of the code may result in probation or termination from the program.

Professionalism and integrity are basic characteristics required of students in the program. As such, in addition to APU student standards of behavior, the Department of Social Work has standards for professional ethical behavior required of social work students as outlined below. Violations of this code trigger an investigation and possible sanctions. Although it is not possible to provide an exhaustive list of all types of violations that may result in probation or termination from the program, the following are some examples:

1. Plagiarism or other academic integrity violation (see APU's academic integrity policy (https://www.apu.edu/provost/integrity/))
2. Misrepresenting or misstating events surrounding an incident involving professional conduct
3. Poor or improper professional conduct during internship, classroom, or service-learning assignments
4. Being under the influence of alcohol and/or other controlled substances during classes and/or internship
5. Unprofessional involvement with a client or supervisor while engaged in internship activities
6. Breach of professional confidentiality
7. Derogatory comments and behavior toward a client, agency employee, classmate, faculty, or staff member

8. Discrimination or harassment directed toward a client, agency employee, classmate, faculty, or staff member on the basis of class, race, age, disability, national origin, gender, religion, and/or sexual orientation

10. Insubordination

11. Excessive and/or unexcused absences

12. Falsifying field/classroom attendance hours

13. Unprofessional use of social media sites

14. Inappropriate professional attitude/disposition

Additionally, students are provided professional development feedback through the use of Professionalism Rubrics scored in each BSW course. These rubrics encompass faculty feedback relevant to in-class and service-learning observation. Rubrics are used to give guidance to students relevant to demeanor, use of reflection, appropriate use of technology, use of supervision/consultation, critical thinking, and collegiality. Students who present concerns in these areas may be referred to the BSW program director for remediation. The BSW Student Handbook (https://www.apu.edu/bas/programs/bsw/students/) can be referred to for the full description of the conduct code and appeals process.

**Student Participation and Feedback**

**Student Participation and Feedback Policy**

The BSW program invites and welcomes student participation and feedback as we work together to deliver a high-quality program that prepares generalist social work practitioners. Students are invited to participate in Club Social Work, to participate in or organize other interest groups, and to participate in student government.

Students are highly encouraged to talk with faculty if there are questions or concerns regarding classes. Field faculty are available to discuss issues related to field internships. The BSW program coordinator and/or the BSW program director are available to discuss such issues as medical leave, leave of absence, academic planning, and study away/independent study options. If students feel that issues have not been resolved through these channels, they are encouraged to make an appointment to speak with the department chair.

It is the student’s responsibility to provide accurate feedback on strengths and challenges in the program through various feedback mechanisms, including but not limited to communication with the Club Social Work faculty liaison student officer, course evaluations, exit surveys, and alumni surveys. Student feedback is critical to helping the BSW program undergo ongoing evaluation and curricular improvements. A full description of student rights and responsibilities can be found in the academic catalogs listed on the Office of the Provost website (https://www.apu.edu/provost/catalog/), including processes for filing a grievance, and academic integrity and grade-change policies.

**Student Participation and Feedback Procedure**

Students may participate in BSW program development and provide feedback by:

1. Participating in Club Social Work
   
a. Club Social Work solicits membership through social work class announcements and student email invitation during the spring semester each academic year. As needed, membership solicitation may also occur in the fall semester. Students are encouraged to email clubsocialwork@apu.edu with additional questions. While membership as a CSW officer is encouraged, CSW weekly meetings are open to all BSW students. BSW students are encouraged to share feedback with CSW as a mechanism for student participation in BSW program development.
   
b. CSW student members, primarily the designated CSW faculty liaison student officer, attend BSW program meetings monthly to share student updates and feedback.

2. Organizing other interest groups and/or participation in student government
   
a. BSW students are encouraged to engage with the APU Office of Campus Life (https://www.apu.edu/campus-life/) to create APU clubs and organizations (https://www.apu.edu/campus-life/involvement/clubs/) in response to student or campus needs. Serving as an officer in the APU Student Government Association (https://apusga.squarespace.com/) is also encouraged. These auxiliary clubs and organizations serve as additional touch points for CSW officers to gain insight on student feedback during regularly scheduled university club and organization meetings sponsored by the Office of Campus Life.
3. Meeting with BSW faculty/staff and/or the department chair
   a. All faculty/staff contact information can be found on the BSW website (https://www.apu.edu/bas/programs/bsw/faculty/), and students are welcome to schedule meetings during office hours to provide feedback.

4. Providing feedback after each course using the anonymous IDEA evaluation provided by the university at the close of each semester.

5. Providing feedback on the anonymous BSW program exit survey provided to BSW seniors by the program annually in the spring semester.

6. Providing feedback in the alumni survey sent via email to BSW alumni two years postgraduation by the Department of Social Work.

Program Learning Outcomes

Program Learning Outcomes

Students who successfully complete this program shall be able to:
1. Demonstrate ethical and professional behavior.
2. Engage in diversity and differences in practice.
3. Advance human rights and social, economic and environmental justice.
4. Engage in practice-informed research and research-informed practice.
5. Engage in policy practice.
6. Engage with individuals, families, groups, organizations, and communities.
7. Assess individuals, families, groups, organizations, and communities.
8. Intervene with individuals, families, groups, organizations, and communities.
9. Evaluate practice with individuals, families, groups, organizations, and communities.
10. Critically analyze how Christian beliefs and values can be ethically integrated in professional social work practice.

Program Competencies/Learning Outcomes

Students will demonstrate these competencies (CSWE, 2015):

Competency 1: Demonstrate Ethical and Professional Behavior

Social workers understand the value base of the profession and its ethical standards, as well as relevant laws and regulations that may impact practice at the micro, mezzo, and macro levels. Social workers understand frameworks of ethical decision-making and how to apply principles of critical thinking to those frameworks in practice, research, and policy arenas. Social workers recognize personal values and the distinction between personal and professional values. They also understand how their personal experiences and affective reactions influence their professional judgment and behavior. Social workers understand the profession's history, its mission, and the roles and responsibilities of the profession. Social workers also understand the role of other professions when engaged in interprofessional teams. Social workers recognize the importance of lifelong learning and are committed to continually updating their skills to ensure they are relevant and effective. Social workers also understand emerging forms of technology and the ethical use of technology in social work practice. Social workers:

- make ethical decisions by applying the standards of the NASW Code of Ethics, relevant laws and regulation, models for ethical decision-making, ethical conduct of research, and additional codes of ethics as appropriate to context;
- use reflection and self-regulation to manage personal values and maintain professionalism in practice situations;
- demonstrates professional demeanor in behavior; appearance; and oral, written, and electronic communication;
- use technology ethically and appropriately to facilitate practice outcomes; and
- use supervision and consultation to guide professional judgment and behavior.

Competency 2: Engage Diversity and Difference in Practice

Social workers understand how diversity and difference characterize and shape the human experience and are critical to the formation of identity. The dimensions of diversity are understood as the intersectionality of multiple factors including but not limited to age, class, color, culture, disability and ability, ethnicity, gender, gender identity and expression, immigration status, marital status, political ideology, race, religion/spirituality, sex, sexual orientation, and tribal sovereign status. Social workers understand that, as a consequence of difference, a person's life experiences may include oppression, poverty, marginalization, and alienation as well as privilege, power, and acclaim. Social workers also understand the forms and mechanisms of oppression and discrimination and recognize the extent to which a culture's structures and values, including social, economic, political, and cultural exclusions, may recognize the extent to which a culture's structures and values, including social, economic, political, and cultural exclusions, may oppress, marginalize, alienate or create privilege and power. Social workers:

- apply and communicate an understanding of the importance of diversity and difference in shaping the experiences in practice at the micro, mezzo, and macro levels;
• present themselves as learners and engage clients and constituencies as experts of their own experiences; and
• apply self-awareness and self-regulation to manage the influence of personal biases and values in working with diverse clients and constituencies.

Competency 3: Advance Human Rights and Social, Economic, and Environmental Justice

Social workers understand that every person regardless of position in society has fundamental rights such as freedom, safety, privacy, and an adequate standard of living, health care, and education. Social workers understand the global interconnections of oppression and human rights violations and are knowledgeable about theories of human need and social justice and strategies to promote social and economic justice and human rights. Social workers understand strategies designed to eliminate oppressive, environmental, economic, social and cultural human rights are protected. Social workers:

• apply their understanding of social, economic, and environmental justice to advocate for human rights at the individual and system levels; and
• engage in practices that advance social, economic, and environmental justice.

Competency 4: Engage in Practice-Informed Research and Research-Informed Practice

Social workers understand quantitative and qualitative research methods and their respective roles in advancing a science of social work and in evaluating their practice. Social workers know the principles of logic, scientific inquiry, and culturally informed and ethical approaches to building knowledge. Social workers understand that evidence that informs practice derives from multidisciplinary sources and multiple ways of knowing. They also understand the process for translating research:

• use practice experience and theory to inform scientific inquiry and research;
• apply critical thinking to engage in analysis of quantitative and qualitative research methods and research findings; and
• use and translate research evidence to inform and improve practice, policy, and service delivery.

Competency 5: Engage in Policy Practice

Social workers understand that human rights and social justice, as well as social welfare and services, are mediated by policy and its implementation at the federal, state, and local levels. Social workers understand the history and current structure of social policies and services, the role of policy in service delivery, and the role of practice in policy development. Social workers understand their role in policy development and implementation within their practice in practice settings at micro, mezzo, and macro levels and they actively engage in policy practice to effect change within those settings. Social workers recognize and understand the historical, social, cultural, economic, organizational, environmental, and global influences that affect social policy. They are also knowledgeable about policy formulation, analysis, implementation, and evaluation. Social workers:

• identify social policy at the local, state, and federal level that impacts well-being, service delivery, and access to social services;
• assess how social welfare and economic policies impact the delivery of and access to social services; and
• apply critical thinking to analyze, formulate, and advocate for policies that advance human rights and social, economic, and environmental justice.

Competency 6: Engage with Individuals, Families, Groups, Organizations, and Communities

Social workers understand that engagement is an ongoing component of the dynamic and interactive process of social work practice with, and on behalf of, diverse individuals, families, groups, organizations, and communities. Social workers value the importance of human relationships. Social workers understand theories of human behavior and the social environment, and critically evaluate and apply this knowledge to facilities engagement with clients and constituencies, including individuals, families, groups, organizations, and communities. Social workers understand strategies to engage diverse clients and constituencies to advance practice effectiveness. Social workers understand how their personal experiences and affective reactions may impact their ability to effectively engage with diverse clients and constituencies. Social workers value principles of relationship-building and inter-professional collaboration to facilitate engagement with clients, constituencies and other professional as appropriate. Social workers:

• apply knowledge to human behavior and the social environment, person-in-environment, and other multidisciplinary theoretical frameworks to engage with clients and constituencies; and
• use empathy, reflection, and interpersonal skills to effectively engage diverse clients and constituencies.

Competency 7: Assess Individuals, Families, Groups, Organizations, and Communities

Social workers understand that assessment is an ongoing component of the dynamic and interactive process of social work practice with and on behalf of, diverse individuals, families, groups, organizations, and communities. Social workers understand theories of human behavior and the social environment, and critically evaluate and apply this knowledge in the assessment of diverse clients and constituencies, including families, groups, organizations, and communities. Social workers understand strategies to engage diverse clients and constituencies to advance practice effectiveness. Social workers recognize the implications of the larger practice context in the assessment process and value the importance of inter-professional collaboration in this process. Social workers understand how their personal experiences and affective reactions may impact their ability to effectively engage with diverse clients and constituencies. Social workers:

• collect and organize data, and apply critical thinking to interpret information from clients and constituencies;
• apply knowledge of human behavior and the social environment, person-in-environment, and other multidisciplinary theoretical frameworks in the analysis of assessment data from clients and constituencies;
• develop mutually agreed-on intervention goals and objectives based on the critical assessment of strengths, needs, and challenges within clients and constituencies; and
• select appropriate intervention strategies based on the assessment, research knowledge, and values and preferences of clients and constituencies.

Competency 8: Intervene with Individuals, Families, Groups, Organizations, and Communities

Social workers understand that intervention is an ongoing component of the dynamic and interactive process of social work practice with, and on behalf of, diverse individuals, families, groups, organizations, and communities. Social workers are knowledgeable about evidence-informed interventions to achieve the goals of clients and constituencies, including individuals, families, groups, organizations, and communities. Social workers understand theories of human behavior and the social environment, and critically evaluate and apply this knowledge to effectively intervene with clients and constituencies. Social workers understand methods of identifying, analyzing, and implementing evidence-informed interventions to achieve client and constituency goals. Social workers value the importance of interprofessional and interorganizational collaboration. Social workers:

• critically choose and implement interventions to achieve practice goals and enhance capacities of clients and constituencies;
• apply knowledge of human behavior and the social environment, person-in-environment, and other multidisciplinary theoretical frameworks in the interventions with clients and constituencies;
• use interprofessional collaboration as appropriate to achieve beneficial practice outcomes; and
• facilitate effective transitions and endings that advance mutually agreed-on goals.

Competency 9: Evaluate Practice with Individuals, Families, Groups, Organizations, and Communities

Social workers understand that evaluation is an ongoing component of the dynamic and interactive process of social work practice with, and on behalf of, diverse individuals, families, groups, organizations and communities. Social workers recognize the importance of evaluating processes and outcomes to advance practice, policy, and service delivery effectiveness. Social workers understand theories of human behavior and the social environment, and critically evaluate and apply this knowledge in evaluating outcomes. Social workers understand qualitative and quantitative methods for evaluating outcomes and practice effectiveness. Social workers:

• select and use appropriate method for evaluation of outcomes;
• apply knowledge of human behavior and the social environment, person-in-environment, and other multidisciplinary theoretical frameworks in the evaluations of outcomes;
• critically analyze, monitor, and evaluate intervention and program processes and outcomes; and
• apply evaluation findings to improve practice effectiveness at the micro, mezzo, and macro levels.

Competency 10: Critically Analyze How Christian Beliefs and Values Can be Ethically Integrated in Professional Social Work Practice

Social workers understand the role of spirituality and faith as part of a holistic approach to social practice and in understanding human behavior and the social environment. Social workers apply ethical principles in the integration of faith in practice, mindful of their own beliefs and impact on the helping relationship. Social workers recognize that faith communities are part of the cultural context of individuals, families, and communities, and provide protective as well as risk factors in the process of change. In this context, social workers articulate how Christian beliefs and values can be ethically integrated in professional social work practice. They:

• demonstrate self-awareness of their own worldview, as it relates to a Christian worldview;
• articulate how a Christian worldview is integrated into social work practice; and
• critically analyze how Christian, spiritual, or religious traditions assist or hinder the helping process.

Certificate of Distinction in Undergraduate Social Work Research

The Certificate of Distinction in Undergraduate Social Work Research is available to seniors participating in the advanced research section of SOCW 478 and SOCW 479 of the BSW program.

Requirements and Expectations

• Students must have a minimum cumulative GPA of 3.3 and have received a B or higher in statistics (MATH 130) or equivalent course in order to participate in the advanced research section. Students who have received less than a B in statistics but meet the GPA requirement may petition to be in the advanced research section. Petitions will be reviewed on a case-by-case basis.
• Students must have completed and received a C or higher in all other required BSW courses leading to their senior year.
• Students must complete an application that includes a brief essay noting why they wish to participate in the advanced research section.
• Students must receive a recommendation from one other BSW faculty member who can speak to the student’s writing ability and professional readiness to participate in the advanced research section.
• Students must develop an original research project tied to their field internship in accordance with the course requirements.
• Students must complete the appropriate Institutional Review Board (IRB) application and receive approval for their projects from APU’s IRB office (https://www.apu.edu/researchandgrants/ethics/irb/).
• Students must submit an abstract for presentation at an appropriate campus-wide research event.
• Students must submit an abstract for the student research poster competition at the national undergraduate social work conference (The Association of Baccalaureate Social Work Program Directors (BPD) conference) held every March. Students who are selected, through a review process, to present their research at the BPD conference must attend the conference and participate in the research poster competition. Students apply for travel grants from APU’s Undergraduate Research Program (https://www.apu.edu/undergraduate-research/) to support travel and conference-related expenses.
• Students are invited to submit abstracts to participate in the annual, highly competitive Posters on the Hill interdisciplinary student conference in Washington, DC, sponsored by the Council on Undergraduate Research.
• Students coauthor with the instructor to submit an article based on their research to a peer-reviewed academic journal in social work for publication consideration by the end of the spring semester. Students are expected to remain in touch with the course instructor postgraduation to work on any revisions requested by the journal(s) in order to be accepted for publication.

1 Meets the General Education Writing 3 requirement.

**Master of Social Work**

**MSW Program Mission and Goals**

The following mission statement guides APU’s Master of Social Work (MSW) program (https://www.apu.edu/bas/programs/msw/):

*The Master of Social Work (MSW) program develops competent advanced social work practitioners and leaders who can integrate knowledge based on scientific inquiry, values, and skills of social work to advance human well-being, promote social and environmental justice, and advocate for equity for diverse individuals, families, groups, organizations, and communities, in the context of their environment both locally and globally, informed by our Christian faith tradition.*

*We value:*

• The Social Work Code of Ethics
• Diversity and inclusive excellence
• Service
• Innovative teaching and scholarship
• Integration of faith and learning
• Social work leadership development
• Strengthening communities in local, national, and global contexts

The following outcome goals are derived from the mission statement and purposes of social work education congruent with accreditation standards:

1. Graduates will exhibit competence in generalist and advanced social work practice with diverse individuals, families, groups, organizations, and communities, including appropriate uses of supervision, consultation, and discernment, to seek necessary organizational change.

2. Graduates will demonstrate knowledge, built on a liberal arts foundation, of the history of the social work profession and empirically supported theoretical frameworks that provide understanding of individual development and behavior across the life span and interactions among and between individuals and families, groups, organizations, and communities.

3. Graduates will demonstrate critical thinking skills, skills related to the effective integration of research in practice, and adequate preparation for leadership, advanced study, and lifelong learning.

4. Graduates will demonstrate knowledge and skills to partner with communities to advocate for the development of policies and programs that seek to advance human rights and well-being; promote social, racial, economic, and environmental justice; empower clients; and respect diversity.
The Master of Social Work (MSW) program offers two specializations:

**Clinical Practice with Individuals and Families**

This specialization prepares students for clinically oriented practice with individuals, children, and families in contexts such as mental health clinics, veterans’ services, managed care facilities, shelters, group homes, child welfare agencies, hospice, schools, correctional institutions, and other settings where personal helping relationships are developed. Specific emphasis is placed on advanced clinical practice skills with children, adolescents, adults, families, and older adults; group therapy skills; and policies specific to health and mental health concerns.

**Community Leadership and Program Administration**

This specialization prepares students to provide leadership in nonprofit agencies, government programs, and policy and advocacy organizations in a variety of local and global contexts. Drawing on the significant cultural diversity characterizing the Los Angeles area, and the expertise of faculty, the curriculum prepares students to be proactive leaders and to collaborate with communities to improve upon the complex local, national, and international social problems they encounter. Curriculum content in this specialization includes organizational behavior and management, program planning and evaluation, organizing for community change, human rights and social policy with an optional emphasis in international social work, and research methods for data-driven change.

**Program Options**

The full-time program (two years, 60 units) includes classes two days per week and a minimum 16 hours per week of supervised internship. All students take the same first-year generalist foundation courses. Specialization courses are taken in the second year of the program (Azusa campus).

The part-time program (four years, 60 units) includes classes every Tuesday beginning at 4:20 p.m. (two classes per term, scheduled back-to-back). In addition, there are a total of four Saturday intensive courses required, which meet three to five times per term, in years one and three of the program. All students take the same generalist foundation courses in the first and second years. Specialization courses are taken in the third and fourth years of the program. Supervised internships require a minimum 16 hours per week occur in the second and fourth years (Azusa campus).

The part-time program (three years, 60 units) at the Inland Empire Regional Campus meets every Thursday beginning at 4:45 p.m., and five Saturdays (all day), per semester. Coursework occurs year-round (fall, spring, and summer), and students complete the program during their third summer of coursework. Supervised internships requiring approximately 16-20 hours per week occur in the second and third years at an internship placement specific to the specialization; placements are available in San Bernardino, Riverside, Los Angeles, Orange, and Ventura counties. Clinical Practice with Individuals and Families specialization only (Inland Empire Regional Campus).

The full-time Advanced Standing program (36 units) allows graduates of CSWE-accredited BSW programs to earn their MSW degree in 10 months. Students complete two 3-unit Advanced Standing bridge courses during an 8-week summer session (July-August, three evenings a week) prior to the start of their specialization curriculum, in which they join existing full-time MSW students for the remaining two terms (30 units) of the MSW program. Advanced Standing student internships require 20 hours per week for fall and spring terms (Azusa campus).

The part-time Advanced Standing program allows graduates of CSWE-accredited BSW programs to earn their MSW degree over the course of two years. Students complete two 3-unit Advanced Standing bridge courses during an 8-week summer session (July-August, three evenings a week) prior to the start of their specialization curriculum, in which they join existing part-time MSW students for the remaining two years (30 units) of the part-time MSW program. Part-time Advanced Standing student internships require 20 hours per week for fall and spring of the second year of the program (Azusa campus).

The two bridge courses for advanced standing are:

Field Internships

Field/practicum education is a required component of the MSW curriculum. The field/practicum application and placement process occurs during the term prior to the onset of internships. Over the course of the program, students complete two yearlong internships totaling 960 hours, with a focus on applying and integrating professional social work knowledge, values, and skills in a supervised community agency setting. Internships occur Monday-Friday during business hours. Successful completion of the internship/seminar curriculum, with a grade of B- or higher, is required for field/practicum credit and to proceed to the next field/practicum course sequence. Students are concurrently enrolled in field/practicum seminar during internship terms. Full-time students complete internships during both years of the program, Azusa part-time students complete internships during the second and fourth years, and Inland Empire part-time students complete internships during the second and third years of the program. Students in the two-, three-, and four-year options earn a total of 16 semester units for field/practicum education coursework. Advanced Standing students complete a total of eight field/practicum education units over two terms totaling 600 hours. Course credit is not given for life experiences or for previous or current work experience. Students are required to obtain their own individual liability insurance policy prior to entering their field internship. Information regarding insurance is available through the MSW program. Students are responsible for ensuring they have reliable transportation to and from internship agencies.

Field/practicum education faculty select internship sites using strict criteria consistent with accreditation standards set forth by the Council on Social Work Education, including the congruence of internship agency mission and goals with those of professional social work ethics and standards. Agencies must also provide student supervision consistent with accreditation requirements.

Policy Regarding Transfer of MSW Credits

The MSW program takes responsibility for ensuring that transferred courses are congruent with the curriculum policy statement of CSWE and meet program objectives. Students seeking admission to the program after enrollment at another CSWE-accredited MSW program may submit a list of MSW generalist foundation-level courses completed within the last five years for evaluation for transfer of credits. A maximum of 12 units may be transferred. No credit is given for prior field internship hours. A petition for transfer credit must fulfill the conditions listed below:

1. The work must have been completed while the student was enrolled in good standing as a graduate student. A letter from the MSW program director is required verifying that the student was in good standing.

2. The work must have been done within five years prior to starting the MSW program at Azusa Pacific University.

3. The school from which the credits are transferred must be accredited by a regional accreditation agency and by the Council on Social Work Education.

4. No transfer grade is lower than a B.

5. None of the transfer coursework consists of extension or workshop courses.

6. Petition for transfer of credit occurs after acceptance into the MSW program and prior to the start of the first semester. All required documentation must be sent to the MSW graduate program director prior to August 1.

Course credit is not given for life experiences or for previous or current work experience.

Procedure Regarding Transfer of MSW Credits

1. Contact the MSW director of admissions and student services before starting the program to request transcript review.

2. Each course will be evaluated by the program on a case-by-case basis for compatibility with program requirements.

3. This process includes a comparison of syllabi from transfer institutions to ensure course content equivalency to APU required courses.

4. Student will be notified via email of transferable credits before course enrollment.

5. The director of admissions and student services will discuss program requirements met through the credits, and provide academic advising for course planning.

Policy and Procedure Regarding Transfer of Elective Credits

The MSW program requires two elective courses (total of 6 units). Students transferring from another graduate program may petition to have up to 6 units evaluated for possible elective credit. The course(s) must be relevant to the MSW program and preferably have been taken within five years prior to admission. Syllabi will be reviewed on a case-by-case basis to assure that prior content is not outdated. Petitions must be submitted to the MSW program for evaluation. Due to the importance of MSW program compliance with CSWE accreditation standards, students may be asked to provide course syllabi in order to assess the relevance and timeliness of course material.
Procedure

1. Submit a request to evaluate relevant coursework, along with a copy of syllabi, to the MSW program, preferably completed within five years prior to admission, to the director of admissions and student services.

2. Syllabi will be reviewed by the graduate program director for compatibility.

3. The student will be notified of the outcome via email, by the MSW program.

4. The director of admissions and student services will discuss program requirements met through the credits, and provide academic advising for course planning.

Social Work Student Conduct Code

In addition to maintaining academic standards, students must demonstrate professional standards and adherence to the Department of Social Work conduct code. Violation of the code may result in probation or termination from the program. Refer to the MSW Student Handbook (https://www.apu.edu/bas/programs/msw/students/) for the full description of the conduct code and appeals process.

Academic Performance Expectations

GPA Requirements and Academic Probation

Continuation in the MSW Program requires a demonstration of academic ability. Students must maintain a 3.0 grade point average in all coursework and must pass all classes with a B- or higher.

Students who do not meet the GPA requirements and/or do not pass one or more classes with a B- or higher are placed on academic probation. Failure to meet 3.0 GPA requirement after repeating specified classes will result in graduation delay and/or academic dismissal.

Procedure for Addressing Academic Probation

• Meet with program director to discuss current academic standing in the program

• Discuss expectations for good academic standing, (http://catalog.apu.edu/policies-procedures/graduate/good-academic-standing/) as outlined in the APU Academic Catalog (http://catalog.apu.edu/policies-procedures/graduate/good-academic-standing/)

• Student is placed on academic probation for one semester in which student’s grade point average must be 3.0 and all course grades are a minimum B-

• Student participates in the development of a performance improvement plan

• Student will meet with program director during probationary semester to discuss progress toward meeting performance improvement plan

• Student restores good academic standing when minimum academic requirements are met

• Failure to meet improvement plan may result in academic dismissal

• Students can appeal a decision by using the university grievance process outlined in the graduate catalog

#### Total Units

60-66

---

1. Students may test out of SOCW 527 and SOCW 528 but still need to complete the required unit total for the program. Contact the Department of Social Work (https://www.apu.edu/bas/socialwork/contact/) for more details.

2. Students from either specialization can take any of the 3-unit credential courses as part of the two-elective graduation requirement—or in addition to that requirement—so they could end up with 63 or even 66 units. The courses meet both elective and PPSC requirements. But even if a community specialization student takes all credential courses, they DO NOT earn the credential, because only clinical specialization students can receive the credential.

Students from the clinical specialization seeking to complete credential requirements must complete PPSC field and field seminar courses SOCW 553, SOCW 554, SOCW 555, and SOCW 556 as part of the 6-unit field education graduation requirement. The courses are taken in place of clinical field and field seminar courses SOCW 534, SOCW 539, SOCW 544, and SOCW 548.

### Professional Expectations

The university catalog outlines professional expectations of students. Social work students have further expectations for professional behavior as outlined by the NASW Code of Ethics and as outlined in the social work conduct code, which can be found in the MSW Student Handbook (https://www.apu.edu/bas/programs/msw/students/).

### Coursework Approved for Prelicensure Requirements

Additional coursework approved by the Board of Behavioral Sciences (https://www.bbs.ca.gov/) for meeting prelicensure requirements, as follows, is embedded in the generalist foundation-year MSW curriculum. Refer also to the MSW Student Handbook, Appendix 1, BBS Coursework Map.

- Human Sexuality (10 hours)
- Alcohol and Other Chemical Substance Dependency (15 hours)
- Child Abuse Assessment (7 hours)
- Spousal or Partner Abuse (15 hours)
- Aging and Long-Term Care (10 hours)
- California Law/Professional Ethics (18 hours)
- Suicide Assessment and Intervention (6 hours)
- Provision of Mental Health Services via Telehealth (3 hours)

Advanced Standing students may complete prelicensure requirements in MSW elective courses, as listed below, or may satisfy requirements through qualifying undergraduate coursework.

- SOCW 537 Child and Adolescent Behavioral Health and Diagnosis (Child Abuse Assessment Requirement)
- SOCW 561 Treatment of Substance Use Disorders (Alcoholism/Chemical Dependency Requirement)
- SOCW 566 Social Work, Health, and Aging (Aging and Long-Term Care Requirement)
- SOCW 567 Marital Therapy and Domestic Violence (Spousal or Partner Abuse Requirement)
- SOCW 569 Human Sexuality and Sex Therapy (Human Sexuality Requirement)

The California Law/Professional Ethics requirement (18 hours) is met in SOCW 551 Advanced Standing: Social Work Ethics and Practice.

The prelicensure requirements can also be taken postgraduation through the National Association of Social Workers (NASW) or other approved continuing education providers.

Students are responsible for meeting prelicensure requirements and should save relevant course syllabi as proof of hours and content completed. See the BBS website for full information on licensure requirements (https://www.bbs.ca.gov/applicants/lcsw.html), and see the MSW Student Handbook for more information.
Admission

University graduate admission and program-specific requirements must be met before an application is complete (see Admission to the University (p. 1082)). Program-specific application requirements are available online (https://tracking.cirrusinsight.com/74647a2d-e9a2-4121-9b55-9959c7aac4ec/apu-edu-graduateprofessionalcenter-admissions-requirements-program/).

International students should contact Graduate and Professional Admissions (https://www.apu.edu/graduateprofessionalcenter/admissions/) for application procedures.

Program Learning Outcomes

Program Learning Outcomes

Students who successfully complete this program shall be able to:

1. Demonstrate ethical and professional behavior.
2. Engage diversity and difference in practice.
3. Advance human rights and social, economic, and environmental justice.
4. Engage in practice-informed research and research-informed practice.
5. Engage in policy practice.
6. Engage with individuals, families, groups, organizations, and communities.
7. Assess individuals, families, groups, organizations, and communities.
8. Intervene with individuals, families, groups, organizations, and communities.
9. Evaluate practice with individuals, families, groups, organizations, and communities.
10. Demonstrate ethical integration of faith and spirituality in social work practice.

Program Competencies/Program Learning Outcomes

Generalist Foundation Competencies EPAS 2015

Competency 1: Demonstrate Ethical and Professional Behavior

Social workers understand the value base of the profession and its ethical standards, as well as relevant laws and regulations that may impact practice at the micro, mezzo, and macro levels. Social workers understand frameworks of ethical decision-making and how to apply principles of critical thinking to those frameworks in practice, research, and policy arenas. Social workers recognize personal values and the distinction between personal and professional values. They also understand how their personal experiences and affective reactions influence their professional judgment and behavior. Social workers understand the profession's history, its mission, and the roles and responsibilities of the profession. Social workers also understand the role of other professions when engaged in inter-professional teams. Social workers recognize the importance of life-long learning and are committed to continually updating their skills to ensure they are relevant and effective. Social workers also understand emerging forms of technology and the ethical use of technology in social work practice. Social workers:

- make ethical decisions by applying the standards of the National Association of Social Workers (NASW) (http://www.naswdc.org/) Code of Ethics, relevant laws and regulation, models for ethical decision-making, ethical conduct of research, and additional codes of ethics as appropriate to context;
- use reflection and self-regulation to manage personal values and maintain professionalism in practice situations;
- demonstrate professional demeanor in behavior, appearance, and oral, written, and electronic communication;
- use technology ethically and appropriately to facilitate practice outcomes; and
- use supervision and consultation to guide professional judgment and behavior.

Competency 2: Engage Diversity and Difference in Practice

Social workers understand how diversity and difference characterize and shape the human experience and are critical to the formation of identity. The dimensions of diversity are understood as the intersectionality of multiple factors including but not limited to age, class, color, culture, disability and ability, ethnicity, gender, gender identity and expression, immigration status, marital status, political ideology, race, religion/spirituality, sex, sexual orientation, and tribal sovereign status. Social workers understand that, as a consequence of difference, a person's life experiences may include oppression, poverty, marginalization, and alienation as well as privilege, power, and acclaim. Social workers also understand the forms and mechanisms of oppression and discrimination and recognize the extent to which a culture's structures and values, including, social, economic, political, and culture exclusions, may recognize the extent to which a culture’s structures and values, including social, economic, political, and cultural exclusions, may oppress, marginalize, alienate or create privilege and power. Social workers:

- apply and communicate understanding of the importance of diversity and difference in shaping the experiences in practice at the micro, mezzo, and macro levels;
• present themselves as learners and engage clients and constituencies as experts of their own experiences; and
• apply self-awareness and self-regulation to manage the influence of personal biases and values in working with diverse clients and constituencies.

Competency 3: Advance Human Rights and Social, Economic, and Environmental Justice
Social workers understand that every person regardless of position in society has fundamental rights such as freedom, safety, privacy, and adequate standard of living, health care, and education. Social workers understand the global interconnections of oppression and human rights violations, and are knowledgeable about theories of human need and social justice and strategies to promote social and economic justice and human rights. Social workers understand strategies designed to eliminate oppressive, environmental, economic, social, and cultural human rights are protected. Social workers:
• apply their understanding of social, economic, and environmental justice to advocate for human rights at the individual and system levels; and
• engage in practices that advance social, economic, and environmental justice.

Competency 4: Engage in Practice-Informed Research and Research-Informed Practice
Social workers understand quantitative and qualitative research methods and their respective roles in advancing a science of social work and in evaluating their practice. Social workers know the principles of logic, scientific inquiry, and culturally informed and ethical approaches to building knowledge. Social workers understand that evidence that informs practice derives from multi-disciplinary sources and multiple ways of knowing. They also understand the process for translating research. Social workers:
• use practice experience and theory to inform scientific inquiry and research;
• apply critical thinking to engage in analysis of quantitative and qualitative research methods and research findings; and
• use and translate research evidence to inform and improve practice, policy, and service delivery.

Competency 5: Engage in Policy Practice
Social workers understand that human rights and social justice, as well as social welfare and services, are mediated by policy and its implementation at the federal, state, and local levels. Social workers understand the history and current structure of social policies and services, the role of policy in service delivery, and the role of practice in policy development. Social workers understand their role in policy development and implementation within their practice in practice settings at micro, mezzo, and macro levels and they actively engage in policy practice to effect change within those settings. Social workers recognize and understand the historical, social, cultural, economic, organizational, environmental, and global influences that affect social policy. They are also knowledgeable about policy formulation, analysis, implementation, and evaluation. Social workers:
• identify social policy at the local, state, and federal level that impacts wellbeing, service delivery, and access to social services; and
• assess how social welfare and economic policies impact the delivery of and access to social services; and
• apply critical thinking to analyze, formulate, and advocate for policies that advance human rights and social, economic, and environmental justice.

Competency 6: Engage with Individuals, Families, Groups, Organizations, and Communities
Social workers understand that engagement is an ongoing component of the dynamic and interactive process of social work practice with, and on behalf of, diverse individuals, families, groups, organizations, and communities. Social workers value the importance of human relationships. Social workers understand theories of human behavior and the social environment, and critically evaluate and apply this knowledge to facilities engagement with clients and constituencies, including individuals, families, groups, organizations, and communities. Social workers understand strategies to engage diverse clients and constituencies to advance practice effectiveness. Social workers understand how their personal experiences and affective may impact their ability to effectively engage with diverse clients and constituencies. Social workers value principles of relationship-building and inter-professional collaboration to facilitate engagement with clients, constituencies and other professional as appropriate. Social workers:
• apply knowledge to human behavior and the social environment, person-in-environment, and other multidisciplinary theoretical frameworks to engage with clients and constituencies; and
• use empathy, reflection, and interpersonal skills to effectively engage diverse clients and constituencies.

Competency 7: Assess Individuals, Families, Groups, Organizations, and Communities
Social workers understand that assessment is an ongoing component of the dynamic and interactive process of social work practice with and on behalf of, diverse individuals, families, groups, organizations, and communities. Social workers understand theories of human behavior and the social environment, and critically evaluate and apply this knowledge in the assessment of diverse clients and constituencies, including families, groups, organizations, and communities. Social workers understand theories of human behavior and the social environment, and critically evaluate and apply this knowledge in the assessment of diverse clients and constituencies, including individuals, families, groups, organizations, and communities. Social workers understand methods of assessment with diverse clients and constituencies to advance practice effectiveness. Social workers recognize the implications of the larger practice context in the assessment process and value the importance of inter-professional collaboration in this process. Social workers understand how their personal experiences and affective reactions may affect their assessment and decision making. Social workers:
• collect and organize data, and apply critical thinking to interpret information from clients and constituencies;
• apply knowledgeable of human behavior and the social environment, person-in-environment, and other multidisciplinary theoretical frameworks in the analysis of assessment data from clients and constituencies;
• develop mutually agreed-on intervention goals and objectives based on the critical assessment of strengths, needs, and challenges within clients ad constituencies; and
• select appropriate intervention strategies based on the assessment, research knowledge, and values and preferences of clients and constituencies.

**Competency 8: Intervene with Individuals, Families, Groups, Organizations, and Communities**

Social workers understand that intervention is an ongoing component of the dynamic and interactive process of social work practice with, and on behalf of, diverse individuals, families, groups, organizations, and communities. Social workers are knowledgeable about evidence-informed interventions to achieve the goals of clients and constituencies, including individuals, families, groups, organizations, and communities. Social workers understand theories of human behavior and the social environment, and critically evaluate and apply this knowledge to effectively intervene with clients and constituencies. Social workers understand methods of identifying, analyzing, and implementing evidence-informed interventions to achieve client and constituency goals. Social workers value the importance of interprofessional and interorganizational collaboration. Social workers:

• critically choose and implement interventions to achieve practice goals and enhance capacities of clients and constituencies;
• apply knowledgeable of human behavior and the social environment, person-in-environment, and other multidisciplinary theoretical frameworks in the interventions with clients and constituencies;
• use interprofessional collaboration as appropriate to achieve beneficial practice outcomes; and
• facilitate effective transitions and endings that advance mutually agreed-on goals.

**Competency 9: Evaluate Practice with Individuals, Families, Groups, Organizations, and Communities**

Social workers understand that evaluation is an ongoing component of the dynamic and interactive process of social work practice with, and on behalf of, diverse individuals, families, groups, organizations and communities. Social workers recognize the importance of evaluating processes and outcomes to advance practice, policy, and service delivery effectiveness. Social workers understand theories of human behavior and the social environment, and critically evaluate and apply this knowledge in evaluating outcomes. Social workers understand qualitative and quantitative methods for evaluating outcomes and practice effectiveness. Social workers:

• select and use appropriate method for evaluation of outcomes;
• apply knowledge of human behavior and the social environment, person-in-environment, and other multidisciplinary theoretical frameworks in the evaluations of outcomes;
• critically analyze, monitor, and evaluate intervention and program processes and outcomes; and
• apply evaluation findings to improve practice effectiveness at the micro, mezzo, and macro levels.

**Competency 10: Demonstrate Ethical Integration of Faith and Spirituality in Social Work Practice**

Social workers understand the role of spirituality and faith as part of a holistic approach to social work practice and in understanding human behavior and the social environment. Social workers apply ethical principles in the integration of faith in practice, mindful of their own beliefs and their impact on the helping relationship. Social workers recognize that faith communities are part of the cultural context of individuals, families, and communities, and provide protective as well as risk factors in the process of change. In this context, social workers articulate how Christian beliefs and values can be ethically integrated in professional social work practice. Social workers:

• demonstrate an understanding of a Christian worldview related to social work practice;
• critically analyze how Christian, spiritual, or religious traditions assist or hinder the helping process;
• demonstrate understanding of ethical integration of faith and spirituality in social work practice; and
• understand the contributions and capacity of faith-based organizations and churches as resources in the delivery of social services.

**Clinical Practice with Individuals and Families Competencies EPAS 2015**

**Competency 1: Demonstrate Ethical and Professional Behavior**

Social workers have a deep understanding and commitment to the value base of the profession, and can conceptualize and apply ethical standards and relevant laws and regulations to complex cases involving diverse populations and emerging technologies. Social workers demonstrate advanced critical thinking skills to examine and incorporate use of best-practice frameworks for decision making, including use of supervision. Social workers integrate the value base of the profession by reflecting on one's own biases and values while considering interconnected ethical implications of assessment, diagnosis, treatment planning, and intervention. Social workers demonstrate effective regulation in working with clients while using professional judgment and behaviors, and engage in reflective and reflexive practices. Social workers demonstrate the ability to work in interprofessional teams, engaging in activities within the role and scope of practice of diverse social work settings. Social workers are aware of the importance of lifelong learning and demonstrate the ability to adapt to, learn about, and apply emerging forms of practice. They:

• consistently apply and advance National Association of Social Workers (NASW) (http://www.naswdc.org/) principles and code of ethics in ambiguous and complex practice situations;
• recognize complex ethical considerations related to technology and practice; and
• recognize the role and appropriate use of supervision and consultation in ethical decision making.
Competency 2: Engage Diversity and Difference in Practice
Social workers understand how diversity and difference characterize and influence the human experience as it applies to clinical practice with individuals, families, and groups. Social workers can identify the ways that practitioner and client cultural backgrounds and beliefs may affect clinical social work practice. Social workers are able to recognize and address stigma, access to care, and quality-of-care issues relating to diverse client groups by identifying structures and values that oppress and/or enhance privilege or power. Social workers are able to demonstrate advanced insight into personal biases and values and their influence on work with diverse clients, extending consistent dignity and respect to others. Social workers understand how cultural concepts of distress shape assessment, diagnosis, and treatment. They:

- demonstrate and express how cultural concepts of distress and identity, as well as intersectionality, influence assessment, diagnosis, and treatment;
- apply cultural humility and competence in adapting integrated services to meet diverse client needs; and
- collaborate with and advocate for vulnerable and disempowered individuals, families, and groups so that services and resources are equitably accessed.

Competency 3: Advance Human Rights and Social, Economic, and Environmental Justice
Social workers understand the importance of protecting fundamental human rights to end all forms of oppression. Mindful of every person’s fundamental right to self-determination, social workers help empower clients to navigate organizations and institutions in order to meet all their basic needs. Social workers are knowledgeable of best practices that help reduce and eradicate structural injustices within health, mental health, education, and community systems so that all individuals, particularly those who are vulnerable and oppressed, can lead healthy and thriving lives. They:

- identify and develop strategies that help reduce and eliminate systemic forms of oppression an individual may experience in his/her community or institution;
- integrate theories of human need and social justice in order to formulate policies that advance human rights for vulnerable populations; and
- use knowledge of the effects of oppression, discrimination, and historical trauma on clients and client systems to guide treatment planning and intervention.

Competency 4: Engage in Practice-informed Research and Research-informed Practice
Social workers understand the evaluation methods of evidence-informed practice. They know how to consume and evaluate the quantitative and qualitative research literature on practice to remain informed of emerging practice trends. Social workers innovate new and effective intervention models, while identifying gaps in the research literature, particularly around disenfranchised, oppressed, and marginalized populations. They also recognize the philosophical limitations of current evidence-based research models. Social workers use best practices in research to design, analyze, and conduct their own research using quantitative or qualitative research methods. They:

- evaluate the social work profession research base to inform theory, scientific inquiry, and research;
- apply critical thinking to engage and develop a quantitative and qualitative research proposal question;
- identify practice implications determined by evidence-informed research; and
- use and translate research evidence to inform, improve, and innovate practice, policy, and service delivery.

Competency 5: Engage in Policy Practice
Social workers understand the dynamic and political nature of clinical practice and apply interventions contextualized within a framework of advancing human rights within social welfare systems. Using a person-in-environment perspective, social workers understand how a client’s experience is directly impacted by local, state, or federal policies. Social workers actively engage in policy practice through advocacy and by implementing strategies that help effect change at the organizational and governmental levels. They:

- identify how organizational and governmental policies impact the practice environment and the client’s ability to access services;
- work alongside and on behalf of clients to influence service delivery through advocacy and legislative change; and
- use evidence-informed practice and research-based evidence to advocate for policies that advance social and economic well-being.

Competency 6: Engage with Individuals, Families, Groups, Organizations, and Communities
Social workers understand engagement as an integral component of clinical social work practice, and understand the importance of relationship as instrumental in the facilitation of the helping process. Social workers utilize interpersonal skills, knowledge of human behavior, and multiple theoretical frameworks to facilitate engagement with individuals, families, groups, organizations, and communities. They:

- demonstrate the ability to attend to the interpersonal dynamics and contextual factors that strengthen and potentially threaten the therapeutic alliance;
- establish a relationally based process that encourages clients to be equal participants in the establishment of treatment goals and expected outcomes;
- develop, manage, and maintain therapeutic relationships with clients within the person-in-environment and strengths perspective; and
- utilize appropriate multidimensional assessment instruments.
Competency 7: Assess Individuals, Families, Groups, Organizations, and Communities

Social workers competently engage in detailed client assessment, recognizing that assessment is an ongoing, dynamic process. They engage in differential diagnosis, utilizing the DSM in a critical and responsible manner, and utilize the various aspects of a comprehensive assessment to accurately assess their clients. Social workers understand methods of assessment with diverse clients and constituencies to advance practice effectiveness, and are knowledgeable about interprofessional collaboration, utilization of collateral contacts, and appropriate referral to supplemental services for their clients as needed. Social workers recognize how agency setting, clinical bias, and cultural differences affect assessment and diagnosis. They:

- perform detailed client assessment and utilize critical thinking to arrive at accurate diagnoses and treatment plans;
- select appropriate intervention strategies and treatment modalities based on accurate cultural formulation and assessment of their client’s presenting problems; and
- critically apply diagnostic classification systems in a process of continuous assessment.
- utilize appropriate multidimensional assessment instruments.

Competency 8: Intervene with Individuals, Families, Groups, Organizations, and Communities

Social workers demonstrate advanced skills in assessment and diagnosis in order to determine appropriate application of human behavior and practice theories that inform intervention within contexts. Social workers link interventions to problems, applying best-practice interventions throughout the dynamic and interactive process of social work practice with diverse family populations. Social workers apply critical thinking, and demonstrate the ability to respond to, assess, and intervene with crises and trauma at the individual, family, and community levels. Social workers engage in interprofessional and collaborative teams and within systems impacting mental health in order to advocate for, inform, and achieve client or community goals. They:

- critically select and apply best practices, evidence-based interventions, and appropriate clinical techniques for a range of presenting concerns identified in the assessment of individuals, families, and groups in diverse situations;
- demonstrate understanding of theories informing assessment of and interventions in diverse situations;
- demonstrate the ability to identify crises and the appropriate use of crisis intervention and prevention strategies as needed; and
- collaborate effectively with other professionals to coordinate treatment interventions and appropriate advocacy.

Competency 9: Evaluate Practice with Individuals, Families, Groups, Organizations, and Communities

Social workers competently engage in an ongoing evaluation of the dynamic and interactive process of social work practice, recognizing the diversity that exists in serving individuals, families, groups, organizations, and communities. Understanding the integral relationship between processes and outcomes, social workers apply multidimensional methods of evaluation to advance practice, policy, and service delivery effectiveness, using qualitative and quantitative outcomes measures. In doing so, social workers incorporate a thorough understanding of human behavior and the social environment in evaluating the effectiveness of applied interventions. They:

- use clinical evaluation of the process and/or outcomes to develop best-practice interventions for a range of bio-psycho-social-spiritual conditions; and
- utilize outcomes data to evaluate effectiveness of applied interventions.

Competency 10: Demonstrate Ethical Integration of Faith and Spirituality in Social Work Practice

Social workers understand the role of spirituality and faith as part of a holistic approach to social work practice, particularly in understanding human behavior and the social environment. Social workers competently engage in assessing and diagnosing multifaceted needs by applying a bio-psycho-social-spiritual framework. Guided by ethics and cultural humility, social workers respect differences and professional boundaries while incorporating spirituality and faith in their clinical work with individuals, families, groups, and communities. They critically evaluate the role that Christian beliefs and values play in the helping process.

- Use critical thinking skills to apply Christian beliefs and values, as appropriate, to client needs, in an ethical manner.
- Apply bio-psycho-social-spiritual assessment skills as applicable to practice contexts.
- Integrate clients’ religious, spiritual, and faith traditions and/or faith communities, as indicated, to enhance recovery.

Community Leadership and Program Administration Competencies EPAS 2015

Competency 1: Demonstrate Ethical and Professional Behavior

Social workers have a deep understanding and commitment to the value base of the profession, particularly the commitment to advance social justice. Social workers understand the person-in-environment perspective, and possess advanced understanding of how to apply ethical standards and relevant laws and regulations to micro, mezzo, and macro practice situations. Social workers apply critical thinking and ethical frameworks to complex decision making in community practice, including the research and policy arenas. Social workers demonstrate advanced awareness of personal biases and influences and maintain professional judgment when practicing with diverse organizations and communities. Macro social workers understand the roles and responsibilities of managers in social welfare organizations, community organizers in neighborhoods, and policy advocates in state, national, and international governance. Social workers also understand emerging forms of technology, including social media, data information systems, and analytics software, and take great ethical consideration in the application of such technology. They:
• demonstrate advanced insight in personal reflection and self-regulation to maintain professionalism;
• use reflection and self-regulation to manage personal values and maintain professionalism in practice situations;
• demonstrate ability to effectively communicate orally and in writing when assuming a leadership role and when collaborating with other professionals;
• use supervision and consultation to guide professional judgment and behavior;
• apply ethical decision-making skills to address complex and ambiguous practice situations; and
• utilize technology ethically and appropriately when conducting research, tracking quality of service delivery, and facilitating program outcomes.

**Competency 2: Engage Diversity and Difference in Practice**

Social workers understand how diversity and difference characterize and shape the human experience as it applies to an individual’s experience within their larger social and cultural environment. Social workers are committed to the promotion of equal social and economic rights across all dimensions of diversity and within local, organizational, and policy arenas, recognizing the roles that privilege and discrimination have in determining the access and allocation of societal resources. Social workers are knowledgeable about challenging and rectifying organizational and structural forms of oppression, and ensure that communities, organizations, and policies are sensitive to and knowledgeable of the unique and diverse needs of their clients and constituencies. They:

• ensure the cultural competencies of programs and policies by recognizing the similarities and differences between the values and norms of the dominant society and those of oppressed, underserved, and underrepresented populations;
• collaborate with and advocate for vulnerable and disempowered communities so that power and resources are equitably distributed; and
• apply cultural humility in the examination of personal biases and values and their influence on work with diverse clients and constituencies, extending consistent dignity and respect to others.

**Competency 3: Advance Human Rights and Social, Economic, and Environmental Justice**

Social workers understand the foundational functions of the United Nations’ universal human rights treaties for the protection of the civil, political, social, economic, educational, health, and ecological rights of individuals, communities, and sovereign nations. Social workers understand the role of cultural relativism as applied to diverse norms and values, exhibited across multicultural global populations. Social workers understand the impact of globalization on poverty, environmental resources, climate change, and the mechanisms for local and global governance as related to social policy development. They:

• integrate human rights principles for elimination of oppressive structures when developing social policies on community, state, federal, and global levels;
• apply theoretical, political, economic, and social sciences frameworks when analyzing human rights and social justice issues; and
• engage in research-informed advocacy for the rights of diverse population groups to establish social, economic, and environmental justice.

**Competency 4: Engage in Practice-Informed Research and Research-Informed Practice**

Social workers recognize how multiple forms of knowing and their associated research methodologies help inform how evidence is developed and used to inform data-driven programmatic and policy development and implementation. Social workers understand the conceptual and operational links between program and policy design and its impact on the clients and constituencies they are designed to serve. They:

• use and translate research evidence to inform and improve practice, policy, and service delivery;
• create scientifically rigorous inquiries to create, plan, and evaluate programs and policies; and
• articulate the tensions between practice wisdom and research evidence when making practice decisions.

**Competency 5: Engage in Policy Practice**

Social workers understand the operationalization of social policies into equitable and effective service delivery. Social workers understand the foundational functions of human rights and social justice principles as they apply to social welfare and social services policies. Social workers understand the fundamental strategies, including engagement of stakeholders, political advocacy, and policy creation and analysis, for the establishment of social, economic, and environmental justice. They:

• assess and analyze the formative effect of organizational, ideological, religious, economic, and political factors on domestic and global social policies;
• implement sustainable development principles in the analysis and development of domestic and global social policies and programs; and
• engage multiple stakeholders in social policy development and implementation on community, state, federal, and global levels.

**Competency 6: Engage with Individuals, Families, Groups, Organizations, and Communities**

Social workers understand that engagement is a critical component of social work practice and specialize in connecting with groups, organizations, and communities utilizing theoretical practice models for engaging in the change process. Social workers establish relationships by analyzing relevant systems and identifying potential stakeholders. Social workers are committed to engagement with diverse clients and constituencies to enhance assessment and improve effectiveness of interventions. They:
• use interpersonal skills to engage constituents in the change process;
• pursue reciprocal relationships to develop desired outcomes and expectations; and
• collaborate effectively with constituents to facilitate sustainable change.

**Competency 7: Assess Individuals, Families, Groups, Organizations, and Communities**
Social workers understand that assessment is contextual and is an ongoing component of effective social work practice among groups, organizations, and communities. Social workers collect information through identified stakeholders within critical systems, and are committed to effective assessment among diverse clients and constituencies to enhance the effectiveness of interventions. Social workers apply relevant theoretical and evidence-informed practice models in assessment of groups, organizations, and communities. They:

• research, collect, analyze, and interpret system policy and community and organizational data to inform assessment and intervention strategies;
• select and modify appropriate intervention strategies based on evidence and continuous assessment;
• mutually develop agreed-upon goals and measurable objectives; and
• initiate strategies and/or actions to achieve goals and objectives within the context of the organization, community, and/or policy arenas.

**Competency 8: Intervene with Individuals, Families, Groups, Organizations, and Communities**
Social workers understand that intervention is an ongoing component of the dynamic and interactive process of social work practice and specialize in interventions relevant to groups, organizations, and communities. Social workers are knowledgeable of and apply evidence-informed interventions that are grounded in participatory methods. Social workers in macro practice understand the importance of acknowledging systems and power structures to best promote change and recognize the value of place-based initiative. Social workers are specifically skilled in advocacy, facilitation, policy practice, administration, and development of intervention strategies within groups, organizations, and communities. They:

• develop intervention goals and design and implement a plan of action in collaboration with individuals, groups, organizations, and communities;
• plan for the use of models, methods, and strategies that are appropriate to the local, regional, national, and international context; and
• identify power structures and use consensus building to enhance service implementation.

**Competency 9: Evaluate Practice with Individuals, Families, Groups, Organizations, and Communities**
Social workers understand that evaluation is an ongoing component of ensuring effective practice with groups, organizations, and communities. Social workers recognize stakeholders in the development of evaluation methods and ensure that a broad range of qualitative and quantitative measures are utilized. Social workers in macro practice understand data collection, analysis, interpretation, and application related to program and policy evaluation, and are committed to the dissemination of outcomes of intervention strategies to enhance evidence-informed practice. They:

• establish and/or ensure that measurable evaluation criteria and methods are being utilized within change efforts;
• collect, analyze, and interpret system, policy, community, and organizational data relevant to intervention evaluation; and
• utilize evaluation data in collaboration with constituents to select and modify appropriate intervention strategies for enhanced benefit to client systems.

**Competency 10: Articulate How Christian Beliefs and Values Can be Ethically Integrated in Professional Social Work Practice**
Social workers understand how Christian beliefs and values can be ethically integrated into professional social work practice, and are knowledgeable about the capacity of faith-based organizations and churches as resources in the delivery of social services. Social workers understand the ethical integration of personal faith and core values as social workers, and recognize the contributions of the global Christian community in promoting social justice. They:

• critically evaluate the strengths and challenges of faith-based organizations and churches in the delivery of client services;
• demonstrate understanding of the ethical integration of personal faith and core values when working with organizations, communities, and policy arenas; and
• identify ways in which social justice is enhanced and supported by the global Christian community.

**Courses**

**SOCW 511, Introduction to the Social Work Profession, 2 Units**
Content focuses on the history, identity, values, ethics, scope of practice, and knowledge base of the social work profession. Students explore ways their own backgrounds and beliefs are likely to influence professional activities, and examine the specific relationship of faith perspectives to social welfare policy and practice. Attention is given to developing professional writing and critical thinking skills.

**Prerequisite:** Admission to MSW program
SOCW 512, Social Welfare Policy and Policy Practice, 3 Units
The course provides an introduction to American social welfare policies, offers a historical overview of political influences on social work practice, and presents different models for political advocacy. Content focuses on political and client advocacy with attention to the relevance of professional ethical standards and faith perspectives to policy practice.
Prerequisite: Admission to MSW program

SOCW 513, Micro-theory and Human Development, 3 Units
Content will focus on theories that inform micro-level social work practice with individuals and families using a bio-psychosocial and spiritual framework. Human development across the life course is addressed with psychosocial theory’s life stages to assist with the contextualization and integration of theories to meet the needs of diverse populations in practice.
Prerequisite: Admission to MSW program

SOCW 514, Practice I - Interviewing and Assessment, 3 Units
This course begins a two-course sequence that provides the foundation for social work practice with individuals and families. Content includes legal and ethical practice, stages of the helping process, interviewing and assessment skills with adults, children, and families, clinical assessment and diagnosis using the DSM, and strategies for critically analyzing and sharing assessment information.
Prerequisite: Admission to MSW program

SOCW 515, Field Seminar I, 1 Unit
Field seminars meet in conjunction with field coursework and provide students opportunities to discuss practice situations, professional development issues, the relationship of field to classroom learning, and skills necessary for effective practice. Generalist foundation year field seminars (I and II) focus on beginning generalist social work practice skills, understanding agency and community context, and professional ethics.
Prerequisite: Admission to the Social Work program; Corequisite: SOCW 516

SOCW 516, Field I, 3 Units
The purpose of field internship is to provide a professional setting for students to practice generalist foundation social work skills and to provide an opportunity for the integration of knowledge, skills, values, and ethical faith integration in practice. Students complete a minimum of 480 hours by the end of semester I and semester II at an approved and designated social welfare agency.
Prerequisite: Admission to the Social Work program; Corequisite: SOCW 515

SOCW 521, Introductory Research Methods, 2 Units
Content will introduce critical evaluation of social work research and evidence informed social work practice, along with how research can ethically be used to improve practice at individual and agency levels. Concepts include: problem identification, hypothesis formulation, measurement, sampling, qualitative and quantitative research designs, data collection methods, data analysis, and program evaluation. Students will explore how science, scholarship, and the politics of knowledge development can facilitate the mission of social work.
Prerequisite: Statistics course

SOCW 522, Diversity and Social Justice, 3 Units
Content will focus on diverse populations in American society and ways historical and contemporary patterns of oppression and discrimination may influence social work practice. Specific attention is given to self-awareness and to professional commitments to marginalized groups and processes of advocacy, coalition-building, and other ways of developing effective alliances to promote social justice.
Prerequisite: Admission to MSW program

SOCW 523, Macro-theory and Communities/Organizations, 3 Units
Content will focus on macro-level theories and social work practice with organizations and communities. Models of practice that include comprehensive assessment, integrating an understanding of various forms and mechanisms of discrimination and oppression and their relevance to macro-level interventions, will be examined. Social work with organizations and communities embraces efforts to protect human and civil rights for the advancement of social and economic justice.
Prerequisite: SOCW 513

SOCW 524, Practice II - Intervention and Evaluation, 3 Units
This course ends a two-course sequence that provides the foundation for social work practice with individuals and families. Content includes goal-setting and contracting, planning and implementing change strategies, utilizing evidence-based practice research, interdisciplinary collaboration, advocacy, resource development, and practice evaluation.
Prerequisite: SOCW 514
SOCW 525, Field Seminar II, 1 Unit
Field seminars meet in conjunction with field coursework and provide students opportunities to discuss practice situations, professional development issues, the relationship of field to classroom learning, and skills necessary for effective practice. Generalist foundation year field seminars (I and II) focus on beginning generalist social work practice skills, knowledge and use of self, and professional ethics.
Prerequisite: SOCW 514, SOCW 515, and SOCW 516;
Corequisite: SOCW 526

SOCW 526, Field II, 3 Units
The purpose of field internship is to provide a professional setting for students to practice generalist foundation practice skills and to provide an opportunity for the integration of knowledge, skills, values, and ethical faith integration in practice. Students complete a minimum of 480 hours by the end of semester I and semester II at an approved and designated social welfare agency.
Prerequisite: Admission to MSW program, SOCW 515, and SOCW 516;
Corequisite: SOCW 525

SOCW 527, Research for Evidence-Informed Practice, 2 Units
The content of this course prepares students to critically evaluate social work research and evidence-informed social work practice, along with the ethical use of research methods to improve clinical practice. Concepts include problem identification, hypothesis formulation, measurement, sampling, qualitative and quantitative research designs, data collection methods, data analysis, and outcomes evaluation. Students explore how science, scholarship, and the politics of knowledge development can facilitate the mission of social work.
Prerequisite: Statistics course

SOCW 528, Research for Data Driven Change, 2 Units
This course will introduce critical evaluation of social work research and its ethical application towards data-driven decision-making within community practice settings. Concepts include: problem identification, hypothesis formulation, measurement, sampling, research design, data collection methods, data analysis, and program evaluation. Students will explore how science, scholarship, and the politics of knowledge development can facilitate the mission of social work.
Prerequisite: Statistics course

SOCW 529, Human Rights and Sustainable Development Policy, 2 Units
Content will focus on the relevance of human rights and sustainable development policy to macro-level social work practice in the U.S. and abroad. Topics will include advancement of human rights for social, economic and environmental justice and sustainable development strategies for poverty alleviation, universal education, public health, sanitation and housing, food security, access to clean water, population control and climate change. Analysis of existing global social policies will apply existing political, ideological, religious, cultural, age, and gender frameworks to explain current conditions and future trends. Secular and Christian perspectives will be explored.
Prerequisite: SOCW 522 and SOCW 523

SOCW 530, Organizing for Community Change, 3 Units
This course expands foundation year macro-level practice content to enhance theoretical understanding and develop skills in the promotion of community, organizational, and policy change to enhance social well-being and advance social justice. Special attention is focused on collaborative efforts, coalition building and participatory methods to facilitate sustainable change. Additional topics include assessment of social service delivery systems, advocacy, and professional ethics in macro practice. The importance of engaging diverse communities, recognition of underrepresented and underserved populations, and utilizing cultural humility in practice are emphasized.
Prerequisite: SOCW 523

SOCW 531, Human Rights and Sustainable Development, 2 Units
Content will focus on the relevance of human rights and sustainable development to macro-level social work practice in the U.S. and abroad. Topics will include advancement of human rights and economic justice, poverty alleviation, politics, religion, culture, age, gender, and public health conditions on human rights and development-related activities. Secular and Christian perspectives will be explored.
Prerequisite: SOCW 522 and SOCW 523

SOCW 532, Advanced Community Practice, 3 Units
This course expands foundation year macro-level practice content to include community entrance, engagement, participatory action research, and collaborative strategies to advance policies and programs supporting community interests and desired resources. Additional topics include empowerment, development of cultural competence, identification of oppressive cultural structures, globalization, and professional ethics. Engaging diverse communities and cultural humility are emphasized.
Prerequisite: SOCW 523

SOCW 533, Organizational Behavior and Management, 3 Units
This course provides an overview of organizational behavior and effective management practices within the social service sector. Topics include: human resource/legal/ethical issues; employee diversity; organizational culture; conflict resolution; group behavior; employee training/development; hiring practices; employee motivation; budgeting; and managing organizational change. Emphasis is placed on professional written and verbal communication.
Prerequisite: SOCW 523
SOCW 534, Field Seminar III, 1 Unit
Field Seminar III focuses on presentation and discussion of student experiences in specialization field internships. Specific emphasis is placed on demonstration and evaluation of advanced practice skills, interventions, supervision use, cultural responsiveness, professional ethics, and faith integration issues addressed in coursework.

Prerequisite: SOCW 514, SOCW 515, SOCW 516, SOCW 524, SOCW 525, SOCW 526;
Corequisite: SOCW 527 and SOCW 539 (clinical specialization) or SOCW 528 and SOCW 535 (community leadership and program administration specialization)

SOCW 535, Field III - Community Leadership and Program Administration, 3 Units
The purpose of field internship is to provide a setting for students to develop advanced community practice skills and an opportunity for the ethical integration of knowledge, skills, values, and faith in social work. Students complete a minimum of 480 hours (600 hours for Advanced Standing students) by the end of semester I and semester II at an approved and designated agency.

Prerequisite: SOCW 514, SOCW 515, SOCW 516, SOCW 524, SOCW 525, SOCW 526;
Corequisites: SOCW 528, SOCW 534

SOCW 536, Adult Behavioral Health and Diagnosis, 3 Units
This course begins a two-semester advanced clinical practice sequence focusing on adult behavioral health. Content includes advanced application of the Diagnostic and Statistical Manual for Mental Disorders (DSM-5); symptoms, diagnoses, and treatment strategies associated with psychiatric conditions; brain functioning and chemistry; psychotropic medications; and managed care expectations. Cultural and faith perspectives are integrated throughout the course using clinical best practices.

Prerequisite: SOCW 514 and SOCW 524

SOCW 537, Child and Adolescent Behavioral Health and Diagnosis, 3 Units
This course focuses on behavioral health issues experienced by children and adolescents, and discussion of the effects of trauma on social and emotional development. Diagnostic issues affecting children and related treatment interventions are explored in the contexts of child welfare, school-based behavioral health, and healthcare settings. Research-informed approaches are taught, to improve functioning and well-being of children and adolescents. Laws impacting work with minors and families, as well as ethical issues for social work practitioners, are presented. Course content meets California education requirements in the area of child abuse assessment for LCSW licensure.

Prerequisite: SOCW 513, SOCW 514, and SOCW 524

SOCW 538, Clinical Practice with Groups, 2 Units
This course presents different theoretical approaches and treatment strategies associated with clinical social work practice with groups. Topics include group development stages, professional ethics in practice with groups, leadership principles, diversity issues, and evaluation methods.

Prerequisite: SOCW 513

SOCW 539, Field III-Clinical Practice, 3 Units
The purpose of field internship in the clinical specialization year is to provide a setting for students to develop advanced practice skills and an opportunity for the integration of knowledge, skills, and social work values as applied to clinical practice across the life span continuum. Students complete a minimum of 480 hours (600 hours for Advanced Standing students) by the end of fall and spring semesters at an approved and designated agency.

Prerequisite: SOCW 514, SOCW 515, SOCW 516, SOCW 524, SOCW 525, SOCW 526;
Corequisites: SOCW 527, SOCW 534

SOCW 540, Educational Policy, 3 Units
This course introduces policies and legislation that impact delivery of school social work services in the United States education system. Landmark local, state, and federal policies are presented for analysis and application to the public school setting, critical for gaining an understanding of the challenges for school social work practice. Historical and current perspectives including racism, equality, and access to public education are discussed.

Prerequisite: Completion of generalist foundation curriculum; admission to the PPS program (required for students seeking the PPSC).

SOCW 541, Capstone Leadership Project, 3 Units
This course prepares students for professional leadership roles in social work settings and supports completion of their capstone leadership projects. Content integrates development of leadership skills, self reflection, professional use of self, interprofessional practice, use of research to inform practice, and knowledge of program context to implement sustainable change in organizations. Professional ethics and decision making, which influence the leadership role in social work, are examined.

Prerequisite: All generalist foundation courses and completion of first semester of specialization courses.
Corequisites: SOCW 544, and SOCW 545 or SOCW 548

SOCW 542, International Social Work Policy and Practice, 2 Units
Content will focus on international social work practice at multiple systems levels. Topics will include comparison of United States’ and international social welfare policy, differing theoretical and religious perspectives, neo-liberal economic development policies, globalization, and issues immigrants and other marginalized groups. Practice content will address poverty alleviation, conflict and post-conflict reconstruction, displacement and forced migration concerns.

Prerequisite: SOCW 522, SOCW 523, SOCW 531, SOCW 532
SOCW 543, Fundraising, Grant Writing, and Fiscal Decision Making, 3 Units
This course prepares students for potential fundraising, grant writing, program design and evaluation, and fiscal decision-making responsibilities in human services organizations. Students assess local agencies and analyze funding resources, strategies, skills, and decision-making processes. Assignments focus on grant writing, developing fundraising strategies, and applying knowledge of ethical management and fiscal practices.

SOCW 544, Field Seminar IV, 1 Unit
Field Seminar IV focuses on presentation and discussion of students experiences in specialization year field internships and preparation for masters-level social work employment and licensure. Specific emphasis is placed on critical thinking and communication of professional judgments, integration of theory, assessment, intervention, and evaluation, as well as professional development issues.
Prerequisite: SOCW 514, SOCW 515, SOCW 516, SOCW 524, SOCW 525, SOCW 526, SOCW 534, SOCW 535 or SOCW 539;
Corequisite: SOCW 541; and SOCW 545 or SOCW 548

SOCW 545, Field IV - Community Leadership and Program Administration, 3 Units
Field internship provides a setting for students to utilize advanced community practice skills and an opportunity for the ethical integration of knowledge, skills, values, and faith in social work. Students complete a minimum of 480 hours (600 hours for Advance Standing students) by the end of semester I and semester II at an approved and designated agency.
Prerequisite: SOCW 514, SOCW 515, SOCW 516, SOCW 524, SOCW 525, SOCW 526, SOCW 534, and SOCW 535;
Corequisite: SOCW 541, SOCW 544

SOCW 546, Family Therapy in Context, 3 Units
This course focuses on family practice contexts and theories of child welfare and family therapy. Content includes social worker roles and scope of practice in child welfare practice, and current approaches to assisting families in the child welfare system. Also included is the demonstration and practice of family therapy, application of theory, and assessment and intervention on diverse family systems. Course material also addresses legal and ethical problem solving related to contemporary professional ethics and statutes and regulations related to family law.
Prerequisite: SOCW 513, SOCW 523

SOCW 547, Health and Behavioral Health Policy, 2 Units
This course explores American social welfare policies relevant to health and behavioral health care. Course content includes the historical and social contexts of health and behavioral health care, and the roles of the public and private sectors in shaping contemporary trends and issues, particularly among vulnerable communities. Topics include healthcare reform, integrated care, access/treatment disparities, advocacy and policy reform, and the recovery model.
Prerequisite: SOCW 512

SOCW 548, Field IV - Clinical Practice, 3 Units
Field internship in the clinical specialization year provides a setting for students to develop advanced practice skills, and an opportunity for the integration of knowledge, skills, and social work values as applied to clinical practice across the life span. Students complete a minimum of 480 hours (or 600 hours for Advanced Standing students) by the end of fall and spring semesters at an approved, designated agency.
Prerequisite: SOCW 514, SOCW 515, SOCW 516, SOCW 524, SOCW 525, SOCW 526, SOCW 534, and SOCW 539;
Corequisites: SOCW 541 and SOCW 544

SOCW 550, Advanced Standing: Intermediate Praxis, 3 Units
Content focuses on theory/practice integration in professional social work. Students apply different worldviews and micro- and macro-level theories to case examples drawn from professional social work, and identify implications for intervention and evaluation. Models of practice involving diverse communities and social welfare organizations are explored.
Prerequisite: Admission to advanced standing MSW program;
Corequisite: SOCW 551

SOCW 551, Advanced Standing: Social Work Ethics and Practice, 3 Units
This advanced-standing course provides overviews of the legal and ethical practice standards in social work, and addresses the skills required for effective engagement, assessment, intervention, and evaluation with individuals, families and groups. Assignments focus on social work practice skill development, application of documentation standards, use of evidence-informed practice methods, and integration of legal and ethical issues impacting practice.
Prerequisite: Completion of BSW degree; statistics course with a grade of C or higher.

SOCW 552, Program Planning and Evaluation, 3 Units
Systematic program planning with a focus on outcomes is a critical component in operating effective human service programs. Over the course of this semester, you will become familiar with program design and program evaluation methodologies, and the tools most commonly used to assess human service programs. Additional topics will include identification and use of performance measures, the roles of evaluators and stakeholders, the influence of the political environment, technology applications, and applicable ethics related to program design and evaluation. At the completion of this course you will be prepared to design and implement programs and conduct outcome evaluations to ensure program efficiency and effectiveness for clients, staff and external funding sources.
Prerequisite: Completion of generalist foundation coursework
SOCW 553, Field V Clinical: School Social Work, 3 Units
The PPSC school social work field internship provides a setting for students to develop advanced clinical practice skills in preparation for practice in school settings, and an opportunity for the ethical integration of knowledge, skills, values, and faith in social work. Students accrue field hours at an approved and designated school site in the fall and spring semesters of their specialization year; a total of 600 hours (450 in school social work and 150 in child welfare and attendance) is required by the end of the spring semester. This is the second of a two-semester course sequence with SOCW 555.
Prerequisite: MSW Students: SOCW 514, SOCW 515, SOCW 516, SOCW 524, SOCW 525, & SOCW 526. Post-MSW Students: MSW from a CSWE-accredited program, and acceptance into the APU PPSC program.
Corequisites: MSW students: SOCW 527, SOCW 554

SOCW 554, Field Seminar V Clinical: School Social Work, 1 Unit
This seminar course focuses on discussion of student experiences in the PPSC school social work field internships. Emphasis is on demonstration and evaluation of advanced practice skills, interventions, supervision use, cultural responsiveness, professional ethics, and faith integration issues addressed in the PPSC field experience. This is the first of a two-semester course sequence with SOCW 556.
Prerequisite: MSW Students: SOCW 514, SOCW 515, SOCW 516, SOCW 524, SOCW 525, & SOCW 526. Post-MSW Students: MSW from a CSWE-accredited program, and acceptance into the APU PPSC program.
Corequisites: MSW students: SOCW 527, SOCW 553

SOCW 555, Field VI Clinical: School Social Work, 3 Units
The PPSC school social work field internship provides a setting for students to develop advanced clinical practice skills in preparation for practice in school settings, and an opportunity for the ethical integration of knowledge, skills, values, and faith in social work. Students accrue field hours at an approved and designated school site in the fall and spring semesters of their specialization year; a total of 600 hours (450 in school social work and 150 in child welfare and attendance) is required by the end of the spring semester. This is the second of a two-semester course sequence with SOCW 553.
Prerequisite: MSW Students: SOCW 514, SOCW 515, SOCW 516, SOCW 524, SOCW 525, SOCW 526, SOCW 553, and SOCW 554; Post-MSW students: MSW degree from a CSWE-accredited program, and acceptance into the APU PPSC program.
Corequisite: SOCW 556

SOCW 556, Field Seminar VI Clinical: School Social Work, 1 Unit
This seminar course focuses on discussion of student experiences in the PPSC school social work field internship. Emphasis is on demonstration and evaluation of advanced practice skills, interventions, supervision use, cultural responsiveness, professional ethics, and faith integration issues that occur in the field internship experience. This is the second of a two-semester course sequence with SOCW 554.
Prerequisite: MSW students: SOCW 514, SOCW 515, SOCW 516, SOCW 524, SOCW 525, SOCW 526, SOCW 553, SOCW 554. For Post-MSW students: MSW degree from a CSWE-accredited program, and acceptance into APU PPSC program.
Corequisite: For all students: SOCW 541, SOCW 555

SOCW 560, Social Work Practice in Healthcare Settings, 3 Units
This elective course offers an introduction to social work practice in healthcare settings, with a focus on the specific knowledge and skills essential for effective intervention. Students critically analyze the U.S. healthcare system as compared to international models, and apply clinical skills and relevant laws to interdisciplinary practice while understanding the context of the political, societal, and economic influences that impact service delivery and available resources. The course also articulates how a Christian worldview relates to ethical social work practice within the field of health care.

SOCW 561, Treatment of Substance Use Disorders, 3 Units
This course describes substance use disorders from a biopsychosocial-cultural-spiritual perspective, emphasizing assessment and intervention skills, processes, and evidence-informed research relevant to treatment using the recovery model. Diversity issues involving policy and practice are explored. Course content meets California Board of Behavioral Sciences prelicensure requirement in the area of alcohol and other substance abuse assessment.

SOCW 562, Urban Social Welfare, 3 Units
Course integrates on-site experiential learning with classroom education focused on urban issues of homelessness, gang involvement, and immigration. Students engage in weekly on-site learning activities in high-need areas of Los Angeles and Orange County. Content includes theological and sociological perspectives on urban issues as well as urban social work practice. Elective

SOCW 563, School Social Work, 3 Units
This course uses an ecological perspective in teaching the practice of social work in schools. Topics include the historical, theoretical, legal, research, policy, and practice issues relevant to the delivery of school social work services; the roles and tasks performed by social workers in public schools; school social work practice models; and the professional code of ethics. The purpose of this course is to develop the knowledge, skills, and abilities necessary for successful and competent practice with students, families, schools, and communities.
Prerequisite: Completion of generalist foundation curriculum; admission to the PPS program (required for students seeking the PPSC).

SOCW 564, Social Work and the Bible: Christian Perspectives on Service and Professional Practice, 3 Units
This course focuses on theological and social work perspectives on the relevance of the Bible to professional practice activities. Content addresses diverse Christian perspectives on social welfare policies and faith integration in different practice environments. Distinctions between professional social work, Christian counseling, and missionary activity are explored. Elective
SOCW 565, Clinical Spanish Practice, 3 Units
This course prepares students to utilize clinical practice skills in the Spanish language, including assessment, engagement, intervention, and evaluation of services with individuals, groups, and communities. Content covers diversity issues such as cultural competence and understanding of the Latino/Hispanic culture and its intragroup differences, and equipping students to confront biases, myths, and stereotypes in the client-practitioner therapeutic relationship. Course is conducted primarily in Spanish.
Prerequisite: SOCW 514 and SOCW 524

SOCW 566, Social Work, Health, and Aging, 3 Units
This course explores concepts, social policies, resources, and interventions related to social work practice with the older adult population. Content integrates themes of diversity, ageism, empowerment, and faith, as well as community-based and cross-cultural competence. Content includes a focus on biopsychosocial assessment, with emphasis on functional and cognitive status, integrated healthcare practice, interdisciplinary practice, and end-of-life care. This course meets California Board of Behavioral Sciences requirements for clinical social work licensure.

SOCW 567, Couples Therapy, 3 Units
This course is an overview of current theories, methods, and psychological instruments used in couples therapy interventions. Content includes detection, assessment, and intervention strategies for spousal or partner abuse, meeting California requirements for training in the area of domestic and family violence for MFT and LCSW licensure. Students apply course material to role-play scenarios during class time. Attention is given to issues of ethnic diversity, blended families, and faith integration.
Prerequisite: Completion of generalist foundation coursework or admission into the Advanced Standing program.

SOCW 568, Military Social Work, 3 Units
This course helps students understand the unique and complex needs of active-duty service members, veterans, and family members of military personnel, presenting knowledge and skills essential to effective clinical social work practice with these populations. Topics include military culture, ethical issues, diversity, family integration, trauma, assessment, family issues, reintegration, domestic violence, substance use, homelessness, suicide, building resiliency, and evidence-informed interventions for use in interprofessional settings.

SOCW 569, Human Sexuality and Sex Therapy, 3 Units
This course reviews human sexuality as a basis for sex therapy and clinical social work involving sexuality issues. Students examine and evaluate biological, psychological, social, moral, and faith perspectives on sexual development and functioning. In addition, students survey literature on sexual dysfunction, and learn treatment strategies utilized in various social work contexts and systems of marital and sex therapy. This course meets California Board of Behavioral Sciences requirements for clinical social work licensure.

SOCW 570, International Social Work Policy and Practice, 3 Units
Content focuses on international social work practice at multiple systems levels. Topics include comparison of U.S. and international social welfare policies; different theoretical, economic, cultural, ideological, and religious perspectives; neoliberal economic development policies; issues involving immigrants and other marginalized groups; and the impact of globalization and climate change on rapid urbanization and population growth. Practice content addresses poverty alleviation, conflict and postconflict reconstruction, and displacement and forced migration concerns.
Prerequisite: SOCW 522 and SOCW 523

SOCW 595, Special Topics, 1-6 Units
Special topics courses offer graduate-level content that is typically scheduled in an intensive format. These courses include a wide range of specialized topics relevant to professional social workers. The unit values of these courses range from 1-6 depending upon the specific contact hours and coursework load. Note: Elective offerings vary year to year.

SOCW 599, Readings in Social Work, 1-3 Units
Students enroll in this course to pursue independent study of professional interests/activities. Students explore topics in greater depth than in regular course offerings and/or initiate individual projects. Readings and assignments are based on learning contracts developed in consultation with a sponsoring faculty member and approved by the MSW program director. Additional fees required.

Pupil Personnel Services Credential in School Social Work and Child Welfare and Attendance Services
Help meet the need for professional social workers equipped to serve children and adolescents in schools. Azusa Pacific’s Pupil Personnel Services Credential (PPSC) in School Social Work and Child Welfare and Attendance Services program (https://www.apu.edu/bas/programs/pps-credential/) will advance your skills with a practice specialization that provides a competitive edge for employment in social work services within P-12 school settings.

Designed as a complement to the MSW degree program (https://www.apu.edu/bas/programs/msw/), this credential combines a solid theoretical base and evidence-informed practice models related to school social work and child welfare and attendance. Through relevant coursework and fieldwork experience, students gain the knowledge and skills necessary to effectively serve students in a school setting.
opportunities, you will learn how to support children, parents, and school personnel while shaping a responsive environment to help children succeed academically and thrive emotionally.

- MSW Students: This credential option is available for APU MSW students pursuing the clinical practice specialization.
- MSW Degree Holders: Individuals who already hold an MSW degree and have appropriate experience may also qualify for the credential program.

Admission

University graduate admission and program-specific requirements must be met before an application is complete (see Admission to the University (p. 1092)). Program-specific application requirements are available online (https://tracking.cirrusinsight.com/74647a2d-e9a2-412f-9b55-9559c7a8c4ec/apu-edu-graduateprofessionalcenter-admissions-requirements-program/).

International students should contact Graduate and Professional Admissions (https://www.apu.edu/graduateprofessionalcenter/admissions/) for application procedures.

To apply for the PPSC program, you must be enrolled in or planning to enroll in APU’s Master of Social Work program, or have already completed an MSW degree.

Current MSW Student Admission Requirements

The PPSC program is open to all students enrolled in the 60-unit APU MSW program who have successfully completed foundation-level curriculum, are enrolled in the Clinical Practice with Individuals and Families specialization, and complete the PPSC program requirements as outlined below:

- Attend PPSC orientation prior to applying to a specialization field internship
- Complete the PPSC application (https://www.apu.edu/graduateprofessionalcenter/apply/)
- Provide a personal statement as outlined in the PPSC General Program Requirements (https://www.apu.edu/bas/programs/pps-credential/admission/).
- Obtain a Certificate of Clearance through the California Commission on Teacher Credentialing (CTC) website (https://www.ctc.ca.gov/credentials/submit-online/)
- Provide evidence of meeting basic skills requirements (as outlined by the CTC)

To learn more about registering, contact Olivia Sevilla, assistant professor and PPSC coordinator, at oesevilla@apu.edu or (626) 815-6000, Ext. 2769.

Post-MSW Admission Requirements

Applicants to the post-MSW PPSC program who want to enroll for the summer and/or need to fulfill the field internship requirement must submit materials by March 1. Applicants who want to enroll in fall and/or have completed the field internship requirement must submit materials by June 1. Full admission requires that the MSW degree be posted by June 30.

Post-MSW PPSC applicants who have not completed PPSC fieldwork must meet the following admissions requirements:

- Hold an MSW degree from a CSWE-accredited program, with advanced coursework focused on clinical or direct practice; or have two years of post-MSW practice experience with children, youth, and families
- Provide verification of completion of a course with child/adolescent behavioral health and diagnosis content, or evidence of 2 years of work experience with children and families
- Complete the PPSC application (https://www.apu.edu/graduateprofessionalcenter/apply/)
- Provide official transcripts, along with syllabi and course descriptions as needed, to provide proof of prerequisite coursework completed
- Obtain a Certificate of Clearance through the California Commission on Teacher Credentialing (CTC) website (https://www.ctc.ca.gov/credentials/submit-online/)
- Provide evidence of meeting the Basic Skills Requirement (as outlined by the CTC) (https://www.ctc.ca.gov/credentials/leaflets/basic-skills要求-(cl-667/))

Note: The Certificate of Clearance and Basic Skills Requirement are program requirements, but not conditions for admission.

Note: Applicants needing 600 PPSC fieldwork hours will need to complete 8 units of fieldwork along with 6 units of coursework. Applicants who have already completed the required fieldwork can request to have hours verified for the credential, and be approved to complete only the 6 units of coursework.
Post-MSW PPSC Applicants Who Have Completed Field Requirements

Applicants who have already completed the required PPSC fieldwork hours can request to waive field placement. If a field placement waiver is granted, applicants will need to complete only 6 units of coursework.

Note: It is preferred that the required 600 PPSC hours be collected in the specialization year of the MSW program. Hours collected in the generalist, foundation year of the MSW program will be considered for the post-MSW PPSC program if the student has evidence of a specialization placement focused on working with children and families, and has completed a course with child/adolescent behavioral health and diagnosis content.

Candidates must also meet the following PPSC field placement requirements:

- Of the 600 hours completed, 450 must be in school social work (SSW) activities, and 150 hours must be in child welfare and attendance (CWA) activities; these hours are approved by an approved supervisor.
- Hours include activities in any two grade levels (PK-K, Elementary, Middle, High School) and with diverse populations.
- Certificate of Clearance must remain active through the entire credentialing process.

Meeting the Basic Skills Requirement is not a condition of admission, but it must be completed before credential recommendation can be made.

Candidates can apply to have prior fieldwork hours verified by the program.

Equipping School Social Work Leaders

Coming from a Christian-based perspective, the PPS credential faculty are committed to preparing a workforce that can advocate for and meet needs within the community and school system. During the credential program, you will:

- Learn to conduct biopsychosocial assessments, intervene in crises, identify community resources and linkages, and participate in interprofessional collaboration and consultation.
- Study alongside faculty who are active practitioners of school social work.
- For those completing the credential with the MSW, participate in fieldwork opportunities in diverse school settings to put learning into practice.
- Benefit from potential opportunities to disseminate research at local, regional, or national conferences with faculty.

This credential option builds on the MSW program’s mission to develop competent advanced social work practitioners who integrate the knowledge, values, and skills of social work to advance social justice and provide services to assist individuals, families, groups, organizations, and communities within the school setting.

Program Learning Outcomes

Students who successfully complete this program shall be able to:

1. SSWPE 1: Ethical and Professional Behavior
2. SSWPE 2: Engage Diversity and Difference in Practice
3. SSWPE 3: Promote Social Justice and Equity
4. SSWPE 4: Engage in Practice-informed Research and Research-informed Practice
5. SSWPE 5: Engage in Policy Practice
6. SSWPE 6: Engage with Students, Families, Groups, Organizations, and Communities
7. SSWPE 7: Assess Students, Families, Groups, Organizations, and Communities
8. SSWPE 8: Intervene Collaboratively with: Students, Families, Groups, Teachers, School Staff, Organizations, and the Community
9. SSWPE 9: Evaluate Interventions with Students, Families, Groups, Teachers, School Staff, Organizations, and the Community
10. SSWPE 10: Growth and Development

Support Services

The Community Counseling Center

The Community Counseling Center (https://www.apu.edu/ccc/), a Christian-based counseling center, provides high-quality counseling and consulting services at a low cost to the community. Families use the center’s resources to resolve life-transition dilemmas and find harmony between their values and actions. The center also enables students in APU’s clinical psychology programs to develop the necessary skills to become effective therapists and/or psychologists. For more information, call (626) 815-5421.
School of Business and Management

Mission

The School of Business and Management (SBM) (https://www.apu.edu/business/) is a Christ-centered community of scholars and professionals pursuing academic excellence to advance the work of God in the world, developing students of character and competence as difference makers in business and society.

Tenets

The School of Business and Management is committed to the following core principles:

Academic Excellence

Learning and producing scholarship in a community of excellence by:

1. Viewing students as the first priority.
2. Maintaining a dynamic teaching environment where relevant business and management theories and practical tools are imparted.
3. Engaging in scholarship that advances the thinking in related fields, informs teaching, involves students, and serves communities in practical ways.
4. Investing in campus infrastructure, technology, and alliances to enhance capabilities to learn and produce scholarship.
5. Sustaining a learning environment that fosters critical analysis and creative thinking.

Students of Character

Learning and producing scholarship in a community of faith by:

1. Modeling and infusing a Christian perspective of truth and life throughout SBM programs.
2. Enlivening the mind and transforming the heart by developing important links between faith, learning, and application.
3. Facilitating nurturing, caring, and mentoring relationships among faculty, staff, students, and alumni.
4. Practicing God-honoring diversity.

Advance the Work of God in the World

Learning and producing scholarship to impact the world by:

1. Helping students identify their strengths and providing mentoring to ensure those strengths are developed and utilized to benefit business and society.
2. Using experiential, real-world, and service learning to create value for students and the community.
3. Developing programs, alumni, and students that have an impact around the world.
4. Preparing students academically, professionally, and spiritually to engage their field and community in God-honoring ways.
5. Actively advancing the work of God through research, teaching, and community service.
6. Teaching the ethical conduct of business throughout all SBM programs.

LP and Timothy Leung School of Accounting

Housed within Azusa Pacific’s School of Business and Management, the LP and Timothy Leung School of Accounting (https://www.apu.edu/business/accounting/) focuses on developing graduates with the Christian character and competence demanded by the public accounting profession. The school offers a BS in Accounting (p. 682), an accounting minor (p. 712), and a Master of Professional Accountancy (MAcc) (p. 708).

Vision Statement

To be a premier Christian accounting school, recognized as a thought leader on accounting character and competence to reflect the life of Christ and shine the light of Truth.

Undergraduate Business Programs

The School of Business and Management provides professional career preparation in accordance with the university’s Christian heritage and mission. To this end, the school has built a reputation for pragmatic and ethically based education.

The school encompasses diverse programs in business and management, and within these programs are multiple options for majors and minors. The school offers a Bachelor of Arts in Business Management (p. 673), a Bachelor of Arts in Human Resources and Organizational Development (p. 677), a Bachelor of Arts in Digital Marketing and Design (p. 675), a Bachelor of Science in Business Analytics (p. 680), and a Bachelor of Science in Business with six majors: accounting (p. 682), economics (p. 684), entrepreneurship (p. 686), finance (p. 688), international business (p. 690), and marketing (p. 691). The BA degrees requires students to complete the common professional component (the business core) and
then select elective courses deemed most appropriate for their career objectives. The BS degrees require students to complete the business core and courses in an area of specialization.

At the professional level, the school offers a Bachelor of Business Administration (BBA) degree completion program (p. 678), a business administration minor (p. 713), a Certificate in Data Analysis and Visualization (p. 694), and a Certificate in Supply Chain and Logistics (p. 697), all of which feature learning that is immediately applicable in the workplace. The relevant coursework addresses current issues in business and encourages the integration of real-world work experiences and hands-on projects. Combine these experiences with internships or international study opportunities to further expand your portfolio and network. Optional concentrations provide students the opportunities to dive deeper into the specific business areas of supply chain management, human resource development, and leading teams and people.

Curriculum content in the undergraduate business program is aligned with graduate school requirements for those who wish to pursue a Master of Business Administration (MBA) (p. 701), Master of Business Management (MBM) (p. 704), Master of Professional Accountancy (MAcc) (p. 708), or Master of Public Administration (MPA) (p. 710).

**Graduate Business Programs**

The School of Business and Management offers a Master of Business Administration (MBA) (p. 701), Master of Business Management (MBM) (p. 704), Master of Professional Accountancy (MAcc) (p. 708), Master of Arts in Leadership (http://catalog.apu.edu/academics/school-business-management/leadership-organizational-psychology/leadership-ma/), Master of Science in Organizational Psychology (http://catalog.apu.edu/academics/school-business-management/leadership-organizational-psychology/organizational-psychology-ms/), and Master of Public Administration (MPA) (p. 710). These comprehensive and intensive graduate accounting, business, and management programs develop exceptional business management professionals with outstanding moral character, strong analytical and innovative decision-making skills, and a worldview that understands and appreciates the global diversity in cultures, markets, and economies. SBM graduate programs provide advanced professional education and academic studies leading to successful careers in business firms, government agencies, and nonprofit organizations.

The graduate business and management programs are an integral part of the university’s vision of scholastic leadership through excellence in academic programs, a community service focus, and deep commitment to faith that reaches across the globe. The programs further reflect the commitment of the School of Business and Management to continuously advance the university’s core principles of transformational scholarship, faith integration, God-honoring diversity, and intentional internationalization.

**Certificate Programs**

The School of Business and Management offers several certificate programs, including Change Strategies for Consulting (p. 693), Digital Marketing and Social Media (p. 695), Data Analysis and Visualization (Professional) (p. 694), Foundations of Human Resources (p. 695), Government Budgeting (p. 696), Leadership Development (p. 696), Project Management (p. 697), and Supply Chain and Logistics (Professional) (p. 697). Typically 12 units, certificate programs provide a focused area of study with sequenced courses designed to help students hone and enhance skills, specialize in a field, further a career, or find a new job.

**Certificates, Credentials, and Microcredentials**

The School of Business and Management offers students the opportunity to earn internationally recognized and marketplace-relevant certificates, credentials, and microcredentials as a complement to their diploma, allowing them to align their achievements with industry-current professional competencies and showcase their skills to current and potential employers.

As the demands of the workplace rapidly shift, employers are seeking career-ready professionals with the skills needed for the quickly changing workplace of today. A recognition of skill or achievement, certificates and credentials link learning to the skills that employers demand and employees need for the 21st-century workplace. By earning market-valued certificates, credentials, and microcredentials, SBM students are able to highlight their proficiencies and qualifications, giving them a competitive edge in their job search and career path.

Additionally, the Leung School of Accounting offers students the opportunity to prepare for specialized credentials, such as the Certified Public Accountant (CPA), the IRS Enrolled Agent (EA), and the Certified Information Systems Auditor (CISA), increasing their value to potential employers.

**Memberships**

As a member of the Association to Advance Collegiate Schools of Business (AACSB) (https://www.aacsb.edu/), the School of Business and Management is committed to advancing how business education is taught. SBM leadership and faculty teams strive to shape the next generations of leaders and make a lasting, positive impact on society.

**Accreditation**

- All Azusa Pacific University programs are accredited by the WASC Senior College and University Commission (WSCUC). (https://www.wscuc.org/)
- The School of Business and Management (SBM) is accredited by the International Accreditation Council for Business Education (IACBE) (https://iacbe.org/).
Programs

Majors
- Accounting (BS) (p. 682)
- Business Analytics (BS) (p. 680)
- Business Management (BA) (p. 673)
- Digital Marketing and Design (BA) (p. 675)
- Economics (BS) (p. 684)

- Leadership Development (p. 696)
- Project Management (p. 697)
Courses

ACCT 120, Principles of Accounting I, 3 Units
This course introduces the financial accounting model and application of fundamental accounting principles. The corporate form of business serves as the primary model to demonstrate accounting principles for cash, accounts receivable, inventories, operational assets, liabilities, and stockholders' equity.

ACCT 121, Principles of Accounting II, 3 Units
This course introduces basic managerial accounting concepts and emphasizes the use of accounting data in decision making. Topics covered include cost accumulation models, cost behavior, break-even analysis, variable costing, budgeting, differential analysis, product pricing, capital expenditure analysis, and financial statement analysis.
Prerequisite: ACCT 120

ACCT 122, Accounting Perspectives, 1 Unit
This course introduces students pursuing an accounting degree to a broad overview of the various career paths available to successful accounting graduates.

ACCT 320, Intermediate Accounting I, 3 Units
This course offers an intensive study of the accounting theory and principles underlying financial accounting. Emphasis is placed on the theoretical and conceptual framework of the financial reporting process including the role and authority of official accounting pronouncements and the responsibilities of professional accountants. This course begins with a review of the accounting model and covers accounting theory as it relates to revenue recognition, current assets including cash, accounts receivable, inventories, and current liabilities.
Prerequisite: ACCT 121

ACCT 321, Intermediate Accounting II, 3 Units
This course continues the study begun in ACCT 320, covering operational assets, intangible assets, investments, long-term liabilities, leases, income taxes, corporate capital transactions, and statement of cash flows. Emphasis is placed on the theoretical and conceptual framework of the financial reporting process including the role and authority of official accounting pronouncements and the responsibilities of professional accountants.
Prerequisite: ACCT 320

ACCT 325, Cost Accounting, 3 Units
This course explores managerial accounting concepts used in planning and controlling operations, determining cost of production, inventory control and evaluation, budgeting, and long-range planning. Emphasis is placed on cost determination, cost accumulation, cost-volume-profit relationships, standard costs, variances analysis and reporting, and the relationship between controlling costs and controlling operations.
Prerequisite: ACCT 321

ACCT 331, Federal Taxes I, 3 Units
This course offers an intensive study of the theory and principles of federal income tax law as it applies to individuals. Emphasis is on the theoretical framework and philosophy of the federal tax system, as well as practical application and planning. Course material covers basic concepts in the determination of income, classes of deductions, allowable credits, and property transactions. The importance of appropriate tax planning is stressed, and students prepare for the CPA (Certified Public Accountancy) test along with the IRS (Internal Revenue Service) Enrolled Agent (EA) test.
Prerequisite: ACCT 121

ACCT 332, Federal Taxes II, 3 Units
This course offers an intensive study of the theory and principles of federal income tax law as it applies to business entities—corporations, partnerships, estates, and trusts. Emphasis is on the theoretical framework as well as practical application and planning. Course material covers basic concepts of taxation in corporate formation and operation as well as partnership and S corporation formation and operation, along with the fundamentals of estate, gift, and trust taxation. The course also covers the tax audit process and professional tax preparer responsibilities, and students prepare for the CPA (Certified Public Accountancy) test along with the IRS (Internal Revenue Service) Enrolled Agent (EA) test.
Prerequisite: ACCT 331 for accounting majors, ACCT 121 for accounting minors.

ACCT 333, Volunteer Income Tax Assistance (VITA), 1 Unit
This course gives students the opportunity to apply their knowledge of tax law and the available tools to successfully assist individuals and families in the community in preparing and filing accurate tax returns under the supervision of the instructor. Students gain hands-on experience working with clients and preparing tax returns according to the Volunteer Income Tax Assistance (VITA) and Tax Counseling for the Elderly (TCE) return preparation process.
Prerequisite: ACCT 331

ACCT 336, Advanced Accounting, 3 Units
This course provides an in-depth study of accounting theory and principles. Topics include business combinations, consolidations, insolvency, foreign currency transactions, segment reporting, partnerships, fund accounting, and accounting for state and local governmental units and other non-business organizations.
Prerequisite: ACCT 321
ACCT 425, Writing 3: Accounting Ethics, 3 Units
Students in this course are introduced to issues of accounting ethics that professionals encounter in practice, moral reasoning to resolve ethical dilemmas, and accountants’ professional codes of conduct. Topics include major philosophical schools of thought, biblical perspectives on accountability, ethical reasoning strategies, earnings management, fraud, and corporate governance. Credit is not given for both ACCT 425 and ACCT 525. ACCT 425 does not satisfy the requirements of the Master of Professional Accounting (MAcc) program. Meets the General Education Requirement: Writing 3: Writing in the Disciplines.
Prerequisite: Writing 2 and ACCT 321.

ACCT 426, Auditing Principles I, 3 Units
This course is an overview of auditing concepts, with special attention to auditing standards, professional ethics, the legal ability inherent in the attest function, the study and evaluation of internal control, the nature of evidence, statistical sampling, and the impact of electronic data processing. The basic approach to planning an audit is also addressed, as are the audit objectives and procedures applied to the elements in a financial statement.

ACCT 427, Auditing Principles II, 3 Units
This course takes the concepts and procedures learned in ACCT 426 and applies them in a comprehensive audit case study. Students prepare audit work papers that demonstrate application of audit theory and objectives for various classes of financial statement accounts. Students are exposed to the planning, control, and review procedures used by many public accounting firms. The use of computerized audit software is covered.
Prerequisite: ACCT 426

ACCT 500, Principles of Accounting I, 3 Units
This course introduces the financial accounting model and application of fundamental accounting principles. The corporate form of business serves as the primary model to demonstrate accounting principles for cash, accounts receivable, inventories, operational assets, liabilities and stockholders’ equity.

ACCT 501, Principles of Accounting II, 3 Units
This course introduces basic managerial accounting concepts and emphasizes the use of accounting data in decision making. Topics covered include cost accumulation models, cost behavior, break-even analysis, variable costing, budgeting, differential analysis, product pricing, capital expenditure analysis, and financial statement analysis.
Prerequisite: ACCT 500

ACCT 502, Financial Accounting, 3 Units
This course introduces the financial accounting model and application of fundamental accounting principles. The corporate form of business serves as the primary model to demonstrate accounting principles for cash, accounts receivable, inventories, operational assets, liabilities and stockholders’ equity. Students will interpret company performance by analyzing accounting statements and complete a computer simulation which demonstrates computer applications in accounting.

ACCT 503, Intermediate Accounting I, 3 Units
This course offers an intensive study of the accounting theory and principles underlying financial accounting. Emphasis is placed on the theoretical and conceptual framework of the financial reporting process including the role and authority of official accounting pronouncements and the responsibilities of professional accountants. This course begins with a review of the accounting model and covers accounting theory as it relates to current assets including cash, accounts receivable, inventories, and current liabilities.

ACCT 504, Intermediate Accounting II, 3 Units
This course covers operational assets, intangible assets, investments, long-term liabilities, leases, income taxes, corporate capital transactions, and statements of cash flow. Emphasis is on the theoretical and conceptual framework of the financial reporting process, including the role and authority of official accounting pronouncements and the responsibilities of professional accountants.

ACCT 506, Cost Accounting, 3 Units
This course provides the study of the theory and principles underlying cost and managerial accounting. Emphasis is placed on the following topics: Terminology, Job Order Costing, Activity Based Costing, Cost Volume Profit Analysis, Budgeting, Standard Cost, Non-Routine Decisions, Responsibility Accounting, Process Costing, Quality, Capital Budgeting, and Inventory Management.

ACCT 507, Auditing Principles, 3 Units
This course takes the concepts and procedures learned in previous accounting courses and applies them in a comprehensive audit case study. Students prepare audit work papers that demonstrate application of audit theory and objectives for various classes of financial statement accounts. Students are exposed to the planning, control, and review procedures used by many public accounting firms.

ACCT 508, Federal Taxes I, 3 Units
This course offers an intensive study of the theory and principles of federal income tax law as it applies to individuals. Emphasis is placed on the theoretical framework and philosophy of the federal tax system as well as practical application and planning. This course also covers basic concepts in the determination of income, classes of deductions, allowable credits, property transactions, as well as the tax audit process and professional tax preparer responsibilities. The importance of appropriate tax planning is stressed.
ACCT 509, Federal Taxes II, 3 Units
This course offers an intensive study of the theory and principles of federal income tax law as it applies to business entities - corporations, partnerships, estates, and trusts. Emphasis is on the theoretical framework as well as practical application and planning. This course covers basic concepts of taxation in corporation formation and operation, and partnership and $ corporation formation and operation, and fundamentals of estate, gift, and trust taxation.

ACCT 510, Accounting and Tax Research Methods, 3 Units
In preparation for professional practice, students explore accounting research methods and tax issues utilizing professional online research databases to properly identify and focus research questions, interpret data, develop opinions, and effectively communicate the results.
Prerequisite: Acceptance into the Master of Professional Accountancy program

ACCT 511, Advanced Accounting, 3 Units
This course provides an in-depth study of accounting theory and principles first encountered in Intermediate Accounting. Topics covered include, but are not limited to, partnerships and corporations. Extensive coverage is given to business combinations and consolidations, as well as bankruptcy reporting.

ACCT 512, Management Accounting, 3 Units
Students investigate how management makes critical strategic and operational decisions using an organization's key financial and managerial accounting information, including Financial Statement, Balance Sheet, Income Statement, and Statement of Cash Flow. Students also discuss how to motivate and align management to act in the firm's best interests.

ACCT 515, Accounting Information Systems, 3 Units
This course emphasizes the application of accounting information systems. Students gain experience in auditing data within the computer environment and learn the controls necessary to ensure the accuracy and reliability of the accounting system.
Prerequisite: Acceptance into the Master of Professional Accountancy program

ACCT 520, Global Financial Accounting Standards, 3 Units
This course compares global accounting standards of the International Financial Reporting Standards to Generally Accepted Accounting Principles standards in the United States. Topics include statements of operations, financial position, stockholders' equity, and cash flow, as well as research and development, inventories, pensions, stock options, intangibles, leases, and taxes. Students learn through in-depth analysis of contemporary financial reporting requirements promulgated by the national and international accounting standards boards.
Prerequisite: Acceptance into the Master of Professional Accountancy program

ACCT 525, Accounting Ethics, 3 Units
Students explore accounting ethics encountered in practice such as, moral reasoning to resolve ethical dilemmas and accountants' professional codes of conduct. Topics include major philosophical schools of thought, biblical perspective on accountability, ethical reasoning strategies, earnings management, fraud, and corporate governance.
Prerequisite: Acceptance into the Master of Professional Accountancy program

ACCT 530, Advanced Business Law, 3 Units
Focusing on advanced legal issues encountered in financial and commercial business transactions, this course offers an in-depth study of business law, mergers and acquisitions, sales, commercial paper, secured transactions, documents of title, bankruptcy, securities regulations, and the legal liability of accountants.
Prerequisite: Acceptance into the Master of Professional Accountancy program

ACCT 535, Advanced Managerial Accounting, 3 Units
Students investigate the various ways management uses accounting information to make critical strategic and operational decisions such as product pricing, line extensions, and activity-based costing, and to evaluate operating performance including EVA and balanced scorecard. Students discuss methods of distilling key financial and managerial accounting information, as well as motivating and aligning management to act in the firm's best interests. Case based.
Prerequisite: Acceptance into the Master of Professional Accountancy program

ACCT 540, Forensic Accounting and Fraud Investigation, 3 Units
Discussion focuses on the principles and methodology of forensic accounting, including fraud detection and prevention. Students examine consumer, management, employee, and financial statement fraud. Prevention through internal controls and evidence gathering techniques are also addressed.
Prerequisite: Acceptance into the Master of Professional Accountancy program

ACCT 545, Advanced Auditing, 3 Units
This course covers advanced auditing topics and helps students develop an understanding of auditing standards and practice through in-depth analysis of contemporary auditing theory as promulgated by the accounting profession. The course emphasizes pronouncements by the Auditing Standards Board and the Public Company Accounting Oversight Board.
Prerequisite: Acceptance into the Master of Professional Accountancy program
ACCT 550, Accounting for Nonprofit Entities, 3 Units
Students in this course examine how nonprofit organizations measure financial performance and how they differ from for-profit organizations. Students also explore accounting principles and practices for nonprofit organizations including churches, hospitals, and health and welfare organizations. Utilizing case studies, students assess nonprofit and for-profit organizations that receive government assistance in the form of contracts, guaranties, grants, or assistance that may be subject to federal audit requirements. Other topics include ethical examination of accounting decisions, and the general characteristics and operational environment of nonprofit organizations, applying generally accepted standards, principles, and practices.

ACCT 551, Government Financial Management, 3 Units
This course covers the principles of public financial accounting and follows the Association of Government Accountants (AGA) Certified Government Financial Manager (CGFM) exam structure, which focuses on three modules: governmental environment, governmental accounting; financial reporting and budgeting; and governmental financial management and control. Students taking this course are required to use AGA’s CGFM study guide materials (which are purchased by the university) and take all three CGFM exams. Students taking this course must pass all three CGFM exams to obtain an automatic A in the course.

ACCT 590, Integrative Accounting Review, 3 Units
In this course, students integrate the learning experience by completing modules related directly to CPA exam preparation.
Prerequisite: Acceptance into the Master of Professional Accountancy program

ACCT 591, Accounting Internship, 3 Units
Students in this course engage in a practical application of principles and theory in a real-world business setting through an accounting internship with a CPA firm. Students without prior public accounting internships or work experience are required to take the course.
Prerequisite: Acceptance into the Master of Professional Accountancy program

BUSI 100, Personal Finance, 3 Units
This course covers financial challenges that our society faces, the impact that they have on our society, and personal and social responsibilities related to these issues. In addition, the course offers students power over financial resources, freedom to give generously, insight for better citizenship, and civic engagement opportunities. Meets the General Education Requirement: Civic Knowledge and Engagement.

BUSI 109, Business Mathematics, 3 Units
Students in this course learn the basic concepts and practices of business mathematics, including business algebra, business calculus, and statistics. Topics include differentiation and statistics such as population and sample, descriptive statistics, variation and skewness, exploratory data analysis with visuals, probability, random variable, sampling distribution, central limit theorem, discrete distributions (binomial, Poisson), continuous distributions (normal, t, exponential, chi-square), confidence interval estimation, hypothesis testing, correlation, regression, and the analysis of variance (ANOVA) for business students.
Prerequisite: MATH 90 or an appropriate score on the APU mathematics placement assessment.

BUSI 110, Business and Entrepreneurship, 3 Units
Students in this course learn about the role of business in society and the impact of the social environment on the firm, and become acquainted with the basic functional areas of business, including management, human resources, marketing, finance, and production. Students produce a comprehensive business plan incorporating the functions of business and examining the effect of the business on society. Meets the General Education Requirement: Civic Knowledge and Engagement.

BUSI 111, Business Statistics, 3 Units
Students in this course learn basic statistical concepts and methods of collecting, summarizing, presenting, and interpreting data for the business context. Among the topics covered are differentiation, population, sample, descriptive statistics, variation and skewness, exploratory data analysis with visuals, probability, random variable, sampling distribution, central limit theorem, discrete distributions (binomial, Poisson), continuous distributions (normal, t, exponential, chi-square), confidence interval estimation, hypothesis testing, correlation, regression, and the analysis of variance (ANOVA), to be applied in real-world business situations. Meets the General Education Requirement: Quantitative Literacy (Math).
Prerequisite: MATH 90 or an appropriate score on the APU mathematics placement assessment.

BUSI 120, Business Communications, 3 Units
Students in this course explore current communication technologies and strategies in the modern marketplace to create and deliver audience-focused informative and persuasive messages using credible research, impactful visuals, and professional vocal and physical techniques delivered orally. Students are given scenario-based challenges often encountered in organizational settings and business situations, to help them determine the extent of information needed when communicating with key stakeholders, researching and utilizing credible support materials ethically, organizing information logically, and delivering messages through professional presentations using appropriate visual aids, graphics, posture, gesture, eye contact, and vocal expressiveness. Meets the General Education Requirement: Oral Communication.

BUSI 213, Negotiation Strategies and Skills, 3 Units
Students in this course learn the basics of negotiation, then research and explore additional techniques that help them establish alternative criteria to expand and build upon their bargaining style. Each student is assessed on negotiating style, role playing, principled negotiation, and information gathering. Emphasis is on topics related to negotiations in a business context.
BUSI 240, Introduction to Information Systems and Business Applications, 3 Units
This course offers the fundamentals of business information systems, methods, equipment, processes, computer characteristics, and concepts. Students also examine the ethical use of information, information systems, and business applications. The business applications of Formstack, QuickBooks, and Salesforce are taught with opportunities to earn an Expert Badge in Formstack and Competency Badge in QuickBooks.

BUSI 244, Data Analytics, Spreadsheets, and Data Visualization, 3 Units
Integrating knowledge gained in BUSI 240, students gain hands-on experience in analyzing, managing, and reporting data in the business world, and use advanced statistical tools to frame business decisions for operations, finance, forecasting, etc. Students learn data applications of Microsoft Excel, Data Studio, and Tableau, and also have the opportunity to earn an Expert Badge in Excel.
Prerequisite: BUSI 240

BUSI 246, Business Programming, 3 Units
Students in this course gain a basic understanding of computer programming from the perspective of business professionals, and explore the fundamental techniques used in data science and business analytics to solve business problems. Business major students without programming experience learn how to apply basic programming concepts and principles using Python, as students learn the Python programming language in an integrated and interactive software development environment. Major course topics include data types, control structures, classes, objects, algorithms, arrays, attributes, methods, data management, data visualization, and statistical data analysis. Lab assignments with a focus on problem solving are used to understand the nature of programming tasks.
Prerequisite: BUSI 111 or instructor's permission

BUSI 296, Business Law, 3 Units
The course introduces the laws affecting business transactions. Included is an overview of the legal system as it relates to business and in-depth study of contracts, sales and commercial transactions, and secured transactions.

BUSI 311, Quantitative Analysis for Management, 3 Units
This course comprises an overview of quantitative methods used to make data-driven decisions in business. Management tools include statistical analysis, simulation, and linear programming. The application of quantitative methods in project management, inventory management, time series forecasting, and data visualization is explored. Student evaluation is based on participation, assignment completion, exams, and a group project. This course prepares students to enter a changing business climate that requires knowledge of how to analyze data and create reports that help senior management make informed business decisions.
Prerequisite: BUSI 111

BUSI 314, Big Data Analytics for Business, 3 Units
This course introduces students to the evolving domain of data science and business analytics, helping them understand the processes and tools for analyzing big data and discovering new information to support managerial decision-making. Students solve problems across all areas of business with descriptive, diagnostic, predictive, and prescriptive analytics. Main topics include a robust study of basic statistics, data visualization, exploratory data analysis, linear regression, logistic regression, ridge regression, classification, clustering, decision tree analysis, text analytics, and more. These skills are foundational for anyone interested in a career in big data analytics/data science, and they are beneficial for every manager in today's data-rich economy.
Prerequisite: BUSI 111 or instructor's permission

BUSI 350, Business Internship, 3 Units
This course gives students the opportunity for practical application of principle and theory in an actual business setting through an internship. Students learn to set objectives and measure performance against those objectives in the business setting through a structured reporting process with the instructor. Meets the General Education Requirement: Integrative and Applied Learning.
Prerequisite: Completion of 60 units and instructor's permission.

BUSI 370, International Business, 3 Units
This course presents a survey of issues in international business, with a focus on managing in an international environment, understanding the global monetary system, and developing an international perspective on business operations including production, marketing, finance, and human resources. Meets the General Education Requirement: Intercultural Competence.
Prerequisite: MGMT 210

BUSI 405, Business Report Writing, 3 Units
Students practice writing clear, well-organized, effective formal and informal reports. Evaluation and preparation of business reports, utilizing business research methods and communication techniques are emphasized. Management of data and the use of graphics also are included.
BUSI 414, Application of Business Analytics, 3 Units
This course gives students opportunities for practical application of advanced analytics tools and techniques to real-world problems to help business professionals make data-driven decisions. Students learn to manipulate real-world big data sets, develop the most appropriate models, evaluate AI/ML-based models, and create technical reports that describe their findings. Main topics include data wrangling, advanced data exploration methods, advanced data visualization techniques, linear/logistic/polynomial regression models, classification, decision trees, clustering, neural networks, text mining, financial technology, and more. This class is accessible for students who do not have good math/statistics foundations and technical backgrounds; no coding skills or experience required.
Prerequisite: BUSI 111 or instructor consent, BUSI 244, BUSI 314

BUSI 430, Money and Banking, 3 Units
This course includes a study of monetary theories and banking principles, with special reference to contemporary developments in money and banking in the United States, the Federal Reserve System, and financial investment.
Prerequisite: ACCT 121, ECON 250, and ECON 251

BUSI 495, Writing 3: Business Ethics, 3 Units
This course focuses on the integration of Christian faith, ethical issues, and professional concerns that confront business professionals in the workplace. Students explore biblical and moral principles for ethical analysis and reflection, and utilize the case method to research and write managerial responses to current ethical dilemmas in the workplace. This course fulfills the General Education Writing 3 requirement and is recommended for all business majors. Meets the General Education Requirement: Writing 3: Writing in the Disciplines.
Prerequisite: Writing 2

BUSI 496, Senior Seminar: Business Ethics, 3 Units
This course focuses on the integration of Christian faith, ethical issues and professional concerns, which confront business professionals in the workplace with particular concern for leadership and transitions. The course will explore biblical and moral principles as related to real life case studies. In addition, the course offers the student the opportunity to complete in-depth study in a business related area to further prepare them as effective participants and leaders in the workplace. Meets the General Education Requirement: Integrative and Applied Learning.
Prerequisite: Senior standing and upper-division writing intensive course, majority of God's Word and the Christian Response

BUSI 497, Readings, 1-4 Units
This is a program of study concentrating on assigned readings, discussions, and writing arranged between, and designed by, a student of upper-division standing and a full-time professor. An independent study fee is assessed for each enrollment in this class.

BUSI 511, Big Data and Business Analytics, 3 Units
This course helps students understand the tools and processes for analyzing big data and discovering new information to support managerial decision making. Students solve problems across all areas of business with descriptive, diagnostic, predictive, and prescriptive analytics. Main topics include data preprocessing with database/SQL; descriptive analytics; exploratory data analysis and data visualization; diagnostic analytics such as linear regression and logistic regression; predictive analytics; and prescriptive analytics. Students also have an opportunity to earn a badge in business analytics.

BUSI 513, Introduction to Supply Chain Management and Logistics, 3 Units
This course covers the formulation and implementation of logistics and supply chain strategy for competitive advantage, including analysis of logistics capabilities, enhancement of strategy-supportive capabilities, and integration with strategically chosen supply chain partners.

BUSI 514, Operations Management, 3 Units
Different business strategies require different processes, and each strategy utilizes unique capabilities to gain competitive advantage. Students in this case-based course use a process view of operations to analyze key dimensions such as capacity planning, cycle time management, role of technology, logistics and supply chain management, and quality management. Students also connect to recent developments such as lean or world-class manufacturing, just-in-time operations, time-based competition, and business reengineering.

BUSI 515, Artificial Intelligence (AI) and Machine Learning (ML) for Business, 3 Units
This course focuses on practical applications of AI/ML tools and techniques to real-world problems to help business professionals with their data-driven decision making. Students learn how to manipulate real-world big datasets, develop most appropriate prediction models, evaluate AI-/ML-based models, and create technical reports that describe their findings. Main topics include advanced data visualization techniques, linear/logistic/polynomial regression models, classification, decision trees, clustering, association rules, neural networks, text mining, financial technology, and more. Students also have an opportunity to earn a badge in business intelligence.

BUSI 516, Organizational Behavior, 3 Units
This course provides students with the social science tools needed to solve organizational problems and influence the actions of individuals, groups, and organizations. It prepares managers to organize and motivate the human capital of the firm, manage social networks and alliances, and execute strategic change through knowledge of competitive decision making, reward system design, team building, strategic negotiation, political dynamics, corporate culture, and strategic organizational design. Case based.
BUSI 517, Quality Management, 3 Units
This course introduces fundamental concepts and methods of quality management and productivity improvement, and students examine the role of managers in designing and implementing programs to improve the quality of products and services. Emphasis is on understanding the forces that make quality and productivity critical organizational issues. Student ability to implement quality-management tools, techniques, and processes is demonstrated.

BUSI 519, Research Design and Program Evaluation for Nonprofits, 3 Units
This practical methods course focuses on the available literature and research studies in the public and nonprofit sectors. In addition, it prepares students in such areas as setting research objectives, respondent selection/sample size, questionnaire development, evaluation, and the merits of conducting research in-house versus using an outside consultant or research firm. The course also covers qualitative research techniques, including depth interviews and focus groups. It includes a unit on copy testing (of brochures, direct mail, print, and video) to evaluate message communication before or after production.

BUSI 522, Private Enterprise and Public Policy, 3 Units
This course provides an introduction to political economy, the role of government in a mixed economy, business-government relations, the public policy process, regulation of business, corporate political activity, and the creation of businesses to capitalize on opportunities driven by legislative or regulatory action. Case based.

BUSI 523, Manufacturing Operations, 3 Units
This course provides an understanding of the concepts, methodologies, and applications of production operations management. Focus is on analysis and study of production methods and procedures available to line and staff management in various-sized U.S. and global business operations. Significant attention is given to decision-making processes appropriate for manufacturing or service organizations, including tactical and operational considerations. Coursework stresses the need and reasons for input, involvement, and interaction of operations personnel with all other disciplines and areas of a business organization.

BUSI 528, Consulting for Organizations, 3 Units
This course provides an overview of the consulting and advisory process as it relates to external and internal consultation in industry. The course focuses on various aspects of the consulting process life cycle such as gaining and retaining clients, developing proposals and engagement letters, defining client needs and diagnosing problems, utilizing effective data collection and analysis methodologies, documenting information gathered, developing solutions, presenting recommendations, and managing project requirements. Several types of consulting services and related issues are addressed. Students gain experience in basic consulting skills by completing a real-life consulting project and presenting their findings orally and in writing.
Prerequisite: MGMT 521

BUSI 530, Capstone Project: Entrepreneurial Emphasis, 3 Units
The project integrates the learning experience with a plan for development and implementation of a new, untried venture. The completed project describes the product or service offered, including necessary financing, proposed staffing, market size and niche, and the timetable associated with each element. Oral defense before a faculty panel completes the experience.

BUSI 532, Ethical Issues in Nonprofit Management, 3 Units
Following introductory class sessions on moral philosophy and democratic capitalism, students explore a variety of issues/decisions confronting leaders/managers. Case study situations include such areas as stewardship, truth in advertising, social (behavior change) marketing, marketing research (privacy and confidentiality); corporate responsibility, board/staff relations (accountability), individual responsibility (limits of welfare), and global issues (government corruption, labor practices, etc.).

BUSI 542, Managing Cultural Differences, 3 Units
Students learn how to identify, analyze, and plan for those elements within the cultural, economic, and political environments of international business that require specialized understanding and strategy for successful management or organized enterprise.

BUSI 543, International Trade and Finance, 3 Units
Students learn about the financial-monetary-economic environment of international business. Topics include the balance of payments, foreign exchange markets and risk, trade finance, direct foreign investment, capital budgeting in the multinational firm, and the international money and capital markets. Emphasis is placed on decision making with regard to international investment and financing.

BUSI 548, International Business, 3 Units
This course covers the various strategies businesses use in worldwide operations. Students explore the development of business strategies, the motivations for firms to expand operations globally, organizational challenges, and managerial implications. Students also examine political, economic, and social factors that shape the international business environment. The course focuses on competitive responses to these external pressures and identifies strategic models or approaches. Organizational capabilities, structures, and systems are examined to deliver optimal results. The necessary processes to acquire cross-border knowledge for creating joint ventures and alliances are examined. Finally, the future role of Multi-National Enterprises (MNE’s) for the global economy is explored. Case and simulation based.
BUSI 550, Capstone Project: International Emphasis, 3 Units
Students submit a business plan that summarizes the major areas within international business from organization to quantitative methods. Methodology and underlying theories are presented through an exploration of the present international business environment. Oral defense of the completed project before a faculty panel is required.

BUSI 551, Situation Analysis and Diagnosis, 3 Units
This course introduces the purpose, methods, and skills of situation analysis and diagnosis in carefully selected case studies. Students benefit from a focused approach to interpreting, understanding, and developing skills to discover appropriate conclusions in differing business environments and situations.

BUSI 552, Comparative Management, 3 Units
The course enables the international business student to understand how management objectives, goals, practices, and business-government interaction are related to the cultural settings in which they take place. The course includes: analysis of international similarities and differences in managerial functions, structure and process, etc., in light of environmental factors; identification of the impact and results of different management practices; and an inquiry into the "universals" of management.
Corequisite: BUSI 551

BUSI 555, Integrated Decision Making in Nonprofits, 3 Units
This course, taken in the student's final semester, develops the students' ability to understand the decision-making process and execute the steps involved in identifying, evaluating, and implementing an effective business strategy for a nonprofit organization. The purpose is achieved as students identify their organization's mission, primary customers, and specific goals by integrating the functional knowledge acquired in previous nonprofit courses (i.e., management, marketing, finance, research, ethics, etc.) and by developing a comprehensive strategic plan for a new organization, an existing organization, or from the perspective of an organization that wants to review its current offerings. As such, the course also examines factors unique to a nonprofit (e.g., involvement of the board and lay members, government funders, communication with various customer groups, and assuring congruence between organizational mission and the strategic plan).

Corequisite: BUSI 551

BUSI 556, Fund Development: Planning, Implementing, and Evaluation, 3 Units
This course examines the principles and methods of fundraising that respond to one's understanding of what donors, funders, and volunteers value, that is, what inspires their giving and how to develop and nurture these relationships. It uses case studies to demonstrate successful/unsuccesful promotional techniques, including advertising campaigns, direct mail, and special events. It also explores such areas as if/when to use consultants and special forms of planned giving. Finally, the course includes units on philanthropy/corporate giving and foundations, as well as a unit on grant writing.

BUSI 557, Effective Nonprofit Leadership and Management, 3 Units
This course addresses the questions: What are the characteristics of effective leadership and management? How can one organize for success and evaluate/strengthen the work already done? It explores the fundamental challenges to effective leadership including defining and articulating the organization's mission, identifying and understanding the multiple "customers" served, and identifying and prioritizing the critical managerial tasks that must be successfully executed. As such, it examines the roles of the executive director, the board, staff, and volunteers. Finally, this course introduces students to the Drucker Formulation Self-Assessment Tool for Nonprofit Organizations based on management expert Peter F. Drucker's principles of management.

BUSI 558, Public Accounting: Legal and Financial Issues in Nonprofit Management, 3 Units
This course introduces the legal and financial issues relevant to managing a 501 (c)(3) nonprofit organization. Issues addressed include organizing the entity, qualifying for and maintaining nonprofit status, fundraising, and nonprofit enterprise. Financial areas covered include the principles of fiscal responsibility for nonprofits as well as cost accounting, budgeting, the presentation of financial statements, proposed development, and in-kind resources.

BUSI 559, Strategic Marketing for Nonprofits, 3 Units
This course provides an introduction to the field of strategic marketing of nonprofit organizations (e.g., educational institutions, churches, the public and social sectors, health services, and the arts). The course texts, outside readings, videos, case studies, and class exercises focus on understanding three areas of effectiveness: 1) what makes an organization effective or not; 2) how individuals can improve their own effectiveness as managers, staff, or volunteers; and 3) how promotional strategies can be used to enhance the organization's effectiveness.

BUSI 560, Nonprofits in America: History, Philosophy, and Tradition, 3 Units
This introductory course traces the history, philosophy, and societal role of nonprofits in the United States and how the independent sector today compares organizationally to business and government. As such, it examines the roles of government (at the state and federal levels), religion and churches (including constitutional issues), business (corporate philanthropy), and the rights/responsibilities of individuals (e.g., natural law and contemporary public policy).
**BUSI 576, Business Internship, 3 Units**
This course gives students an opportunity to apply educational principles, theory, and disciplinary skills to a position with an organization, either for-profit or not-for-profit. Students are responsible for obtaining employment, and must submit the application for appropriate internship approvals. They also learn to set objectives and measure performance against those objectives in a business or related setting through a structured reporting process with the instructor. Projects and assignments are due throughout the term.
Prerequisite: Appropriate employment for internship, completion of 30 units of coursework, and instructor's permission.

**BUSI 577, Global Field Study, 3 Units**
This course provides the framework for graduate students to register for and complete a global field study in various countries around the world. During the course, students conduct corporate visits to business firms locally and around the globe to discuss how they apply and practice the business management principles, concepts and theories covered in the graduate curriculum.

**BUSI 581, Strategic Leadership, 2 Units**
Students learn to set an organization's strategic direction, align corporate organizational structure to implement strategy, and lead individuals. Students explore the power and strategic importance of their own formation and identity as a leader in creating value, mobilizing resources around opportunities, and influencing others through their corporate role. Class discussions serve as a framework for exploring high-performance impact, corporate culture, reputation, leading strategic change, and leadership theories and styles, with particular attention to servant leadership as an extension of a Christian worldview. Students further explore informal and formal authority and the strategic connection between personal leadership and organizational effectiveness.

**BUSI 583, Integrated Decision Making, 3 Units**
Students seek to develop the capability to appreciate and carry out the decision-making processes involved in identifying, evaluating, selecting, and implementing strategy in a company. This purpose is achieved by requiring the student to set goals, analyze business problems, develop a framework for making decisions to reach these goals, integrate the functional knowledge acquired in previous courses, and experience, through computer simulation business cases, the processes and functions performed by executive officers in meeting goals, and coping with an uncertain business environment.

**BUSI 590, Capstone Project, 3 Units**
This comprehensive capstone, intended for students with extensive workplace experience, gives students an opportunity to integrate their learning through the formulation of a corporate report providing strategic direction to a national, international, or global business. The completed strategic plan describes the general economic process applied to a business selected by the student: seasonal sales cycle, inflation/recession tendencies, and product life cycle. Emphasis is placed on the development of strategies, economic analysis, and flexibility of strategic alternatives within the plan.
Prerequisite: MGMT 578

**BUSI 591, Marketing Strategy for Competitive Advantage, 3 Units**
This course concentrates on the strategic issues encountered in marketing, in terms of total corporate and business strategy. Emphasis centers on matching internal strengths with outside opportunities, giving attention to weaknesses of the firm and threats from the environment. The goal is attainment of a sustainable competitive advantage.
Prerequisite: MGMT 578

**BUSI 592, Financial Strategy for Competitive Advantage, 3 Units**
This course stresses the enterprise-wide view of the strategic management of financial resources. Lectures and case studies present the tools and perspective necessary to gain a competitive advantage through financial management.
Prerequisite: FIN 513 and MGMT 578

**BUSI 593, Manufacturing Strategy for Competitive Advantage, 3 Units**
This course concentrates on the strategic issues encountered in the manufacturing processes. Manufacturing is recognized as an important strategic resource which can provide major competitive strengths for a business. Today's manufacturing managers must look to the future to plan, set objectives, initiate strategy, establish policies, and commit resources. The goal is attainment of a sustainable competitive advantage.
Prerequisite: MGMT 578

**BUSI 594, Emerging Trends in Information Technology, 3 Units**
This course, intended for students without a background in information technology (IT), surveys current topics in IT and their impact on business, management, organizations, and society. Course topics include business intelligence, cybersecurity, business analytics, social networks, data visualization, agile software development, and business process management. Students develop a sufficient understanding of how organizations can utilize technologies, get hands-on skill development using real-world tools and deliverables, and explore management and organizational issues associated with technological change.

**BUSI 595, Capability Design and Management of Strategic Change, 3 Units**
Management capabilities and components, strategic diagnosis, and capability design are addressed. The course introduces state-of-the-art, real-time planning systems, including crisis management. Evaluation of organizational dynamics during discontinuous strategic changes is addressed. Strategic diagnosis and capability design are applied to a successful operation of a corporate firm.
BUSI 596, Special Topics in Business, 1-3 Units
This course presents timely and new topics in business. Different material is covered each time the course is offered. The course may be repeated for credit. Some topics require prerequisites, which vary according to the topic.

BUSI 597, Field Experience, 2 Units
This program of study exposes students to the inner workings of several different organizations, research and development, and manufacturing facilities. The commonalities and differences students observe stimulates their thinking with regard to what matters and what works. The course consists of an intensive fieldwork experience as well as assigned readings that focus on firsthand experiences of business leaders. Grading is Pass/Fail.

BUSI 598, Executive Seminar, 1 Unit
This seminar introduces contemporary issues within business, human resources, and/or organizational development, and their impact on organizational effectiveness. Seminars focus on skill development to improve working environments and interactions among employees, leaders, organizations, and communities. May be taken three times with different topics.

BUSI 599, Readings in Business, 1-3 Units
Students may enroll in an independent study for unit credit to investigate subjects and interests that lie beyond regular course offerings, explore topics in greater depth, and/or initiate individual projects. Such requests must be developed in consultation with a sponsoring faculty member and be approved by the graduate program chair and dean. Unit credit varies depending on the scope of the study plan.

ECON 200, Survey of Economics, 3 Units
This course covers the concepts and tools of economic analysis for microeconomics and macroeconomics. Students study the basics of interactions between firms and consumers: consumer demands, firm costs, price determination under various market structures, and the role of government in a market economy. Students also study the fundamentals of national income and economic growth, interest rates, unemployment, and government fiscal and monetary policies. Meets the General Education Requirement: Social Science.

ECON 250, Principles of Macroeconomics, 3 Units
This course provides an introduction to concepts and tools of economic analysis for macroeconomics. Students study national income and economic growth, interest rates, unemployment, and government fiscal and monetary policies. Meets the General Education Requirement: Social Science.

ECON 251, Principles of Microeconomics, 3 Units
This course provides an introduction to concepts and tools of economic analysis for microeconomics. Students study the interactions of firms and consumers: consumer demands, firm costs, price determination under various market structures, and the role of government in a market economy. Prerequisite: C- or better in MATH 110 or MATH 151 or MATH 165, or 60 or higher on the ALEKS math placement assessment.

ECON 350, Intermediate Macroeconomics, 3 Units
This course covers more complex economic models applicable to the study of such topics as economic growth; the effects of monetary policy on business cycles, prices, and interest rates; government spending and debt; and the macroeconomy with trade. Prerequisite: ECON 200

ECON 351, Intermediate Microeconomics, 3 Units
Material in this course expands on the concepts and tools of economic analysis. Students explore more in-depth models of interactions in society: consumer choice, firm decisions, perfect and imperfect competition. Issues of uncertainty and strategic interaction are addressed, as well as extensions to multiple markets. Prerequisite: ECON 200

ECON 355, Environmental Economics, 3 Units
Students in this course apply economic perspectives and analytical tools to the study of environmental problems, focusing on the effects of business activities on the environment and the effects of environmental policy on business. Prerequisite: ECON 200

ECON 356, Labor Economics, 3 Units
This course covers the allocation of labor in a society among its various possible uses. Students consider the role of markets in allocating this labor, issues of market power, and the role of government policy in accomplishing social objectives. Wage determination, job search, and labor productivity are also discussed. Prerequisite: ECON 251

ECON 357, Economics of the Developing World, 3 Units
This course introduces students to the economic and social issues confronting the majority of people in the world. Students survey the current conditions of people in the developing world and build ways of understanding the complex issues these people face. Using these tools, students examine economic and financial infrastructure, political conditions, levels and trends in poverty and income distribution, job creation and economic growth, health and education, and environmental conditions, which all affect the state of “development” of a people. Prerequisite: ECON 250 and ECON 251
ECON 359, Urban and Regional Economics, 3 Units
This course combines the disciplines of economics and geography. Economic interactions among individuals, firms, and governmental units are analyzed geographically by focusing on central cities, suburbs, and outlying regions. Within this urban and regional context, this course places particular emphasis on market forces, land use, transportation, crime, housing, and local government. *Meets the General Education Requirement: Civic Knowledge and Engagement.*
Prerequisite: ECON 200

ECON 371, Comparative Economics, 3 Units
Students are offered an integrated treatment of policy, institutions, business, and international trade theory within the different types of economic systems. The values that societies hold are examined as reasons for why different systems are chosen in different countries. The course studies the economics of both market economies and socialist economies, examining their domestic and international policies toward economic interactions.
Prerequisite: ECON 250

ECON 452, Econometrics, 3 Units
This course introduces students to econometric analysis to better understand the economic environment. Cross-sectional regression analysis and time series methods are covered, and serial correlation and heteroskedasticity are addressed. Panel data methods are introduced, as well as such topics as instrumental variables and simultaneous equation estimation.
Prerequisite: ECON 350; ECON 351 (may be taken concurrently); BUSI 111

ECON 453, Microfinance and Microenterprise, 3 Units
Microfinance and microenterprise development are strategies for strengthening the economic opportunities of poorer households to enable families to build assets, provide income, and plan for a better future. This course examines these approaches in depth and evaluates the effectiveness of various projects at accomplishing their stated goals.
Prerequisite: ECON 250, ECON 251, and Junior Standing

ECON 454, Industrial Organization and Regulation, 3 Units
This course investigates the importance of market structure for firm and consumer outcomes beyond the standard perfect competition and monopoly models. Students will learn to incorporate real world attributes into their understanding of market activity through case studies and advanced market models. Topics to be addressed include cartels, entry and exit, oligopoly, price discrimination, and research and development.
Prerequisite: ECON 351; ECON 350 (may be taken concurrently)

ECON 458, Economics and Religion, 3 Units
This course provides students an opportunity to examine the relationship between religion and economic life in terms of individuals' actions and the elements of the economic system. In particular, students examine the relationship between economic behavior/institutions and Islam, Confucianism, and Christianity.
Prerequisite: ECON 350, ECON 351 (may be taken concurrently), Junior Standing.

ECON 495, Special Topics in Economics, 3 Units
This course presents timely and new topics in economics. Different material is covered each time the course is offered. The course may be repeated for credit. Some topics require prerequisites, which vary according to the topic.

ECON 497, Readings, 1-4 Units
This program of study concentrates on assigned readings, discussions, and writing arranged between and designed by a student of upper-division standing and a full-time faculty member.

ECON 502, Business Economics, 3 Units
This course provides a survey of the concepts and tools of economic analysis of both microeconomics and macroeconomics. Students study the basics of interactions between firms and consumers: consumer demands, firm costs, production decisions, resources utilization and price determination under various market structures, market entry and exit decisions, and the role of government in the markets of an economy. Students learn the basic mathematical models needed to begin analyzing business decisions. Students also develop basic tools to analyzing the fundamentals of national income and economic growth, interest rates, unemployment, and government fiscal and monetary policies. A number of current national and international issues will be analyzed using these tools.

ECON 521, Managerial Economics, 3 Units
Students learn to think strategically about the economic environment in which a firm operates. The first half of the course covers the foundations of microeconomics (supply and demand, market price and output, production, cost, and simple competitive market equilibrium). The second half deals with applying microeconomic theory to economic strategy, including more sophisticated pricing and competitive strategies. Case based.
ECON 575, Global Business Economics, 3 Units
This course covers the concepts of global economics, measurement of economic performance, macroeconomic indicators affecting the global business environment, sources of country-specific economic data and data evaluation, microeconomic analysis of decisions in multinational firms, and economic performance forecasting. It also explores the global economic environment of business, including socioeconomic goals and policies that impact multinational business performance and global business strategies, as well as international economic forces influencing business decisions and the firm. It further explores global business economic cases featuring methodology and research perspectives of economics and the contribution of the economics paradigm to business decisions and processes.
Prerequisite: ECON 521

ENTR 210, Small Business Ventures, 3 Units
Students in this course apply their leadership, problem-solving, and strategy skills to consider how winning entrepreneurs think, act, and perform, then establish goals to practice emulating those actions, attitudes, and strategies. New venture creation is about the process of getting a new venture started, growing the venture, successfully harvesting it, and starting again.
Prerequisite: BUSI 110

ENTR 312, Creativity and Innovation, 3 Units
Students in this course investigate innovation in the corporate setting and the personal creative process, with an emphasis on understanding the role innovation plays in corporate success. Via lectures and personal exercises that build information content and a repertoire of specific techniques, students learn and apply the practical toolkit for sharpening and implementing their innovative and creative skills.

ENTR 314, Entrepreneurial Management, 3 Units
Students apply their creative and innovative talents while sharpening their analytical abilities. Students will develop a new business idea and craft it into a comprehensive business plan that details the qualitative (e.g. business modeling and milestone planning) and quantitative (financial forecasts and valuation) process of bringing a new venture idea to fruition. The business plan that each team develops is an operating plan for a start-up company or a new venture within a larger corporation.
Prerequisite: ENTR 310

ENTR 315, Social Entrepreneurship, 3 Units
Social entrepreneurship is an emerging and rapidly changing field dedicated to the starting and growing of social mission-driven ventures - organizations that strive to advance social change through innovative solutions. This course exposes students to viable business models in social enterprise, focusing on the ideas, process, steps, and strategies required for creating new social ventures. Through lectures, case studies, and classroom dialogue, students will learn to think strategically and to act opportunistically with balanced social and financial perspective.
Prerequisite: BUSI 110

ENTR 420, Entrepreneurship and Innovation Practicum, 3 Units
This course gives students practical experience through guest speakers and company visits, and through work in an entrepreneurial or innovative organization, with students translating those experiences into academic learning. With close guidance from practicum faculty, students identify and work with a business or a public or nonprofit organization. Working individually or in small teams, students complete a defined project of approximately 100 hours that has practical value and academic rigor. Students provide regular status reports and receive faculty coaching during the practicum.
Prerequisite: Junior standing

ENTR 520, Entrepreneurial Decision Making, 3 Units
This course covers the tactical and strategic decisions that are essential for successfully starting and managing a new business. The course provides the framework for students to learn the application of practical business knowledge and tactics in transforming entrepreneurial vision into winning business strategies and thriving entrepreneurial ventures. Students learn the techniques for successful entrepreneurial decisions, including modeling successful business and strategic plans; effectively targeting, evaluating, and identifying alternate financing sources; competitive pricing, product differentiation, and market targeting as key drivers for sales growth and profitability; and effective competitive and risk assessment, analysis, and management.

ENTR 524, New Venture Creation, 3 Units
Students review the experiences entrepreneurs encounter in conceiving and launching a business. The course combines personal assessment and involvement exercises with an emphasis on group interactions, personal planning, and contemplating an entrepreneurial career. Team activities, personal planning exercises, new venture simulation, and case studies are utilized. Students analyze factors affecting purchase decisions in the marketplace, apply behavioral and social science concepts to the study of buyer behavior, and study methods that organizations use for personal selling, sales promotion, public relations, the art of negotiating, and other forms of promotion to communicate with customers and prospects.

ENTR 525, Entrepreneurial Venture Analysis, 3 Units
This course covers case studies and analysis of entrepreneurial ventures and the identification of the different ways management concepts and techniques are applied in developing innovative businesses, standardizing products, designing processes, and operating tools. The course explores the identification of the systems and analytical decision models applied in various entrepreneurial operating functions and the techniques for setting performance standards and designing the activities required to drastically upgrade the yield from resources in order to create new markets and new customers. It evaluates the complex dynamics of entrepreneurial challenges in modern theory and practice through the use of case studies of entrepreneurial ventures.
FIN 300, Business Finance for Managers, 3 Units
This course introduces concepts and tools of business finance for managers. Students study financial statements and their interpretation, business performance measures, the management of cash and the short-term financial needs of organizations, and how to make good capital budgeting decisions.
Prerequisite: ACCT 120

FIN 320, Principles of Corporate Finance, 3 Units
Students in this course explore the principles and practices of financial management. Sources and methods of raising capital, allocation of funds within the firm, cash flow and financial statement analysis, financial markets, and capital budgeting techniques are addressed. Additional concepts covered include present-value analysis, long-term financial planning, risk and return, and basic derivatives.
Prerequisite: ACCT 120

FIN 330, Financial Analysis, 3 Units
This course equips students with the necessary tools of financial statement analysis for business valuation and strategic considerations. Students explore the ideas of ratio analysis and time value of money in discounted cash flows in order to analyze the financial conditions of a business organization. Course material also covers credit analysis and corporate finance issues such as mergers and acquisitions and debt financing. Case studies are used extensively.
Prerequisite: FIN 300 (finance majors only)

FIN 331, Managerial Finance, 3 Units
This course extends the concepts and methodologies introduced in Principles of Finance to incorporate the practical uses as a manager in an organization. The course places emphasis on managerial decisions using spreadsheet applications. Topics include: financial statement analysis, project analysis, long-term financial planning, risk and return, and basic derivatives.
Prerequisite: FIN 320 or Instructor's consent

FIN 352, Financial Markets and Institutions, 3 Units
This course covers financial markets, instruments, and institutions, with students examining the roles of depository institutions, insurance companies, and others in the process of intermediation. The structure of financial markets, recent developments in financial instruments, interest rate determination, and the regulatory environment are discussed.
Prerequisite: ECON 200

FIN 372, International Trade and Finance, 3 Units
Students study the theory and practice of international trade and international finance, exploring questions of why countries trade, what they trade, and national and global trade policies. Course material also covers foreign exchange markets, exchange rate determination, foreign direct investment, and international capital markets.
Prerequisite: ECON 200

FIN 432, Investment Analysis, 3 Units
This course introduces students to the basic tools of investment analysis and integrates these with the actual operations of investments and portfolio construction. Emphasis is on providing analyses of asset selection with an experience of real market activities.
Prerequisite: FIN 300 (finance majors only) and FIN 352 (finance majors only; may be taken concurrently with instructor permission)

FIN 433, Applied Portfolio Management, 3 Units
Students in this course engage in practical application of financial investment principles and theory through a portfolio management opportunity in a business setting. Students learn to set portfolio objectives and measure performance against specific metrics in the business setting through a structured reporting process with the instructor.
Prerequisite: FIN 330 or instructor's consent, BUSI 111 or instructor's consent, and FIN 432 (FIN 432 prerequisite applies to finance majors only)

FIN 434, Derivatives, 3 Units
This course prepares students with a basic understanding of derivatives of financial assets and commodities (such as futures, options, swaps, etc.). Pricing of these derivatives and their function in hedging and speculation is discussed. Recent innovations of pricing models for instruments such as interest rate derivatives, exotic options, and assessment of market risk based on the market prices of derivatives are also covered.
Prerequisite: FIN 432, MATH 130

FIN 436, Financial Risk Management, 3 Units
The course introduces students to the theory and management tools of risk management and financial innovation, including the use of different combinations of financial assets and derivatives to immunize an organization's market risk. Topics include dynamic hedging using derivatives such as futures and options, and possibly the development of new products (or combinations) to protect a business or portfolio from exposure to financial risk.
Prerequisite: FIN 300, FIN 432 or instructor's consent, and FIN 433 (may be taken concurrently, required for finance majors only)
FIN 439, Seminar in Finance, 3 Units
Students in this course evaluate their learning from finance major courses in preparation for the Securities Industry Essentials exam to become finance professionals. Students explore various types of professional finance career tracks and prepare individual career-development plans. Topics include capital markets, financial instruments and their risks, trading activities, managing customer accounts, prohibited activities, rules and regulations, professional financial jobs, and personal career plans.
Prerequisite: FIN 330 (finance majors only) and FIN 432 (finance majors only)

FIN 502, Business Finance for Managers, 3 Units
This course provides an introduction to concepts and tools of business finance for managers. Students study financial statements and their interpretation, business performance measures, the management of cash and the short term financial needs of the organization, and how to make good capital budgeting decisions. Students will analyze company performance and make recommendations by applying class content to financial issues.

FIN 513, Corporate Finance, 3 Units
Students in this course examine how financial decisions can affect the value and health of firms. Topics include cash flow and ratio analysis, discounted cash flow analysis, stock and bond valuation, investment criteria and decisions, capital budgeting, capital structure decisions, risk-return analysis, and long-term and short-term financing decisions. In addition, students read and discuss articles related to God's financial principles.
Prerequisite: ACCT 512 (Prerequisite applies to MBA students only)

FIN 526, Capital Formation, 3 Units
Students study the market processes by which resources are allocated, from the capital formation of economic activities of the economy's various sectors to the financial activities in the money and capital markets. Specifically, the course includes the use of flow of funds analysis as applied to capital markets and various financial chronicles as sources for explaining and predicting economic behavior; the theory and reality of the interest rate structure; the nature of various capital markets and their securities; knowledge of corporate debt and equity instruments; federal, state, and local government securities; and mortgages. This course leads to a basic knowledge and understanding of the sources and uses of funds and the role of financial intermediation in the growth and development of economies.
Prerequisite: FIN 513

FIN 536, Entrepreneurial Finance, 3 Units
This course examines the financial decisions of entrepreneurs and venture capital investors based on the stages of a venture development. Topics include financial options for entrepreneurs and investors, preparations for and analysis of a new business' financial statements, and the valuation of the venture.
Prerequisite: FIN 513 (MBA students only; MBM and MSHA students have no prerequisite for this course)

FIN 546, Investments, 3 Units
This course provides students with the study of financial instruments. Along with the knowledge of investment principles, students focus on the decision process for evaluating various investment opportunities. In addition, students discuss their stewardship responsibilities to God as individual Christian investors and Christian financial managers in a corporation.
Prerequisite: FIN 513

FIN 567, Advanced Financial Analysis, 3 Units
Students explore the practical applications of financial management based on case studies. Major topics include financial statement analysis, financial forecasting, cost of capital estimation, capital budgeting decisions, capital structure decisions, equity financing, and mergers and acquisitions.
Prerequisite: FIN 513 (MBA/Accounting students only), FIN 502 (MSHA students only)

HROD 250, HR Life Cycle: Hiring to Retiring, 3 Units
In this course, students gain an in-depth and practical perspective of employee staffing, compensation, and benefits spanning from prior to an employee's hire until after they leave the organization. Special attention is given to the six stages of the employee life cycle: attraction, recruitment, onboarding, development, retention, and separation.

HROD 351, Talent Enhancement: Training, Development, and Engagement, 3 Units
This course gives students hands-on experience with the employee training life cycle as they learn about employee development and engagement. Students develop an employee training program that helps employees learn specific knowledge or skills to improve performance, and also examine the components of employee development—a more expansive strategy that focuses on employee growth and future performance rather than an immediate job role.
Prerequisite: HROD 250

HROD 352, Employee Relations, 3 Units
In this class, students study the legal and social dynamics of HR as a valued partner in employee care. Students examine the handling of grievances, discipline, and labor relations in union and nonunion shops. Concepts related to an organization's strategic effort to maintain a positive relationship with its employees, including the complex interrelations between employers and employees, labor/trade unions, employer organizations, and the state, are reviewed.
Prerequisite: HROD 250
HROD 353, Compensation and Total Rewards, 3 Units
This course offers an in-depth look at a strategically important area of human resources for organizations: establishing employee compensation plans that attract the right talent and retain top performers. Students in this course study multiple factors that organizations consider when designing compensation plans for the workforce. They also examine the differences between financial and nonfinancial means of compensation, how to establish wage levels, how to evaluate jobs to ensure that employees are being compensated appropriately, key economic considerations in establishing compensation plans, and how to design performance incentive programs. Course material includes an overview of relevant laws that govern compensation systems and employee benefit programs, and addresses how to evaluate the strategic effectiveness of compensation plans. This course prepares students for the Total Rewards portion (Unit 4) of the HR Certification Institute's PHR/SPHR professional certification exams.
Prerequisite: HROD 250

HROD 354, Talent Planning and Acquisition, 3 Units
This course offers an in-depth look at an area of human resources that is foundational to the profession: attracting and selecting highly qualified candidates to fill jobs. In this course, students study equal employment opportunity and employment discrimination, workforce planning, job analysis/description/specification, recruitment, and selection tools. They also examine how to conduct workforce planning and recruitment processes, how to design selection processes that are valid and reliable, and how to legally conduct preemployment testing and background investigations. This course prepares students for the Talent Planning and Acquisition portion (Unit 2) of the HR Certification Institute's PHR/SPHR professional certification exams.
Prerequisite: HROD 250

HROD 500, Foundations of Human Resource Development, 3 Units
The course provides an introduction to and overview of the field of human resource development with emphasis upon its historical and philosophical foundations. Theories and concepts relevant to the field are analyzed. Special emphasis is placed on the roles and functions of OD professionals within organizations and understanding the basic competencies of professional practice.

HROD 501, Organizational Design and the Psychology of Work Behavior, 3 Units
This course examines the fundamental theories and viewpoints on the nature of work, its role in adult life, and the function of employment organizations. Included is discussion of forces impacting individual, group, and system performance and productivity within complex sociotechnical systems. Particular emphasis is placed on examining the role of work in the growth and functioning of humans and in identifying the characteristics of organizations in which both the human needs of the people who compose the organization and the organization as a productive, adaptive entity are satisfied.

HROD 512, Employee Development, 3 Units
This course introduces theories of human growth and development as a foundation for understanding the developmental challenges facing individuals during their lifespans. Specific implications and applications are made related to how human growth and development is effected by and affects organizational life.

HROD 520, Career Development Systems, 3 Units
Students study the emerging field of career planning and development related to initial and ongoing professional development. Current literature, relevant theories, and major approaches to career planning and development are examined in accordance with career planning and development approaches in organizations. Students use various self-assessment tools and diagnostic instruments to evaluate data on their own work histories, interests, skills, and values.

HROD 530, Labor Law and Negotiations for Human Resource Professionals, 3 Units
This course provides a brief introduction to the pervasiveness and importance of labor law and negotiations. All human resources professionals must understand labor law and the rights given to employees pursuant to those laws, regardless of whether the employees are members of a union. Professionals must also be thoroughly versed in collective bargaining and the labor relations process in order to be prepared to work for companies whose employees are either represented by a union or are seeking to join a union. Course material equips students for these tasks, as well as for involvement in negotiating agreements and resolving conflicts, such as collective bargaining agreements, agreements with benefit plan providers, individual employee claims, and the terms of employment for new employees.
Prerequisite: MGMT 517

HROD 531, Designing and Managing Compensation and Benefit Systems, 3 Units
This course provides a solid understanding of the art of compensation practice and its role in promoting companies' competitive advantages. Compensation systems in organizations must be linked to organizational objectives and strategies. Scholars and managers agree that the way compensation is allocated among employees sends a message about what management believes is important and the types of activities it encourages. With the responsibility of administering compensation expenditures wisely, HR professionals must balance the interests and costs of employers with the needs and expectations of employees.
Prerequisite: MGMT 517

HROD 532, Human Resource Law, 3 Units
Human resources professionals are routinely called upon to navigate a number of legal issues. This course introduces the major laws governing human resource management in the workplace beginning with the core skills it takes to safely interview job candidates, counsel employees, and mediate disputes. Students gain a thorough understanding of EEOC and ADA regulations and learn how to comply with the Family and Medical Leave Act. Emphasis is on the laws about unlawful discrimination, recruiting, hiring, promotions, harassment, and reasonable accommodation.
Prerequisite: MGMT 517
HROD 550, Instructional Design and Training Methods, 3 Units
This course focuses on methods to assess an organization's training and development needs, and designing and implementing training programs to address those needs. Analysis and application of adult-learning theories in relation to program design are explored. Methods of instructional design and course development are emphasized.

HROD 575, Leveraging Diverse Community Partnerships, 3 Units
Students gain an in-depth understanding of the recruitment and retention of diverse workforces. This course gives students practical methods for recruiting employees from diverse backgrounds through the development of culturally sensitive marketing and recruiting materials. It also addresses issues regarding the management, retention, and advancement of employees from diverse backgrounds.

HROD 576, Managing in a Multicultural Context, 3 Units
This course focuses on developing an understanding of diversity and cultural difference. Students examine effective and ineffective management techniques and learn helpful approaches to conflict resolution in multicultural work environments.

HROD 577, Cultural Explorations in Global Business, 3 Units
Future business leaders engage their own and others' cultures in the context of a global marketplace while understanding how those cultures may impact the bottom line. Students also investigate the complexities of company demands to increase compliance with international business standards.

HROD 578, Recruiting and Retaining a Diverse Workforce, 3 Units
In leveraging diverse community partnerships, students learn practical methods for developing culturally sensitive marketing campaigns for the purpose of recruiting diverse employees into multiple areas of industry. Also, issues regarding management and retention of employees from diverse backgrounds are examined, including glass ceiling issues.

HROD 599, Readings in Human and Organizational Development, 1-3 Units
Students may enroll in an independent study for unit credit. In this course, students investigate subjects and interests that lie beyond regular course offerings, explore topics in greater depth, and/or initiate individual projects. It provides an opportunity to identify and develop an area of study of particular concern to the individual learner. Readings are pursued in accordance with a study plan developed in consultation with a sponsoring faculty member and approved by the graduate programs chair and dean. Course requirements typically involve a literature review and submission of a paper. Unit credit varies depending on the scope of the study plan.

IBUS 374, Topics in International Management and Strategy, 3 Units
Students in this course analyze operational management issues encountered in international and culturally diverse enterprises. Course material may focus on human resource management, production management, cross-cultural issues, or strategic planning and implications for the firm.

IBUS 377, Global Field Study, 3 Units
This course provides the framework for international business majors to register for and complete global field studies in various countries around the world. Students conduct visits to business firms locally and globally to discuss how they apply and practice the business management principles, concepts, and theories covered in the undergraduate business curriculum.

IBUS 479, Import/Export Practicum, 3 Units
In this project-based class, students gain practical knowledge of the business of imports and exports. Students are expected to start a one-semester small business importing a product from abroad and selling it domestically. Key assignments may include a market analysis, sourcing analysis, business plan, importing a sample, and selling the sample. Students have freedom of scope and scale when deciding which product(s) should comprise the project.

LDRS 103, Life Design and Self-Leadership, 3 Units
This course helps students discover their individual calling within the framework of their view of life and work. Students gain a greater understanding of their strengths, values, interests, skills, and personality as they build prototypes of potential careers utilizing a life design process and prepare for life after college with intention and purpose.

LDRS 201, Foundations of Leadership, 3 Units
This course blazes the trail for understanding the concepts of good leadership and followership, identifying oneself as a leader, discovering one's sense of calling, establishing a commitment and plan for whole-person leadership development, seeing leadership through an interdisciplinary lens, and grounding one's "leadership story" in an awareness of current history and the reality of the Kingdom of God. Through creative experiences, meaningful texts, and powerful assignments, students are prepared for further leadership education.

LDRS 303, Career and Life Planning, 3 Units
For students entering the professional world, this course aids in understanding career development options, finance management, and coping with stress. Students gain a greater understanding of their strengths, values, interests, skills, and personality as they seek employment and/or apply to graduate school. Relevant guest presenters spend class time sharing important information that benefits students in planning for careers and life.
LDRS 311, Leadership Values and Virtues, 3 Units
This course views leaders as authentic servants committed to transformation. Students study the leader's motivations, the dreams of followers, conflict resolution, as well as personal, intellectual, and civic virtue. Perspectives for steering clear of bad leadership and toward collaboration with those who share the leader's commitment to the common good are considered. The course focuses on the development of leaders who are responsible, good, humble, and who understand the diverse values of others.
Prerequisite: LDRS 201 (may also be taken concurrently) or junior standing or department consent.

LDRS 311H, Leadership Values & Virtues - Honors, 3 Units
This course views leaders as authentic servants committed to transformation. Students study the leader's motivations, the dreams of followers, conflict resolution, as well as personal, intellectual, and civic virtue. Perspectives for steering clear of bad leadership and toward collaboration with those who share the leader's commitment to the common good are considered. The class focuses on the development of leaders who are responsible, good, humble, and who understand the diverse values of others.
Prerequisite: LDRS 201 (may also be taken concurrently), Junior standing, or departmental consent. Must also be a student admitted to the Honors College and be considered a member in "active" status.

LDRS 322, Leadership Strengths and Skills, 3 Units
This course focuses on a strengths-based approach to leadership and leadership development, as well as the skills necessary for good leadership. Opportunities to understand and practice essential skills such as continual learning, powerful communication, problem solving, managing process, goal achievement, conflict resolution, win-win negotiating, and empowering stewardship are woven throughout the course. Training additional leaders is also a key topic. Effective leadership practice through emphasis on strengths development is the goal of this course.
Prerequisite: LDRS 201 (may also be taken concurrently) or junior standing or department consent.

LDRS 333, Leadership Influence and Impact, 3 Units
This course looks at the leader as agent of change on three levels: personal change, influence on individuals and small groups, and impact on cities, organizations, and cultures. Through historical reflection and developing a systemic vision, students are equipped to make a difference in many social settings. By learning to work as mentors, facilitators, and ambassadors, emerging leaders can leave a dynamic legacy.
Prerequisite: LDRS 201 (may also be taken concurrently) or junior standing or department consent.

LDRS 335, Leadership Communication, 3 Units
This course teaches students the theoretical, empirical, and practical aspects of leadership communication by taking a distinct communication approach to leadership studies. Topics covered include leadership and follower communication styles and practices; various leadership theories and perspectives; power and influence; team/group leadership; organizational, crisis, and public leadership; diversity; ethics in leadership; and leadership development.

LDRS 401, Leadership Studies Capstone, 3 Units
This course deepens students' capacity for leadership based on wisdom, knowledge, and understanding. In addition to concluding the leadership minor by linking leadership practice to leadership theory, students dialogue about leadership issues such as gender, community, temptation, finding one's voice, mission, and the whole-person model. A thoughtful and thorough final project and a high-quality portfolio presentation are crafted to integrate students' learning about leadership and to provide a postgraduation plan for lifelong leadership development.
Prerequisite: LDRS 201, LDRS 311, LDRS 322, LDRS 333

LDRS 495, Special Topics in Leadership, 1-3 Units
This course addresses topics of current interest in leadership studies that are not covered by the core and elective courses. Topics vary from semester to semester. This course may be taken more than once as topics change.

LDRS 497, Readings, 1-3 Units
This is a program of study concentrating on assigned readings, discussions, and writing arranged between, and designed by, a student of upper-division standing and a professor approved by the Program Chair. The course allows the student to identify a specific leadership theme and investigate it further.

LDRS 501, Foundations of Leadership Theory, 3 Units
This course provides a conceptual and practical survey of predominant leadership theories providing students with opportunities for critical reflection and application. A focus is given to transformational theories of leadership and application is made to the M.A. in Leadership core competencies.

LDRS 502, Cornerstones of Christian Leadership, 3 Units
This course utilizes APU's Four Cornerstones to discuss leadership from the Christian tradition. Students look at the example of Jesus, the ultimate servant leader, and how His followers through history have both succeeded and failed in following His example. Through probing into how Christian scholars have written about and understood leadership, as well as seeking to show that the goal of Christian leadership is to serve God and the common good of humanity, students gain a faith-based benchmark for further studies in leadership.

LDRS 503, Organizational Behavior, 3 Units
This course investigates the effective functioning of individuals and groups within organizational settings. Emphasis is placed on how leaders perceive organizations from strategic design, organizational culture, and political environment perspectives. This course applies theoretical concepts to major organizational challenges such as organizational effectiveness, motivation, conflict, job stress and satisfaction, and decision making. The focus of the course includes organizational communication, as well as the attitudinal and behavioral implications for leaders.
LDRS 510, Creative and Collaborative Leadership, 3 Units
This course enables students to integrate the concepts of personality, leadership, and creativity; investigate collaborative leadership; identify and apply creativity and preferred leadership styles; and explore the effects leadership styles can have on given organizational communities.

LDRS 511, Exploration of Leadership Thought, 3 Units
This foundational course provides an overview of the evolution of leadership thought, including a review of the fundamental theories and principles that led to the study of leadership as a discipline, as well as an examination of the story of leadership from a biblical perspective. Students are introduced to a holistic framework for leadership development informed by an understanding of the importance of ethics, values, and spirituality from a Christian worldview.

LDRS 512, EQ I: Self-Leadership, 3 Units
This course focuses on the self-competence elements of emotional intelligence - leader self-awareness and leader self-management - from psychological, spiritual, emotional, and developmental perspectives. Students enhance their self-leadership through the improvement of self-competence and self-development.

LDRS 516, Leadership Development and Practice, 3 Units
This course emphasizes the process of leadership development from a transformational perspective. Students consider both their personal growth and the dynamic mechanisms necessary for facilitating the development of others. Emphasis is on the issues and challenges of creating a lifelong learning mindset individually and organizationally, mentoring strategies, team building, developing effective followers, and designing career development systems. This course provides the opportunity for application through a practicum assignment.

LDRS 520, Understanding Vocation in a Changing World, 3 Units
This course focuses on understanding one's true overarching vocation in life as it connects to the purposes of God in this world to steward the earth and its peoples. One's vocation then influences what one does with his or her life. The concepts of career are continually changing, but work/life planning continues to be important personally and professionally. Students have the opportunity to use various self-assessment tools and diagnostic instruments to evaluate their own working history, interests, skills, values, and career anchors. Students also learn to design career programs for organizational settings.

LDRS 523, EQ 2: Relational Leadership, 3 Units
This course focuses on the social competence elements of emotional intelligence - leader/follower social awareness and leader/follower relationship management - from psychological, spiritual, emotional, and developmental perspectives. Students enhance their relational leadership acumen through the study of motivation, and social skills for leader/follower relational development.
Prerequisite: LDRS 512

LDRS 524, Principles and Practices of Design Thinking, 3 Units
Students in this course explore the fundamental principles and practices of design thinking, in relation to the workplace and in the context of the person as leader. Concepts such as creativity, empathy, failure, risk, and creative confidence are explored. This course also provides the opportunity to practice design thinking on personal and organizational levels.

LDRS 532, Leadership Practicum, 3 Units
This course creates a dialogue between previously explored concepts/theories of leadership and the practical experiences of exemplar practitioners. Students are involved in community service and exposed to community leaders for interaction, observation, and analysis. These encounters enable students to assess and activate their leadership journey based on spiritual, mental, educational, and emotional aspects of leadership development.
Prerequisite: LDRS 501, LDRS 502, and LDRS 503

LDRS 533, Systems and Strategic Planning for Leaders, 3 Units
This course focuses on systems thinking from a leadership perspective. By working with stories, scenarios, and strategy, students learn to address complex problems, anticipate consequences, and leverage potential. Attention will be given to the use of narrative for influencing constituent participation. Finally, organizational design is considered as a key concern for leaders in organizations.
Prerequisite: LDRS 501, LDRS 502, and LDRS 503

LDRS 534, Leader as an Agent of Change, 3 Units
This course looks at the leader as an agent of change through three lenses: self examination, change theory, and organizational culture. Each is assessed in light of implications for those involved in the change initiative. Special attention will be given to the transformational change that takes place for leaders and followers when the call for change occurs. Application is made to organizations, informal networks, temporary situations, and other social contexts.

LDRS 535, Leading Dynamic Change, 3 Units
This course focuses on the practice of leading organizational change, as well as the importance of personal change within the life of the leader. Students engage in activities and projects to enhance understanding of the role of the leader as a change agent within the organization.
LDRS 536, Disruptors and Conflict, 3 Units
This course prepares students to manage their responses to conflict in order to leverage disruptive issues in leadership with creative confidence. Through the study of personal and organizational conflict management skills, students become equipped to solve complex issues that are disruptive to personal, team, and organizational functioning.

LDRS 542, Leading Across Cultures, 3 Units
In a pluralistic society, leaders are often tasked with the responsibility of bridging both domestic and international contexts in a convergence of global learning. This seminar will examine the historical, organizational, and interpersonal significance of leading across cultures, with particular emphasis on discerning the underlying values of community behaviors as well as the attitudes, beliefs, values, skills, knowledge, and self-awareness necessary for leaders to effectively serve in diverse contexts. A variety of theoretical, research and applied issues are addressed; in particular, the course aims to explore social location theory as a means of equipping graduates to advance equity and positive change through increased capacity for diversity engagement.

LDRS 547, Navigating Social Climates, 3 Units
This course equips students as leaders in today's globalized organizations and societies who analyze, through multiple lenses, issues of inequity and injustice that exist locally, nationally, and globally. The course utilizes conceptual and experiential learning in which students encounter and reflect on realities of inequity and injustice in the social and natural worlds, in interpersonal, intergroup, and organizational relationships. Students are also expected to begin to develop habits and skills to promote shalom-oriented organizations and communities.

LDRS 548, Strategic Foresight, Thinking, and Planning, 3 Units
This course focuses on engaging the full strategy cycle, which includes strategic foresight, thinking, and planning. Through an applied project, students engage in scanning for trends and developing stories and scenarios; develop strategic thinking skills; and engage in a strategic planning process.

LDRS 559, Curiosity to Inquiry, 3 Units
This pass/fail course underscores curiosity as an innate human capacity and cultivates students’ ability to use it toward human-centered inquiry and socially transformative innovations. Students engage in the ideation and inspiration phases of Design Thinking in solving a complex leadership challenge for an organization or a community. Through the process, students are expected to become familiar with traditional as well as innovative data collection techniques and become informed consumers of published research. Successful completion of this course results in a prototype for the leadership experiment, which the student implements in LDRS 560 Leadership Experiment.
Prerequisite: LDRS 511, LDRS 512, LDRS 523, LDRS 524, LDRS 535, LDRS 536, LDRS 547, and LDRS 548.

LDRS 560, Leadership Experiment, 3 Units
As a completion of the M.A. in Leadership program's 4D model of Discover, Design, Develop, and Deliver, this final course helps students continue their leadership experiment started in LDRS 559 and culminates with a TEDx-style presentation. This is a pass/fail course.
Prerequisite: LDRS 559, and enrollment in the M.A. in Leadership program.

LDRS 561, Group and Conflict Issues in Leadership, 3 Units
This course helps the student understand small-group behavior. It uses experience-based methods, case studies, reading material, and simulation. The course examines role behavior, group dynamics, conflict control, leadership, and group development. It also addresses motivation and problem solving as essential elements of organizational behavior.

LDRS 563, Ethical Decision Making, 3 Units
This course investigates the intersection of ethics and effective decision making. Students will explore ethical implications of the decision making process, with particular emphasis on the ways that ethical decision making applies to individuals, groups, and organizational systems. This course applies theoretical concepts to significant organizational problems requiring effective decision making processes. Attention will be given to systematic rational approaches as well as the role of intuition and group dynamics in the decision making process. The course will utilize lecture, case study analysis, group exercises, review of current literature, classroom discussions, and simulations to create an effective learning environment.

LDRS 571, Leadership for a Learning Environment, 3 Units
This course looks at the leader's role in designing and implementing effective learning strategies and effective methods for educating adults. Emphasis is given to the creation of programs that focus on learning styles, discussion-oriented teaching, inspiring presentation skills, and results-oriented outcomes. During the course, students are given opportunities to demonstrate competency in the principles and practices of materials development, teaching, training, and skill development.

LDRS 592, Research Methods and Design, 3 Units
This course provides an introduction to basic concepts, principles, and methods of evaluation and research in the leadership setting, focusing on research traditions, procedures, theories, and methods. Emphasis is placed on identifying methods appropriate for particular research questions and conducting disciplined inquiry regardless of method selected. Particular emphasis will be placed on identifying a research question and conducting a comprehensive review of relevant literature.
LDRS 593, Applied Research, 3 Units
This course provides an introduction to basic concepts, principles, and methods of evaluation and applied research in leadership settings, focusing on action research methodology. A faculty-student collaborative process, participatory action research allows students to engage in inquiry and action for change in response to organizational or community problems. During the course, students will identify a research question in their personal leadership contexts, review the current research literature, develop a plan to collect initial data, and present their project and findings to the class. At each stage of inquiry, the professor and peer research groups will provide feedback.
Prerequisite: LDRS 592 (May be taken concurrently)

LDRS 595, Capstone Project in Leadership, 3 Units
The capstone course is an opportunity for students to demonstrate that they have achieved the goals for learning established through the M.A. in Leadership program competencies. The course assesses cognitive, affective, and applied learning in a student-centered and student-directed manner which requires the command, analysis, and synthesis of knowledge and skills. The capstone course integrates scholarship and praxis through the development of a literature review and 360-degree assessment and requires application of that learning to professional and personal contexts as evidenced through artifacts demonstrating competence. In culmination of their graduate studies, students will formulate a personal philosophy of leadership and develop a personalized growth plan that synthesizes their academic learning and outlines future professional and intellectual goals.
Prerequisite: Students enrolled in the M.A. in Leadership program

LDRS 597, Current Issues in Leadership, 3 Units
Current topics are chosen for discussion, research, and decision making relevant to the Organizational Leadership emphasis.

LDRS 598, Special Topics, 3 Units
In this course, a topic of current interest or need is examined in depth. Students analyze and evaluate topics/issues to reach and express a position, provide training for a particular population, or enhance personal development. If students elect this course more than once during their program, each course must address a different topic.

LDRS 599, Readings in Leadership Studies, 1-3 Units
The independent study vehicle allows students and their sponsoring faculty members to pursue approved investigations beyond regular course offerings.

MGMT 120, Business Communications, 3 Units
Students in this course explore communication technologies and strategies used in the modern marketplace to create and deliver audience-focused informative and persuasive messages based on credible research, impactful visuals, and professional vocal and physical techniques. Students are given scenario-based challenges often encountered in organizational settings and business situations, to help them with determining the extent of information needed in communications with key stakeholders, researching and utilizing credible support materials ethically, organizing information logically, and delivering messages through professional presentations using appropriate visual aids, graphics, posture, gesture, eye contact, and vocal expressiveness.

MGMT 210, Principles of Management, 3 Units
This course covers elements of planning, organizing, leading, and control, with emphasis given to organizing and actuating responsibility and authority, delegation, decentralization, the role of staff, line-staff relationship committees, boards of directors, and organization charting. This course will also explore formal and informal organization, communication, and reaction to change. Students will create and manage a business in an environment similar to today's economy. Meets the General Education Requirement: Integrative and Applied Learning.

MGMT 211, Organizational Leadership, 3 Units
This course covers contemporary theories, principles, and practices of leadership within the context of managing businesses and organizations, introducing leadership topics such as change management, leadership development, and organizational communication. Students also explore the emerging concept of followership and the role it plays in organizational failures and successes. Significant attention is given to students' personal assessment and evaluation of their personality, strengths, leadership styles, and work, in order to establish a leadership and management identity. Meets the General Education Requirement: Social Science.

MGMT 212, Managing Diverse Teams and Groups, 3 Units
This course covers essential theories and concepts for analyzing, understanding, and managing various groups and teams in the workplace. Students examine the components that comprise teams, develop skills in diagnosing opportunities and threats that teams face, and build teamwork expertise. Significant time is spent exploring interpersonal processes, conflict resolution, and the many characteristics that influence the effectiveness of a team. This course also gives students an understanding of team diversity, the differences between individual members that can exist in various areas such as age, nationality, religious background, functional background or task skills, sexual orientation, political preferences, and communication and decision-making styles, among others. Meets the General Education Requirement: Social Science.

MGMT 214, Project Management, 3 Units
This course introduces the basic principles of modern project management (PM), including project initiating, planning, execution, monitoring, and closing, with a focus on the development of PM knowledge areas as defined by the Project Management Body of Knowledge. Students learn how to use Microsoft Project Professional and related software tools for managing and controlling the project lifecycle. Course material helps students prepare for the Project Management Professional certification exam. Meets the General Education Requirement: Integrative and Applied Learning.
Prerequisite: MGMT 210
MGMT 335, Real Estate Management, 3 Units
This course offers an introduction to real estate principles and practices, essential real estate law, practices incidental to ownership, real estate brokerage, and property evaluation.

MGMT 350, Business Management Internship, 3 Units
This course gives students the opportunity to apply their knowledge of principle and theory, and practice their skills and abilities, in an actual business setting through an internship. Course format is similar to that of an independent study, combining in-class meetings, online lesson plans, and real-life work experience. Meets the General Education Requirement: Integrative and Applied Learning.
Prerequisite: Completion of 60 units, and instructor consent.

MGMT 410, Production Management, 3 Units
This course focuses on decision making and allocation control regarding personnel, materials, and machine utilization in a manufacturing environment. Course material addresses handling and control of materials, inventory, purchasing, and quality control, and students also learn about setting standards and developing skills in estimating, forecasting, and scheduling.
Prerequisite: MGMT 210

MGMT 440, Business Process Management, 3 Units
Business processes are the core of organizations, providing service to customers, impacting operations and cost structures, and defining enterprise software requirements. In this course, students explore what business processes are-how they are defined, documented, and managed. The course introduces the role of business architect as the initial developer of an enterprise software solution, and features real-world software tools, since software develops (and demands) a deeper understanding of the complexity and nuances associated with business process management. The course is suitable for all business students, since technology has become such a critical component of business.
Prerequisite: BUSI 240

MGMT 445, Human Resource Management, 3 Units
Students in this course study the human factors in modern business, particularly how they affect and are influenced by labor-management interactions and personnel relations, techniques, and procedures.
Prerequisite: MGMT 210

MGMT 446, Introduction to Organizational Theory and Design, 3 Units
This course introduces students to major perspectives in organizational theory and design and its impact on organizations and management. Course material gives students the fundamental knowledge base for understanding and exploring how organizations function, develop, and modify themselves to reflect the forces and needs of external and internal environments. Students examine organizational theory, which is the sociological study of formal and informal organizational structures such as businesses and bureaucracies and their interrelationship with the environment in which they operate. This course complements the studies of organizational behavior and human resources.
Prerequisite: MGMT 210

MGMT 448, Organizational and Administrative Behavior, 3 Units
Organizational behavior is an interdisciplinary field drawing from psychology, sociology, economics, organization theory, statistics, and other areas. In this course, students gain an understanding of the field and the various research strategies involved as they examine human behavior in organizations, as well as individual, group, and organization-level processes that impact workplace behavior and organizational life. Students are exposed to organizational behavioral science theories and their applications in different management settings and types of organizations, and have an opportunity to engage in experiential and skill-building activities, applying conceptual frameworks in community settings and developing strategies for increasing stakeholder and civic participation. Meets the General Education Requirement: Civic Knowledge and Engagement.
Prerequisite: MGMT 210

MGMT 450, Strategic Management, 3 Units
This course focuses on fundamental decisions in the life of a business: What is the business, and what should it be? What are the objectives? How are priorities set? How are strategic, long-range decisions to be handled? To grow or not to grow--and what is the right size for the business? Meets the General Education Requirement: Integrative and Applied Learning.
Prerequisite: MGMT 210; FIN 300 or FIN 330; MKTG 260; junior standing.

MGMT 467, Introduction to Organizational Development and Change, 3 Units
This course comprises a broad survey of major topics in organizational development and change, including but not limited to organizational processes, organizational growth, and organizational climates and cultures. Course material covers historical and contemporary theories and methods of introducing change in organizations, leading change, and the ethical issues involved in organizational change. Students examine the complex issues involved in organizational development and change management, along with the strategies and techniques required to effectively lead change in an organization. Students also explore the role of leadership in change and how leaders effect change, and examine a number of organizational issues including the need for change, why organizations change or fail to change, the legal and regulatory issues associated with change, and how change helps organizations become more competitive and profitable.
Prerequisite: MGMT 210
MGMT 501, Managerial Communication, 3 Units
Management, by definition, is achieving results with and through other people. Therefore, all of the technical and analytical skills in the world are useless unless you can communicate— that is, explain, persuade, and collaborate with others either by writing, interacting one-on-one, or presenting to a group. This course is aimed at equipping students with the necessary techniques and skills of research and communication used to inform others, inspire them and enlist their activity and willing cooperation.

MGMT 502, Developing Management Skills, 3 Units
This course provides an introduction to management skills necessary for the twenty-first century characterized by chaotic, transformational, and rapid-fire change. Scientific evidence demonstrates how management skills are associated with personal and organizational successes. Although management skills are applicable in most areas of your life, this course will focus on work setting management skills to help students improve their own competency in a managerial role.

MGMT 503, Business Strategy: Theory and Practice, 3 Units
This course provides a review of management as an area of theoretical development as well as a field of practice. It comprises classical management theories and modern approaches to organization and business. Main blocks of the course are functions of management, managerial processes and interaction between organizations and their environment. This course includes elements of organizational behavior. Business cases are used as application of theoretical concepts.

MGMT 504, Current Issues in Business and Management, 3 Units
This course examines organizational and behavioral problems facing managers. Students develop an awareness of modern concepts, strategies, and techniques that can enhance organizational effectiveness. Among these subjects are organizational design, personal leadership and delegation, communication, conflict management, and interpersonal perception group dynamics.

MGMT 510, Applied Research and Analysis, 3 Units
Students study research methodology as it relates to needs for research-derived information, with emphasis on the research process in the development of primary and secondary research information, conducting research related to given products or services, and the analysis and evaluation of actual business organizations.

MGMT 516, High-Performance People Management, 3 Units
This course provides students with the social science tools needed to solve organizational problems and influence the actions of individuals, groups, and organizations. It prepares managers to understand how to best organize and motivate the human capital of the firm, manage social networks and alliances, and execute strategic change.

MGMT 517, Managing Human Capital, 3 Units
Students study the establishment of human resource objectives and requirements in an organization. Emphasis is on executive decision making in dealing with formal employee-employer relationships. Collective bargaining, organization of employees, negotiation, and administration of collective bargaining agreements are covered.
Prerequisite: HROD 500 or GNRS 560

MGMT 521, Organizational Development and Change, 3 Units
Students investigate the emerging field of organizational development (OD) - major theories, basic concepts, and primary intervention strategies. Emphasis is placed on diagnosing the relationship between an organization's mission and culture, and facilitating system-wide, planned changes to improve organizational effectiveness.
Prerequisite: MGMT 515 and MGMT 516

MGMT 529, Ethical Decision Making, 3 Units
This course raises students' moral recognition level, provides them with the apparatus to make moral decisions in a business context, and considers ethical problems in business according to Christian principles. Emphasis is placed on the role of the leader in organizations.

MGMT 540, Diversity for Strategic Advantage, 3 Units
This course introduces the major goals, principles, and concepts of multiculturalism with particular emphasis on its impact on organizational effectiveness. It explores the cultural, linguistic, and socioeconomic factors influencing the workplace. This course offers concepts to improve learning and working environments and interaction among employees, businesses, and communities.

MGMT 541, Global Business Management, 3 Units
This course focuses on the environmental and functional differences between U.S. and international business, including exporting, balance payments, strategic planning, organization of multinational firms, international financial planning and cash management, foreign exchange planning, comparative management philosophies, international marketing strategies, incorporation for international operations and external relations of the multinational corporation.

MGMT 551, Leadership in Organizations, 3 Units
This course introduces current literature and theories of leadership. Leadership within organizational settings is examined. Leadership dilemmas and issues are analyzed (e.g., ethics, decision making, power and authority, conflict management). Emphasis is placed on identifying and enhancing leadership in organizational settings.
MGMT 561, Managing Teams and Conflict, 3 Units
This course helps the student understand small-group behavior. It uses experience-based methods, cases, reading material, and simulation, and examines role behavior, group dynamics, conflict control, leadership, and group development. It also addresses motivation and problem solving as essential elements of organizational behavior.

MGMT 570, Organizational Performance Improvement, 3 Units
This course provides an introduction to fundamental concepts and methods of quality and productivity improvement and examination of the OD professional's role in designing and implementing programs to improve quality of products and services. Particular emphasis is placed on understanding the forces that make quality and productivity critical organizational issues.

Prerequisite: MGMT 521

MGMT 577, Global Field Study, 0 Units
This course provides the framework for graduate students to register for and complete a global field study in various countries around the world. During the course, students conduct corporate visits to business firms locally and around the globe to discuss how they apply and practice the business management principles, concepts and theories covered in the graduate curriculum.

MGMT 578, Strategic Management, 3 Units
Taken in a student's last semester, this course explores how to convert executive vision into definitive plans that can be operationally implemented, and provides opportunity for practice and experimentation in strategy formulation and change management. Students use strategy support systems to transition from a change-resistant operational approach to a future-oriented approach characteristic of strategic thinking. Case- and project-based.

Prerequisite: ACCT 512, FIN 513, and MKTG 527.

MGMT 581, Ethical Leadership, 3 Units
This course provides a foundation for two integrative themes: leadership and ethics. Leadership is examined from theoretical and practical perspectives, with an emphasis on servant leadership. An ethical framework for management decision-making is also established and used. Students learn to apply their spiritual gifts, strengths, personality traits, and leadership styles to their leadership contexts.

MGMT 582, Strategic Management in Not-for-Profit, 3 Units
This course offers a study of the strategic management issues which are unique to government and other not-for-profit organizations. Included are: defining characteristics of different types of not-for-profit organizations; convergence of environmental demands on not-for-profit organizations and business firms; power in not-for-profit organizations; multiple stakeholder and stakeholder power; formulation of legitimacy strategy; and success measurement in not-for-profit organizations.

Prerequisite: BUSI 450 or equivalent

MGMT 583, Global Strategic Management, 3 Units
The course explores the main issues that companies and their managers confront when they 'go global' or 'manage globally'. Students gain both theoretical and practical insight into the management of a global organization to appreciate the opportunities, problems (both worldwide and local), and alternative strategies for globalization or localization.

MGMT 595, Special Topics in Management, 1-3 Units
This course presents timely and new topics in management. Different material is covered each time the course is offered. The course may be repeated for credit. Some topics require prerequisites, which vary according to the topic.

MGMT 597, Master's Project in Management, 3 Units
This capstone course involves the implementation and application of management theory. Students participate in a service-learning project for a community-based organization, applying management methodology. Students are expected to complete a master's level research project demonstrating competency in management theory, the individual area of emphasis, as well as faith integration.

Prerequisite: MGMT 521; final semester of MAM program

MKTG 260, Principles of Marketing, 3 Units
Students in this course analyze the movement of goods from producers to consumers, which includes discussion of the channels of distribution, marketing functions, management considerations, and problems in marketing practice. Marketing trends in current economic systems are reviewed. 

Meets the General Education Requirement: Intercultural Competence.

MKTG 261, Visual Marketing, 3 Units
This course provides students with a comprehensive overview of the principles and techniques behind visual marketing. Students explore various platforms available to help them effectively reach their target audience through visually engaging methods, and evaluate market trends, use of technology, target audience, and visual communication methods to create a visual marketing strategy. By the end of the course, students are able to identify which approaches are best suited for their projects and how they can use these tools to create compelling visual marketing campaigns.

Prerequisite: MKTG 260
MKTG 262, Consumer Behavior: An Applied Approach, 3 Units
This course involves a comprehensive examination of the nature of markets and the factors influencing market development and change. Students study individual consumer behavior in relation to the buying-selling process, with emphasis on understanding the consumer in order to facilitate the development of an effective marketing strategy. Meets the General Education Requirement: Civic Knowledge and Engagement.

MKTG 350, Marketing Internship, 3 Units
This course integrates marketing principles and theory into a working environment related to marketing. Includes research, setting objectives, general marketing decision making, and reflection. Meets the General Education Requirement: Integrative and Applied Learning.
Prerequisite: MKTG 260, completion of 60 units, and instructor consent.

MKTG 361, Advertising and Integrated Marketing Communications, 3 Units
Students in this course explore how organizations promote ideas, products, or services through strategic connections with consumers on a variety of digital channels. Grounded in advertising, public relations, and communication, course material covers marketing campaigns and practices that have shaped our history, and how modern organizations build value by using branding, storytelling, publicity, medium utilization, and data analytics to create authentic messaging for specific target audiences.
Prerequisite: MKTG 260

MKTG 363, Marketing Research, 3 Units
This course is an overview and practical application of contemporary methods for gathering, analyzing, and preparing market research for use in management decision making. Research methodology includes specific topic areas as the research process, primary and secondary data, qualitative and quantitative research methods, statistical analysis, and utilization of technology.
Prerequisite: MKTG 260 and MATH 130

MKTG 364, Sales and Sales Management, 3 Units
In this course, consideration is given to personal sales strategies and practices, including relationship management, negotiation, consultative selling, and key account management. The sales management function, including recruiting and selecting salespeople, motivation and training, compensation plans and quotas, supervising, sales forecasting and budgeting, salesforce evaluation, and the ethics in selling and sales management is covered.
Prerequisite: MKTG 260 or instructor consent

MKTG 368, Retail Management, 3 Units
Students explore the roles and scope of retailing business, characteristics of retailers and consumers, and strategies for managing operations. Course material emphasizes retailing characteristics and activities, multichannel opportunities, retail communication mix, consumer buying behavior, retail market strategy (including location and site strategy), product mix, store layout, merchandising, competition, pricing, and promotion. This course also introduces students to procurement and supply chain logistics, customer relationship management, operations, and employee management. Students in this course have the opportunity to earn a retail management microcredential.
Prerequisite: MKTG 260

MKTG 369, Global Industrial Marketing, 3 Units
Students learn the marketing of business goods by manufacturers to other businesses, government agencies, and social institutions. The course consists of market analysis, sales forecasting, product strategy, effective use of sales force, and industrial promotional planning and implementation. Extensive quantitative techniques are utilized.
Prerequisite: MKTG 262, MKTG 363

MKTG 373, Global Marketing Management, 3 Units
This course is an overview of international marketing and considers the powerful economic, technological, industrial, political, and demographic forces that are converging to build the foundation of a global marketplace in a dynamic and ever-changing world. Students conduct projects involving international marketing.
Prerequisite: MKTG 260 and BUSI 370

MKTG 376, Strategic Brand Management, 3 Units
This course introduces students to the essential concepts of strategic brand management. It provides an in-depth exploration of how brands are created, positioned, and leveraged for maximum market advantage. Through the perspective of customer-based brand equity, students learn about influencer marketing, digital platform brands, social listening, attribution modeling, and marketing to bicultural consumers. Upon completion of this course, students are able to demonstrate a comprehensive understanding of the principles and techniques used in today's competitive marketing environment.
Prerequisite: MKTG 260

MKTG 378, Contagious Marketing, 3 Units
Students in this course gain a comprehensive understanding of the strategic methods that organizations employ to promote their products, services, or ideas in the digital age. Course material covers various channels used for connecting with consumers, such as advertising, public relations, and other communications. Students explore the historical and current practices of contagious marketing campaigns, focusing on how organizations build value through branding, storytelling, publicity, and medium utilization. By the end of the course, students have a deep understanding of the principles and practices of contagious marketing and are equipped with the skills needed to create effective campaigns.
Prerequisite: MKTG 260
MKTG 465, Strategic Marketing Management, 3 Units
This course offers a strategic approach to the management of the marketing function. As the capstone course for marketing majors, students utilize marketing case analysis to examine and evaluate the entire marketing decision-making process. Course content focuses on the strategic analysis of market opportunities and the development of the marketing mix through project coursework.
Prerequisite: MKTG 262, MKTG 361

MKTG 466, Digital and Social Media Marketing, 3 Units
Within an organization’s strategic and business objectives, digital marketing leverages traditional marketing, utilizing essential digital marketing tools such as online branding, display advertising, social media marketing, and search engine optimization. Content in this course emphasizes the development of digital marketing strategies and programs for an organization, and students have the opportunity to earn an industry-recognized Hootsuite certificate in social media and social media marketing management.
Prerequisite: MKTG 260

MKTG 502, Marketing Principles, 3 Units
This course focuses on understanding marketing management, formulating and implementing marketing strategies, and provides a systematic framework for marketing planning, analysis and evaluation. The characteristics and management of markets are described in topics that include the marketing environment, components of the marketing mix, market segmentation, positioning and targeting.

MKTG 515, Marketing Research, 3 Units
This course prepares students to approach marketing research from a management perspective. The role of marketing research process, the human side of marketing research, and organizational and ethical issues are discussed. Students utilize comprehensive cases and analysis, along with a marketing research project.
Prerequisite: MKTG 527 and BUSI 511

MKTG 527, Marketing Strategy, 3 Units
This course offers in-depth management, analysis, and decision-making resources related to marketing strategy, including environmental turbulence, competitive analysis, customer and market analysis, product life cycle analysis, and marketing mix management. Course material is primarily case-based.
Prerequisite: ACCT 512 and FIN 513

MKTG 545, International Marketing, 3 Units
International marketing is the performance of business activities that direct the flow of a company’s goods and services to consumers or users in more than one nation. The elements of the marketing mix (product, price, promotion, and place-channels of distribution) first studied in domestic marketing are analyzed in global terms, thus adding the elements of geography, cultural forces, and the structure of distribution to the uncontrollables with which the marketer must contend.

MKTG 565, Integrated Marketing Communications, 3 Units
In this course, the marketing communication function is introduced and analyzed. Topics include advertising theory, planning and measurement, communication theory, the integrated marketing communication (IMC) mix, promotional strategies, public relations and publicity, consumer education, collateral materials planning, and promotional ethics.

MKTG 580, Strategic Digital Marketing, 3 Units
This course discusses the differences between E-commerce and E-business in relation to the firm, emphasizing the correlation between business, technology, and society. An advanced marketing course, it builds on the firm’s business model, which guides its traditional and dynamic online marketing presence. Emphasis is placed on the importance of the Christian worldview and community citizenship, and on developing a positive long-term relationship with customers and stakeholders, thereby creating a distinct competitive advantage for the firm. Student projects integrate learning activities with business organizations.

OPSY 501, Introduction to Organizational Psychology, 3 Units
This course is an introduction to the field of industrial/organizational (I/O) psychology, providing an overview of the fundamentals and the various subfields of the discipline. Special consideration is given to topics that integrate the application of psychology to organizational environments. Coursework covers the history of I/O psychology, offers a comparative review of topics within industrial psychology and organizational psychology, and helps students gain a fundamental understanding of employee selection, training, motivation, job satisfaction, communication, group behavior, and stress management. The course also includes a review of the organizational psychology literature as well as ethics guidelines and professional standards governing the practice of organizational psychology.
Prerequisite: Acceptance into the MS in Organizational Psychology program

OPSY 502, Organizational Ethics, 3 Units
Students in this course examine psychological phenomena that help explain why people who want to act ethically in organizations often do not act in accordance with their values. Course material also helps students understand how cognition, affect, and behavior interact, so they can better navigate ethically challenging situations. Ethical issues in organizational contexts are examined in light of biblical values and the American Psychological Association’s Ethical Principles of Psychologists and Code of Conduct.
Prerequisite: Acceptance into the MS in Organizational Psychology program
OPSY 503, Group and Organizational Behavior, 3 Units
This course offers a behavioral science approach to organizational life and enables students to investigate the effective functioning of individuals and groups within organizational settings. Emphasis is on the psychology of teams, team dysfunction, group conflict, and organizational culture. This course applies theoretical concepts to challenges such as team dynamics, conflict, decision making, and organizational behavior patterns.
Prerequisite: Acceptance into the M.S. in Organizational Psychology program; successful completion of OPSY 501 is recommended.

OPSY 505, Individual and Team Assessment, 3 Units
Students receive instruction and training in individual assessment techniques for vocational and business applications, including pre- and postemployment assessment for selection, onboarding training, advancement, developmental or remedial coaching, and succession planning. Students are introduced to qualitative and quantitative assessment methods as key tools for leadership assessment; learn the importance of assessment in organizational and leadership dynamics; and gain competency in the use of several key assessment methods and instruments and learn to apply these instruments to leadership development within work team environments. Students are also introduced to job analyses and use measurement tools relevant for assessing occupational interests, abilities, competency modeling, and work-related personality constructs. Students also complete several individual assessments as part of the experiential, outside-of-class portion of the course.
Prerequisite: Acceptance into the MS in Organizational Psychology program

OPSY 510, Organizational Assessment and Interventions, 3 Units
This course introduces intervention strategies that correspond to the primary issues related to organizational life: change management, organizational culture, and leadership and team dynamics. Students gain competency in focusing on these critical areas of assessment and intervention: qualitative method, conducting needs analysis, proposing consultation projects, and employee assistance programs. Students also become familiar with research methodologies related to existing programs and successful programs within companies.

OPSY 515, Coaching Techniques and Application, 3 Units
Students in this course examine theories and practices within the fields of psychology, organizational behavior, business, and other relevant fields as they relate to the practice of executive coaching. They also explore coaching competencies, professional ethics, and models of executive coaching, and are introduced to a repertoire of basic coaching skills applicable to most executive coaching situations (e.g., self-awareness, empathy, listening, questioning, giving and receiving feedback, confrontation, limit setting, demonstrating leadership, etc.).

OPSY 520, Consultative Applications of Organizational Psychology, 3 Units
This course covers the applied aspects of organizational psychology, providing an overview of the consulting process as it relates to external and internal consultation in industry. Students are introduced to the theoretical and practical aspects of providing organizational consultation, with special consideration given to topics that integrate the competencies needed for applying psychology to organizational environments. Coursework provides an overview of organizational consulting models and frameworks, and focuses on the fundamental steps in the consulting process that lead to high-impact outcomes. The course also includes a review of the organizational psychology literature, as well as ethics guidelines and professional standards governing the practice of organizational psychology.
Prerequisite: Acceptance into the M.S. in Organizational Psychology program, and successful completion of OPSY 501.

OPSY 534, Organizational Systems: Theories of Change, 3 Units
This course engages the idea of organizational change from a systems perspective and approaches content through analysis of theory, praxis, and story. Practical application is explored in regard to how students can and will be equipped to serve as change agents in internal and external consultant roles. Special attention is given to the specific steps involved in identifying the need for change, engaging internal and external stakeholders in the change process, and implementing desired change initiatives.

OPSY 542, Organizational Implications of Diversity, 3 Units
This course explores theoretical and practical ideas about diversity in organizations, equipping students to identify and engage individual, societal, and organizational dynamics related to 21st century workplace diversity and inclusion. Students learn about basic psychological processes-including attitudes toward marginalization, structural inequity, privilege, and prejudice-that affect how members of different social groups perceive and interact with one another in organizational settings. Students also engage critical perspectives on the historical, sociocultural, and psychological factors of organizational diversity, explore the ethical implications of navigating complex organizational cultures, and discuss strategies for fostering and sustaining diversity.
Prerequisite: Acceptance into the MS in Organizational Psychology program

OPSY 550, Statistics for Research in Organizations, 3 Units
This course introduces students to the basic concepts of statistical ideas and methods, equipping them to carry out common statistical procedures and follow statistical reasoning for research in workplace phenomena. Principles of measurement, data summarization, and univariate and bivariate statistics are examined. Emphasis is on the application of fundamental concepts to real-world situations.
Prerequisite: Acceptance into the MS in Organizational Psychology program

OPSY 590, Research Methodology and Survey Applications, 3 Units
Students in this course learn quantitative research techniques of investigation and apply them to psychological activities in organizations. Students also learn principles of survey design. A final project includes developing and administering a psychometrically valid survey for an organization, with students analyzing the data and providing a report of the results.
Prerequisite: OPSY 590
OPSY 595, Introduction to Thesis in Organizational Psychology, 4 Units
This course gives student researchers a directed study focused on preparing a master's thesis in organizational psychology. Students identify a worthy research topic, write a comprehensive literature review, select an appropriate research method, and shape a compelling research proposal.
Prerequisite: OPSY 501, OPSY 502, OPSY 503, OPSY 505, OPSY 510, OPSY 515, OPSY 520, OPSY 534, OPSY 542, OPSY 590, OPSY 592, and permission from the department chair.

OPSY 596, Thesis in Organizational Psychology: Data Collection and Analysis, 4 Units
This course gives student researchers a directed study focused on completing a master's thesis in organizational psychology. Building on the research proposal completed in OPSY 595, students collect and analyze data and present their findings in the form of a completed master's thesis and oral presentation to the thesis committee.
Prerequisite: OPSY 595

PADM 350, Theory and Practice of Public Administration, 3 Units
This course provides a detailed overview of the theoretical foundation for managing and operating federal, state, and local government agencies and nonprofit organizations. Public administrators interact with politicians, community stakeholders, businesses, and voters to achieve the public good, and students in this course examine the role of public administrators through texts, scholarly articles, discussion questions, application to real-world case scenarios, guest speakers, and online coursework.

PADM 355, Environmental Economics, 3 Units
Students in this course apply economic perspectives and analytical tools to the study of environmental problems, focusing on the effects of business activities on the environment and the effects of environmental policy on business.
Prerequisite: ECON 200

PADM 356, Labor Economics, 3 Units
This course covers the allocation of labor in a society among its various possible uses. Students consider the role of markets in allocating this labor, issues of market power, and the role of government policy in accomplishing social objectives. Wage determination, job search, and labor productivity are also discussed.
Prerequisite: ECON 200

PADM 357, Economics of the Developing World, 3 Units
This course introduces students to the economic and social issues confronting the majority of people in the world. Students survey the current conditions of people in the developing world and build ways of understanding the complex issues these people face. Using these tools, students examine economic and financial infrastructure, political conditions, levels and trends in poverty and income distribution, job creation and economic growth, health and education, and environmental conditions, which all affect the state of "development" of a people.
Prerequisite: ECON 200

PADM 359, Urban and Regional Economics, 3 Units
This course combines the disciplines of economics and geography. Economic interactions among individuals, firms, and governmental units are analyzed geographically by focusing on central cities, suburbs, and outlying regions. Within this urban and regional context, this course places particular emphasis on market forces, land use, transportation, crime, housing, and local government. Meets the General Education Requirement: Civic Knowledge and Engagement.
Prerequisite: ECON 200

PADM 375, Program Implementation and Evaluation, 3 Units
This course details the rationale for public programs authorized and managed by public agencies and nonprofit organizations. Public policies and management principles applied to the administration of programs are examined using the course textbook, course reader, online discussion Q&A, digital media, and assigned online coursework. Meets the General Education Requirement: Integrative and Applied Learning.

PADM 399, Public Administration Practicum, 6-8 Units
This course offers fieldwork internship opportunities in local, state, and federal government internships and practicums. A fieldwork opportunity is chosen by the student in consultation with the Public Administration faculty director. Meets the General Education Requirement: Civic Knowledge and Engagement.

PADM 501, Origin of Public Administration, 3 Units
In this introductory course for preservice and midcareer individuals, students learn the theory and practice of public administration. Course material includes an exploration of ethical dilemmas influencing the daily tasks of public administrators, with an emphasis on the core public administration values of accountability, integrity, and leadership and evidence-based decision making for effective and efficient public policy program implementation. Coursework involves textbooks, lectures, discussions, and case studies of application to professional settings to assist managers with problem solving and promote responsive, faithful service that helps vulnerable and diverse populations in our communities.
PADM 502, Organizations and Behavior, 3 Units
Students in this course review public management research, theories, and perspectives that help practitioners assess the issues and challenges of working with people, technologies, and policies to accomplish goals. Students also critique modern public management strategies and behaviors to solve real-world problems. Instructional materials are interdisciplinary (psychology, public administration, political science) and include articles, cases, electronic resources, student experiences, and collaborative discussions to analyze, develop, and communicate ethical evaluative skills that promote management solutions aligned with the values of APU’s Four Cornerstones.

PADM 503, The Policy Process, 3 Units
This course offers an in-depth study of the public policy process (analysis, promulgation of statutory laws and administrative rules) and value-based implementation. Public administrators in public, nonprofit, and private organizations must interact with political leaders, administrative staff, and diverse community groups to ensure the implementation of necessary policy programs and services, and that these are accessible to people in need. Coursework involves textbooks, scholarly materials, lectures, discussions, and case assignments.

PADM 504, Economic and Urban Development, 3 Units
This course prepares students for public-sector organization management. Students learn about community development programs, municipal budgeting and expenditures, grants administration, joint powers agreements, public-private partnerships, nonprofit organizations, fiscal management policies, and county, state, and municipal government economic development programs.

PADM 505, Public Sector Research Methods, 3 Units
This course is for preservice and midcareer professionals who use research and data as evidence in public administration to advocate for resources, make effective ethical leadership decisions, and implement and evaluate programs. The importance of research in the policy implementation process and in programs run by public and nonprofit managers is examined. **Prerequisite:** MGMT 516, PADM 501, PADM 503, and PADM 504.

PADM 506, Ethical Leadership and Management, 3 Units
This course helps leaders in public, nonprofit, and private organizations sharpen their leadership skills. Emphasis is on strategies and tactics used daily by management professionals tasked with achieving agency mission and goals for the common good. Analytical and critical thinking skills are improved by evaluating principles, theories, and best practices for leading and collaborating with diverse community stakeholders. Course materials (discussions, research, lectures) and case studies of real-world problems emphasize strategies, theories and tactics used daily by faithful, efficient and effective management professionals and community leaders.

PADM 510, U.S. Healthcare System, 3 Units
Students in this course examine the American healthcare system, which supports individuals and families regardless of their ability to pay. Students discuss public health systems and federal, state, county, and municipal government systems management, and explore alternatives and improvements to current health administrations while reflecting on their faith traditions as they apply to advancing healthcare practice. This course also provides an overview into the publicly funded California healthcare system, one of the largest and most diverse systems in the United States. This system comprises only 6 percent of the state’s hospitals but provides more than 40 percent of hospital care to the uninsured.

PADM 511, Federal Health Insurance Policy (Implementation and Administration) [Proposed], 3 Units
CalPERS is the nation's largest public pension fund and serves more than 1.9 million members in the retirement system and 1.5 million members in their health care program. Course provides detailed discussion and instruction about CalPERS and public pension programs are examined using course textbook, journal articles, lecture discussion examples, Q&A discussion board assignments and assigned online coursework.

PADM 512, Healthcare Administration, 3 Units
This course covers the foundations of healthcare administration in the United States, introducing students to the structure and function of the healthcare system. Topics include theory and models of healthcare administration, public policy impacts and scarcity, partnerships and achieving equality in healthcare governance at the national, state, and local levels, community environments, and critical issues in health services. Students explore Christian faith-based alternatives for alleviating healthcare burdens, and conduct a community health system analysis. **Prerequisite:** Admitted to MPA or M.S. in Healthcare Administration program, Nursing, MBA/MBM Program or permission of MPA director.

PADM 513, Community Health and the Built Environment, 3 Units
The course provides a foundation for administering health and well-being in state and local communities. Students integrate knowledge-based competencies from multidisciplinary research (CAHME, APHA, public policy studies) and apply best practices to assess and suggest policies that can reduce healthcare problems in vulnerable communities. Topics covered include ideas for building healthy environments, demographics of infectious diseases and essential skills for future healthcare professionals. Students conduct a community healthcare system analysis that integrate case studies, audiovisuals, discussions, team assignments and faith-based alternatives to alleviate healthcare burdens. **Prerequisite:** Admitted to MPA or MS in Healthcare Administration program, Nursing, MBA/MBM Program or permission of MPA director.
PADM 514, Nonprofit Storytelling, 3 Units
Framing the message to communicate the mission and goals is essential for diversity, inclusion, and social impact work. Public-sector organizations find value using compelling communication techniques such as social/digital (PADM 515) and emergent technologies of storytelling and storyboards popular in the nonprofit sector. Nonprofits experience challenges communicating program policy issues to citizens, but capturing personal experiences and creating storyboards provides evidence of organizational impact in the community that statistics cannot. This online course focuses on nonprofit storytelling as a communication practice to engage vital stakeholders, fortify strategic alliances, and participate in the public policy making process at the national and local levels. Course material includes discussions, literature materials, case studies, and real-world activities.

PADM 515, Social/Digital Media and the Public Sector, 3 Units
Social media is a contemporary and pervasive communication technology that leaders in the public sector often use to facilitate interaction with the public - to inspire with lifestyle brands, create and build professional brands, and promote diversity and inclusion in public policy making. Concerns about social/digital media as a communication technology include openness in government, protecting privacy, and building relationships. This course focuses on using social/digital technologies (e.g., Google Hangouts, Twitter, Facebook, town halls, and public policy hearings) to expedite citizen input for potential action. Course materials include texts and audiovisuals, case studies with tips for influencing outcomes, and references to students’ faith traditions, all designed to improve public practice.

PADM 518, Public-Private Partnerships, 3 Units
This course provides an overview of public-private partnerships (P3) essential to maintaining the national, state and local governments’ infrastructure. Governments build relationships with businesses to provide critical services as public safety, welfare, healthcare, education and economic development projects. Students gain knowledge about the risk, structure, and finance of P3 projects to effectively lead and manage agreements. Through case studies of best practices, students can explore innovative ways to build and sustain public-private relationships used in regional and national situations.

PADM 521, Nonprofit Collaborations with Governments, 3 Units
Students in this course explore concerns voiced at state and local governments to improve public service delivery for community development, utilizing the trend toward collaborative policies and resources that can strengthen nonprofit innovations to benefit communities. Governments cannot solve state and local problems alone, so there has been a trend toward collaborative policies and resources that can strengthen nonprofit innovations to benefit communities. Students recognize that public well-being initiatives to protect social, political, administrative, economic, and cultural rights are best served by leveraging nonprofit strengths and community relationships. Course readings, audiovisuals, and case learning materials combine with student faith traditions to help improve nonprofit leadership.

PADM 522, Geographic Information Systems (GIS) in the Public Sector, 3 Units
This introductory course equips preservice and midcareer individuals with the geographical and spatial intelligence and skills required in most public administration positions. Knowledge of data analysis and of relationships (size, shape, and location) between geographic points of interest are powerful tools to help with descriptive analysis and planning in the social environment. Students acquire the basic geographic information systems (GIS) tools for analyzing, describing, and managing programs essential to public health, environmental science, criminal justice, and business as well as public administration.

PADM 532, Business Finance for Managers, 3 Units
This course provides an introduction to concepts and tools of business finance for managers. Students study financial statements and their interpretation, business performance measures, the management of cash and the short-term financial needs of the organization, and how to make good capital budgeting decisions. Students also analyze company performance and make recommendations by applying class content to financial issues.

PADM 533, Business Strategy: Theory and Practice, 3 Units
This course provides a review of management as an area of theoretical development as well as a field of practice, and covers classical management theories and modern approaches to organization and business. Main blocks of the course are functions of management, managerial processes, and interaction between organizations and their environment. Course material includes elements of organizational behavior, and business cases are used for application of theoretical concepts.

PADM 537, Managing Human Capital, 3 Units
Students in this course study the establishment of human resource objectives and requirements in an organization, with emphasis on executive decision making in dealing with formal employer-employee relationships. Collective bargaining, organization of employees, negotiation, and administration of collective bargaining agreements are covered.
Prerequisite: HROD 500 or GNRS 560

PADM 542, Developing Management Skills, 3 Units
This course provides an introduction to management skills necessary for a 21st century characterized by chaotic, transformational, and rapid-fire change. Scientific evidence demonstrates that management skills are associated with personal and organizational successes, and although management skills are applicable in most areas of life, this course focuses on work setting management skills to help students improve their own competency in managerial roles.
PADM 550, Accounting for Nonprofit Entities, 3 Units
Students in this course examine how nonprofit organizations measure financial performance and how they differ from for-profit organizations. Students also explore accounting principles and practices for nonprofit organizations including churches, hospitals, and health and welfare organizations. Students assess nonprofit and for-profit organizations that receive government assistance in the form of contracts, guarantees, grants, or assistance that may be subject to federal audit requirements. Other topics include ethical examination of accounting decisions, and the general characteristics and operational environment of nonprofit organizations, as well as the application of generally accepted standards, principles, and practices.

PADM 551, Government Financial Management, 3 Units
This course covers the principles of public financial accounting and follows the Association of Government Accountants (AGA) Certified Government Financial Manager (CGFM) exam structure, which focuses on three modules: governmental environment and accounting; financial reporting and budgeting; and governmental financial management and control. Students taking this course are required to use AGA's CGFM study guide materials (which are purchased by the university) and take all three CGFM exams.

PADM 565, Integrated Marketing Communications, 3 Units
In this course, the marketing communication function is introduced and analyzed. Topics include advertising theory, planning and measurement, communication theory, the integrated marketing communication mix, promotional strategies, public relations and publicity, consumer education, collateral materials planning, and promotional ethics.

PADM 594, Emerging Trends in Information Technology, 3 Units
This course, intended for students without a background in information technology (IT), surveys current topics in IT and their impact on business, management, organizations, and society. Course topics include business intelligence, cybersecurity, business analytics, social networks, data visualization, agile software development, and business process management. Students develop an understanding of how organizations can utilize technologies, get hands-on skill development using real-world tools and deliverables, and explore management and organizational issues associated with technological change.

PADM 595, Special Topics in Public Administration, 3 Units
Studying new trends and new governance in public administration enables student practitioners to consider administrative pillars such as efficiency, effectiveness, social justice and the economy in a contemporary way. The course focus is to enhance leadership and management skills as faithful (moral behaving) public servants as students review and discuss recognized and innovative strategies applicable to a variety of job settings.

PADM 599, Readings in Public Administration, 1-3 Units
This course is an independent study vehicle through which students and their sponsoring faculty members may pursue approved investigations beyond those provided within regular course offerings.

PADM 600A, Community Engagement, 3 Units
This course and PADM 600B Public Administration Capstone are the final courses in the Master of Public Administration (MPA) program. Students in this course participate in activities in diverse communities, identifying trends and issues facing public leaders and thereby enhancing student practice. In consultation with the MPA program director, students participate in fieldwork experiences, learning to apply faith-based principles, theories, and problem-solving strategies in public, nonprofit, and joint-venture partnerships, which also benefits community partners.
Prerequisite: Second-year good standing in the MPA program.

PADM 600B, Public Administration Capstone, 3 Units
The capstone comes at the conclusion of the MPA program and requires application of new knowledge to solve real-world problems. Students demonstrate mastery of foundational management and policy implementation materials and integrate ethical and moral standards, as well as professional experiences, that are at the core of the MPA program. With guidance from the program director and the course instructor, students work with a community partner or client (fieldwork course PADM 600A) to produce a project paper that represents careful planning, research, and fulfillment of course deliverables. Successful completion of PADM 600A and PADM 600B is required for the MPA degree.
Prerequisite: Second-year good standing in the MPA program.

PRBA 110, Business and Entrepreneurship, 3 Units
This course introduces students to the role of business in society and the impact of the social environment on the firm. It acquaints students with the basic functional areas of business, including management, human resources, marketing, finance, and production. Students produce a comprehensive business plan incorporating the functions of business and examining the effect of the business on society. Meets the General Education Requirement: Civic Knowledge and Engagement.

PRBA 111, Business Statistics, 3 Units
Students in this course learn basic statistical concepts and methods of collecting, summarizing, presenting, and interpreting data for the business context. Among the topics covered are differentiation, population, sample, descriptive statistics, variation and skewness, exploratory data analysis with visuals, probability, random variable, sampling distribution, central limit theorem, discrete distributions (binomial, Poisson), continuous distributions (normal, t, exponential, chi-square), confidence interval estimation, hypothesis testing, correlation, regression, and the analysis of variance (ANOVA), to be applied in real-world business situations. Meets the General Education Requirement: Quantitative Literacy (Math).
Prerequisite: MATH 90 or an appropriate score on the APU mathematics placement assessment.
PRBA 120, Principles of Accounting I, 3 Units
This course introduces the financial accounting model and application of fundamental accounting principles. The corporate form of business serves as the primary model to demonstrate accounting principles for cash, accounts receivable, inventories, operational assets, liabilities and stockholders' equity.

PRBA 121, Principles of Accounting II, 3 Units
This course introduces basic managerial accounting concepts and emphasizes the use of accounting data in decision making. Topics covered include cost accumulation models, cost behavior, break-even analysis, variable costing, budgeting, differential analysis, product pricing, capital expenditure analysis, and financial statement analysis.
Prerequisite: PRBA 120

PRBA 125, Business Communications, 3 Units
Students in this course explore current communication technologies and strategies in the modern marketplace to create and deliver audience-focused informative and persuasive messages using credible research, impactful visuals, and professional vocal and physical techniques delivered orally. Students are given scenario-based challenges often encountered in organizational settings and business situations, to help them determine the extent of information needed when communicating with key stakeholders, researching and utilizing credible support materials ethically, organizing information logically, and delivering messages through professional presentations using appropriate visual aids, graphics, posture, gesture, eye contact, and vocal expressiveness. Meets the General Education Requirement: Oral Communication.

PRBA 200, Survey of Economics, 3 Units
This course covers the concepts and tools of economic analysis for microeconomics and macroeconomics. Students study the basics of interactions between firms and consumers: consumer demands, firm costs, price determination under various market structures, and the role of government in a market economy. Students also study the fundamentals of national income and economic growth, interest rates, unemployment, and government fiscal and monetary policies. Meets the General Education Requirement: Social Science.

PRBA 210, Principles of Management, 3 Units
Elements of planning, organizing, leading, and control are covered. Particular emphasis is given to organizing and actuating responsibility and authority, delegation, decentralization, the role of staff, line-staff relationship committees, board of directors, organization charting, formal and informal organization, communication, and reaction to change.

PRBA 211, Organizational Leadership, 3 Units
This course covers contemporary theories, principles, and practices of leadership within the context of managing businesses and organizations, introducing leadership topics such as change management, leadership development, and organizational communication. Students also explore the emerging concept of followership and the role it plays in organizational failures and successes. Significant attention is given to students' personal assessment and evaluation of their personality, strengths, leadership styles, and work, in order to establish a leadership and management identity. Meets the General Education Requirement: Social Science.

PRBA 212, Managing Diverse Teams and Groups, 3 Units
This course covers essential theories and concepts for analyzing, understanding, and managing various groups and teams in the workplace. Students examine the components that comprise teams, develop skills in diagnosing opportunities and threats that teams face, and build teamwork expertise. Significant time is spent exploring interpersonal processes, conflict resolution, and the many characteristics that influence the effectiveness of a team. This course also gives students an understanding of team diversity - the differences that can exist between individual members, in various areas such as age, nationality, religious background, functional background or task skills, sexual orientation, political preferences, and communication and decision-making styles, among others. Meets the General Education Requirement: Social Science.
Prerequisite: PRBA 210

PRBA 213, Negotiation Strategies and Skills, 3 Units
Students in this course learn the basics of negotiation, then research and explore additional techniques that help them establish alternative criteria to expand and build upon their bargaining style. Each student is assessed on negotiating style, role playing, principled negotiation, and information gathering. Emphasis is on topics related to negotiations in a business context.

PRBA 240, Introduction to Information Systems and Business Applications, 3 Units
This course covers the fundamentals of business information systems, methods, equipment, processes, computer characteristics, and concepts. Students also examine the ethical use of information, information systems, and business applications, and learn to use business applications Formstack, QuickBooks, and Salesforce, with opportunities to earn an Expert Badge in Formstack and ProAdvisor Badge in QuickBooks.

PRBA 244, Data Analytics, Spreadsheets, and Data Visualization, 3 Units
Integrating knowledge gained in PRBA 240, students gain hands-on experience in analyzing, managing, and reporting data in the business world, and use advanced statistical tools to frame business decisions for operations, finance, forecasting, etc. Students learn data applications of Microsoft Excel, Data Studio, and Tableau, and also have the opportunity to earn an Expert Badge in Excel.
Prerequisite: PRBA 240
PRBA 250, Principles of Macroeconomics, 3 Units
This course introduces concepts and tools of economic analysis for macroeconomics. Students study national income and economic growth, interest rates, unemployment, and government fiscal and monetary policies. *Meets the General Education Requirement: Social Science.*
**Prerequisite:** C- or better in PRMA 110 or 60 or higher on ALEKS math placement assessment.

PRBA 251, Principles of Microeconomics, 3 Units
This course provides an introduction to concepts and tools of economic analysis for microeconomics. Students study the interactions of firms and consumers: consumer demands, firm costs, price determination under various market structures, and the role of government in a market economy.
**Prerequisite:** C- or better in PRMA 110

PRBA 260, Marketing Principles, 3 Units
This course provides an introduction to the theory and practical application of marketing principles by examining concepts related to understanding, reaching, and responding to customers.

PRBA 296, Business Law, 3 Units
The course introduces the laws affecting business transactions. Included is an overview of the legal system as it relates to business and in-depth study of contracts, sales and commercial transactions, and secured transactions.

PRBA 300, Business Finance for Managers, 3 Units
This course provides an introduction to concepts and tools of business finance for managers. Students study financial statements and their interpretation, business performance measures, the management of cash and the short term financial needs of the organization, and how to make good capital budgeting decisions.
**Prerequisite:** PRBA 120, BBA Majors only

PRBA 305, Operations Management, 3 Units
In this course, students learn about operations and productivity, operations strategy in a global environment, project management, forecasting, design of goods and services, quality management, process strategy, location strategies, layout strategies, job design and work management, supply chain management, inventory management, aggregate planning, materials requirements planning, scheduling, lean operations, and maintenance and reliability.

PRBA 313, Introduction to Supply Chain Management and Logistics, 3 Units
This course covers the formulation and implementation of logistics and supply chain strategy for competitive advantage, including analysis of logistics capabilities, enhancement of strategy-supportive capabilities, and integration with strategically chosen supply chain partners.
**Prerequisite:** PRBA 305

PRBA 314, Supply Chain Sourcing [Proposed], 3 Units
This course introduces students to supply chain sourcing. Students learn how to build and manage supply chains including leveraging supply chains to ensure a steady flow of inputs and supplies to the organization. Course projects include managing supply chains, building alternatives for resilience, and strategic sourcing and procurement.

PRBA 315, Business System Analytics, 3 Units
This course introduces fundamental concepts and methods of business analysis (or analytics) and examines the role of managers in qualitative and quantitative analysis designed to foster efficient and effective operations of an organization. Emphasis is on understanding the tools and techniques needed for a successful manager in a global organization in the 21st century.

PRBA 317, Quality Management, 3 Units
This course introduces fundamental concepts and methods of quality management and productivity improvement, and examines the role of managers in designing and implementing programs to improve quality of products and services. Emphasis is on understanding the forces that make quality and productivity critical organizational issues. Student ability to implement quality-management tools, techniques, and processes is demonstrated.

PRBA 320, Intermediate Accounting I, 3 Units
This course offers an intensive study of the accounting theory and principles underlying financial accounting. Emphasis is placed on the theoretical and conceptual framework of the financial reporting process, including the role and authority of official accounting pronouncements and the responsibilities of professional accountants. This course begins with a review of the accounting model and covers accounting theory as it relates to revenue recognition, current assets including cash, accounts receivable, inventories, and current liabilities.
**Prerequisite:** PRBA 121

PRBA 321, Intermediate Accounting II, 3 Units
This course offers an intensive study of the accounting theory and principles underlying financial accounting. Emphasis is placed on the theoretical and conceptual framework of the financial reporting process, including the role and authority of official accounting pronouncements and the responsibilities of professional accountants. This course begins with a review of the accounting model and covers accounting theory as it relates to current assets including cash, accounts receivable, inventories, and current liabilities.
**Prerequisite:** PRBA 320
PRBA 361, Integrated Marketing Communications, 3 Units
Students explore the variety of strategic approaches organizations use in the digital age to connect with consumers and promote ideas, products, or services. Grounded in advertising and public relations communication, course material covers marketing campaigns and practices that have shaped our history, and how today’s organizations build value by using branding, storytelling, publicity, medium utilization, and data analytics to create authentic messaging for specific target audiences. Students in this course will have the opportunity to earn an Integrated Marketing Communication Expertise micro-credential badge.
Prerequisite: PRBA 260 or MKTG 260, or approval of department chair

PRBA 364, Sales and Sales Management, 3 Units
In this course, consideration is given to personal sales strategies and practices, including relationship management, negotiation, consultative selling, and key account management. The sales management function, including recruiting and selecting salespeople, motivation and training, compensation plans and quotas, supervising, sales forecasting and budgeting, salesforce evaluation, and the ethics in selling and sales management is covered.
Prerequisite: PRBA 260 or instructor consent

PRBA 368, Retail Management, 3 Units
Students explore the roles and scope of retailing business, characteristics of retailers and consumers, and strategies for managing operations. Course material emphasizes retailing characteristics and activities, multichannel opportunities, retail communication mix, consumer buying behavior, retail market strategy (including location and site strategy), product mix, store layout, merchandising, competition, pricing, and promotion. This course also introduces students to procurement and supply chain logistics, customer relationship management, operations, and employee management. Students in this course have the opportunity to earn a retail management microcredential.
Prerequisite: PRBA 260

PRBA 370, International Business, 3 Units
This course presents a survey of issues in international business, with focus on managing in an international environment, understanding the global monetary system, and developing an international perspective on business operations including production, marketing, finance, and human resources. Meets the General Education Requirement: Intercultural Competence.
Prerequisite: PRBA 210

PRBA 445, Human Resource Management, 3 Units
Students study the human factors in modern business as they are influenced by and effect labor-management interactions, personnel relations, techniques, and procedures.
Prerequisite: Acceptance into the School of Business and Management.

PRBA 448, Organization and Administrative Behavior, 3 Units
Organizational behavior is an interdisciplinary field drawing from psychology, sociology, economics, organization theory, statistics, and other areas. In this course, students gain an understanding of the field and the various research strategies involved as they examine human behavior in organizations, as well as individual, group, and organization-level processes that impact workplace behavior and organizational life. Students are exposed to organizational behavioral science theories and their applications in different management settings and types of organizations, and have an opportunity to engage in experiential and skill-building activities, apply conceptual frameworks in community settings, and develop strategies for increasing stakeholder and civic participation. Meets the General Education Requirement: Civic Knowledge and Engagement.
Prerequisite: PRBA 210

PRBA 450, Strategic Management, 3 Units
This course focuses on fundamental decisions in the life of a business: What is the business, and what should it be? What are the objectives? How are priorities set? How are strategic, long-range decisions to be handled? To grow or not to grow-and what is the right size for the business? Meets the General Education Requirement: Integrative and Applied Learning.
Prerequisite: PRBA 210, PRBA 300, and Senior Status.

PRBA 466, Digital Marketing, 3 Units
This course helps students understand the latest concepts in digital marketing to apply to organizations. Upon completion of the course, students earn two certifications from Hootsuite, a global leader in social media management - Social Media Marketing and Fundamentals (Analytics) - and students’ names are added to a global database of certified specialists.
Prerequisite: PRBA 260

PRBA 495, Writing 3: Business Ethics, 3 Units
This course focuses on the integration of Christian faith, ethical issues, and professional concerns that confront business professionals in the workplace, with particular regard to leadership and transitions. Students in this course explore biblical and moral principles as related to real-life case studies, and have the opportunity to complete in-depth study in a business-related area to further prepare them as effective participants and leaders in the workplace. Meets the General Education Requirement: Writing 3: Writing in the Disciplines.
Prerequisite: PRWR 261 and senior Standing
**PRBA 497, Readings, 1-4 Units**
This is a program of study concentrating on assigned readings, discussions, and writing arranged between, and designed, by a student of upper-division standing and a full-time professor. An independent study fee is assessed for each enrollment in this class.

**WEB 571, Web Site Design and Development, 3 Units**
This course examines fundamental principles of website design, emphasizing considerations of functionality, information architecture, and usability. The course also introduces the students to prototyping tools used to develop and communicate website designs.

**WEB 572, Emergent Information Technologies, 3 Units**
This course involves the study of technological change, especially the effects of technological change on society and commerce and how these changes and effects transpire. The course also entails a study of key technologies that are having, or may have, significant effects on society and commerce.

**WEB 573, Relational Database Technology, 3 Units**
This course presents the relational database model and explains a process for relational database design, and covers the fundamentals of relational database creation and maintenance. It also explains the use of an application development environment, such as Allaire’s Cold Fusion, to develop Web database applications.

**WEB 575, Internet Business and Strategic Management, 3 Units**
This course describes how the Internet has created demand for e-business, and how this new economic and technological shift has transformed the way in which business models are created. Major trends driving e-business are identified. E-business application architecture is reviewed. The importance of creating a customer relationship management (CRM) is emphasized. The significance of strategic management is paramount to a sustainable competitive advantage, where enterprise resource planning is being utilized. In this quickly changing environment, knowledge management becomes important to integrate technologies and solutions for organizations. Clarifying strategic objectives with the process improvement, strategic improvement, and business transformation are considered, along with elements of tactical execution options and e-project management.

LP and Timothy Leung School of Accounting

Housed within Azusa Pacific’s School of Business and Management, the LP and Timothy Leung School of Accounting focuses on developing graduates with the Christian character and competence demanded by the public accounting profession.

Vision Statement
To be a premier Christian accounting school, recognized as a thought leader on accounting character and competence to reflect the life of Christ and shine the light of Truth.

LP and Timothy Leung Scholarships
With gratitude to the Leung Endowment, students may qualify for scholarships. Additionally, students have the option to enroll in a fifth year to earn a Master of Professional Accountancy (MAcc) degree.

Specialized Credentials and Applied Learning
Students have the opportunity to earn specialized credentials, such as the IRS Enrolled Agent (EA) and the Certified Information Systems Auditor (CISA), increasing their value to potential employers. Additionally, students may join the Accounting Honors Society and participate in the Volunteer Income Tax Assistance (VITA) program, which equips students with hands-on experience as they provide income tax assistance to low-income taxpayers in the surrounding communities. Comprehensive curriculum coupled with experiential learning techniques has led to CPA exam pass rates in the top 20% of California universities.
In addition to VITA and the Accounting Honors Society, the school offers numerous student clubs and study-away opportunities. Students participating in study-away opportunities engage with topics of globalization, trade, culture, and global management and leadership as they travel the world. Typically, study-away trips include visiting global and international organizations and learning from universities and business leaders around the world. Additionally, numerous student clubs offer students the opportunity to build skills in leadership, management, decision making, and teamwork.

**Internships and Job Placement**

Accounting majors are invited to participate in the annual Meet the Firms night, hosted by the Accounting Honors Society and boasting outstanding successes. Typically, 60 accounting professionals representing 20 public accounting firms—all of the Big Four (EY, PwC, KPMG, and Deloitte), several major national (CLA, BDO) and specialty (CapinCrouse, Ron Blue) firms, and many regional and local firms (KSJG)—meet with APU students to discuss internship and job opportunities.

Accounting majors obtain paid internships with public accounting firms and in professional accounting. Job placement for accounting students also remains strong, with most CPA-track students placed prior to graduation. On the undergraduate side, our graduates are typically placed with every major accounting firm in the US, from Big Four to national and regional firms.

**Graduate Programs Offer Flexible Course Schedules**

To accommodate busy schedules, graduate classes are offered during the evening, afternoon, and online. Classes give students the opportunity to participate in real-life projects and case studies with profit, nonprofit, and governmental organizations. Students may take advantage of the multiple delivery formats to customize their education experience. Students are admitted to and can start the Master of Professional Accountancy (MAcc) program in any of the eight terms during the academic year.

**Graduate Program**

- Master of Professional Accountancy (MAcc) (p. 708)

**BA in Business Management**

60 units

Preparation for a business career requires a deep appreciation and sound understanding of the marketplace. Thus, the business management (https://www.apu.edu/business/programs/business-management-major/) major program is designed for those who seek a broad spectrum of business courses or wish to combine several fields, preparing students to pursue work and lead in a vast range of industries. This program develops competence in conceptual, human, and technical skills, and these skills—developed through a well-chosen sequence of electives—make those completing the program well prepared for employment in public and private-sector organizations.

This major equips students with the leadership, management, and analytical skills of planning, decision making, problem solving, communication, and delegation, preparing them to advance their career, achieve their goals, and help shape the future of business. Coursework in general business management and leadership includes a fundamental system of values that serves as the basis for decision making, and the program also emphasizes effectiveness and efficiency. A focus project and other experiences in project/people management give students the knowledge and skills to become leaders in a broad spectrum of industries, including how to ensure employee commitment, engagement, and satisfaction.

**Experiential Learning Opportunities**

Students have the option to acquire practical skills and experience in leadership, management, decision making, and teamwork through internships, student clubs, honor societies, and study-away opportunities. For example, in the International Business Global Colloquium, students study various aspects of international business and international differences with students from different countries, schools, and programs for a significant social/international experience.

Students participating in study-away opportunities engage with topics of globalization, trade, culture, and global management and leadership as they travel the world. Typically, study-away trips include visiting global and international organizations and learning from universities and business leaders around the world.
Numerous School of Business and Management student clubs and honor societies also provide opportunities for students to build their résumé as well as their skills in leadership, project management, teamwork, event planning, and marketing.

**Certificates, Credentials, and Microcredentials**

Today, employers are looking for new hires with technical skills and leadership abilities such as decision making and teamwork. This program gives students the opportunity to earn industry-valued, internationally recognized certificates, credentials, and microcredentials that can be added to résumés and uploaded to online portfolios, certifying and showcasing their mastery of these skills to potential employers.

**Career Opportunities**

Good managers and leaders are in demand with global, international, and national organizations, and our students are prepared upon graduation for first-line management positions such as supervisor and team or shift leader. This program also prepares and equips students for staff specialist or general administration positions. Students may enter into a wide range of industries, including retail and sales, commercial banking, real estate, savings and loan associations, entertainment, supply chain management, logistics, and more. Some graduates begin new ventures, operate small businesses, develop new products, or return to the family business.

**Requirements**

The Bachelor of Arts in Business Management comprises 60 units. Students must achieve an average GPA of 2.5 or higher in their major courses (including the Business Core).

1. Meets the General Education Quantitative Literacy requirement.
2. Meets the General Education Intercultural Competence requirement.
3. Meets the General Education Social Sciences requirement.
4. Meets the General Education Civic Knowledge and Engagement requirement.
5. Meets the General Education Integrative and Applied Learning requirement.

Program Learning Outcomes

Students who successfully complete this program shall be able to:
1. Demonstrate competency in multiple business disciplines.
2. Apply critical thinking to solve business problems.
3. Evaluate business decisions based on a Christian perspective.
4. Communicate ideas through professional channels.
5. Be contributing team members.
6. Identify cultural aspects of business in diverse environments.

BA in Digital Marketing and Design

63 units

The BA in Digital Marketing and Design program is for students interested in learning how to apply their creativity in the digital market space. With a focus on digital marketing strategy and social media marketing, this program gives students an innovative and relevant skill set for branding, influencer marketing, and brand journalism.

Students in this program are equipped to create a digital marketing strategic plan and manage digital marketing tools and channels, including the implementation of specific targeted marketing campaigns that promote business services, products, and corporate brand journalism. Students learn how to apply strategically aligned marketing communications to prosumers in order to leverage an organization’s brand for the expansion of customer acquisition, conversion, and value growth potential, ultimately increasing sales and brand recognition.

Students in this program have the opportunity to earn industry-valued, internationally recognized certificates and microcredentials, either during the core courses or upon completion of the program, that certify their mastery of digital communication management and marketing analytics skills or abilities. These certificates in social media marketing and business analytics come from an independent third-party firm that specializes in social media and platform management, and can be added to résumés and uploaded to online portfolios, showcasing these skills to potential employers.

Coursework engages students in creating a comprehensive strategic digital marketing plan, including developing appropriate marketing strategies and objectives and conducting a marketing audit to ensure successful implementation. Digital marketing tools are integrated and developed—including email marketing campaigns, website design analysis, SEO, content marketing strategies, social media marketing, and building online community life cycles—that are appropriate and applicable to an organization’s vision and mission. Complementary topics in advertising, promotion, graphics, web design, and SEO, and student participation in internship experiences, help build the student skill set and résumé for immediate employment in several marketing-related and design industries.

Today’s employers are seeking educated marketers who can create and manage corporate brands and communications designed to foster a consistent organizational image and promote customer loyalty. Students in this program are equipped with the necessary practical skills to become professional marketers for various types of businesses, nonprofits, and church-led organizations.

Experiential Learning Opportunities

In teams, students complete a social media campaign and a marketing plan for a real organization. Students can build their résumés through internships and have the option to participate in numerous student clubs and honor societies that provide confidence and skill-building opportunities in leadership, team building, social media, event planning, promotion, and marketing supervisory or management positions.

Students have the option to acquire practical skills and experience in leadership, management, decision making, and teamwork through internships, student clubs, honor societies, and study-away opportunities. Students participating in study-away opportunities engage with topics of globalization, trade, culture, and global management and leadership as they travel the world. Typically, study-away trips include visiting global and international organizations and learning from universities and business leaders around the world.
Career Opportunities

Professionals who can leverage the power of digital marketing are in high demand. Career paths open to marketing majors include marketing coordinator/specialist, marketing project manager, social media specialist/manager, account coordinator/executive manager, product/brand manager, digital marketing specialist/manager, social media marketing manager, creative assistant, web content writer/manager, sales representative/manager, marketing manager, advertising and promotion manager, media planner/buyer, retail marketer, marketing analytics specialist, and marketing communications coordinator. Income potential and personal fulfillment are high. Marketing professionals who excel can become top executives.

Program Learning Outcomes

Program Learning Outcomes

Students who successfully complete this program shall be able to:
1. Examine the full spectrum of digital marketing concepts and practices, including advertising, promotion, and design concepts.
2. Apply key marketing processes, including digital marketing concepts, and graphic design.
3. Create digital marketing plans that appeal to a diverse and global population.
5. Develop design strategies for digital marketing campaigns.
6. Evaluate digital marketing practices to ensure compliance with relevant laws and regulations.
7. Incorporate ethical practice into all aspects of digital marketing management.

BA in Human Resources and Organizational Development

57 units

The BA in Human Resources and Organizational Development (https://www.apu.edu/business/programs/human-resources-organizational-development-major/) program provides the conceptual knowledge and practical skills for career placement and job advancement in the expanding field of human resources, including the areas of employee life cycle, training and development, and the growing HR generalist field.

This program equips students with all of the necessary foundational knowledge that a human resources professional must have, including best practices and strategies necessary for today’s workplace. Students learn the complexities of managing the benefits and policies of an organization, designing employee development and delivering training, and managing employee relations. This interdisciplinary program prepares students with the organizational theory, ethics, and business management skills to become expert problem solvers in today’s HR climate.

Experiential Learning Opportunities

Students in this program build their résumés and portfolios through applied projects, such as designing a training workshop, writing job descriptions, and creating employee development plans. Students also have the option to acquire practical skills and experience in leadership, project management, decision making, and teamwork through internships, student clubs, and honor societies.

This program also offers students the chance to participate in study-away programs, where they engage with topics of globalization, trade, culture, and global management and leadership as they travel the world. Typically, study-away trips include visiting global and international organizations and learning from universities and business leaders around the world.

Certificates, Credentials, and Microcredentials

Today, employers are looking for professionals with technical skills and leadership abilities, and students in this major are prepared to earn industry-valued, internationally recognized certificates, credentials, and microcredentials, such as the Professional in Human Resources certification and the Workplace Ethics Badge, validating their ability to motivate and manage talent and distinguishing them in the HR field. These certifications can be added to résumés and uploaded to online portfolios, showcasing these skills to potential employers.

Career Opportunities

Different areas of the HR field consistently rank high on lists of best careers. Income potential and personal fulfillment are high. Career paths open to human resources majors include HR coordinator/assistant, recruiter/talent acquisition, training and development coordinator, payroll specialist, HR manager, compensation analyst, benefits manager, labor relations manager, human resources generalist, and HR business partner. Human resources professionals who excel can become top executives.

2. Apply key HR processes, including talent management, total rewards, performance management, learning and development, employee relations, and HR analytics.
3. Create plans to recruit, hire, train, retain, and motivate a diverse and global workforce.
4. Benchmark salaries and design effective compensation strategies.
5. Develop strategies for reducing corporate risk and liability through effective HR practices.
6. Incorporate diversity and inclusion practice into all aspects of HR management.
7. Evaluate HR practices to ensure compliance with relevant laws and regulations.
8. Design effective HR and training and development strategies that strengthen organizations.
9. Incorporate ethical practice into all aspects of HR management.

Bachelor of Business Administration (BBA) (Bachelor’s Completion Program)

57 units

Today's business leaders must be agile and able to adapt to a rapidly changing business world while leading employees by modeling character, integrity, and compassion. Azusa Pacific's Bachelor of Business Administration (BBA) (https://www.apu.edu/business/programs/bba-degree/) bachelor’s completion program equips students with the leadership and analytical skills needed to advance their career, achieve their goals, and help shape the future of business.
Designed for working professionals with at least 15 units of transferable college credit, the BBA program allows immediate application of learning in the workplace. Relevant coursework addresses current issues in business and encourages the integration of real-world work experiences and hands-on projects. Students combine these experiences with internships or international study opportunities to further expand their portfolio and network.

Throughout the program, students build on existing experience while gaining a strong foundation in strategic management, finance, marketing, accounting, and more.

**Highlights**

- Designed for working professionals, the BBA degree completion program equips students with the leadership and analytical skills needed to lead change in today's business world.
- Relevant coursework and real-world projects guided by faculty with business experience allow students to immediately apply learning at work.
- Focused certificates and credentials provide in-demand skills, know-how, and experience and verify students' skills and abilities to current and future employers.
- Learn from Fulbright Scholars and world-renowned professors with industry experience.
- Flexible course scheduling allows students to advance their academic and professional goals at their own pace.

**Certificates, Credentials, and Microcredentials**

Today, employers are looking for new hires with technical skills and leadership abilities such as decision making and teamwork. In the BBA program, students have the opportunity to earn industry-valued, internationally recognized certificates and microcredentials that can be added to résumés and uploaded to online portfolios, showcasing these skills and abilities to current and future employers.

**Requirements**

The Bachelor of Business Administration degree completion program requires 120 total units, including General Education units and 57 units of core business courses (BBA students may also add an optional 9-unit concentration).

6. Meets the General Education Writing 3 requirement.

**Program Learning Outcomes**

**Program Learning Outcomes**

Students who successfully complete this program shall be able to:

1. Business Knowledge: Apply business knowledge from multiple business disciplines to plan, design, and execute business strategies.
2. Critical Thinking: Identify and solve business problems using analytical and critical thinking skills.
3. Quantitative Reasoning: Analyze quantitative data to address real-world or discipline-specific business problems.
5. Written Communication: Convey ideas clearly and effectively through professional written communication.
6. Oral Communication: Communicate in informative or persuasive ways using the appropriate genre, channel, structure, and style.
7. Collaborative Teamwork: Effectively participate in business-focused teams as members and leaders in diverse environments.
8. Global/Multicultural Awareness: Identify and respond to cultural, economic, and political aspects of business in multicultural and global environments, informed by biblically based ethics.
10. Discipline Problem Solving: Solve core business problems and effectively analyze and address business situations.

**BS in Business Analytics**

66 units

The Bachelor of Science in Business Analytics (https://www.apu.edu/business/programs/business-analytics-major/) is for students interested in developing expertise in data science and data analytics with specialization in the field of business. This program gives students a foundation in business and business management, and they are able to customize their degree by selecting a concentration in accounting, economics, finance, or marketing.
Utilizing methods and systems to extract information or knowledge from large quantities of data that come in various forms, students learn to synthesize broad perspectives, knowledge, skills, and interconnections in business. Coursework gives students the opportunity to use big data and historical data to develop models that help organizations make data-driven decisions.

This program equips students to solve complex problems and offer practical conclusions based on real business data, as they learn to utilize models, theories, and techniques drawn from the broad areas of mathematics, business and management sciences, and management information systems. Students learn to analyze large quantities of data and discover value-oriented insights, becoming data-driven decision makers in their organizations. Information is applied to a wide range of data-rich business domains such as accounting, economics, finance, marketing, human resource management, and supply chain management.

**Experiential Learning Opportunities**

Students in this program acquire practical skills and experience in business analytics, building their portfolios and résumés through applied projects. Coursework includes opportunities for hands-on application with big data manipulation and analysis, system management, and data visualization, including multiple strategies to produce and leverage data-driven decision making.

Students may also participate in internships, student clubs, honor societies, and study-away opportunities. Students participating in study-away programs engage with topics of globalization, trade, culture, and global management and leadership as they travel the world. Typically, study-away trips include visiting global and international organizations and learning from universities and business leaders around the world.

**Certificates, Credentials, and Microcredentials**

Today, employers are looking for new hires with technical skills in big data and data analytics. This program gives students the opportunity to earn industry-valued, internationally recognized certificates, credentials, and microcredentials, such as in spreadsheets, data visualization, business analytics, and much more, that can be added to résumés and uploaded to online portfolios, certifying and showcasing their mastery of these skills to potential employers.

**Career Opportunities**

BS in Business Analytics students are equipped to pursue professional careers in industry, as demand for data analysts, data scientists, and data engineers in job markets across all industries is high and supply is low. The U.S. Bureau of Labor Statistics sees strong growth in the data science field and predicts that the number of jobs will increase by about 28% through 2026, which is equivalent to approximately 11.5 million new jobs in the field.

The median annual wage for management analysts was $93,000 as of May 2021. And about 41,000 openings for financial analysts are projected each year, on average, over the decade.

5. Meets the General Education Integrative and Applied Learning requirement.

### Program Learning Outcomes

Students who successfully complete this program shall be able to:

1. Describe business issues which require business analytics' skills and methods.
2. Transform large quantities of real-life data from a wide range of domains to resolve issues.
3. Apply appropriate analytical methods (descriptive, diagnostic, predictive, and prescriptive analytics) to find solutions to business problems.
4. Explain the results of analytical activities clearly and concisely using oral, written, or electronic media.
5. Describe the ethical and legal issues involved with collecting, storing, and using big data from a Christian perspective.

### BS in Business: Accounting

70 units

The accounting major (https://www.apu.edu/business/programs/accounting-major/) surveys the principles, theories, and concepts of the accounting profession while providing an intense review of the economic, quantitative, and managerial aspects of business. Its practical component leads to work assignments in international, national, and local certified public accountant (CPA) firms in students’ junior and senior years. The combination of classroom theory and real-world experience also prepares candidates for the CPA examination administered by the various state boards of accountancy in the United States.

### Highlights

- CPA exam pass rates in the top 20% of California universities.
- Scholarships allow students to earn a Christian accounting education at a state school price.
- Specialized credentials, such as Enrolled Agent and Certified Internal Systems Analyst, are now available.
- Graduates are placed with every major accounting firm in the U.S., from Big Four to national and regional firms.
• Students are able to earn a Master of Professional Accountancy (MAcc) in one additional year.
• 100% of our MAcc students have paid professional internships.
• 100% job placement rate of our MAcc students in CPA firms by graduation.

LP and Timothy Leung Scholarships
With gratitude to the Leung Endowment, students may qualify for scholarships over four years. Additionally, students have the option to participate in a fifth-year Master of Professional Accountancy.

Specialized Credentials
Students have the opportunity to earn specialized credentials, such as the IRS Enrolled Agent (EA) and the Certified Information Systems Auditor (CISA), increasing their value to potential employers. Additionally, students have the options of joining the Accounting Honors Society and participating in the Volunteer Income Tax Assistance (VITA) program at APU. The VITA project equips students with hands-on experience as they provide income tax assistance to low-income taxpayers in the surrounding communities.

Experiential and Applied Learning
In addition to VITA, the school offers numerous student clubs, honor societies, and study-away opportunities. Students participating in study-away opportunities engage with topics of globalization, trade, culture, and global management and leadership as they travel the world. Typically, study-away trips include visiting global and international organizations and learning from universities and business leaders around the world. Student clubs provide the opportunity for students to build skills in leadership, management, decision making, and teamwork.

Internships and Job Placement
Accounting majors are invited to participate in the annual Meet the Firms night. This event, hosted by the Accounting Honor Society, boasts outstanding successes. Typically, 60 accounting professionals representing 20 public accounting firms meet with APU students, along with students visiting from other universities. All of the Big Four (EY, PwC, KPMG, and Deloitte), several major national firms (CLA, BDO) and specialty firms (CapinCrouse, Ron Blue), and many regional and local firms (KSJG) attend Meet the Firms.

Accounting majors obtain paid internships with public accounting firms or in professional accounting. Job placement for accounting students also remains strong, with most CPA-track students placed prior to graduation.

Career Opportunities
Opportunities available to graduates include professional careers in accounting services, auditing, management advising services, and accounting departments in private firms and government bodies such as law enforcement agencies.

Requirements
The accounting major comprises 70 units. Students must achieve an average GPA of 2.5 or higher in their major courses (this includes the Business Core).

**Program Learning Outcomes**

**Program Learning Outcomes**

Students who successfully complete this program shall be able to:
1. Demonstrate competency in multiple business disciplines.
2. Apply critical thinking to solve business problems.
3. Evaluate business decisions based on a Christian perspective.
4. Communicate ideas through professional channels.
5. Be contributing team members.
6. Identify cultural aspects of business in diverse environments.

**BS in Business: Economics**

66 units

The business economics major (https://www.apu.edu/business/programs/business-economics-major/) equips students with analytical skills built on a strong general business foundation. This major focuses on business management responsibilities and the improvement in business decision making that comes from a deeper understanding of the economic environment of business, including labor, environmental, and international issues. Students become grounded in economic theory and practical applications.

**Experiential Learning Opportunities**

The School of Business and Management offers students numerous experiential learning opportunities, such as student clubs, honor societies, and study away trips. Students participating in study-away opportunities engage with topics of globalization, trade, culture, and global management and leadership as they travel the world. Typically, study-away trips include visiting global and international organizations and learning from universities and business leaders around the world. Faculty-led student clubs and honor societies offer students the opportunity to build skills in leadership, project management, decision making, and teamwork.
Career Opportunities

Business economics careers may be found throughout the field of business, including financial analysis and forecasting, banking, labor organizations, and international trade. Individuals in possession of strong analytical skills are in high demand.

Requirements

The Bachelor of Science in Business: Economics comprises 66 units. Students must achieve an average GPA of 2.5 or higher in their major courses (this includes the Business Core).

Program Learning Outcomes

Students who successfully complete this program shall be able to:

1. Competent Business Knowledge: Demonstrate knowledge in multiple business disciplines, including management, finance, marketing, accounting and economics.
2. Critical Thinking: Identify and solve business problems using analytical and critical thinking skills.
3. Christian Business Ethics: Demonstrate the ability to evaluate business decisions based on a Christian perspective.
4. Written Communication: Convey ideas clearly through professional written communication.
5. Oral Communication: Express ideas effectively through professional oral presentations.
6. Collaborative Teamwork: Demonstrate the ability to function as an effective business team member.
8. Discipline Knowledge: Demonstrate knowledge of economic concepts.
9. Discipline Problem Solving/Strategy: Solve core economic problems, or analyze economic situations and provide strategy for effectiveness.

BS in Business: Entrepreneurship

The entrepreneurship major (https://www.apu.edu/business/programs/entrepreneurship-major/) focuses on the creation of social and economic value and is designed to prepare students for the intricacies of planning, launching, and leading a new business. With a focus on creativity and innovation, new venture planning, and marketing, students are equipped with the skills necessary to start and grow a business.

Entrepreneurship students learn how to shape entrepreneurial opportunities and assess market feasibility. The entrepreneurship major includes working in teams, constructing business models, communicating with partners and customers, and assessing feasibility while launching a new venture or initiative.

Today, new business opportunities have encouraged entrepreneurship on a global scale. Coursework equips students to create, organize, and manage a business, including ideation and innovation, negotiation, and business management. Students also learn how to lead people and projects.

Experiential Learning Opportunities

Entrepreneurship majors apply their knowledge and skills in academic and real-world settings. They also have the option to participate in student clubs and competitions, such as ENACTUS, that provide skill-building opportunities in leadership, teamwork, and decision making. Guided by faculty, teams of students conduct needs assessments in local communities, identify potential solutions, and implement community impact projects.

Surrounding communities benefit from collaboration and fresh innovation, and students gain valuable experience to advance their entrepreneurship résumés. Throughout the years, APU-sponsored teams have a track record of successful placement in ENACTUS competitions.

In addition to ENACTUS, the School of Business and Management offers numerous student clubs, honor societies, and study-away opportunities. Students participating in study-away programs engage with topics of globalization, trade, culture, and global management and leadership as they travel the world. Typically, study-away trips include visiting global and international organizations and learning from universities and business leaders around the world.

Certificates, Credentials, and Microcredentials

Today, employers are looking for new hires with technical skills and also leadership abilities such as decision making and teamwork. This program gives students the opportunity to earn industry-valued, internationally recognized certificates, credentials, and microcredentials that can be added to résumés and uploaded to online portfolios, certifying and showcasing their mastery of these skills and abilities to potential employers.
Career Opportunities

The skills and competencies gained in this program are vital for the success of any business or organization, including early-stage startups, corporations, family businesses, nonprofits, franchises, and other settings. Graduates can start new businesses, buy existing ventures, or go into entrepreneurial positions in profit or not-for-profit ventures. Other career options include intrapreneurship (innovation in large organizations), venture capital, and social entrepreneurship.

Requirements

The entrepreneurship major comprises 63 units. Students must achieve an average GPA of 2.5 or higher in their major courses (this includes the Business Core).

OS Offered in Spring in odd years
Program Learning Outcomes

Students who successfully complete this program shall be able to:

1. Business Knowledge: Apply business knowledge from multiple business disciplines to plan, design, and execute business strategies.
2. Critical Thinking: Identify and solve business problems using analytical and critical thinking skills.
3. Quantitative Reasoning: Analyze quantitative data to address real-world or discipline-specific business problems.
5. Written Communication: Convey ideas clearly and effectively through professional written communication.
6. Oral Communication: Communicate in informative or persuasive ways using the appropriate genre, channel, structure, and style.
7. Collaborative Teamwork: Effectively participate in business-focused teams as members and leaders in diverse environments.
8. Global/Multicultural Awareness: Identify and respond to cultural, economic, and political aspects of business in multicultural and global environments, informed by biblically based ethics.
10. Discipline Problem Solving: Solve core business problems and effectively analyze and address business situations.

BS in Business: Finance

66 units

The finance major is designed for students interested in the stewardship of the financial resources of individuals, corporations, or financial institutions. As future managers, students learn the principles and applications of financial analysis, management, and strategy, and gain experience in portfolio construction; applications of derivatives in financial management, asset management, and international financial management; and case studies in corporate finance.

This program equips students with the theoretical understanding and practical skills necessary to evaluate and direct decisions regarding the allocation of financial resources among a variety of competing opportunities, with the goal of maximizing the value of the resources managed.

Experiential Learning Opportunities

As a business club hosted by Azusa Pacific University’s School of Business and Management and led by a faculty advisor and a board of finance professionals, the Student Investment Fund (SIF) involves the practical application of classroom knowledge. Students practice hands-on investment strategies and are engaged to manage a portion of the university endowment through fundamental valuation.

Students joining SIF have the opportunity to compete in the CFA Institute Research Challenge, a competition between university-sponsored teams that research a designated publicly traded company, prepare a written report on that company, and present their findings. SIF and the CFA competition provide students with hands-on training and mentoring in financial analysis.

Credentials and Microcredentials

In this program, students have the opportunity to earn microcredential badges certifying their mastery of certain skills or abilities and showcasing them to future employers. Microcredentials can be added to résumés and uploaded to online portfolios.

In addition, the Seminar in Finance course (FIN 439) provides students the opportunity to earn the Securities Industry Essentials (SIE) Certification, one of the FINRA qualification exams.

Career Opportunities

This program prepares students for employment in a variety of fields, such as corporate financial management, investment analysis and planning, financial institution management, and risk management. According to the Occupational Outlook Handbook, such occupations are expected to experience strong rates of growth. Moreover, these occupations generally offer attractive starting salaries and working conditions.

To complete the finance major in four years, students are encouraged to complete FIN 300 by the end of their sophomore year.

Requirements

The finance major comprises 66 units. Students must achieve an average GPA of 2.5 or higher in their major courses (this includes the Business Core).

BS in Business: International Business

60 units

The international business major (https://www.apu.edu/business/programs/international-business-major/) gives students a strong general business foundation followed by courses preparing them for careers in global business and international commerce. The program incorporates a global collaborative approach to the study of business, international management, strategic positioning, international trade, and politics as it prepares students to work in a dynamic and interdependent global business environment.

Students explore various ethical, cultural, legal, and other differences that exist in international business and consider their individual and leadership responsibilities and actions. International business majors think through the various urgent challenges that face business environments today, including sustainability, climate change, energy and technological shifts, political and economic shifts, and all forms of equity.

Students also acquire practical skills and experience through study-away opportunities, internships, foreign language study, and the opportunity to work with university students around the world in global colloquium case-study projects.

Experiential Learning Opportunities

The International Business Global Colloquium gives APU students the opportunity to study various aspects of international business and international differences with students from different countries, schools, and programs for a significant social/international experience.

Study-away opportunities expose students to topics of globalization, trade, culture, and global management and leadership as they travel the world. Typically, these trips include visiting global and international organizations and learning from universities and business leaders around the world. Additionally, numerous student clubs and honor societies offer students the chance to build skills in leadership, project management, decision making, and teamwork.

Certificates, Credentials, and Microcredentials

Today, employers are looking for new hires with technical skills and leadership abilities such as decision making and teamwork. This program gives students the opportunity to earn industry-valued, internationally recognized certificates, credentials, and microcredentials, such as the Intercultural Competence Badge, that can be added to résumés and uploaded to online portfolios, certifying and showcasing their mastery of these skills to potential employers.

Career Opportunities

International business careers may be found with multinational corporations, foreign companies, banks, international investments, export/import trade, international law, international nonprofit organizations, world missions, and public/foreign service. Some of these exist in expatriate opportunities and some through various other logistics and extensions. Individuals graduate from this program with significant international experience after practicing management and leadership skills abroad and collaborating with students from all over the world, and find themselves in high demand in today’s global marketplace.

Requirements

The international business major comprises 60 units. Students must achieve an average GPA of 2.5 or higher in their major courses (including the Business Core).

BS in Business: Marketing

63 units

The marketing major (https://www.apu.edu/business/programs/marketing-major/) equips students with solid functional skills in business and strong marketing skills that emphasize a dynamic synergy built upon traditional marketing components with innovative digital and social media marketing. These skills can be used to obtain an internship and secure many types of marketing-related opportunities in industry, positioning them to be influencers in the digital market space.

Students in this program are equipped to create and manage all aspects of an organization, encompassing a hybrid blending of traditional and digital marketing. A comprehensive view of strategic planning for an organization to the implementation of the expanded marketing mix and campaigns to promote business services, products, and brands is demonstrated from student engagement. Corporate brand identity, customer acquisition, conversion, and retention are fulfilled through integrated marketing communications and targeted campaigns. Students may earn certificates demonstrating their proficiency in social media marketing and analytics.

Coursework engages students in learning about consumer behavior, integrated marketing communications, digital marketing, and web design, and offers choices of additional marketing courses that are appealing (sales and sales management, retailing, global marketing management, marketing research). The capstone course, Strategic Marketing Management, is a hands-on course in which students analyze case studies and determine the best course for sustainable strategic competitive advantage. Hands-on projects and community outreach are emphasized throughout the program.

Today’s employers are seeking educated marketers who can create and manage corporate brands and communications designed to foster a consistent organizational image and promote customer loyalty. Students are equipped with the necessary practical skills to become professional marketers for various types of businesses, nonprofits, and church-led organizations.
Experiential Learning Opportunities

In teams, students complete a social media campaign and a marketing plan for a real organization. Students build their résumés through internships and have the option to participate in numerous student clubs that provide opportunities for marketing supervisory or management positions as well as confidence and skill-building opportunities in leadership, team building, project management, decision making, social media, event planning, and promotion.

Students may also participate in various study-away opportunities. Students participating in study-away opportunities engage with topics of globalization, trade, culture, and global management and leadership as they travel the world. Typically, study-away trips include visiting global and international organizations and learning from universities and business leaders around the world.

Certificates, Credentials, and Microcredentials

The marketing major allows students to earn industry-valued, internationally recognized certificates in social media management and analytics, as well as microcredentials in social media, social media marketing management, and sales management, all of which can be added to résumés and uploaded to online portfolios, certifying and showcasing their mastery of these skills to potential employers.

Career Opportunities

Career paths open to marketing majors include marketing coordinator/specialist, marketing project manager, account coordinator/executive manager, product/brand manager, digital marketing specialist/manager, social media marketing manager, creative assistant, web content writer/manager, sales representative/manager, marketing researcher/analyst, marketing manager, advertising and promotion manager, media planner/buyer, retail marketer, marketing analytics specialist, and marketing communications coordinator. Income potential and personal fulfillment are high. Marketing professionals who excel can become top executives.

Requirements

The marketing major comprises 63 units. Students must achieve an average GPA of 2.5 or higher in their major courses (this includes the Business Core).

Program Learning Outcomes

Program Learning Outcomes

Students who successfully complete this program shall be able to:
1. Deliver innovative solutions to complex leadership and organizational challenges.
2. Construct organization development interventions using experience-based models and simulations.
3. Prepare consulting reports and professional recommendations for organizational initiatives around change, leadership, and strategy.

Certificate in Data Analysis and Visualization

Certificate in Data Analysis and Visualization

12 units

Businesses today need informed leaders who can guide decision making by analyzing large amounts of data. The Certificate in Data Analysis and Visualization is for current students who want a specialization and working professionals who want to grow in their field or change career paths.

Certificates help students validate their skills and ability, give them increased marketability and earning power, and verify competence to employers. Certificate programs also provide the knowledge you need to in order to transform your career in less time than many traditional postgraduate and professional degree programs, and do not require any prerequisite work.

The Certificate in Data Analysis and Visualization offers an in-depth study developed by industry experts and balances theory and real-world practice. Coursework focuses on the necessary skills for collecting, formatting, and analyzing an organization’s data, and students learn to manage big data and perform business analytics in order to produce useful information to guide an organization’s decision making.

Credentials and Microcredentials

Today, employers are looking for new hires with technical skills in big data and data analytics. Credentials and microcredentials show potential employers that students have the technical skill needed for today’s workplace. This certificate program gives students the opportunity to earn credentials and microcredentials certifying their mastery of certain skills or abilities.

Students have the opportunity to earn microcredentials in spreadsheets, data visualization, and business analytics. Industry-valued certificates and credentials provide students the opportunity to showcase their skills and abilities to current and future employers. Credentials and microcredentials can be added to résumés and uploaded to online portfolios.

Career Opportunities

Job growth for professionals proficient in business analytics is projected to continue rising. This high-stakes field also commands high salaries. Data analysis and visualization is applicable to a wide variety of jobs, so whether you want to launch a new career or advance to the next level of your current path, a certificate program can get you there.

3. Discuss the importance of ethics in data management, information technology, and statistics, considering a Christian Worldview.
Certificate in Digital Marketing and Social Media

12 units

Certificates are designed for current students who want a specialization, and for working professionals who want to grow in their field or change career paths. Certificates are great résumé builders, provide increased marketability, verify competence to potential employers, and provide practical learning that can be translated directly into workplace application. Certificate programs also provide the knowledge you need to in order to transform your career in less time than many traditional postgraduate and professional degree programs, and do not require any prerequisite work.

The Certificate in Digital Marketing and Social Media provides a foundation of marketing principles and consumer behavior with emphasis on digital and social media marketing. Coursework helps students develop the skills necessary to create and manage digital advertising and social media campaigns and measure their results. Students also learn to create and build a social media presence through brand identity and engaging content communication.

Credentials and Microcredentials

Today, employers are looking for new hires with technical skills in digital marketing and social media. This certificate program gives students the opportunity to earn industry-valued, internationally recognized credentials and microcredentials such as HootSuite, Google Digital Garage, and Sales Force that can be added to résumés and uploaded to online portfolios, certifying and showcasing their mastery of these skills and abilities to potential employers.

Career Opportunities

Job growth for digital marketing and social media professionals is projected to continue rising, so this high-stakes field also commands high salaries. This certificate prepares students for a wide variety of these jobs, so whether you want to launch a new career or advance to the next level of your current path, this program can get you there.

3. Assess individuals and teams using interventions for group dynamics, personality, personal and group values, and internal motivations.
4. Recommend quality solutions for real world HR problems.

---

## Certificate in Government Budgeting

12 units

The Certificate in Government Budgeting is a post-bachelor’s program that equips working professionals who desire to deepen their expertise in financial management in nonprofit and government organizations. With the help of this program, students can become Certified Government Financial Managers (CGFMs), a respected credential that recognizes the specialized knowledge and experience needed to be an effective government financial manager. Students in this program grow as ethical leaders and financial managers, and have the opportunity to prepare for their CGFM certification, demonstrating competency in governmental accounting, auditing, financial reporting, internal controls, and budgeting at the federal, state, and local levels.

**Program Learning Outcomes**

Students who successfully complete this program shall be able to:

1. Apply financial management principles and procedures to nonprofit and government organizations.
2. Use analytic tools to analyze financial information, prepare and manage budgets, and ensure the financial accountability of public organizations.
3. Examine the unique financial challenges and opportunities in public sector financial management.
4. Develop personal ethical principles to guide financial decision-making.

---

## Certificate in Leadership Development

12 units
The Certificate in Leadership Development focuses on the personal character of the leader and how to develop themself and others. Students engage with approaches to executive coaching and gain insight into the past, present, and future landscape of leadership thought. This program is unique because it looks at leadership through the lens of emotional intelligence, which research shows is a cornerstone leadership trait. Students are equipped with practical tools to lead themselves and others forward. This certificate pairs well with any professional background, providing students with the life and leadership skills necessary to become influential agents of change in all kinds of organizations and personal relationships.

### Program Learning Outcomes

Students who successfully complete this program shall be able to:

1. Explore the practical relationship between personality, motivation, personal values, and leadership development.
2. Identify the skills needed to guide high potential talent toward leadership development and success.
3. Articulate the behaviors and skills of emotional intelligence and its impact on organizational relationships.
4. Gain understanding of the historical roots of the study of leadership and its impact on leadership development into the future.

### Certificate in Project Management

12 units

Certificates are designed for current students who want a specialization, and for working professionals who want to grow in their field or change career paths. Certificates are great résumé builders, provide increased marketability, verify competence to potential employers, and provide practical learning that can be translated directly into workplace application. Certificate programs also provide the knowledge you need in order to transform your career in less time than many traditional postgraduate and professional degree programs, and do not require any prerequisite work.

In the project management certificate program, students learn to effectively manage projects across a range of industries and disciplines. Through a series of courses, students will learn about the key principles and practices of project management, including project planning, scheduling, budgeting, risk management, and quality assurance. Students will also have the opportunity to apply these concepts to real-world projects, gaining hands-on experience and developing critical thinking and problem-solving skills.

¹ Meets the Integrative and Applied Learning General Education requirement.

### Certificate in Supply Chain and Logistics

12 units

Certificates validate skills and provide individuals with increased marketability and potential earning power. The Certificate in Supply Chain and Logistics is a professional undergraduate program for current students and working professionals who want to grow in their field or change career paths.
Businesses today need resourceful leaders to manage the procurement and delivery of products in an increasingly complex global economy. Students in this program gain the skills necessary to manage an organization’s global supply chain, engaging in an in-depth study developed by industry experts that balances theory and real-world practice. Emphasis is on procurement, logistics and distribution, quality control, and analytical decision making.

Providing the knowledge you need in order to transform your career in less time than many traditional postgraduate and professional degrees, this certificate does not have any prerequisite work required.

**Credentials and Microcredentials**

Today, employers are looking for new hires with technical skills in supply chain and logistics. This certificate program gives students the opportunity to earn industry-valued, internationally recognized credentials and microcredentials in project management, Six Sigma, Lean, quality management, logistics, and business analytics that can be added to résumés and uploaded to online portfolios, certifying and showcasing their mastery of these skills and abilities to potential employers.

**Career Opportunities**

Job growth for supply chain and logistics professionals is projected to continue rising, so this high-stakes field also commands high salaries—the median annual salary for transportation, storage, and distribution managers in the United States is more than $100,000. Supply chain management encompasses a wide variety of jobs, so whether you want to launch a new career or advance to the next level of your current path, this program can get you there.

**MA in Leadership**

The Master of Arts in Leadership (https://www.apu.edu/bas/programs/masters-in-leadership/) (available face to face and online) is an interdisciplinary degree that equips leaders with skills and tools that can be applied across a variety of vocations and fields. With a focus on character, creativity, curiosity, and innovation grounded in a framework of Christian values, you will explore what being a leader means to you, and how you can hone your skills to help others thrive.

Throughout the program, you will:

1. Discover various dimensions of leadership character as it pertains to the individual, team, and enterprise.
2. Design strategic leadership initiatives through curiosity, inquiry, and experimentation.
3. Develop relevant skills and tools needed to lead a changing leadership landscape with creativity and agility.
4. Deliver innovative solutions to complex leadership and organizational challenges.

**Experiential Learning Opportunities**

Experiential learning opportunities are integrated throughout the program, allowing students to immediately apply knowledge. Applied and experiential learning equips students with a deeper understanding of design thinking. Students use LEGO® SERIOUS PLAY® to understand organizational change structures and gain firsthand experience working with companies.

**Requirements**

Students pursuing the MA in Leadership must complete 30 units of coursework, as well as present their final design project during a Designer Symposium (a TEDx-style night of presentations). Up to 6 units of appropriate coursework may be transferred into the program by petition.

Admission

University graduate admission and program-specific requirements must be met before an application is complete (see Admission to the University (p. 1092)). Program-specific application requirements are available online (https://tracking.cirrusinsight.com/74647a2d-e9a2-412f-9b55-9959c7ac4ec/apu-edu-graduateprofessionalcenter-admissions-requirements-program/).

International students should contact Graduate and Professional Admissions (https://www.apu.edu/graduateprofessionalcenter/admissions/) for application procedures.

Program Learning Outcomes

Program Learning Outcomes

Students who successfully complete this program shall be able to:

1. Discover various dimensions of leadership character as it pertains to the individual, team, and enterprise.
2. Design strategic leadership initiatives through curiosity, inquiry, and experimentation.
3. Develop relevant skills and tools needed to lead a changing leadership landscape with creativity and agility.
4. Deliver innovative solutions to complex leadership and organizational challenges.

MS in Organizational Psychology

The Master of Science in Organizational Psychology (https://www.apu.edu/business/programs/masters-in-organizational-psychology/) degree program prepares students to become effective organizational consultants (either internal or external to an organization). At the intersection of business and psychology, our blended learning experiences combine theoretical grounding and practical application. Students in this program demonstrate the ability to solve complex organizational challenges through assessment, data-driven decision making, and other organizational effectiveness tools. Innovative curriculum produces scholar-practitioners who are competent and confident working in organizations to create a people strategy that aligns with the business strategy.

The expanding field of organizational psychology, sometimes referred to as industrial-organizational psychology, or the study of people’s attitudes, feelings, and behaviors in the workplace, calls for individuals prepared to help organizations and businesses flourish. You can complete the MS in Organizational Psychology program in a little over a year, quickly elevating your earning potential and distinguishing yourself as a qualified and confident practitioner-scholar in one of the most exciting and fastest-growing fields in America.

Highlights

Through the program, you’ll learn to:

• Diagnose organizational health
• Develop and implement change initiatives
• Conduct job analysis and craft job descriptions
• Increase employee morale and expand retention strategies
• Advance performance management programs
• Generate and direct effective succession plans
• Hire, train, and develop talent
• Advise, coach, and build successful teams

Certificates, Credentials, and Microcredentials

Today, employers are looking for new hires with technical skills and also leadership abilities such as innovative decision making and executive coaching. MS in Organizational Psychology students have the opportunity to earn industry-valued, internationally recognized certificates, credentials,
and microcredentials that can be added to résumés and uploaded to online portfolios, certifying and showcasing these skills and abilities to potential employers.

Career Opportunities

The demand is high and continues to rise for those who possess a master’s degree in organizational psychology. Current research trends project two available jobs for every individual applying to work in this lucrative field centered on understanding and improving the workplace environment. People with an organizational psychology degree pursue careers in a variety of fields including academic/educational settings, business, churches, health care, government, and nonprofits. The following list highlights a few specific job titles: talent acquisition coordinator/manager; organizational development director; head of people and culture; organizational consultant; executive/leadership coach; diversity, equity, and inclusion (DEI) leader; human resources manager or director; human resources generalist; training and workplace learning manager; people analyst; and social science researcher.

Requirements

The Master of Science in Organizational Psychology ([https://www.apu.edu/business/programs/masters-in-organizational-psychology/](https://www.apu.edu/business/programs/masters-in-organizational-psychology/)) program includes 13 courses (41 units), all of which are required for the degree. There are no electives.

Total Units 41

Admission

University graduate admission and program-specific requirements must be met before an application is complete (see Admission to the University (p. 1092)). Program-specific application requirements are available online ([https://tracking.cirrusinsight.com/74647a2d-e9a2-412f-9b55-9599c7aad4ec/apu-edu-graduateprofessionalcenter-admissions-requirements-program/](https://tracking.cirrusinsight.com/74647a2d-e9a2-412f-9b55-9599c7aad4ec/apu-edu-graduateprofessionalcenter-admissions-requirements-program/)).

International students should contact Graduate and Professional Admissions ([https://www.apu.edu/graduateprofessionalcenter/admissions/](https://www.apu.edu/graduateprofessionalcenter/admissions/)) for application procedures.

Course Attendance and Schedule

The collaborative learning process that characterizes the organizational psychology program requires that students be prepared to contribute value to class discussions and to the broader learning community based on their experiences. As such, class attendance is an important aspect of commitment to the program, and absences from class are not appropriate except in cases of emergency. Students should notify instructors of planned absences as soon as possible and make arrangements with other students to get notes and assignments.

Commissioning Ceremony

Preceding each commencement, the School of Business and Management holds a commissioning ceremony for graduating students and their families. This event includes an achievement awards ceremony, words to live by, student remarks, and a time of prayer and commissioning for each graduate.
Outstanding Thesis Award

At each commissioning ceremony, graduate faculty may honor a single graduate with the distinction of Outstanding Thesis Award. The award is primarily based on the quality of research study conducted during the thesis process, the written paper, the oral defense presentation, and the original contribution the study makes to the field of organizational psychology. The study's contribution to furthering the Kingdom of God is also considered.

Graduation

In order to graduate, students must complete the required courses with an overall grade-point average (GPA) of at least 3.0. Students may participate in the graduation ceremony once all coursework is complete and the thesis has been defended and approved.

All organizational psychology students are required to complete the library publication of their final thesis paper. This process commences following the student's oral defense and must be completed within 6 months. A student's official degree will not be posted, nor will a diploma be mailed, until the publication process is complete.

Program Learning Outcomes

Program Learning Outcomes

Students who successfully complete this program shall be able to:

1. Explain the theoretical constructs of organizations in relation to the attitudes, feelings, and behaviors of those who work in the organization.
2. Utilize research and diagnostic tools to develop the competencies needed as an organizational consultant.
3. Construct organization development interventions using experience-based models and simulations.
4. Approach individual and organizational wellness through a holistic perspective framed through a Christian worldview.

Master of Business Administration (MBA)

The Master of Business Administration (MBA) (https://www.apu.edu/business/programs/mba/) program offers working professionals an accessible yet rigorous graduate business program that can be completed in 12-30 months. The program prepares students to lead in the workplace by equipping them with key strategic concepts and the analytical and relational skills to make sound recommendations and decisions. The curriculum is designed to strike a balance between theory and practice, combining scholarship with practical experience and actual corporate case studies of business decision making. Students also select an area of concentration based on specific interests and career aspirations.

The program provides the opportunity for students to develop sound analytical abilities, establish collaborative and team-building skills, and become aware of social responsibility as a factor in decision making. Faculty lectures are combined with case studies and discussions, student presentations, and team projects.

The accelerated and interactive classroom environment includes applied learning activities, use of new technologies in solving business problems, and independent field research and studies. National and international travel opportunities provide students with intensive boardroom field experience, where students get to dialogue with industry executives and government leaders.

Highlights

- The MBA program equips students with strong moral character and the leadership and analytical skills needed to lead change in today’s business world.
- Relevant coursework and real-world projects guided by faculty with business experience allow students to immediately apply learning at work.
- Focused certificates and credentials provide in-demand skills, know-how, and experience, verifying and showcasing students' skills and abilities to current and future employers.
- International and national travel opportunities give students intensive boardroom experience, where students get to dialogue with industry executives and government leaders worldwide.
- Students learn from Fulbright Scholars and world-renowned professors with real-world experience.
- Flexible course scheduling allows students to advance their academic and professional goals at their own pace.

Certificates, Credentials, and Microcredentials

Today, employers are looking for new hires with technical skills as well as leadership abilities such as decision making and teamwork. In the MBA program, students have the opportunity to earn industry-valued certificates, credentials, and microcredentials that can be added to résumés and uploaded to online portfolios, certifying and showcasing their skills and abilities to potential employers.
Flexible Course Schedules

To accommodate busy schedules, classes are offered during the evening, online, and at select regional campuses, and students may take advantage of the multiple delivery formats to customize their education experience. Students are admitted to and can start the MBA program in any of the six terms during the academic year.

Requirements

The MBA program curriculum comprises 42-45 units: 30 units of core courses, 9-12 units of concentration courses, and a 3-unit capstone. Concentration options include accounting, business analytics, entrepreneurship, finance, government financial management, healthcare management, international business, marketing, organizational science, public administration, and sport management. Students may request approval to take a second concentration.

PE 572  Foundations of Sport Management
PE 557A  Field Studies/Internships in Sport Management
PE 557B  Field Studies/Internships in Sport Management

Total Units  42-45

1 Any student with a bachelor’s degree in accounting or its equivalent may choose the accounting concentration, which consists of 12 units of regularly offered Master of Professional Accountancy (MAcc) courses.

2 Students who choose a concentration in international business are required to take BUSI 577 Global Field Study. BUSI 577 may be repeated twice and substituted for the other two required concentration courses with approval.

3 This concentration is designed for students who for personal and/or career reasons need to create an individualized concentration. The final course of the concentration is a capstone project or global field study; the other three courses are typically chosen from existing concentration courses offered by the School of Business and Management, but students with unique needs may propose concentrations that include up to 9 units of graduate study offered by other schools or colleges within Azusa Pacific University. All concentrations must be approved in advance by the SBM Graduate Business Admissions Committee. Concentration courses must also be approved by the other college(s)/school(s) in which the courses will be taken.

4 PE 557A and PE 557B must be completed consecutively after all other sport management coursework is completed.

MBA Preparatory Courses

The School of Business and Management offers foundational courses specifically designed to assist students without a previous business education and/or students who do not meet the entrance requirements for full admission. Courses in accounting, economics, finance, marketing, and statistics provide students the necessary prerequisite knowledge and skills needed to study the field of business at the graduate level. If any of these prerequisite courses are required, a determination will be based on a review of each student’s unique combination of undergraduate coursework at Azusa Pacific University (or another accredited institution of higher learning) and any relevant work experience.

Admission

University graduate admission and program-specific requirements must be met before an application is complete (see Admission to the University (p. 1092)). Program-specific application requirements are available online (https://tracking.cirrusinsight.com/74647a2d-e9a2-412f-9b55-9959c7aac4ec/apu-edu-graduateprofessionalcenter-admissions-requirements-program/).

International students should contact Graduate and Professional Admissions (https://www.apu.edu/graduateprofessionalcenter/admissions/) for application procedures.

View the MBA-specific admission requirements (https://www.apu.edu/business/programs/mba/admission/).

Program Changes

If a student wishes to change programs, the School of Business and Management requires students to file a Change of Program form and comply with all program admission requirements.
Course Attendance and Schedule

The collaborative learning process that characterizes the MBA program requires that students are prepared to contribute value to class discussions and to the broader learning community based on their experiences. As such, class attendance is an important aspect of commitment to the MBA program, and absences from class are not appropriate except in cases of emergency.

Students should make note of the start and end of the term as they determine their schedules. Because program coursework is offered in accelerated seven-week sessions, students generally cannot miss more than one class without retaking the course. Students should notify instructors of planned absences as soon as possible and make arrangements with other students to get notes and assignments. Also, since every instructor considers participation in grading, absences and tardiness may significantly affect final grades.

Academic Honors

Outstanding Graduate

At each commissioning ceremony, graduate faculty may honor a single graduate with the distinction of Outstanding Graduate. The award is primarily based on academic achievement and is secondarily given to the outstanding candidate who contributed most to the APU MBA learning community.

Commissioning Ceremony

Preceding each commencement, the School of Business and Management holds a commissioning ceremony for graduating students and their families. This event includes an achievement awards ceremony, words to live by, student remarks, and a time of prayer and commissioning for each graduate.

Graduation

In order to graduate, students must complete the required courses with an overall grade-point average (GPA) of at least 3.0 within five years of matriculation. This includes completing every required course with a C- or above. All courses taken within the SBM and applied toward the MBA degree must be taken for a letter grade, except for courses offered only on a pass/fail (P/F) basis.

Field Study Fees

Mandatory and elected international field study, global field study, and field experience trips incur appropriate required fees. Students who switch programs, withdraw, or are otherwise unable to participate in international field study, global field study, or field experience trips that are either required or elected for their program may be responsible for fees up to the full cost of the trip. View the most up-to-date fees. (https://www.apu.edu/graduateprofessionalcenter/sfs/costs/fees/)

Program Learning Outcomes

Program Learning Outcomes

Students who successfully complete this program shall be able to:
1. Demonstrate proficiency in multiple business disciplines.
2. Construct critical thinking processes to solve business problems.
4. Display strategic thinking through professional communication channels.
5. Be impactful team members.
6. Analyze cultural aspects of business in diverse environments.

Master of Business Management (MBM)

The Master of Business Management (MBM) program offers working professionals an accessible yet rigorous graduate business program that can be completed in 12-30 months. Coursework builds a foundation for successful executive leadership, development of a collaborative work ethic, expansion of management vision with global perspectives, ethical decision-making skills, and the ongoing quest for innovative value creation.

Program coursework provides students with the functional knowledge and strategic tools necessary for successful business management and leadership, as well as the scholastic and professional applications framework to acquire state-of-the-art global leadership and management perspectives. Focus is placed on creating value within organizations, and making continuous positive contributions in a rapidly changing, highly diversified, and increasingly integrated business environment.

The 39-unit MBM program develops exceptional business management professionals with outstanding moral character and strong analytical and innovative decision-making skills. The ethical leadership development vision that forms the core of the program is reflected in coursework designs, which combine classroom learning with hands-on experience. Real-life case studies provide students with résumé experience and allow students to build impressive portfolios. Previous real-life cases have included companies such as Pepsi, Target, and Kaiser Permanente, along with numerous nonprofits.
and startups. International and national travel opportunities give students intensive boardroom field experience, where students get to dialogue with industry executives and government leaders.

**Highlights**

- The MBM program equips students with strong moral character and the management and leadership skills needed to lead change in today's business world.
- Relevant coursework and real-world projects guided by faculty with business experience allow students to immediately augment their résumé and apply learning at work.
- Focused certificates and credentials provide in-demand skills, know-how, and experience, verifying students' skills and abilities to current and future employers.
- Students learn from Fulbright Scholars and world-renowned professors with real-world organizational experience.
- International and national travel opportunities give students intensive boardroom experience, where students get to dialogue with industry executives and government leaders worldwide.
- Flexible course scheduling allows students to advance their academic and professional goals at their own pace.

**Certificates, Credentials, and Microcredentials**

Today, employers are looking for employees who can lead people and projects. The job market demands individuals with strong analytical and project management skills, as well as leadership abilities such as decision making and teamwork. In the MBM program, students have the opportunity to earn industry-valued, internationally recognized certificates, credentials, and microcredentials that can be added to résumés and uploaded to online portfolios, certifying and showcasing their mastery of these skills and abilities to potential employers.

**Flexible Course Schedules**

To accommodate busy schedules, classes are offered during the evening, afternoon, online, and at select regional campuses. Afternoon classes give students the opportunity to participate in real-life business strategy case studies with profit, nonprofit, and governmental organizations, and students may take advantage of the multiple delivery formats to customize their education experience. **Students are admitted to and can start the MBM program in any of the eight terms during the academic year.**

**Requirements**

To graduate, students must complete the required 39 units with a grade-point average of at least 3.0 within five years of matriculation. This includes completing all required courses with a C- or above. All courses taken within the SBM and used for a student’s MBM candidacy must be taken for a letter grade, except courses offered only on a pass-fail basis.

Concentration courses from other college(s)/school(s) must also be approved by those college(s)/school(s).

MBM Preparatory Courses  
The School of Business and Management offers foundational courses specifically designed to assist students without a previous business education and/or students who do not meet the entrance requirements for full admission. Courses in business and management provide students the necessary prerequisite knowledge and skills needed to study the field of business at the graduate level. If any of these prerequisite courses are required, a determination will be based on a review of each student’s unique combination of undergraduate coursework at Azusa Pacific University (or another accredited institution of higher learning) and any relevant work experience.

Admission

University graduate admission and program-specific requirements must be met before an application is complete (see Admission to the University (p. 1092)). Program-specific application requirements are available online (https://tracking.cirrusinsight.com/74647a2d-e9a2-4121-bb55-9955c7aac4ec/apu-edu-graduateprofessionalcenter-admissions-requirements-program/).

International students should contact Graduate and Professional Admissions (https://www.apu.edu/graduateprofessionalcenter/admissions/) for application procedures.

View the MBM-specific admission requirements (https://www.apu.edu/business/programs/masters-in-management/admission/).

Program Changes

If a student wishes to change programs, the School of Business and Management requires students to file a Change of Program form and comply with all program admission requirements.

Course Attendance and Schedule

The collaborative learning process that characterizes the MBM program requires that students be prepared to contribute value to class discussions and to the broader learning community based on their experiences. As such, class attendance is an important aspect of commitment to the MBM program. Absences from class are not appropriate except in cases of emergency.

Students should make note of the start and end of the term as they determine their schedules. Because the program coursework is offered in accelerated eight-week sessions, students generally cannot miss more than one class without retaking the course. Students should notify instructors of planned absences as soon as possible and make arrangements with other students to get notes/assignments. Also, since every instructor considers participation in grading, absences and tardiness may significantly affect final grades.

Academic Honors

Outstanding Graduate

At each commissioning, the graduate faculty may honor a single graduate with the distinction of Outstanding Graduate. The award is primarily based on academic achievement, but when a secondary factor is needed to make a selection, the committee determines which of the outstanding candidates contributed most to the learning community.

Sigma Iota Epsilon National Honorary and Professional Management Fraternity

The MBM program holds a prestigious membership in the Sigma Iota Epsilon (SIE) National Honorary and Professional Management Fraternity. Membership in SIE highlights the academic standards of the program and the qualifications of the faculty. Approval from the national chapter also affirms the contribution and value of scholastic achievement in APU’s management programs.

APU’s MBM fraternity, designated Sigma Iota Epsilon, Theta Kappa Chapter, extends individual membership to students who demonstrate high academic standing in the field of management. The vision of the Theta Kappa Chapter is to connect SIE’s mission with APU’s Four Cornerstones, creating a synergy that helps develop holistic and dynamic professionals in the business world. APU’s programs aim at bridging the gap between theory and practice and helping prepare students to enter the management field and advance as leaders.

Commissioning Ceremony

Preceding each commencement, APU holds a commissioning ceremony for graduating students and their families. This event includes an awards ceremony, words to live by, student remarks, and a time of prayer and commissioning for each graduate.

Field Study Fees

Mandatory and elected international field study and field experience trips that are available on a program-by-program basis incur appropriate required fees. Students who switch programs, withdraw, or are otherwise unable to participate in international field study or field experience trips that are either required or elected for their program may be responsible for fees up to the full cost of the trip. View the most up-to-date list of fees (https://www.apu.edu/graduateprofessionalcenter/sfs/costs/fees/).

Program Learning Outcomes

Students who successfully complete this program shall be able to:

1. Demonstrate proficiency in multiple business disciplines.
2. Construct critical thinking processes to solve business problems.
4. Display strategic thinking through professional communication channels.
5. Be impactful team members.
6. Analyze cultural aspects of business in diverse environments.

Master of Professional Accountancy (MAcc)

For more information: (626) 812-3085

The Master of Professional Accountancy (MAcc) (https://www.apu.edu/business/programs/macc/) program prepares students for careers as certified public accountants (CPAs). The program's curriculum combines coursework and an internship with a public accounting firm to prepare students to pass the CPA exam and meet the 150-semester-credit-hour rule required for certification by 49 of 50 states. The program focuses on developing students’ character and competence consistent with the LP and Timothy Leung School of Accounting’s vision (p. 672).

Ideal candidates will have recently completed an undergraduate degree in accounting, or in a related field with a concentration in accounting, with plans to enter the public accounting profession. Depending, however, on previous academic experience, students may be required to enroll in either the traditional option (p. 709) or the executive option (p. 709). Students in the traditional path, which is designed for students who do not have an undergraduate degree in accounting, or in a related field with a concentration in accounting, must complete additional academic coursework in order to prepare for the rigors of the MAcc program. These additional courses are listed below. Faculty from the MAcc program will communicate with students prior to the beginning of coursework regarding which path is most appropriate for them.

Highlights

• CPA exam pass rates in the top 20% of California universities.
• Students are able to earn the MAcc in as little as one year.
• Scholarships allow students to receive a Christian accounting education at a state-school price.
• Specialized credentials, such as Enrolled Agent and Certified Internal Systems Analyst, are now available.
• Graduates are placed with every major accounting firm in the U.S., from the Big Four to national and regional firms.
• 100% of our MAcc students have paid professional internships.
• 100% job placement rate of our domestic MAcc students in CPA firms by graduation.

Specialized Credentials and Applied Learning

Students have the opportunity to earn specialized credentials, such as the IRS Enrolled Agent and the Certified Information Systems Auditor credentials, increasing their value to potential employers. Additionally, students have the option of joining the Accounting Honors Society and participating in the Volunteer Income Tax Assistance (VITA) program, which gives students hands-on experience providing income tax assistance to low-income taxpayers in the surrounding communities. A comprehensive curriculum coupled with experiential learning techniques has led to CPA exam pass rates in the top 20% of California universities.

Internships and Job Placement

Accounting students are invited to participate in the annual Meet the Firms night. This event, hosted by the Accounting Honor Society, boasts outstanding successes. Typically, 60 accounting professionals representing 20 public accounting firms meet with APU students, along with students visiting from other universities. All of the Big Four (EY, PwC, KPMG, and Deloitte), several major national firms (CLA, BDO) and specialty firms (CapinCrouse, Ron Blue), and many regional and local firms (KSJG) attend Meet the Firms.

Accounting majors obtain paid internships with public accounting firms or in professional accounting. Job placement for accounting students also remains strong, with most CPA-track students placed prior to graduation.

LP and Timothy Leung Scholarships

With gratitude to the Leung Endowment, students may qualify for scholarships awarded on the basis of academic or other achievements.

Application Deadline

Applications are accepted year-round, but to ensure full consideration for scholarships and internships, completed applications should be received at least six weeks prior to the start of the term.
### Requirements for the MAcc: Executive Option

If a student has passed the CPA exam in full or in part, an elective should be chosen to replace ACCT 590.

Admission

University graduate admission and program-specific requirements must be met before an application is complete (see Admission to the University (p. 1092)). Program-specific application requirements are available online (https://tracking.cirrusinsight.com/74647a2d-e9a2-412f-9b55-9959c7aac4ec/apu-edu-graduateprofessionalcenter-admissions-requirements-program/).

International students should contact Graduate and Professional Admissions (https://www.apu.edu/graduateprofessionalcenter/admissions/) for application procedures.

View the MAcc-specific admission requirements (https://www.apu.edu/business/programs/macc/admission/).

Program Learning Outcomes

Students who successfully complete this program shall be able to:
1. Demonstrate proficiency in professional accounting subject areas.
2. Construct critical thinking processes to solve accounting problems.
4. Display strategic thinking through professional communication channels.
5. Be impactful team members.

Master of Public Administration

Program Mission

The Master of Public Administration (MPA) program (https://www.apu.edu/clas/programs/mpa-degree/) equips graduate students to become competent, confident, and ethical leaders who implement public policy effectively, efficiently, and responsively. Our goal is to develop Christ-centered difference makers in the public-sector environment promoting justice through scholarship and leading transformative practice.

The MPA prepares students to become leaders of change in their communities and government agencies by providing a comprehensive degree program that meets the demands of today’s public administration agencies. The program’s rigorous focus is on research, writing, and managerial decision making using data and cultural awareness to achieve the public good. Students are able to customize their degree by selecting a concentration. The degree requirement is 36 units.

Our vision is to:
- Prepare preservice and midcareer professionals to manage and make evidence-based decisions.
- Develop skills in critical thinking, analysis, data use, and research evaluation for meaningful real-world applications.
• Equip future leaders to think creatively and innovatively to solve problems and transform public, nonprofit, and private organizations.
• Prepare culturally confident public sector leaders who nurture collaborative relationships with diverse groups and lead in work, home, and community contexts.

**Highlights**

• The MPA program equips students with strong moral character and the leadership and analytical skills needed to lead change in today’s public-sector environment.
• Relevant coursework and real-world projects guided by faculty with business experience allow students to immediately apply learning at work.
• Focused certificates and credentials provide in-demand skills, know-how, and experience, verifying and showcasing students’ skills and abilities to potential employers.
• Students learn from Fulbright Scholars and world-renowned professors with real-world experience.
• Flexible course scheduling allows students to advance their academic and professional goals at their own pace.

**Flexible Course Schedules**

To accommodate busy schedules, classes are offered during the evening, in person, and online. Students may take advantage of the multiple delivery formats to customize their education experience. **Students are admitted to and can start the MPA program in any of the eight terms during the academic year.**

**Total Units**

36

---

1 This concentration is designed for students who for personal and/or career reasons need to create an individualized concentration. Three courses are typically chosen from existing concentration courses, but students with unique needs may propose concentrations that include up to 12 units of graduate credit.
study offered by the School of Business and Management. The degree requirement is 36 units. All concentrations must be approved in advance by the SBM Graduate Business Admissions Committee.

**Admission**

University graduate admission and program-specific requirements must be met before an application is complete (see Admission to the University (p. 1092)). Program-specific application requirements are available online (https://tracking.cirrusinsight.com/74647a2d-e9a2-412f-9b55-9959c7aac4ec/apu-edu-graduateprofessionalcenter-admissions-requirements-program/).

International students should contact Graduate and Professional Admissions (https://www.apu.edu/graduateprofessionalcenter/admissions/) for application procedures.

**Program Learning Outcomes**

**Program Learning Outcomes**

Students who successfully complete this program shall be able to:

1. Evaluate leadership and management techniques reflecting theories and practices of public administration.
2. Analyze effective strategies to manage policy programs reflecting the global professional standards and ethics of Network Schools of Public Policy Affairs and Administration (NASPAA).
3. Formulate innovative and value-based decisions to manage the political-administrative policy process and solutions for effective public service and program outcomes.
4. Communicate using a Christ-centered worldview and technologies (e-commerce, e-governance, e-learning) helpful to manage intergovernmental relations with diverse groups.
5. Differentiate the function of budgeting and financial planning approaches used by public sector organizations for economic and community development.
6. Develop personal and professional skills to make positive changes at work and in the community as honorable public servants.

**Minor in Accounting**

24 units

The accounting minor surveys the principles, theories, and concepts of the accounting profession. Its practical component leads to work assignments in international, national, and local certified public accountant (CPA) firms in students’ junior and senior years. The combination of classroom theory and real-world experience also prepares candidates for the CPA examination administered by the various state boards of accountancy in the United States.

**Benefits of Adding a Minor**

A minor can help students complement their bachelor’s degree and stand out to future employers, helping them expand their employment opportunities as they study an additional area of interest. Complementary minors provide students the opportunity to demonstrate added expertise in their field and specialize in an area that may provide an edge in their job search, and also add knowledge that can be used throughout an individual’s career.

**Requirements**

No more than three courses in a student’s major may count toward this minor.

1 BUSI 110 waived for all School of Business and Management majors except for B.A. in Economics majors. BUSI 110 should be taken in the freshman or sophomore year, if possible.
Program Learning Outcomes

Students who successfully complete this program shall be able to:

1. Demonstrate mastery of key accounting content areas, such as financial reporting, business and economic concepts, auditing, and regulation.
2. Identify and solve accounting or business problems using analytical and critical thinking skills.
3. Compose responses to business decisions that demonstrate a Christian worldview.
4. Express themselves clearly and effectively through professional written and oral communications.
5. Demonstrate the ability to function as an effective business team member.

Minor in Business Administration (Professional)

21 units

Today’s business leaders must be agile and able to adapt to a rapidly changing business world while leading employees by modeling character, integrity, and compassion. Relevant coursework addresses current issues in business and encourages the integration of real-world work experiences and hands-on projects. Students may combine these experiences with internships or international study opportunities to further expand their portfolio and network.

Benefits of Adding a Minor

A minor can help students complement their bachelor’s degree and stand out to future employers, helping them expand their employment opportunities as they study an additional area of interest. The versatility of the business administration minor complements any major, giving students the opportunity to demonstrate management expertise in any field and possibly providing an edge in their job search, while also adding knowledge that can be used throughout an individual’s career.

Certificates, Credentials, and Microcredentials

Throughout the program, students build on existing experience while gaining a strong foundation in business management and leadership. Students in this program also have the opportunity to earn internationally recognized certificates, credentials, and microcredential badges that can be added to résumés and uploaded to online portfolios, certifying and showcasing their mastery of certain skills or abilities to potential employers.

Program Learning Outcomes

Students who successfully complete this program shall be able to:

1. Critical Thinking: Identify and solve business problems using analytical and critical thinking skills.
2. Quantitative Reasoning: Analyze quantitative data to address real-world or discipline-specific business problems.
3. Information Technology: Apply current information technologies to business issues.
5. Written Communication: Convey ideas clearly and effectively through professional written communication.
6. Oral Communication: Communicate in informative or persuasive ways using the appropriate genre, channel, structure, and style.
7. Global/Multicultural Awareness: Informed by biblically-based ethics, students will identify and respond to cultural, economic, and political aspects of business in multicultural and global environments.

Minor in Business Analytics

21 units

The business analytics minor is for students interested in developing expertise in data science and data analytics with a specialization in the field of business. Students learn to analyze large quantities of data and discover value-oriented insights, becoming data-driven decision-makers in their organizations. Information is applied to a wide range of data-rich business domains such as accounting, economics, finance, marketing, human resource management, and supply chain management.

Benefits of Adding a Minor

A minor can help students complement their bachelor’s degree and stand out to future employers, expanding their employment opportunities as they study an additional area of interest. Complementary minors provide students the opportunity to demonstrate added expertise in their field and specialize in an area that may provide an edge in their job search, and also add knowledge that can be used throughout an individual’s career.

**Program Learning Outcomes**

**Students who successfully complete this program shall be able to:**

1. Describe business issues which require business analytics' skills and methods.
2. Transform large quantities of real-life data from a wide range of domains to resolve issues.
3. Apply appropriate analytical methods (descriptive, diagnostic, predictive, and prescriptive analytics) to find solutions to business problems.
4. Explain the results of analytical activities clearly and concisely using oral, written, or electronic media.
5. Describe the ethical and legal issues involved with collecting, storing, and using big data from a Christian perspective.

**Minor in Business Management**

21 units

The business management minor program is designed for those who seek a broad spectrum of business courses necessary to lead and manage organizations. This program develops competence in conceptual, human, and technical skills, and these skills make students completing the program well prepared for employment in public and private-sector organizations.

Students in this program learn the management and leadership skills of planning, decision making, problem solving, communication, and delegation. Coursework in general business management and leadership includes a fundamental system of values that serves as the basis for decision making. This minor also emphasizes project and people management.

**Benefits of Adding a Minor**

A minor can help students complement their bachelor’s degree and stand out to future employers, expanding their employment opportunities while they study an additional area of interest. The versatility of the management minor complements any major, giving students the opportunity to demonstrate management expertise in any field and possibly providing an edge in their job search, as well as adding knowledge that can be used throughout an individual’s career.

**Certificates, Credentials, and Microcredentials**

Today, employers are looking for new hires with technical skills and leadership abilities such as decision making and teamwork. Students in this program have the opportunity to earn industry-valued certificates, credentials, and microcredential badges that can be added to résumés and uploaded to online portfolios, certifying and showcasing certain skills and abilities to potential employers.

**Experiential Learning Opportunities**

Study-away opportunities expose students to topics of globalization, trade, culture, and global management and leadership as they travel the world. Typically, these trips include visiting global and international organizations and learning from universities and business leaders around the world. Additionally, numerous School of Business and Management clubs offer students the chance to build skills in leadership, management, decision making, and teamwork.

**Career Opportunities**

At APU, students may choose from among a broad range of management course offerings. Business management minors are able to pursue work in a vast range of industries.

**Requirements**

No more than three courses in a student’s major may count toward the business management minor.

Program Learning Outcomes

Program Learning Outcomes

Students who successfully complete this program shall be able to:

1. Competent Business Knowledge: Students will be able to demonstrate knowledge in multiple business disciplines, including management, finance, marketing, accounting and economics.
2. Critical Thinking: Students will be able to identify and solve business problems using analytical and critical thinking skills.
3. Christian Business Ethics: Students will be able to demonstrate the ability to evaluate business decisions based on a Christian perspective.
4. Written Communication: Students will be able to convey ideas clearly through professional written communication.
5. Oral Communication: Students will be able to express ideas effectively through professional oral presentations.
6. Collaborative Teamwork: Students will be able to demonstrate the ability to function as an effective business team member.
7. Comprehensive Global Awareness: Students will be able to identify cultural, economic and political aspects of business in a global environment.
8. Discipline Knowledge: Students will be able to demonstrate knowledge of management concepts.
9. Discipline Problem Solving/Strategy: Students will be able to a) solve core management problems or b) analyze management situations and provide strategy for effectiveness.

Minor in Economics

21 units

The economics minor focuses on a deep understanding of the economic environment of business, including labor, environmental, and international issues. Students become grounded in economic theory and practical applications.

The Benefits of Adding a Minor

A minor can help students complement their bachelor’s degree and stand out to future employers, helping them expand their employment opportunities as they study an additional area of interest. Complementary minors provide students the opportunity to demonstrate added expertise in their field and specialize in an area that may provide an edge in their job search, and also add knowledge that can be used throughout an individual’s career.

Requirements

The economics minor allows no more than three courses in the student’s major to count toward this minor.

³ Offered Spring semester.
⁴ Meets the General Education Civic Knowledge and Engagement requirement.
⁵ PADM 399 counts for 3 units of minor elective credit and 3 units of non-minor elective credit.

**Program Learning Outcomes**

Students who successfully complete this program shall be able to:

1. Competent Business Knowledge: Demonstrate knowledge in multiple business disciplines, including management, finance, marketing, accounting and economics.
2. Critical Thinking: Identify and solve business problems using analytical and critical thinking skills.
3. Christian Business Ethics: Demonstrate the ability to evaluate business decisions based on a Christian perspective.
4. Written Communication: Convey ideas clearly through professional written communication.
5. Oral Communication: Express ideas effectively through professional oral presentations.
6. Collaborative Teamwork: Demonstrate the ability to function as an effective business team member.
8. Discipline Knowledge: Demonstrate knowledge of economics concepts.
9. Discipline Problem Solving/Strategy: Solve core economics problems, or analyze economics situations and provide strategy for effectiveness.

**Minor in Entrepreneurship**

24 units

The entrepreneurship minor prepares students for the intricacies of planning, launching, and leading a new business, with a focus on creativity and innovation, managing and growing a new business, and social media. Coursework covers working in teams, constructing business models, communicating with partners and customers, assessing feasibility while launching a new venture or initiative, and creating a social media campaign.

**Benefits of Adding a Minor**

A minor can help students complement their bachelor’s degree and stand out to future employers, helping them expand their employment opportunities as they study an additional area of interest. Complementary minors provide students the opportunity to demonstrate added expertise in their field and specialize in an area that may provide an edge in their job search, and also add knowledge that can be used throughout an individual’s career.
Experiential Learning Opportunities

Entrepreneurship minors apply their knowledge and skills in academic and real-world settings. Guided by faculty, teams of students conduct needs assessments in local communities, identify potential solutions, and implement community impact projects. The communities benefit from collaboration and fresh innovation, and students gain valuable experience to advance their entrepreneurial résumés.

Students also have the option to participate in student clubs and competitions, such as ENACTUS, that provide skill-building opportunities in leadership, teamwork, and decision making. APU-sponsored teams have a track record of successful placement in ENACTUS competitions.

Credentials and Microcredentials

Today, employers are looking for new hires with technical skills and leadership abilities such as decision making and teamwork. Entrepreneurship minors have the opportunity to earn industry-valued credentials and microcredential badges that can be added to résumés and uploaded to online portfolios, certifying and showcasing these skills and abilities to potential employers.

Requirements

No more than three courses in a student’s major may count toward this minor.

Minor in Finance

24 units

The finance minor is for students interested in the stewardship of the financial resources of individuals, corporations, or financial institutions. As future managers, students learn the principles and applications of financial analysis, management, and strategy, and gain experience in portfolio construction.
and management. This program equips students with the theoretical understanding and practical skills necessary to evaluate and direct decisions regarding the allocation of financial resources among a variety of competing opportunities, with the goal of maximizing the value of the resources managed.

**Benefits of Adding a Minor**

A minor can help students complement their bachelor’s degree and stand out to future employers, helping them expand their employment opportunities as they study an additional area of interest. Complementary minors provide students the opportunity to demonstrate added expertise in their field and specialize in an area that may provide an edge in their job search, and also add knowledge that can be used throughout an individual’s career.

**Experiential Learning Opportunities**

As a business club hosted by Azusa Pacific’s School of Business and Management and led by a faculty advisor and a board of finance professionals, SIF involves the practical application of classroom knowledge. Students practice hands-on investment strategies and are engaged to manage a portion of the university endowment through fundamental valuation.

Students joining the SIF have the opportunity to compete in the CFA Institute Research Challenge, which is a competition between university-sponsored teams that research a designated publicly traded company, prepare a written report on that company, then present their findings. SIF and the CFA competition give students hands-on training and mentoring in financial analysis.

Minor in Foundations of Business (MBA Preparation)

21 units

The foundations of business (MBA prep) minor is for non-business students who are interested in pursuing a Master of Business Administration (MBA) degree after completing their bachelor's program.

Azusa Pacific University's School of Business and Management offers a customizable, Christ-centered MBA degree program that prepares ethical leaders capable of adapting to the changing business landscape. This program teaches the key concepts and skills, both analytical and relational, to be successful managers and leaders in business and society. This minor prepares students to enter into APU's MBA degree program or any accredited MBA program after the completion of a bachelor's degree in a discipline outside of business.

No more than three courses in a student’s major may count toward the foundations of business (MBA prep) minor.

Minor in Foundations of Management (MBM Preparation)

21 Units
The Foundations of Management (MBM prep) minor is for non-business students who are interested in pursuing a Master of Business Management degree (MBM) after completing their bachelor’s program.

Azusa Pacific University’s School of Business and Management offers a customizable, Christ-centered MBM that prepares ethical leaders capable of adapting to the changing business landscape. This master’s in management program prepares students to become managers and leaders who can effectively motivate employees to exceed market expectations, improve competency levels and job performance, guide their organizations to invest in their workforce, and recruit, hire, and train the right individuals. Program graduates become experts in positively steering organizational change and creating a culture of teamwork.

No more than three courses in a student’s major may count toward the foundations of management (MBM prep) minor.

Students who successfully complete this program shall be able to:

1. Demonstrate competency in multiple business disciplines.
2. Apply critical thinking to solve business problems.
3. Evaluate business decisions based on a Christian perspective.
4. Communicate ideas through professional channels.
5. Demonstrate awareness of community impact.

**Minor in Human Resources**

21 units

The human resources minor provides students with a comprehensive understanding of the fundamental principles and practices of managing human capital within an organization. This program equips students with the knowledge and skills needed to effectively recruit, develop, and retain employees, and to navigate the complex legal and ethical considerations associated with employment.

Students will learn about a variety of topics, including compensation and benefits, employee relations, training and development, talent acquisition, diversity and inclusion, and strategic planning. Students will also explore the various challenges facing HR professionals in today’s rapidly changing business landscape, such as the impact of technology on the workforce, the evolving nature of work and employment, and the importance of fostering a positive organizational culture.
Benefits of Adding a Minor

A minor can help students complement their bachelor’s degree and stand out to future employers, helping them expand their employment opportunities as they study an additional area of interest. Complementary minors provide students the opportunity to demonstrate added expertise in their field and specialize in an area that may provide an edge in their job search, and also add knowledge that can be used throughout an individual’s career.

Minor in International Business

24 units

The international business minor prepares students for careers in global business and international commerce. The program incorporates a global collaborative approach to the study of business, international management, strategic positioning, international trade, macroeconomics, and politics as it prepares students to work in a dynamic and interdependent global business environment.

Students explore various ethical, cultural, legal, and other differences that exist in international business and consider their individual and leadership responsibilities and actions. International business majors think through the various urgent challenges that face business environments today, including sustainability, climate change, energy and technological shifts, political shifts, and all forms of equity.

Students also acquire practical skills and experience through study-away opportunities, internships, and the opportunity to work with university students around the world in global colloquium case-study projects.

Benefits of Adding a Minor

A minor can help students complement their bachelor’s degree and stand out to future employers, expanding their employment opportunities while they study an additional area of interest. Complementary minors give students the opportunity to demonstrate added expertise in any field and possibly provide an edge in their job search, and add knowledge that can be used throughout an individual’s career.

Experiential Learning Opportunities

The International Business Global Colloquium gives APU students the opportunity to study various aspects of international business and international differences with students from different countries, schools, and programs for a significant social/international experience.

Study-away opportunities expose students to topics of globalization, trade, culture, and global management and leadership as they travel the world. Typically, these trips include visiting global and international organizations and learning from universities and business leaders around the world. Additionally, numerous student clubs offer the chance to build skills in leadership, management, decision making, and teamwork.

Certificates, Credentials and Microcredentials

Today, employers are looking for new hires with technical skills and leadership abilities such as decision making and teamwork. Students in this program have the opportunity to earn industry-valued certificates, credentials, and microcredential badges that can be added to résumés and uploaded to online portfolios, certifying and showcasing certain skills and abilities to potential employers.
Career Opportunities

International business careers may be found with multinational corporations, foreign companies, banks, international investments, export/import trade, international law, international nonprofit organizations, world missions, and public/foreign service. Some of these exist in expatriate opportunities and some through various other logistics and extensions. Individuals graduate from this program with significant international experience, as well as proficiency in a foreign language, and are in high demand in today’s job market.

No more than three courses in a student’s major may count toward the international business minor.

8. Discipline Knowledge: Students will be able to demonstrate knowledge of international business concepts.
9. Discipline Problem Solving/Strategy: Students will be able to a) solve core international business problems or b) analyze international business situations and provide strategy for effectiveness.

Minor in Leadership

18 units

The undergraduate leadership minor capitalizes upon the university’s intention to develop disciples and scholars who seek to advance the work of God in the world. This minor does so by encouraging students to pursue excellence in their chosen major while also seeking proficiency as strengths-driven leaders. Students are encouraged toward lifelong development (as people and as leaders) and have the opportunity to create, articulate, and practice their own philosophy of Christian leadership.

Courses are thoughtful, challenging, and relationally focused while providing opportunities for reflection, conversation, and research. Students in the minor learn about whole-person development, leadership and virtue, the role of personal strengths and skills in good leadership, and how to lead as agents of change. Disciplined self-leadership, combined with the knowledge of how to facilitate effective collaboration, make leadership minor graduates an asset to any context in which they may serve.

Mission Statement

The leadership minor seeks to educate and inspire students to integrate their faith into their calling and, as people of integrity, live purposefully for the glory of God.
Benefits of Adding a Minor

A minor can help students complement their bachelor’s degree and stand out to future employers, expanding their employment opportunities while they study an additional area of interest. The versatility of the leadership minor complements any major, giving students the opportunity to demonstrate management expertise in any field and possibly providing an edge in their job search, as well as adding knowledge that can be used throughout an individual’s career.

Requirements

The minor in leadership comprises 18 units of leadership coursework.

*Note: Seniors may take one course in the MA in Leadership program. If a student is accepted into the MA in Leadership, the course will count toward that degree as well.*

Minor in Marketing

24 units

The marketing minor is for students who want to complement a major from a different field, as it adds the skills and abilities needed to be knowledgeable about marketing effectiveness in multiple areas. This program equips students with solid skills in marketing, which they can utilize to obtain an internship or secure a marketing-related position. Coursework in digital and social media marketing enables students to be influencers in the social media marketing environment.

Experiential Learning Opportunities

Skills are developed by hands-on class projects such as creating social media campaigns and creating a comprehensive digital marketing plan for an organization. Students can build their résumés through participation in student clubs that provide confidence and skill-building opportunities in leadership, team building, social media, event planning, and marketing supervisory or management positions.

Certificates, Credentials, and Microcredentials

Today, employers are looking for new hires with technical skills and leadership abilities such as decision making and teamwork. Students in this program have the opportunity to earn industry-valued certificates, credentials, and microcredential badges in social media management, sales management, and marketing analytics that can be added to résumés and uploaded to online portfolios, certifying and showcasing these skills and abilities to potential employers.

Benefits of Adding a Minor

A minor can help students complement their bachelor’s degree and stand out to future employers, expanding their employment opportunities while they study an additional area of interest. Complementary minors give students the opportunity to demonstrate added expertise in any field and possibly provide an edge in their job search, and add knowledge that can be used throughout an individual’s career.

Requirements

No more than three courses in the student’s major may count toward this minor.

Total Units: 24

1 Meets the General Education Civic Knowledge and Engagement requirement.
2 Meets the General Education Intercultural Competence requirement.
3 Meets the GE Integrative and Applied Learning requirement.

F Offered in Fall only
S Offered in Spring only
F/S Offered in both Fall and Spring terms
EF Offered in Fall in even years
ES Offered in Spring in even years
Minor in Public Administration

21 units

The public administration minor equips students with the knowledge necessary for careers in local, state, and federal government/politics and the nonprofit sector. Students in this program go beyond theory and gain valuable hands-on experience in public administration, including in the Public Administration Practicum course, which gives students the opportunity for internships in local, state, and federal government offices.

Benefits of Adding a Minor

A minor can help students complement their bachelor’s degree and stand out to future employers, expanding their employment opportunities while they study an additional area of interest. Complementary minors give students the opportunity to demonstrate added expertise in any field and possibly provide an edge in their job search, and add knowledge that can be used throughout an individual’s career.

1 Meets the General Education Civic Knowledge and Engagement requirement.

2 Meets the General Education Integrative and Applied Learning requirement.

3 Meets the General Education Oral Communication requirement.
Program Learning Outcomes

Students who successfully complete this program shall be able to:
1. Articulate the origins, development, and practice of modern state and federal public administration, agencies and rule-making bodies.
2. Describe the proper relationship between government agencies, elected government office holders, and citizens.
3. Identify essential tools used by administrative agencies in designing rules and regulations.
4. Describe, assess views of the obligations Christians in public service have to their fellow citizens.
School of Education

The School of Education (https://www.apu.edu/education/) at Azusa Pacific University equips teachers, counselors, school psychologists, and administrators for excellence and leadership in educational settings. The school provides an EdD program in Educational Leadership, EdS degrees in School Psychology, master’s programs, teaching credentials, and specialist credentials in special education, school counseling, and school psychology. The school also offers an undergraduate major and minor in liberal studies.

For a full listing of programs and affiliated faculty, visit the appropriate department or division pages: Educational Leadership (p. 735), School Counseling and School Psychology (p. 742), and Teacher Education (p. 769).

Mission Statement

Based upon Christian values and principles, the APU School of Education prepares educators to be creative, collaborative, critical thinkers and scholars for diverse educational settings.

Learner Goals

The School of Education seeks to prepare:

1. Ethical professionals who understand and articulate the integration of a Christian worldview in their communities of practice.
2. Responsive educators who practice reflective, creative, critical thinking in their engagement with diverse communities of learners.
3. Informed scholarly professionals who are dedicated to collaboration, professional growth, and lifelong learning.

Affiliated Programs

APU offers a number of California Commission on Teacher Credentialing (CTC)-approved subject-matter programs for candidates completing their bachelor’s degrees. The following programs can be used to meet the subject matter authorization requirement for a preliminary teaching credential:

- English Approved Subject-Matter Program (p. 112)
- Mathematics Approved Subject-Matter Program (p. 185)
- Music Approved Subject-Matter Program (p. 377)
- Social Science Approved Subject-Matter Program (p. 166)

In collaboration with the College of Liberal Arts and Sciences, the School of Education offers the Integrated Bachelor’s/Credential Program (p. 813) to undergraduate students seeking to earn a preliminary teaching credential in hard-to-staff areas (e.g., science, math, special education) during their undergraduate degree program.

Graduate Physical Education Programs

APU offers programs in graduate physical education. The Master of Arts in Physical Education and Single Subject Teaching Credential (p. 524), Master of Arts in Physical Education with an Added Authorization in Adapted Physical Education (p. 525), and the Adapted Physical Education Added Authorization (p. 520) programs are approved by the California Commission on Teacher Credentialing (CTC). For more information, visit the School of Behavioral and Applied Sciences (p. 463) section of this catalog.

School Nurse Services Credential

APU offers a program in school nursing services. The School Nurse Services Credential (SNSC) is approved by the California Commission on Teacher Credentialing (CTC). For more information, visit the School of Nursing (p. 826) section of this catalog.

School Social Work and Child Welfare and Attendance Services PPS Credential

APU offers a Pupil Personnel Services credential program in school social work and child welfare and attendance services, which is approved by the California Commission on Teacher Credentialing (CTC). For more information, visit the Department of Social Work (p. 589) section of this catalog.

Professional School-Level Dispositions

The School of Education has adopted a set of professional dispositions that represent the attitudes and behaviors expected of all education professionals, and reflect the values that are central to the School of Education mission. In addition to maintaining satisfactory academic progress, candidates are expected to demonstrate these dispositions throughout all education programs. Candidates who fail to meet the dispositional requirements will be evaluated for fitness to practice in the profession.
Credit Hour

The School of Education follows the university credit hour policy, except when clinical experience expectations from our professional accrediting bodies have expectations for more clock hours. Clinical experience expectations are guided by our professional accrediting bodies.

Department of School Counseling and School Psychology

- School Counseling – The California Commission on Teacher Credentialing (CTC) requires a minimum of eight hundred clock hours of supervised fieldwork/internship. This equates to eight units of fieldwork/internship within the program.
- School Psychology – The CTC requires a minimum of four hundred and fifty clock hours of practicum experience. This equates to three units of practicum within the program. Additionally, the CTC requires a minimum of twelve hundred clock hours of supervised fieldwork/internship. This equates to ten units of fieldwork/internship within the program.
- Applied Behavioral Analysis Specialization – The Behavior Analyst Certification Board (BACB) requires a minimum of 1,500 clinical hours for individuals applying for Certification before 1/1/2022 and 2,000 clinical hours for individuals apply for Certification 1/1/2022 and after. The ABA program includes two fieldwork courses that have assignments that must be completed in the field under the supervision of a Board Certified Behavior Analyst (BCBA) or School Psychologist. The time necessary to complete the assignments equates to approximately two hundred hours of fieldwork clock hours. These fieldwork courses support students toward meeting their clinical requirements for the BACB, and these courses equate to two units of fieldwork within the program.

Division of Teacher Education

- Preliminary Teaching Credential Programs – The CTC requires six hundred clock hours of clinical experiences. A minimum of sixty hours of early field experiences are embedded in foundations courses, while a minimum one hundred and forty hours of early clinical practice and four hundred hours of culminating clinical practice is completed at student teaching or internship. This equates to four units of clinical practice within the program.

Accreditation

Azusa Pacific University (APU) is accredited by the WASC Senior College and University Commission (WSCUC) (https://www.wscuc.org).

Additionally, APU has a number of professional accreditations and approvals related to its educator preparation programs:

- All programs that result in an educator credential are accredited by the California Commission on Teacher Credentialing (CTC) (https://www.ctc.ca.gov/) and the National Council for Accreditation of Teacher Education (NCATE), which is transitioning to the Council for the Accreditation of Educator Preparation (CAEP) (https://caepnet.org/). The following programs include an educator credential and were accredited under NCATE and are transitioning to CAEP:
  a. Master of Arts in Education: Educational Counseling with an Embedded Pupil Personnel Services Credential in School Counseling (p. 750)
  b. Master of Arts in Education: Educational and Clinical Counseling with an Embedded Pupil Personnel Services Credential in School Counseling (p. 752)
  c. PPS: School Counseling Credential (p. 754)
  d. Education Specialist (EdS) in School Psychology with Embedded Master of Arts in Education: Educational Psychology and Pupil Personnel Services Credential in School Psychology (p. 756)
  e. Educational Specialist (EdS) in School Psychology: Clinical and Educationally Related Mental Health Counseling with Embedded Master of Arts in Education: Educational Psychology and Pupil Personnel Services Credential in School Psychology (p. 763)
  g. PPS: School Psychology Credential (p. 767)
  h. Master of Arts in Education: Learning and Technology and Multiple Subject Teaching Credential (p. 791)
  i. Master of Arts in Education: Learning and Technology and Single Subject Teaching Credential (p. 793)
  j. Master of Arts in Education: Teaching and Multiple Subject Teaching Credential (p. 795)
  k. Master of Arts in Education: Teaching and Single Subject Teaching Credential (p. 796)
  l. Multiple Subject Teaching Credential (p. 798)
  m. Single Subject Teaching Credential (p. 799)
  n. Master of Arts in Education: Learning and Technology and Mild to Moderate Support Needs Education Specialist Credential (p. 805)
  o. Master of Arts in Education: Learning and Technology and Extensive Support Needs Education Specialist Credential (p. 806)
  p. Master of Arts in Education: Special Education and Mild to Moderate Support Needs Education Specialist Credential (p. 808)
  q. Master of Arts in Education: Special Education and Extensive Support Needs Education Specialist Credential (p. 809)
  r. Mild to Moderate Support Needs Education Specialist Credential (p. 811)
  s. Extensive Support Needs Education Specialist Credential (p. 812)
  t. Bachelor of Science in Allied Health with Integrated Single Subject (Science) Teaching Credential (p. 71)
  u. Bachelor of Arts in Liberal Studies with Integrated Mild to Moderate Support Needs Education Specialist Credential (p. 816)
  v. Bachelor of Arts in Liberal Studies with Integrated Extensive Support Needs Education Specialist Credential (p. 816)
  w. Bachelor of Arts in Mathematics with Integrated Single Subject (Math) Teaching Credential (p. 187)
  x. Master of Arts in Physical Education and Single Subject Teaching Credential (p. 524)

- The Educational Specialist (EdS) in School Psychology programs are conditionally approved by the National Association of School Psychologists (NASP) (https://www.nasponline.org/).
Academic Policies

The following academic policies apply to credential and graduate programs.

Normal Progress Toward a Degree or Credential and Time Limit for Degree or Credential

School of Education students have a maximum of five years to complete all program requirements for the degree and/or credential, with the exception of doctoral students, who have six years to complete all program requirements. In rare instances, extensions may be requested by petition. Granting of such a petition may entail additional degree requirements, credential requirements, and/or repeating courses that have expired.

Good Academic Standing

To maintain good academic standing, School of Education students are expected to make satisfactory progress toward completion of their program. There are three criteria to the Good Academic Standing policy, in keeping with university academic quality standards and eligibility requirements for federal financial aid:

1. Minimum GPA Requirement: Students must maintain a minimum cumulative grade-point average (GPA) of 3.0 in their program of study.
2. Time to Degree Completion: School of Education students have a maximum of five years to complete all program requirements, with the exception of doctoral students, who have six years to complete all program requirements.
3. Successful Completion of Credit (CR)/No Credit (NC) Courses: School of Education students must earn a grade of CR for Credit/No Credit courses in which they enroll.

Academic Probation and Dismissal

Students who do not meet the definition of good academic standing outlined above are subject to academic probation and will be given one enrollment period to demonstrate satisfactory progress toward good academic standing. Certain designated courses within the School of Education (e.g., fieldwork, supervised teaching, dissertation courses, etc.) are graded on a Credit (CR)/No Credit (NC) basis. A grade of NC is interpreted as a failing grade, which can have implications for a student's continued satisfactory progress and academic standing.

Minimum Requirements for Certificate, Credential, Master's, and Combined Master's Degree and Credential Students

Students in master's and/or credential coursework must maintain a minimum cumulative GPA of 3.0. Courses with a grade lower than B- (including NC grades) are not applied to master's or educational specialist (Ed.S.) degree requirements or to credential/certificate requirements and must be repeated. Students who earn an NC grade are required to meet with their program director or chair to identify knowledge, skills, and/or dispositions that may need strengthening and to develop a performance improvement plan. Students who earn an NC grade will be placed on probation and given one enrollment period to demonstrate satisfactory progress according to the terms of the improvement plan. Students who do not meet the standards for satisfactory progress after a period of probation may be dismissed from the program.

Students who earn an NC grade in a culminating clinical practice, fieldwork, or internship experience as a result of a lapse in professional responsibility, integrity, or ethical conduct may not be eligible to petition to repeat the course for which they received the nonpassing grade.

Minimum Requirements for Doctoral Students

A doctoral student must maintain a minimum cumulative GPA of 3.0. Courses with a grade lower than B- (including NC grades) are not applied toward doctoral degree requirements and must be repeated.

In order to ensure satisfactory academic progress, a doctoral student who receives an NC grade or grade lower than B- in 700-level courses, or whose grade-point average falls below 3.2, is required to meet with his/her advisor to identify academic skills that may need strengthening and to develop a performance improvement plan.

Doctoral students with a cumulative GPA lower than 3.0, or those who have earned two or more NC grades, will be placed on probation and given one enrollment period to demonstrate satisfactory progress according to the terms of the performance improvement plan. Students who do not demonstrate satisfactory progress according to the terms of the performance improvement plan after a period of probation may be dismissed from the program.
Program Expectations

- APU School of Education candidates prepare to work in schools as educators, including teachers, school and district leaders, school counselors and psychologists, and other specialty personnel. They must demonstrate the content, pedagogy, and writing skills and dispositions required of the profession. Therefore, the School of Education assesses candidates from admission through recommendation of credentials in both academic and dispositional standards.
- Candidates are expected to maintain a high level of professional and ethical behavior throughout the program. Failure to do so may result in discipline up to and including program dismissal.
- All candidates must have access to technology (i.e., computer and internet connectivity). Additional technology requirements are necessary for some programs. Check the program descriptions in this catalog for more information.
- Candidates who live in, work at, or relocate to a location more than 50 miles from the nearest Azusa campus (including regional campuses) must request approval from the department to participate in fieldwork and/or clinical experience at a distance following the process outlined in the Clinical Experience Locations section below. If the location is approved, the candidate may be assessed charges to cover the costs (e.g., travel, lodging, etc.) for fieldwork and/or clinical experience supervision.
- All credential standards and requirements for educator preparation programs are subject to CTC, NCATE (transitioning to CAEP), and federal policy changes, as well as university academic policy, and these supersede catalog descriptions of prior programs and requirements.
- Candidates participating in credential programs or bachelor’s or education specialist degree programs with credential embedded must be covered by professional liability insurance in their capacity as credential candidates.
- Candidates participating in fieldwork and/or clinical experience who are driving to school or agency sites must have proof of auto insurance.

Clinical Experience Locations

Candidates are required to complete fieldwork and/or clinical experience at sites where the School of Education has an executed Memorandum of Understanding (MOU), at sites that engage in ongoing partnership and collaboration with the School of Education, and at sites that are located within 50 miles of the nearest Azusa Pacific University campus where School of Education programs are offered (including regional locations). In rare instances, a candidate may be approved to participate in fieldwork and/or clinical experience at a location more than 50 miles from the nearest Azusa Pacific University campus; for a candidate to request consideration for such a placement, they must submit an Academic General Petition (https://www.apu.edu/graduateprofessionalcenter/registrar/forms/) providing a clear rationale as to why it is not possible to complete fieldwork and/or clinical experience at a site within 50 miles of the nearest Azusa Pacific University campus. If an MOU covering the fieldwork and/or clinical experience is not already in place with the requested site, the Academic General Petition must be submitted at least 4 months prior to the semester in which the fieldwork and/or clinical experience is scheduled to occur. When the Academic General Petition is approved, the School of Education will attempt to secure an executed MOU with the requested site, but there is no guarantee that the School of Education will be able to secure an executed MOU. If an MOU covering the fieldwork and/or clinical experience is in place with the requested site and valid throughout the time frame of the fieldwork and/or clinical experience, the Academic General Petition must be submitted at least 8 weeks prior to the semester in which the fieldwork and/or clinical experience is scheduled to occur. An Academic General Petition approved by the department and the School of Education dean’s office, along with an executed MOU, is required before a candidate may begin any fieldwork and/or clinical experience more than 50 miles from the nearest Azusa Pacific University campus.

Certificate of Clearance

Azusa Pacific University requires candidates who are admitted to any program within the School of Education, or to credential programs housed within other schools in the university, to have and maintain a Certificate of Clearance or a valid and current credential for teaching, administration, counseling, school psychology, or nursing from the California Commission on Teacher Credentialing. Candidates who allow their Certificate of Clearance or other clearance document from the California Commission on Teacher Credentialing to expire will be prevented from enrolling in future terms. For more information, contact the Office of Credentials (https://www.apu.edu/education/resources/credentials/) at soecredentials@apu.edu.

Assessment System (Watermark’s™ Student Learning & Licensure)

The School of Education uses Watermark’s™ Student Learning & Licensure assessment system to support the collection and analysis of student outcomes in all degree and credential programs.

All School of Education candidates enrolled in a program leading to an educator credential are required to submit particular assignments and other forms in Watermark’s™ Student Learning & Licensure (often via Canvas submission) by the deadline specified in the course syllabus. Successful evaluation of necessary submissions is required for degree completion and/or recommendation for a credential to the California Commission on Teacher Credentialing (CTC). It is the responsibility of the candidate to ensure that assignments and forms are submitted as indicated in the assessment system.

At the start of a candidate’s first term in the School of Education, instructions on the assessment system will be provided by email. All assessment-system-related inquiries may be sent to soewatermark@apu.edu.

Office of Credentials

The Office of Credentials (https://www.apu.edu/education/resources/credentials/) provides a centralized location in which prospective and current School of Education candidates, faculty, staff, and the community can receive accurate, comprehensive, and complete information and advisement regarding
the requirements involved in obtaining California credentials and certificates authorizing service in California schools. It is the candidate’s responsibility to submit a credential application through the Office of Credentials upon completion of a credential program in order to receive their California educator’s credential. The Office of Credentials also provides credential-related services to subject-matter preparation programs and credential programs offered through the College of Liberal Arts and Sciences (https://www.apu.edu/clas/), the College of the Arts (https://www.apu.edu/arts/), the School of Behavioral and Applied Sciences (https://www.apu.edu/bas/), and the School of Nursing (https://www.apu.edu/nursing/). For more information, email soecredentials@apu.edu.
Department of Educational Leadership

The Department of Educational Leadership (https://www.apu.edu/education/leadership/) offers an EdD in Educational Leadership that prepares scholar-practitioners with the knowledge and skills to make a transformative impact on schools and districts and in the lives of students in them.

Admission

University graduate admission and program-specific requirements must be met before an application is complete (see Admission to the University (p. 1092)). Program-specific application requirements are available online (https://tracking.cirrusinsight.com/74647a2d-e9a2-412f-9b55-9959c7aac4ec/apu-edu-graduateprofessionalcenter-admissions-requirements-program/).

International students should contact Graduate and Professional Admissions (https://www.apu.edu/graduateprofessionalcenter/admissions/) for application procedures.

Program

Doctoral

• Doctor of Education (EdD) in Educational Leadership (p. 738)

Courses

EDL 702, Proseminar in Educational Leadership, 1 Unit
As a required course for all incoming doctoral students in the Educational Leadership program, the proseminar has three primary goals: 1) to orient students to the intellectual life of doctoral study; 2) to provide opportunities for students to become familiar with steps and procedures required for successful completion of the doctoral program, including a plan and timeline for accomplishing major academic and professional milestones; and 3) to introduce students to the technology, tools, and academic resources needed for doctoral study, including use of the Azusa Pacific University library catalog and databases. The proseminar provides an early opportunity for students to prepare for the rigors of doctoral work and to become familiar with the culture and expectations of the Educational Leadership program. All proseminar activities are designed to help students develop connections with each other and with the faculty to create a community of learners and scholars.

EDL 710, Developing the Leader Within, 2 Units
Leadership impact and influence - positive or negative - are greatly related to the skills, values, and principles of the leader. This course will focus on the mental, ethical, psychological, spiritual, and emotional aspects of leadership, both in the context of the literature, as well as through use of various assessments. These will include guided self-reflection and a 360-degree assessment by those within the leader's span of influence. Patterns of leadership failure will also be explored.

EDL 712, Leading Change in Education: Theory to Practice, 3 Units
This course examines leadership, organizational development, and change theories, with particular application to contemporary public K-12 environments - classroom, school, district, state, and national arenas. The emphasis is on the role of leader as change agent within systems and/or organizations, as well as on the impact of change on individuals and communities. Theoretical as well as practical perspectives relative to the nature of leadership are balanced in the context of discussion of the implications for practice. Leadership in the context of organizational culture, communication, motivation, integrity, and change is incorporated throughout the course.

EDL 713, Diversity and Equity in Education, 3 Units
Students examine diversity and equity issues impacting P-12 students, schools, and communities. Relevant theoretical perspectives are explored to help students deepen their knowledge, skills, and dispositions in order to perpetuate or to change cross cultural patterns in schools. The course raises issues related to justice, excellence, and other topics that call for reflection and the student's ability to intervene as needed.

EDL 716, Educational Policy: Analysis, Praxis, and Reform, 3 Units
The purpose of this course is to prepare students to critically analyze, formulate, and implement educational policies and practices that advance the achievement of P-12 students. Theory and praxis aligned to federal, state, local, and district policies will be examined. The impact of historical and current legislative trends, (such as school funding policies, accountability, and certification processes), will be appraised, interpreted, and critiqued. Implications for various student populations will be considered.

EDL 718, Group Dynamics and Conflict, 2 Units
This course is focused on group dynamics and conflict that arise in all work groups. The roles of all individuals within the group, with focus on leadership styles, healthy group conflict, resolving conflict, and techniques for improving group decision making are explored, and ethical and legal issues related to group interventions are discussed.
EDL 719, Special Topics in Educational Leadership, 3 Units
This course will serve as a "contemporary issues" course for the EdD in Educational Leadership, providing an opportunity to focus in depth on issue(s) in the ever-changing field of public K-12 education, incorporating a fieldwork component to enhance integrated learning, drawing from themes of earlier classes in the program. It will take one of two forms: 1) traditional classroom-based course, with a lead faculty and special speakers who provide "real-time" expertise to the particular specialty topic; 2) travel course to look at K-12 educational issues at a state, national, or international level.

EDL 722, Strategic Planning for Educational Systems, 3 Units
This course focuses on the theory and practice of strategic planning in education systems, introducing various approaches to designing and conducting strategic planning processes, including specific techniques for conducting environmental scans, SWOT analyses, strategic issue identification, and strategy formulation. This course includes an embedded fieldwork component.
Prerequisite: EDL 716

EDL 723, Legal Issues and Crisis Management in Schools, 3 Units
This course is designed to prepare students to function as school leaders in the areas of legal issues and crisis management. During this course, students will be introduced to a number of critical legal issues in schools, including suspension and expulsion, manifestation determination, student records, school safety, and privacy, including internet privacy. Students will also explore issues related to school crisis, including crisis planning, crisis teams, crisis response, and district-level and school-level issues. Each student will critique several districts’ crisis plans, and will develop a crisis plan. This course includes an embedded fieldwork component.

EDL 724, Ethical Leadership in Education, 3 Units
Students examine ethical dilemmas of leadership within contemporary educational institutions and the context of the communities they serve. The role and function of integrity, justice, fairness, and courage in leadership are examined within public and nonpublic school settings. Ethical dilemmas encountered by students in their leadership roles are explored using case study research methodologies, and evaluated in terms of value claims, propositions, and beliefs of contemporary philosophies and a Christian perspective of truth and life. Personal ethics are studied in terms of integrity in pursuing one's own sense of destiny and "calling" in the leadership roles assumed.

EDL 760, Dissertation Milestone: Proposal A - Nature of Inquiry and Chapter 1, 2 Units
This course offers students an opportunity to begin exploring key aspects of the research process: question formulation, literature search and review, research design, data collection and analysis, drawing conclusions, and identifying implications. Students are given the opportunity to enhance their skills in locating and evaluating the literature of the field, exploring scholarly writing and identifying possible dissertation topics. Upon successful completion of the course, students have an initial draft of the introduction (Chapter 1) of the proposal.

EDL 761, Introduction to Educational Research, 2 Units
This course introduces quantitative and qualitative research designs. Students examine the role of theory and research, and their applications to practice in education. Statistical concepts, such as hypothesis testing, and basic descriptive and inferential statistics, are presented in relation to quantitative research designs. Students experience hands-on computer applications with SPSS software. Qualitative approaches to research are also explored, through reading and evaluating empirical research.

EDL 762, Quantitative Inquiry in Education, 3 Units
This course introduces students to quantitative inquiry methods and applications of statistical procedures to practical educational research problems. Emphasis is placed on inferential and univariate statistics and various multivariate analysis techniques such as multiple regression, factorial ANOVA, multivariate ANOVA, and repeated measures. Students develop an understanding of the relationship between statistics and research design and learn to choose and apply the most appropriate statistical procedures in correlational and experimental studies.
Prerequisite: EDL 761

EDL 767, Qualitative Inquiry in Education, 2 Units
This course introduces the perspectives, purposes, designs, analysis, interpretation, and reporting of qualitative research in the field of education through reading and discussion of exemplifying articles. Ethnography, phenomenology, narrative inquiry, case study, grounded theory, and qualitative evaluation studies are among the designs examined. The data collection methods of observation, interviewing, and document analysis are studied and practiced.
Prerequisite: EDL 761

EDL 768, Methods of Data Collection and Analysis, 2 Units
The course addresses methods of data collection and analysis procedures for quantitative and qualitative research. Probability and non-probability samplings and purposive sampling, instrument designs will be discussed. Data analysis methods will be practiced.
Prerequisite: EDL 762, EDL 767
EDL 769, Program Evaluation in Education: Assessment for Decision Making, 3 Units
This course introduces the skills and knowledge of the field of program evaluation, and their application to educational programs. In addition to understanding and identifying the issues and problems that threaten validity and reliability in program evaluations, students learn to be thoughtful consumers of evaluations and produce their own evaluation design. While theory guides the discussion of issues, emphasis is placed on application to good practice. Students produce a brief literature review, design and execute a program evaluation, and report the decision(s) based on the findings. This course includes an embedded fieldwork component.
Prerequisite: EDL 762, EDL 767

EDL 770, Dissertation Milestone: Proposal B, 1 Unit
This course helps students continue to formulate research concepts while conferring with their dissertation chairs to develop the initial chapters of the proposals.
Prerequisite: EDL 761

EDL 771, Dissertation Milestone: Proposal C, 2 Units
This course facilitates the completion of the literature review for students’ dissertation topics, building on academic writing skills and higher-level critical thinking skills required for educational research, including analysis, synthesis, and evaluation of existing scholarly literature. Upon successful completion of this course, students have an initial draft of the dissertation literature review (Chapter Two).
Prerequisite: EDL 770

EDL 772, Dissertation Milestone: Finalizing the Proposal, 2 Units
This course serves as a checkpoint assessment of student readiness to complete the dissertation. Emphasis is on finalizing a well-designed dissertation proposal draft that establishes the conceptual and methodological basis for their research, with clear alignment between the research questions, scholarly literature, and methodology. A draft of the IRB application is also developed within this course.
Prerequisite: EDL 771

EDL 773, Dissertation Milestone: Data Collection, 1 Unit
The purpose of this course is to assist students in collecting research data with tests, self-report measures, questionnaires, interviews, observations, documents, or audio-visual materials. Emphasis is placed on enhancing the quality and credibility of the qualitative data and building the validity and reliability of the quantitative data. Upon successful completion, students will have collected the data that they proposed. This course can be repeated in the following semester if data collection is not completed.
Prerequisite: EDL 772

EDL 774, Dissertation Milestone: Data Analysis, 1 Unit
This course is designed to guide and enable students to engage in data analysis processes for their dissertation. During the course students will work with their dissertation committee and meaningfully analyze the qualitative and quantitative data collected. Upon completion, students will have prepared and analyzed the data they have collected using appropriate measures and techniques.
Prerequisite: EDL 773

EDL 776, Dissertation Milestone: Results, Discussion, and Conclusion, 2 Units
The purpose of this course is to guide students in providing an in-depth interpretation, analysis, and synthesis of the dissertation results. During this course students will work with their committee members to explore their dissertation findings in light of the study's research questions, literature review, and conceptual framework. Emphasis will be placed on providing students an opportunity to reflect thoroughly on the study’s findings and the practical and theoretical implications. Upon completion, students will have developed their Findings (Chapter 4), Discussion of Findings and Conclusion (Chapter 5) toward completion of the dissertation.
Prerequisite: EDL 774

EDL 777, Dissertation, 2 Units
After completing all other program coursework requirements, Ed.D. students work with their dissertation committee in conducting a doctoral-level research project in educational leadership. Students enroll for two units of dissertation credit and must reenroll each semester until the dissertation is completed and successfully defended, APA edits are completed, and the dissertation is submitted for library review and publication.
Prerequisite: EDL 776

EdD in Educational Leadership

For more information: (626) 815-5374

Azusa Pacific University’s EdD in Educational Leadership (https://www.apu.edu/education/programs/doctor-in-educational-leadership/) is a practitioner-based program that places emphasis on applied research that results in direct, positive change in K-12 settings. The program prepares scholar-practitioners who are equipped with the knowledge and skills to make a transformative impact on schools and districts and the lives of students in them.

Mission Statement

The EdD in Educational Leadership program at APU, a Christ-centered university, enables culturally aware K-12 leaders to implement research-based practices as change agents.

Program Requirements

Students must complete 51 units of coursework, and successfully complete the written dissertation, oral defense, and required corrections as well as a public dissertation presentation.

Grading and Grade-Point Average (GPA)

Throughout higher education, and particularly at the doctoral level, commitment to learning should outweigh the pursuit of grades. Nonetheless, grading and grade point average continue to play a crucial role in students’ studies. For doctoral students, the grade of B- is considered minimally acceptable. Courses graded lower than B- are not applied toward doctoral degree requirements and must be repeated.

A doctoral student must maintain a minimum cumulative GPA of 3.0 in 700-level courses and receive no grade lower than B- in 700-level courses. Courses graded lower than B- are not applied toward doctoral degree requirements and must be repeated. A cumulative GPA lower than 3.0 or the receipt of a grade lower than B- in 700-level courses will result in the student being placed on probation. A doctoral student who is on probation for more than a total of two terms throughout his or her doctoral study may be dismissed from the program. Probation and dismissal actions are posted on a student’s transcript.

A doctoral student whose grade point average falls in the range of 3.0-3.2 is required to meet with his/her advisor to identify academic skills that may need strengthening and to take appropriate action.

Other Degree Requirements

Advancement to Candidacy

Following approval of the dissertation proposal by the dissertation committee, doctoral students are advanced to candidacy status.

Dissertation

Doctoral students are required to complete a dissertation, the standards and procedures for which are defined by program faculty in keeping with the APU Style and Format Handbook for Dissertation and Thesis Publications. To be approved for a dissertation defense date, students must complete all requisite coursework, including EDL 776, and have the approval of their dissertation committee. Continuous enrollment in EDL 777 is required until the dissertation is successfully defended and submitted to an APU external reader.

After candidates successfully defend their dissertation in a meeting with their faculty committee, they must complete required corrections and submit the approved changes to an APU external reader. The final step of the dissertation requirement is to participate in a scheduled public presentation of the research to the department.

Doctoral students who have completed all program requirements; successfully defended, published, and presented their dissertation; and fulfilled all obligations of the university will have their doctoral degree posted and will be entitled to use the term “doctor.”

Continuous Progress

In order to receive credit for EDL 772, EDL 773, EDL 774, EDL 776, and EDL 777, doctoral candidates must maintain active student status and make continuous progress toward completion of the dissertation. Continuous progress of doctoral candidates is assessed each term on all of the following expectations:

• maintaining regular contact with the dissertation chair;
• conducting research and/or submitting high-quality drafts in a timely manner, consistent with the timeline established with the dissertation committee.

Candidates who require additional time to complete the dissertation after other coursework is complete must maintain continuous enrollment in EDL 777. Those who receive NC for EDL 777 will need to submit a report on their progress in candidacy and will enter into a probationary period for one term. Candidates who fail to maintain progress after a probationary period may be recommended for termination from the program.

Leaves of Absence

Students in good standing and making satisfactory progress toward their degrees who must interrupt their studies for a compelling reason (e.g., illness, study away, family conditions, or crises) may petition for a leave of absence for a stated period of time not to exceed two years. Requests for a leave must be in writing and state the reasons for the leave and the term in which the student will reenroll. Leaves of absence must be approved by the chair of the Department of Educational Leadership and the dean of the School of Education in advance of the term for which the leave is requested.

Students who fail to return to enrolled status at the end of an approved period of leave, or after three consecutive terms of nonenrollment (e.g., fall, spring, and summer semesters), will be considered no longer in pursuit of an advanced degree and must reapply for admission. If readmitted at a later date, students must meet any new program requirements.

Degree Completion Time

Doctoral students are permitted six years from the date of initial enrollment to complete all requirements for the EdD degree. Extensions beyond the six-year limit may be granted at the discretion of the department chair and the dean of the School of Education. Students needing an extension due to
unusual circumstances must make their request in writing, stating the reason(s) for the extension, a timetable for completion of requirements, and the expected date of degree completion.

**Admission**

University graduate admission and program-specific requirements must be met before an application is complete (see Admission to the University (p. 1092)). Program-specific application requirements are available online ([https://tracking.cirrusinsight.com/74647a2d-e9a2-412f-9b55-959c7aaec4ec/apu-edu-graduateprofessionalcenter-admissions-requirements-program/](https://tracking.cirrusinsight.com/74647a2d-e9a2-412f-9b55-959c7aaec4ec/apu-edu-graduateprofessionalcenter-admissions-requirements-program/)).

International students should contact Graduate and Professional Admissions ([https://www.apu.edu/graduateprofessionalcenter/admissions/](https://www.apu.edu/graduateprofessionalcenter/admissions/)) for application procedures.

**Application Deadlines**

Completed applications with all supporting documentation must be received by one of the following deadlines:

- Priority deadline: May 1 (apply by this date to receive full consideration for scholarships)
- Regular deadline: June 1

**Interview**

Upon invitation, doctoral applicants interview with at least two members of the doctoral faculty. The purpose of the interview is to meet the applicant, discuss education and career goals, evaluate the match of the program to the applicant, and determine the applicant’s potential for success in the program.

**Admission Decisions**

Program applicants must meet department and university criteria for admission. The department reserves the right to offer conditional admission to students who do not meet all the admission criteria. In such cases, the requirements necessary for full admission and the time limit for completing them will be stated in writing. Failure to meet these requirements may result in dismissal from the program.

**Computer Requirement**

Students must own or have ready access to a computer during their tenure in the program. The SPSS statistical software package is required of students in their research courses throughout the program. The Campus Store ([https://bookstore.apu.edu](https://bookstore.apu.edu)) makes arrangements to enable students to purchase computers and software at economical rates on convenient terms. Often, the required purchase of the laptop and software can be budgeted into student loans. For more information, contact the Graduate and Professional Student Financial Services office ([https://www.apu.edu/graduateprofessionalcenter/sfs/](https://www.apu.edu/graduateprofessionalcenter/sfs/)) at (626) 815-2020.

**Study Load**

The three-year, dissertation-embedded EdD program is a full-time commitment requiring continuous full-time enrollment. To maintain the appropriate course sequence, doctoral students must enroll in all courses designated for each academic term. Requests to enroll for fewer units than designated are approved only in specific circumstances. Any leave of absence will be in a one-year increment and will require stopping out until the following year, when the next course sequence is offered.

**Residence Requirement**

Doctoral students must meet a residency requirement by completing a minimum of 41 units toward the doctoral degree at APU.

**Transfer Units**

Doctoral students may transfer up to 10 units of coursework with a grade of B or higher from another regionally accredited doctoral program. Official transcripts and syllabi must be submitted to the program director, who will determine the courses that successfully transfer.

**Schedule**

The program requires a full-time, year-round commitment (fall, spring, and summer). Face-to-face classes are held six Saturdays per 16-week term in both fall and spring, and four Saturdays during the 8-week summer term, with additional instruction provided online. Check with the program office to determine meeting dates and times.

**Advisement**

During the first semester of the doctoral program, students enroll in a 1-unit proseminar course that serves as an orientation and initial advising into the program. The proseminar has three primary goals: 1) to orient students to the intellectual life of doctoral study; 2) to provide opportunities for students to become familiar with steps and procedures required for successful completion of the doctoral program, including a plan and timeline for accomplishing major academic and professional milestones; and 3) to introduce students to the technology, tools, and academic resources needed for doctoral study,
including use of the Azusa Pacific University library catalog and databases. All prosemia activities are designed to help students develop connections with each other and with the faculty to create a community of learners and scholars.

Upon successful completion of the first semester, and once a student begins dissertation work, the dissertation chair serves as the primary academic advisor for the remainder of the student’s time in the program.

Financial Aid

Federal Stafford loans and personal bank loans are available to all eligible graduate students through the student financial services office in the Student Services Center (https://www.apu.edu/graduateprofessionalcenter/). Students are advised to contact that office early in the admissions process.

The School of Education offers multiple scholarships (https://www.apu.edu/education/scholarships/), including the following opportunities exclusively for doctoral students:

Lillian B. Wehmeyer Scholarship Endowment

This scholarship is in memory of the late Lillian B. Wehmeyer, PhD, former faculty in the School of Education doctoral program, who lived with a passion for assisting doctoral students in successful research. The Lillian B. Wehmeyer Scholarship (https://www.apu.edu/graduateprofessionalcenter/sfs/financialaid/types/scholarships/education/#lillianbwehmeyerscholarship) assists doctoral program students in the School of Education who demonstrate satisfactory academic progress, commitment to service, and financial need.

EdD Program Scholarship

Azusa Pacific University offers competitive scholarship support to newly admitted doctoral students who demonstrate outstanding leadership qualities or leadership potential in K-12 education and who are committed to serving under-resourced schools and districts. Priority is given to current practitioners who are leading their schools and districts toward improved performance. Admitted applicants are considered for these awards based on an overall assessment of their admission application. No separate application required. This scholarship is renewable and may be received for a total of three years. Continuous enrollment, good academic standing (minimum 3.5 GPA), and employment in K-12 education are required for annual award renewal.

Program Learning Outcomes

Program Learning Outcomes

Students who successfully complete this program shall be able to:

1. Values-Driven Leader: Exemplify professional ethics and personal integrity, articulate core values for self and organization, and lead with Christian values and principles that honor the worth of all individuals.

2. Change Agent: Set clear goals and direction, analyze current practices, and make sound decisions about what to change, and appropriately monitor change efforts.

3. Effective Communication: Write accurately and coherently, following APA format, and present data in user-friendly format to various constituent groups.

4. Problem Identification: Formulate a research question and identify significant questions and impact.

5. Data Collection and Analysis: Conduct literature searches, evaluate research literature, and synthesize existing information; design research, select appropriate research tools, collect and analyze data, and communicate findings.

6. Apply Research to Practice: Critically evaluate research and use research evidence to inform practice.
Department of School Counseling and School Psychology

The Department of School Counseling and School Psychology (https://www.apu.edu/education/counselingpsych/) offers adult learners academic and practical preparation for careers in school counseling and school psychology. The department provides coursework and supervises fieldwork leading to the Master of Arts in Education: Educational Counseling; the Master of Arts in Education: Educational and Clinical Counseling; the Educational Specialist in School Psychology with Embedded Master of Arts in Education: Educational Psychology; the Educational Specialist in School Psychology: Clinical and Educationally Related Mental Health Counseling with Embedded Master of Arts in Education: Educational Psychology; and the Educational Specialist in School Psychology: Applied Behavior Analysis with Embedded Master of Arts in Education: Educational Psychology. In addition, the department offers a credential-only program for those who hold a master’s degree and PPS Credential in School Counseling and wish to seek an additional PPS Credential in School Psychology, or vice versa. The department also offers an Applied Behavioral Analysis specialization (BCBA Certificate) and a Clinical and Educationally Related Mental Health Counseling specialization.

Student Dispositional Expectations

All candidates in the Department of School Counseling and School Psychology will be evaluated on their professional attitudes, values, and beliefs demonstrated through both verbal and nonverbal behaviors as educators interact with students, families, colleagues, and communities. These positive behaviors support student learning and development. All candidates will be evaluated by faculty with regard to student dispositions throughout their program; any candidate who does not meet minimal expectations with regard to student dispositions will be required to meet with the department chair or the chair’s designee to develop an improvement plan. Students who fail to meet the remedial dispositional requirements will be evaluated for fitness to practice in the profession.

Programs

School Counseling

- Master of Arts in Education: Educational Counseling with Embedded Pupil Personnel Services Credential in School Counseling (p. 750)
- Master of Arts in Education: Educational and Clinical Counseling with Embedded Pupil Personnel Services Credential in School Counseling (p. 752)
- PPS: School Counseling Credential (p. 754)

School Psychology

- Educational Specialist in School Psychology with Embedded Master of Arts in Education: Educational Psychology and Pupil Personnel Services Credential in School Psychology (p. 756)
- Educational Specialist in School Psychology: Clinical and Educationally Related Mental Health Counseling with Embedded Master of Arts in Education: Educational Psychology and Pupil Personnel Services Credential in School Psychology (p. 763)
- Educational Specialist in School Psychology: Applied Behavior Analysis with Embedded Master of Arts in Education: Educational Psychology and Pupil Personnel Services Credential in School Psychology (p. 759)
- PPS: School Psychology Credential (p. 767)

Certificate

- Applied Behavioral Analysis Specialization (BCBA Certificate) (p. 767)

Courses

ABA 500, ABA Fieldwork I, 1 Unit

This course is a companion to the first four courses in the seven-course sequence that fulfills the coursework requirement to become a Board Certified Behavior Analyst (BCBA). This course includes 200 hours of supervised fieldwork. Students must find a mentor willing to supervise their fieldwork hours. While a BCBA mentor is preferred, for the purpose of this class students may also be supervised by a behavior intervention case manager (BICM), behavior specialist, or a school psychologist with at least five years of experience of designing behavior intervention plans (BIPs) and/or behavior support plans (BSPs) and completing functional behavioral assessments (FBAs).

Prerequisite: ABA 503

ABA 503, Theory and Philosophy of Behavior Analysis, 3 Units

This is the third of seven courses that fulfill the coursework requirement to become a Board Certified Behavior Analyst (BCBA). This course focuses on the philosophical underpinnings of behaviorism and examines the theoretical foundations of the science of behavior analysis. Students examine the theoretical assumptions associated with behavior analysis as a philosophy of science and relate them to current applications.

Prerequisite: ABA 505
ABA 504, Single-Case Designs: Measurement and Experimental Evaluation of Behavior, 3 Units
This is the second of seven courses that fulfill the coursework requirement to become a Board Certified Behavior Analyst (BCBA). Students are introduced to single-subject design and learn how to collect, display, analyze, and interpret data using continuous and discontinuous measures.
Prerequisite: ABA 503 (may be taken concurrently)

ABA 505, Foundations In Applied Behavior Analysis, 3 Units
This is the first of seven courses that fulfill the coursework requirement to become a Board Certified Behavior Analyst (BCBA). This course focuses on concepts and principles from the field of applied behavior analysis. Topics include characteristics of ABA, basic principles of behavior, positive and negative reinforcement, positive and negative punishment, extinction, schedules of reinforcement, functions of behavior, motivating operations, stimulus control, and verbal behavior.

ABA 510, ABA Fieldwork II, 1 Unit
This is a companion to the last three courses in the seven-course sequence that fulfills the coursework requirement to become a Board Certified Behavior Analyst (BCBA), and includes 200 hours of supervised fieldwork. Students must find a mentor willing to supervise their fieldwork hours; while a BCBA mentor is preferred, for the purpose of this course students may also be supervised by a behavior intervention case manager (BICM), behavior specialist, or a school psychologist with at least five years of experience designing behavior intervention plans (BIPs) and/or behavior support plans (BSPs) and completing functional behavioral assessments (FBAs).
Prerequisite: ABA 500

ABA 514, Functional Behavior Assessment in Applied Settings, 3 Units
This is the fifth of seven courses that fulfill the coursework requirement to become a Board Certified Behavior Analyst (BCBA). This course focuses on the functional behavior assessment process, which includes descriptive assessment (review of records, interview, observation, interpretation), functional analysis, and developing intervention plans.
Prerequisite: ABA 503, ABA 504, ABA 505, ABA 515

ABA 515, Behavior Intervention, 3 Units
This is the fourth of seven courses that fulfill the coursework requirement to become a Board Certified Behavior Analyst (BCBA). This course focuses on the identification, selection, and implementation of the procedures, systems, and considerations of behavior change methods from the perspective of applied behavior analysis.
Prerequisite: ABA 503, ABA 504, and ABA 505 (ABA 503 may be taken concurrently)

ABA 524, Ethics in Applied Behavior Analysis, 3 Units
This is the last of seven courses that fulfill the coursework requirement to become a Board Certified Behavior Analyst (BCBA). This course focuses on ethical considerations inherent to the field of applied behavior analysis and covers the professional and ethical compliance code for behavior analysts.

ABA 534, Organizational Behavior Management, 3 Units
This is the sixth of seven courses that fulfill the coursework requirement to become a Board Certified Behavior Analyst (BCBA). This course focuses on using data-informed procedures for personnel management and supervision. Students gain knowledge and expertise in approaches to staff training, client outcomes, and personnel management that utilize organizational behavior management (OBM) techniques grounded in applied behavior analysis.
Prerequisite: ABA 503, ABA 504, ABA 505, ABA 515, ABA 514 (ABA 514 may be taken concurrently)

EDCO 528, Community, Family, and School Collaboration, 3 Units
Students build awareness of comprehensive models for forming partnerships or collaborations between schools/districts and community stakeholders to strengthen school improvement and reform efforts. The course investigates the importance of parent and community involvement in children’s education from birth through high school, including an overview of exemplary parent involvement programs; resources for family involvement activities and programs; knowledge of existing and possible partnerships between schools/districts and public/private community representatives including mental health, government, advocacy and law enforcement agencies; and knowledge of district/school programs that support student achievement through academics and mental health to support school/community collaborations.

EDCO 533, Counseling Theories and Techniques, 3 Units
Students in this course examine the varied counseling theories and techniques needed by school counselors and mental health counselors in a variety of counseling roles and functions. The focus is on exploring counseling theories to assist in selection of appropriate counseling interventions, studying the models of counseling consistent with current professional research and practice, and the development of a personal model of counseling. Each student must demonstrate knowledge of how school and mental health counseling programs and services promote client development, learning, and achievement in diverse populations within the context of professional ethics. Concepts, attitudes, and values of the counselor that most influence the counseling relationship and outcome are explored. A holistic, ecosystemic model for viewing counseling issues, the community, and the understanding of family processes is studied, with a focus on acquiring knowledge and practicing skills related to individual and group counseling within a multicultural context.
EDCO 534, Assessment, Measurements, and Testing of Individuals, 3 Units
Students in this course learn to understand and interpret measurement techniques and state and national assessments that are used in public schools at all grade levels. Course content includes the role of measurement and assessment in pupil personnel services, test validity and reliability, portfolios, assessment procedures, special education testing, interpreting test data, and elementary statistics. Emphasis is on helping school counselors and other educators use measurement and assessment data to promote positive programs and outcomes for students.

EDCO 535, Professionalism, Ethics, and Law, 3 Units
This course provides an ethical and legal background for use by school counselors and school psychologists as they assume their duties in the public school system. Candidates gain familiarity with state and federal provisions and school district policies pertaining to rights and responsibilities related to schooling, as well as professional ethics. The implications and legal applications of due process and the legal requirements that determine and protect pupil rights are emphasized.

EDCO 545, Positive Behavior Supports and Classroom Intervention, 3 Units
This course focuses on multi-tiered systems of support in the areas of behavior and social emotional skills. Students learn about positive behavioral interventions and supports at the various levels, including the assessment of behavior and the development and implementation of behavior intervention plans. Consultation and collaboration within the educational environment is emphasized.

EDCO 549, Career Development Theories and Techniques, 3 Units
This course orient students to occupational and career education trends, theories, and practices that ensure that all pupils receive equitable guidance that transcends cultural and gender stereotypes and is reflective of national standards. This includes computer-based technology, data management systems, and data-based research that supports career development services. Course material prepares students for postsecondary planning, enabling them to help pupils meet college entrance criteria, navigate admissions procedures, and gain access to financial aid information.

EDCO 550, Crisis/Trauma Response and Interventions, 3 Units
Culturally appropriate crisis theory and counseling related techniques and methods for developing and maintaining a peaceable school environment, and for the prevention, intervention and postvention of such factors in school such as crisis, trauma, violence, gang activity, bullying, conflict, depression, suicide, alcohol and substance abuse, and sexual harassment will be examined within an ecosystemic context. A multidisciplinary response to crises, emergencies, or disasters will be explored while examining the cognitive, affective, behavioral, and neurological effects associated with trauma, brief, intermediate and long-term approaches, assessment strategies for individuals in crisis.

EDCO 555, Group Counseling Skills, 3 Units
This course provides a combination of history, theory, techniques and applications pertaining to the group counseling processes. Training requirements include the practice and demonstration of group techniques. Students observe, participate, and conduct a personal growth group composed of class members and observed by an experienced group supervisor.

EDCO 557, Human Growth, Development, and Learning, 3 Units
Taking an ecosystemic perspective, this course exposes the student to the transactions between biological, psychosocial, cultural, and environmental factors affecting human growth, development, and learning from conception through adolescence. The focus is on the student's achievement of the integrated, holistic, and multicultural understanding, and emphasizes the application of theory to real life situations and problems.

EDCO 560, School Counseling Fieldwork I, 4 Units
This course provides students with firsthand, supervised school counseling experience. Each student is involved in on-site experiences that include application of theory to counseling and consultation, and practice counseling with individuals, groups, families, children, adolescents, and special education populations. Students must complete 400 fieldwork hours to earn credit.

Prerequisite: EDCO 533, EDCO 535, EDCO 550, EDCO 557, EDCO 575

EDCO 561, School Counseling Fieldwork II, 4 Units
This course provides students with firsthand, supervised school counseling experience. Each student is involved in on-site experiences that include application of theory to counseling and consultation, and practice counseling with individuals, groups, families, children, adolescents, and special education populations. Students must complete 400 fieldwork hours to earn credit.

Prerequisite: EDCO 533, EDCO 535, EDCO 550, EDCO 557, EDCO 575, EDCO 560

EDCO 564, School Counseling Fieldwork I, 3 Units
This course provides each student with firsthand, supervised pupil personnel experience. Each student is involved in on-site experiences that include application of theory to counseling and consultation practice with individuals, groups, families, children, adolescents, and exceptional and nonexceptional pupils.

Prerequisite: EDCO 528, EDCO 533, EDCO 535, EDCO 545, EDCO 550, EDCO 555, EDCO 575, EDCO 592

EDCO 568, School Counseling Fieldwork II, 3 Units
This course provides each student with firsthand, supervised pupil personnel experience. Each student is involved in on-site experiences that include application of theory to counseling and consultation practice with individuals, groups, families, children, adolescents, and exceptional and nonexceptional pupils.

Prerequisite: EDCO 528, EDCO 533, EDCO 535, EDCO 545, EDCO 550, EDCO 555, EDCO 575, EDCO 592
EDCO 571, Introduction to Clinical Practice: Basic Skills, 3 Units
This course introduces the student to basic skills in attending behavior, clinical interviewing and clinical intervention. It is designed to stimulate self-awareness as related to the therapeutic relationship, as well as the integration of spirituality and the interpersonal process. Coursework includes reading, observation, role-play and student audio/videotaped clinical practice explores differential diagnosis, the use of current diagnostic tools, such as the DSM 5, and the treatment modalities and placement criteria within the continuum of care.
Prerequisite: EDCO 575

EDCO 572, Psychobiology and Psychopharmacology, 3 Units
This course presents the fundamentals of psychopharmacology, including the biochemical foundation of human behavior, the use of psychotropic medication in the treatment of specific mental disorders, and effective case management. It features an introduction to basic neurobiology, the historical underpinnings of field, the effects of psychotropic medication, specific drug classes and their use in relation to DSM-5, diagnoses, and special consideration for specific populations (e.g., individuals with a history a substance abuse, children). Students learn how to monitor their clients' use of psychotropic medication, when to make a referral for psychiatric evaluation, and how to work successfully with other mental health professionals in the delivery of ethical, effective counseling services.

EDCO 573, Addictions, Assessment, and Interventions, 3 Units
This course provides an introduction to the field of addictions and compulsive behaviors, including substance abuse and substance abuse treatment. The course emphasizes assessment and intervention skills, processes, evidence-based research relevant to treatment and available resources. The nature and scope of addictions are defined, DSM-5 criteria for disorders are reviewed, and unique issues relative to faith, children/adolescents, persons with disabilities and other issues of diversity are considered.

EDCO 574, Introduction to Clinical Practice: Advanced Skills, 3 Units
This course is designed to develop the psychotherapeutic tools of students prior to their entry into a clinical placement. Students focus on developing proficiency in the core interviewing qualities, deriving goals for a clinical session, and in making contracts with clients for change. Coursework includes reading, observation, role-play, and student videotaped clinical practice. Coursework also explores differential diagnosis, the use of current diagnostic tools, application of the DSM 5, and the treatment modalities and placement criteria within the continuum of care. Additionally, students are encouraged to begin developing a theoretical and conceptual understanding of cases, and training to work with diverse populations. Students are also encouraged to address issues regarding the integration of their faith with the practice of psychotherapy. These goals are addressed through experiential learning, lecture, readings, discussion, and reflection.
Prerequisite: EDCO 571

EDCO 575, Clinical Practica, 3 Units
This course is designed to provide candidates with an in-the-field counseling experience that provides development of counseling skills and application of theoretical concepts in an educational clinical setting to enhance self-confidence as practicing professional counselors; and includes providing educational, personal, or career counseling, as well as shadowing an experienced educational counselor. This course requires candidates verify 100 practicum hours under supervision from faculty and site supervisors. Special topics of discussion will also include Human Sexuality, Aging and long-term care, child abuse assessment & reporting, spousal or partner abuse.
Prerequisite: EDCO 533

EDCO 576, Sociocultural Competence, 3 Units
School counselors require an awareness of, and sensitivity to, the social and cultural diversity of the various ethnic groups represented in the districts and communities in which they serve. Everyday issues from levels of family-school involvement to communication to body language can take on new meaning when cultural origins are considered. This course helps students develop a multicultural perspective as they develop awareness of their own cultures, the nuances of other cultures, and counseling considerations and perspectives when working with individuals from diverse social and cultural backgrounds.

EDCO 580, School Counseling Internship I, 4 Units
This course provides students with firsthand, supervised school counseling experience. Each student is involved in on-site experiences that include application of theory to counseling and consultation, and practice counseling with individuals, groups, families, children, adolescents, and special education populations. Students must complete 400 internship hours to earn credit.
Prerequisite: EDCO 533, EDCO 535, EDCO 550, EDCO 557, EDCO 575

EDCO 581, School Counseling Internship II, 4 Units
This course provides students with firsthand, supervised school counseling experience. Each student is involved in on-site experiences that include application of theory to counseling and consultation, and practice counseling with individuals, groups, families, children, adolescents, and special education populations. Students must complete 400 internship hours to earn credit.
Prerequisite: EDCO 533, EDCO 535, EDCO 550, EDCO 557, EDCO 575, EDCO 580

EDCO 587, School Counseling Professionalism, 3 Units
This course is an orientation to the concepts and procedures that define and encompass pupil personnel management systems, including the ethics that guide the coordination and supervision of comprehensive counseling and guidance in multicultural school settings. Standards of professionalism that support successful leadership are incorporated into the instruction.
EDCO 592, Foundations in Research, 3 Units
Students learn to assess, evaluate and apply information resources in preparing a literature review pertinent to a controversial topic in education. They employ database search strategies to identify empirical articles pertinent to the assigned topic. They learn to succinctly summarize articles and discern trends in the professional literature.

EDCO 593, Historical Development of School Counseling and School Psychology, 3 Units
This course provides an historical overview of the professions of school psychology and counseling, and their philosophical and practical contributions to the field of education.

EDCO 594, School Counseling Internship 1, 3 Units
(300 hours) Students enrolled in this fieldwork course are under a paid internship with their school district. In this course students will receive exposure to individual differences, involvement with testing and case studies, participation in parent conferences and IEP/E and P meetings, and provision of counseling and/or consultation as appropriate to students, staff, and parents.

EDCO 595, School Counseling Internship 2, 3 Units
(300 hours) Students enrolled in this fieldwork course are under a paid internship with their school district. This course provides each student with firsthand, supervised pupil personnel experience. Each student is involved in on-site experiences that include application of theory to counseling and consultation practice with individuals, groups, families, children, adolescents, and exceptional and nonexceptional pupils.

EDCO 599, Readings in Educational Counseling, 1-3 Units
Consists of a program of study concentrating on assigned readings, discussions, field experiences, and/or writing arranged between, and designed by, a student and a full-time professor. An independent study fee is assessed for each enrollment in this class.

EDPY 528, Community, Family, and School Collaboration, 3 Units
Students build awareness of comprehensive models for forming partnerships or collaborations between schools/districts and community stakeholders to strengthen school improvement and reform efforts. The course investigates the importance of parent and community involvement in children's education from birth through high school, including an overview of exemplary parent involvement programs; resources for family involvement activities and programs; knowledge of existing and possible partnerships between schools/districts and public/private community representatives including mental health, government, advocacy and law enforcement agencies; and knowledge of district/school programs that support student achievement through academics and mental health to support school/community collaborations.

EDPY 533, Counseling Theories and Techniques, 3 Units
Students in this course examine the varied counseling theories and techniques needed by school counselors and mental health counselors in a variety of counseling roles and functions. The focus is on exploring counseling theories to assist in selection of appropriate counseling interventions, studying the models of counseling consistent with current professional research and practice, and the development of a personal model of counseling. Each student must demonstrate knowledge of how school and mental health counseling programs and services promote client development, learning, and achievement in diverse populations within the context of professional ethics. Concepts, attitudes, and values of the counselor that most influence the counseling relationship and outcome are explored. A holistic, ecosystemic model for viewing counseling issues, the community, and the understanding of family processes is studied, with a focus on acquiring knowledge and practicing skills related to individual and group counseling within a multicultural context.

EDPY 535, Professionalism, Ethics, and Law, 3 Units
This course provides an ethical and legal background for use by school counselors and school psychologists as they assume their duties in the public school system. Candidates gain familiarity with state and federal provisions and school district policies pertaining to rights and responsibilities related to schooling, as well as professional ethics. The implications and legal applications of due process and the legal requirements that determine and protect pupil rights are emphasized.

EDPY 545, Positive Behavior Supports and Classroom Intervention, 3 Units
This course focuses on multi-tiered systems of support in the areas of behavior and social emotional skills. Students learn about positive behavioral interventions and supports at the various levels, including the assessment of behavior and the development and implementation of behavior intervention plans. Consultation and collaboration within the educational environment is emphasized.

EDPY 549, Career Development Theories and Techniques, 3 Units
This course orients students to occupational and career education trends, theories, and practices that ensure that all pupils receive equitable guidance that transcends cultural and gender stereotypes and is reflective of national standards. This includes computer-based technology, data management systems, and data-based research that supports career development services. Course material prepares students for postsecondary planning, enabling them to help pupils meet college entrance criteria, navigate admissions procedures, and gain access to financial aid information.
EDPY 550, Crisis/Trauma Response and Interventions, 3 Units
Culturally appropriate crisis theory and counseling related techniques and methods for developing and maintaining a peaceable school environment, and for the prevention, intervention and postvention of such factors in school such as crisis, trauma, violence, gang activity, bullying, conflict, depression, suicide, alcohol and substance abuse, and sexual harassment will be examined within an ecosystemic context. A multidisciplinary response to crises, emergencies, or disasters will be explored while examining the cognitive, affective, behavioral, and neurological effects associated with trauma, brief, intermediate and long-term approaches, assessment strategies for individuals in crisis.

EDPY 555, Group Counseling Skills, 3 Units
This course provides a combination of history, theory, techniques and applications pertaining to the group counseling processes. Training requirements include the practice and demonstration of group techniques. Students observe, participate, and conduct a personal growth group composed of class members and observed by an experienced group supervisor.

EDPY 556, Academic Assessment and Intervention, 2 Units
This course examines the foundations of curriculum-based measurement, evidence-based interventions, progress monitoring, and response to intervention. Students learn problem-solving skills in the identification and prevention of skill deficits, development of goals based on assessment data, progress monitoring, and determining the responsiveness to intervention.

EDPY 557, Human Growth, Development, and Learning, 3 Units
Taking an ecosystemic perspective, this course exposes the student to the transactions between biological, psychosocial, cultural, and environmental factors affecting human growth, development, and learning from conception through adolescence. The focus is on the student’s achievement of the integrated, holistic, and multicultural understanding, and emphasizes the application of theory to real life situations and problems.

EDPY 571, Introduction to Clinical Practice: Basic Skills, 3 Units
This course introduces the student to basic skills in attending behavior, clinical interviewing and clinical intervention. It is designed to stimulate self-awareness as related to the therapeutic relationship, as well as the integration of spirituality and the interpersonal process. Coursework includes reading, observation, role-play and student audio/videotaped clinical practice explores differential diagnosis, the use of current diagnostic tools, such as the DSM 5, and the treatment modalities and placement criteria within the continuum of care.

Prerequisite: EDCO 575 or EDPY 575

EDPY 572, Psychobiology and Psychopharmacology, 3 Units
This course presents the fundamentals of psychopharmacology, including the biochemical foundation of human behavior, the use of psychotropic medication in the treatment of specific mental disorders, and effective case management. It features an introduction to basic neurobiology, the historical underpinnings of field, the effects of psychotropic medication, specific drug classes and their use in relation to DSM-5, diagnoses, and special consideration for specific populations (e.g., individuals with a history a substance abuse, children). Students learn how to monitor their clients’ use of psychotropic medication, when to make a referral for psychiatric evaluation, and how to work successfully with other mental health professionals in the delivery of ethical, effective counseling services.

EDPY 573, Addictions, Assessment, and Interventions, 3 Units
This course provides an introduction to the field of addictions and compulsive behaviors, including substance abuse and substance abuse treatment. The course emphasizes assessment and intervention skills, processes, evidence-based research relevant to treatment and available resources. The nature and scope of addictions are defined, DSM-5 criteria for disorders are reviewed, and unique issues relative to faith, children/adolescents, persons with disabilities and other issues of diversity are considered.

EDPY 574, Introduction to Clinical Practice: Advanced Skills, 3 Units
This course is designed to further develop the psychotherapeutic tools of students prior to their entry into a clinical placement. Students focus on developing proficiency in the core interviewing qualities, deriving goals for a clinical session, and in making contracts with clients for change. Coursework includes reading, observation, role-play, and student videotaped clinical practice. Coursework also explores differential diagnosis, the use of current diagnostic tools, application of the DSM 5, and the treatment modalities and placement criteria within the continuum of care. Additionally, students are encouraged to begin developing a theoretical and conceptual understanding of cases, and training to work with diverse populations. Students are also encouraged to address issues regarding the integration of their faith with the practice of psychotherapy. These goals are addressed through experiential learning, lecture, readings, discussion, and reflection.

Prerequisite: EDCO 571 or EDPY 571

EDPY 575, Clinical Practica, 3 Units
This course is designed to provide candidates with an in-the-field counseling experience that provides development of counseling skills and application of theoretical concepts in an educational clinical setting to enhance self-confidence as practicing professional counselors; and includes providing educational, personal, or career counseling, as well as shadowing an experienced educational counselor. This course requires candidates verify 100 practicum hours under supervision from faculty and site supervisors. Special topics of discussion will also include Human Sexuality, Aging and long-term care, child abuse assessment & reporting, spousal or partner abuse.

Prerequisite: EDCO 533 or EDPY 533
EDPY 592, Foundations in Research, 3 Units
Students learn to assess, evaluate and apply information resources in preparing a literature review pertinent to a controversial topic in education. They employ database search strategies to identify empirical articles pertinent to the assigned topic. They learn to succinctly summarize articles and discern trends in the professional literature.

EDPY 593, Historical Development of School Counseling and School Psychology, 3 Units
This course provides an historical overview of the professions of school psychology and counseling, and their philosophical and practical contributions to the field of education.

EDPY 599, Readings in Educational Psychology, 1-3 Units
Consists of a program of study concentrating on assigned readings, discussions, field experiences, and/or writing arranged between, and designed by, a student and a full-time professor. An independent study fee is assessed for each enrollment in this class.

EDPY 624, Disabilities in Children, 2 Units
School psychologists are required to have an understanding of the spectrum of individual differences among potential students, particularly individuals with exceptional needs. This course introduces students to individuals defined by cultural differences, socioeconomic disadvantages, sexual biases, and developmental psychopathology, in order to achieve sensitivity to the needs and feelings of persons with differing experiences. Students are introduced to the legal requirements of educating learners in the least-restrictive environments, and consider current issues and future trends in special education.

EDPY 633, Multicultural and Bilingual Assessment and Intervention, 3 Units
This course equips school psychologists with a multidimensional perspective of cultures, bilingualism, assessment, remediation, and interventions in the education system. Course material focuses on assessment models, psychoeducational assessment practices, and test bias. In addition, the social, psychological, ecological, linguistic, and cultural aspects of multicultural and bilingual students and families are explored. Upon successful completion of this course, students are able to demonstrate knowledge of multicultural and social factors, the ability to conduct a multicultural assessment, and the ability to translate assessment results into interventions appropriate for multicultural and linguistic minority students.

EDPY 635A, Role and Function of a School Psychologist: Positive Behavior Supports, 1 Unit
This is a supervised practicum in data-driven behavioral consultation/collaboration and socialization/life skills. This course emphasizes Functional Behavior Assessments and Behavior Intervention Plans. Students meet with a university instructor for seminar discussion and group supervision each semester. A minimum of 150 hours is applied toward the total 450 required practicum hours.
Corequisites: EDPY 624 and EDPY 681

EDPY 635B, Role and Function of a School Psychologist: Individual/Group Counseling, 1 Unit
This course offers a supervised practicum in the development of life skills, mental health, and home/school/community collaboration. Students gain supervised skills in individual/group counseling and meet with a university instructor for seminar discussion and group supervision each semester. A minimum of 150 hours is applied toward the total 450 required practicum hours.
Corequisites: EDPY 637 and EDPY 682

EDPY 635C, Role and Function of a School Psychologist: Assessment, 1 Unit
This is a supervised practicum in data-based intervention development and collaboration. Students gain supervised experience in administration, scoring, and interpretation of cognitive/processing/social-emotional assessments. Students also conduct Curriculum-Based Assessments within a Response to Intervention (RTI) model. Students meet with a university instructor for seminar discussion and group supervision each semester. A minimum of 150 hours is applied toward the total 450 required practicum hours.
Corequisites: EDPY 633 and EDPY 683

EDPY 636, Research and Evaluation in School Psychology, 3 Units
Students gain advanced skills in understanding statistical techniques and applying them to the analysis of educational research data related to school psychology. Strategies for conducting effective evaluations are considered as students plan an evaluation using appropriate statistical analysis as related to educational psychological research. Students gain additional experience in the use of computers for statistical analysis.

EDPY 637, Child Psychopathology Assessment and Treatment, 3 Units
Students in this course learn a systematic approach to the description and assessment of, and planning for, children with learning and behavior problems. Emphasis is on emotional disturbances, including internalizing disorders and externalizing disorders, ADHD, and autism. Course material also includes the development of appropriate interventions from assessment data, use of technology, and the use of assessments for accountability.
EDPY 655, School Psychology Internship I, 5 Units
Students in this course get on-site experience as school psychologists for special and regular education students, acquiring professional skills and knowledge. Such experience includes working with IDEA regulations and procedures, assessing and counseling exceptional students, consulting with teachers, parents, and community agencies, and supervising counseling services. Students also become skilled in conducting student assessment, writing reports, consulting with staff and parents, designing prevention, intervention, and postvention strategies, and completing progress evaluations. 600 hours.

EDPY 656, School Psychology Internship II, 5 Units
With continued on-site supervision, field experience students become increasingly independent in planning, implementing, and reporting psychoeducational assessments of pupils. Students continue to gain experience collaborating with multidisciplinary colleagues as they participate in, and even initiate, the planning of prevention, intervention, and evaluation activities related to the responsibilities of a school psychologist. 600 hours.

EDPY 681, Psychoeducational Assessment I, 3 Units
This is the first in a series of three courses equipping students for effective assessment of preschool children, school-age children, and adults. Students explore the multifaceted and culturally defined nature of human intelligence, research and theory regarding the development and measurement of human intellectual ability, and the construction, uses, and limitations of assessment tools and methods. Students complete this series of courses equipped with a wide range of techniques in the assessment of intelligence, processing abilities, adaptive behavior, social-emotional functioning, and achievement. Students gain experience in developing interventions and recommendations based on assessment data, and in communicating the results of assessments to diverse audiences.

EDPY 682, Psychoeducational Assessment II, 3 Units
This is the second in a series of three courses equipping students for effective assessment of preschool children, school-age children, and adults. Students explore the multifaceted and culturally defined nature of human intelligence, research and theory regarding the development and measurement of human intellectual ability, and the construction, uses, and limitations of assessment tools and methods. Students complete this series of courses equipped with a wide range of techniques in the assessment of intelligence, processing abilities, adaptive behavior, social-emotional functioning, and achievement. Students gain experience in developing interventions and recommendations based on assessment data, and in communicating the results of assessments to diverse audiences.

EDPY 683, Psychoeducational Assessment III, 3 Units
This is the third in a series of three courses equipping students for effective assessment of preschool children, school-age children, and adults. Students explore the multifaceted and culturally defined nature of human intelligence, research and theory regarding the development and measurement of human intellectual ability, and the construction, uses, and limitations of assessment tools and methods. Students complete this series of courses equipped with a wide range of techniques in the assessment of intelligence, processing abilities, adaptive behavior, social-emotional functioning, and achievement. Students gain experience in developing interventions and recommendations based on assessment data, and in communicating the results of assessments to diverse audiences.

EDPY 690, Advanced Individual Research, 3 Units
In this course, the professor and students work closely to advance research into a form appropriate for presentation at a national conference or publication in a peer-reviewed journal. Examples of activities in this course include development of literature reviews, data collection, statistical analysis, manuscript editing and revising, presenting research at conferences, and submission for publication in scholarly journals.

EDPY 695, School Psychology Fieldwork I, 5 Units
Students in this course get on-site experience as school psychologists for special and regular education students, acquiring professional skills and knowledge. Such experience includes working with IDEA regulations and procedures, assessing and counseling exceptional students, consulting with teachers, parents, and community agencies, and supervising counseling services. Students also become skilled in conducting student assessment, writing reports, consulting with staff and parents, designing prevention, intervention, and postvention strategies, and completing progress evaluations. 600 hours.

EDPY 696, School Psychology Fieldwork II, 5 Units
With continued on-site supervision, field experience students become increasingly independent in planning, implementing, and reporting psychoeducational assessments of pupils. Students continue to gain experience collaborating with multidisciplinary colleagues as they participate in, and even initiate, the planning of prevention, intervention, and evaluation activities related to the responsibilities of a school psychologist. 600 hours.

EDPY 697, Readings in School Psychology, 1 Unit
This course assists the student in research of current literature in the field of school psychology. Literature is one of the vehicles that bridges the gap between theory and practice. Thus, this intensive course in current professional literature allows the student to remain on the cutting edge of the profession.
Prerequisite: Completion of program requirements and approval of program director

Faculty
Chair; Program Director, School Psychology
Michael Salce (http://www.apu.edu/faculty/msalce/), EdD
MA in Education: Educational Counseling with an Embedded Pupil Personnel Services Credential in School Counseling

For more information: (626) 815-5424

APU’s Master of Arts in Education: Educational Counseling (https://www.apu.edu/education/programs/masters-in-school-counseling/) offers candidates an efficient path to a school counseling career by embedding within the program all requirements for the Pupil Personnel Services Credential in School Counseling.

A requirement in completing the program is the completion of fieldwork or an internship, both of which provide candidates with hands-on experience in school counseling. An internship credential is appropriate for students who have secured a paid internship position and a contract to serve as a school counselor at a California public school. Students applying for an internship credential may submit their application for it upon successful completion of 8 prerequisite courses and prior to the start of the fieldwork/internship experience.

**Course Sequence**

Obtain academic advising prior to initial registration.

1 Prerequisites for fieldwork/internship

Additional Requirements

1. Candidates must earn a passing score of 150 or greater on the Praxis II (code 5421) exam to demonstrate their competence in school counseling prior to completion of the program.

2. All candidates admitted to the Master of Arts in Education: Educational Counseling program are required to submit a copy of their California Certificate of Clearance (COC) or another form of clearance, such as a valid and current credential for teaching, counseling, school psychology, and/or nursing. The law requires Azusa Pacific University to keep these records on file while candidates are in attendance at APU.

3. Candidates must verify successful completion of the California Basic Skills Requirement (https://www.ctc.ca.gov/credentials/leaflets/basic-skills-requirement-(cl-667/) via one of the options approved by the California Commission on Teacher Credentialing (CTC) (https://www.ctc.ca.gov/), prior to admission.

Advisory Notes

- Educational psychology can be pursued as an educational specialist (EdS) degree with a second master’s degree embedded after completing the requirements for the Master of Arts in Education: Educational Counseling. Because these programs are unique, students must be admitted to each program separately. Candidates intending to pursue two Master of Arts in Education degrees should review the university requirements for additional master’s degrees as stated in the Academic Policies and Procedures (p. 1240) section of the catalog.

- The practicum experience included in the educational counseling program is required by the California Commission on Teacher Credentialing (https://www.ctc.ca.gov/) and consists of 100 hours completed in a K-12 setting or approved clinical setting. These hours will be verified in the EDCO 575 course, which must be taken prior to fieldwork or internship. This course provides candidates the educational and clinical experience in applied psychotherapeutic techniques, assessment, diagnosis, prognosis, treatment, issues of development, adjustment, and maladjustment, health and wellness promotion, and other recognized counseling interventions.

- At some regional campuses, candidates may need to delay enrollment until there are a sufficient number of beginning candidates to provide the appropriate adult learning opportunities. Applicants can obtain detailed information about dates for beginning coursework by requesting an advisement appointment at the Azusa campus or any of the regional campuses.

- Candidates must maintain a minimum cumulative grade-point average (GPA) of 3.0 in their program of study, and receive a grade of B- or higher in each course (a grade of CR in fieldwork/internship).

- Candidates approaching program completion must obtain a credential application from the Office of Credentials (https://www.apu.edu/education/resources/credentials/). The graduate degree must be conferred before receiving the credential recommendation.

- Candidates approaching graduation must obtain and complete a Graduation Application (https://www.apu.edu/graduateprofessionalcenter/registrar/forms/) from the Office of the Registrar (https://www.apu.edu/graduateprofessionalcenter/registrar/) in accordance with published university deadlines. The registrar and department will collaborate to determine whether the student has met all requirements.
Candidates have a maximum of five years to complete all coursework and assessments, including waivers and transfer of units, beginning the first date of enrollment for coursework in the degree program.

**Admission**

University graduate admission and program-specific requirements must be met before an application is complete (see Admission to the University (p. 1092)). Program-specific application requirements are available online (https://tracking.cirrusinsight.com/74647a2de9a2-412f-9b55-9959c7aad4ec/apu-edu-graduateprofessionalcenter-admissions-requirements-program/).

International students should contact Graduate and Professional Admissions (https://www.apu.edu/graduateprofessionalcenter/admissions/) for application procedures.

**Program Learning Outcomes**

**Program Learning Outcomes**

Students who successfully complete this program shall be able to:

1. Demonstrate competency in foundations of School Counseling Professional Standards.
2. Demonstrate competency in professionalism, ethics, and legal mandates.
3. Demonstrate competency in student academic development.
4. Demonstrate competency in student college and career development.
5. Demonstrate competency in social/emotional development.
6. Demonstrate competency in educational foundations: growth and development, learning theory, academic achievement.
7. Demonstrate competency in leadership and advocacy in social justice, equity, and access.
8. Demonstrate competency in program development.
9. Demonstrate competency in research, program evaluation, and technology.

**MA in Education: Educational and Clinical Counseling with an Embedded Pupil Personnel Services Credential in School Counseling**

For more information: (626) 815-5424

The Master of Arts in Education: Educational and Clinical Counseling (https://www.apu.edu/education/programs/masters-in-school-clinical-counseling/) degree is a 62-unit program that encompasses the 50-unit MAEd in Educational Counseling degree (p. 750) plus the 12 additional units of coursework required by the California Board of Behavioral Sciences (https://bbs.ca.gov/applicants/lpcc.html) for Licensed Professional Clinical Counselor (LPCC) eligibility. The program prepares candidates to obtain a Pupil Personnel Services Credential necessary to work in K-12 school settings, provides a clinical emphasis, and satisfies the coursework requirements set forth for California licensure as an LPCC. Contact the department (https://www.apu.edu/education/counselingpsych/contact/) for specific information pertaining to the benefits of this degree option.

A requirement of the program is the completion of fieldwork or an internship, both of which provide candidates with hands-on experience in school counseling. Students must complete the 8 prerequisite courses prior to enrolling in fieldwork or internship. An internship credential is appropriate for students who have secured a paid internship position and a contract to serve as a school counselor at a California public school. Students applying for an internship credential may submit their application for it upon successful completion of the fieldwork prerequisite courses and prior to the start of the internship experience.

**Total Units**

62

^1 Prerequisites for fieldwork/internship.

^2 Students who begin their studies in the spring semester must follow the advisement sheet provided by the department, which is slightly different in sequence.

**Additional Requirements**

1. Candidates must earn a passing score of 150 or greater on the Praxis II (code 5421) exam to demonstrate their competence in school counseling prior to completion of the program.

2. All candidates admitted to the Master of Arts in Education: Educational and Clinical Counseling program are required to submit a copy of their California Certificate of Clearance (COC) or another form of clearance, such as a valid and current credential for teaching, counseling, school psychology, and/or nursing. The law requires Azusa Pacific University to keep these records on file while candidates are in attendance at APU.

3. Candidates must verify successful completion of the California Basic Skills Requirement (https://www.ctc.ca.gov/credentials/leaflets/basic-skills-requirement-(cl-667/) via one of the options approved by the California Commission on Teacher Credentialing (CTC) (https://www.ctc.ca.gov/), prior to admission.

**Advisory Notes**

- Educational psychology (p. 756) can be pursued as an educational specialist (EdS) degree with a second master’s degree embedded after completing the requirements for the Master of Arts in Education: Educational and Clinical Counseling. Because these programs are unique, candidates must be admitted to each program separately. Candidates intending to pursue two Master of Arts in Education degrees should review the university requirements for additional master’s degrees as stated in the Academic Policies and Procedures (p. 1240) section of the catalog.

- The practicum experience included in the educational and clinical counseling program is required by the California Commission on Teacher Credentialing (https://www.ctc.ca.gov/) and consists of 100 hours completed in a K-12 setting or approved clinical setting. These hours will be verified in the EDCO 575 course, which must be taken prior to fieldwork or internship. This course provides candidates the educational and clinical experience in applied psychotherapeutic techniques, assessment, diagnosis, prognosis, treatment, issues of development, adjustment, and maladjustment, health and wellness promotion, and other recognized counseling interventions.
• At some regional campuses, candidates may need to delay enrollment until there are a sufficient number of beginning candidates to provide the appropriate adult learning opportunities. Applicants can obtain detailed information about dates for beginning coursework by requesting an advisement appointment at the Azusa campus or any of the regional campuses.

• Candidates must receive a grade of B- or higher in each course (a grade of CR in fieldwork/internship) and maintain a 3.0 grade-point average (GPA) throughout the program.

• Candidates approaching program completion must obtain a credential application from the Office of Credentials (https://www.apu.edu/education/resources/credentials/). The graduate degree must be conferred before receiving the credential recommendation.

• Candidates approaching graduation must obtain and complete a Graduation Application (https://www.apu.edu/graduateprofessionalcenter/registrar/forms/) from the Office of the Registrar (https://www.apu.edu/graduateprofessionalcenter/registrar/) in accordance with published university deadlines. The registrar and department will collaborate to determine whether the student has met all requirements.

• A candidate has a maximum of five years to complete all coursework and assessments, including waivers and transfer of units, beginning the first date of enrollment for coursework in the degree program.

• Upon completion of the educational and clinical counseling program, graduates should contact the Board of Behavioral Sciences (https://bbs.ca.gov/applicants/lpcc.html) for additional requirements for LPCC Licensure.

Admission

University graduate admission and program-specific requirements must be met before an application is complete (see Admission to the University (p. 1092)). Program-specific application requirements are available online (https://tracking.cirrusinsight.com/74647a2d-e9a2-412f-9b55-9959c7aac4ec/apu-edu-graduateprofessionalcenter-admissions-requirements-program/).

International students should contact Graduate and Professional Admissions (https://www.apu.edu/graduateprofessionalcenter/admissions/) for application procedures.

Program Learning Outcomes

Program Learning Outcomes

Students who successfully complete this program shall be able to:
1. Demonstrate competency in foundations of School Counseling Professional Standards.
2. Demonstrate competency in professionalism, ethics, and legal mandates.
3. Demonstrate competency in student academic development.
4. Demonstrate competency in student college and career development.
5. Demonstrate competency in social/emotional development.
6. Demonstrate competency in educational foundations: growth and development, learning theory, academic achievement.
7. Demonstrate competency in leadership and advocacy in social justice, equity, and access.
8. Demonstrate competency in program development.
9. Demonstrate competency in research, program evaluation, and technology.

Pupil Personnel Services: School Counseling Credential

For more information: (626) 815-5424

Prerequisite: Educational Specialist in School Psychology with Embedded Master of Arts in Education: Educational Psychology and Pupil Personnel Services Credential in School Psychology (p. 756)

A required transcript evaluation of students’ current PPS school psychology courses will determine which courses will count toward the PPS: School Counseling Credential.

Requirements are the same as for Azusa Pacific University’s Master of Arts in Education: Educational Counseling with Embedded Pupil Personnel Services Credential in School Counseling program (p. 750), which are as follows:

1 Prerequisites for fieldwork/internship

Additional Requirements

1. Candidates must earn a passing score of 150 or greater on the Praxis II (code 5421) exam to demonstrate their competence in school counseling prior to completion of the program.

2. All candidates admitted to the Pupil Personnel Services: School Counseling Credential program are required to submit a copy of their California Certificate of Clearance or another form of clearance, such as a valid and current credential for teaching, counseling, school psychology, and/or nursing. The law requires Azusa Pacific University to keep these records on file while candidates are in attendance at APU.

3. Candidates must verify successful completion of the California Basic Skills Requirement (https://www.ctc.ca.gov/credentials/leaflets/basic-skills-requirement-(cl-667/) via one of the options approved by the California Commission on Teacher Credentialing (CTC) (https://www.ctc.ca.gov/), prior to admission.

Advisory Notes

• The practicum experience included in the educational counseling program is required by the California Commission on Teacher Credentialing (https://www.ctc.ca.gov/) and consists of 100 hours completed in a K-12 setting or approved clinical setting. These hours will be verified in the EDCO 575 course, which must be taken prior to fieldwork or internship. This course provides candidates the educational and clinical experience in applied psychotherapeutic techniques, assessment, diagnosis, prognosis, treatment, issues of development, adjustment and maladjustment, health and wellness promotion, and other recognized counseling interventions.

• At some regional campuses, candidates may need to delay enrollment until there is a sufficient number of beginning candidates to provide the appropriate adult learning opportunities. Applicants can obtain detailed information about dates for beginning coursework by requesting an advisement appointment at the Azusa campus or any of the regional campuses.

• Candidates must maintain a minimum cumulative grade-point average (GPA) of 3.0 in their program of study, and receive a grade of B- or higher in each course (a grade of CR in fieldwork/internship).

• Candidates approaching program completion must obtain a credential application from the Office of Credentials (https://www.apu.edu/education/resources/credentials/). An appropriate counseling-related graduate degree from a regionally accredited college or university must be conferred before receiving the credential recommendation.

• Candidates have a maximum of five years to complete all coursework and assessments, including waivers and transfer of units, beginning the first date of enrollment for coursework in the credential program.
Admission

University graduate admission and program-specific requirements must be met before an application is complete (see Admission to the University (p. 1092)). Program-specific application requirements are available online (https://tracking.cirrusinsight.com/74647a2d-e9a2-4121-9b55-9959c7aac4ec/apu-edu-graduateprofessionalcenter-admissions-requirements-program/).

International students should contact Graduate and Professional Admissions (https://www.apu.edu/graduateprofessionalcenter/admissions/) for application procedures.

Educational Specialist (EdS) in School Psychology with Embedded MA in Education: Educational Psychology and Pupil Personnel Services Credential in School Psychology

For more information: (626) 815-5424

Azusa Pacific University’s Educational Specialist (EdS) in School Psychology with embedded Master of Arts in Education (MAEd): Educational Psychology and Pupil Personnel Services Credential in School Psychology (https://www.apu.edu/education/programs/school-psychology-specialist-degree/) program equips school psychology candidates with distinctive and marketable skills and competencies. The school psychology program is approved with conditions by the National Association of School Psychologists (NASP) (https://www.nasponline.org/) and accredited by the National Council for Accreditation of Teacher Education (NCATE)—which is transitioning to the Council for the Accreditation of Educator Preparation (CAEP) (https://caepnet.org/)—and the California Commission on Teacher Credentialing (CTC) (https://www.ctc.ca.gov/). The two degrees are completed in three years and comprise 66 graduate semester units, 450 hours of practicum, and 1,200 hours of fieldwork/internship. Upon successful completion of this program, candidates can apply to become Nationally Certified School Psychologists (NCSPs).

Program Structure

Years 1 and 2 (MAEd)

Candidates complete a total of 49 units and 450 hours of practicum during the first two years of the program. Upon completion of all coursework, practicum hours, and the Graduate Research Project (GRP), the candidate is granted the Master of Arts in Education: Educational Psychology and may participate in commencement.

Year 3 (Post-master’s Year, EdS)

During the Spring II session of the second year and the post-master’s year, candidates complete an additional 17 units of special focus coursework, including 10 units of fieldwork/internship (1,200 hours). Candidates applying for an internship credential may submit their application once a paid internship at a public school in the field of school psychology has been secured. Prior to starting fieldwork/internship, students are required to provide an updated TB clearance.

Upon successful completion of post-master’s coursework and fieldwork/internship, and passing of the PRAXIS II (School Psychology) exam, the candidate is granted the Educational Specialist (EdS) degree and may file for the PPS Credential in School Psychology. Once these requirements are fulfilled, the student may apply to become a Nationally Certified School Psychologist (NCSP) through the National Association of School Psychologists (NASP); students are advised to review specific NCSP requirements online (https://www.nasponline.org/standards-and-certification/national-certification/ncsp-eligibility/).

Additional Admission Requirements for School Psychology Applicants

1. After all admission materials have been submitted to the Office of Graduate and Professional Admissions (https://www.apu.edu/graduateprofessionalcenter/admissions/), the school psychology program reviews the file and notifies the applicant to schedule an admission interview with the department. The prospective candidate should come prepared to be interviewed by program faculty. The purpose of the interview is to meet the candidate, discuss career goals, evaluate match of the program to the student, and make an initial assessment of the applicant’s potential for success as a school psychologist.

2. All candidates who are admitted to the program are required to submit a copy of their California Certificate of Clearance (COC) or another form of clearance, such as a valid and current credential for teaching or counseling and/or nursing. The law requires Azusa Pacific University to keep these records on file while candidates are in attendance at APU.
3. Candidates must verify successful completion of the California Basic Skills Requirement (https://www.ctc.ca.gov/credentials/leaflets/basic-skills-requirement-(cl-667/) via one of the options approved by the California Commission on Teacher Credentialing (CTC) (https://www.ctc.ca.gov/) prior to admission.

    5

**Total Units**  
11

Students will complete the following in order to earn the Educational Specialist (EdS) with an embedded Pupil Personnel Services Credential in School Psychology:

- Designated EdS coursework (17 units)
- 1,200 hours of fieldwork/internship (primary and secondary settings)
- Passing the PRAXIS II School Psychology #5402 with a 147 or higher **OR** PRAXIS II School Psychology #5403 with a 155 or higher

**Additional Requirements**

1. Students must pass the PRAXIS II School Psychology #5402 exam with a score of 147 or higher or PRAXIS II School Psychology #5403 exam with a score of 155 or higher to demonstrate their competence in school psychology prior to completion of the program.
2. Students prepare a Graduate Research Project (GRP), which includes a formal research paper or program evaluation and must be approved by APU’s Institutional Review Board (IRB). The GRP content should be related to a topic that the student chooses to study in depth and has relevance to the field of school psychology. The research portion of the project is completed through the following courses: EDPY 592, EDPY 690, and EDPY 636. In addition to the GRP, students are required to present their research findings and paper to a faculty and peer panel.
3. Students complete a performance-based portfolio during practicum and internship/fieldwork that will be evaluated by program faculty and field experience mentors for evidence of skills competency.

**Advisory Notes**

- Students intending to pursue two Master of Arts in Education degrees should review the university requirements for additional master’s degrees as stated in the Academic Policies and Procedures (p. 1240) section of the catalog.
- Students cannot pursue the Master of Arts in Education: Educational Counseling (https://www.apu.edu/education/programs/masters-in-school-counseling/) as a second master’s degree after completing the requirements for the Master of Arts in Education: Educational Psychology and Educational Specialist in School Psychology.
- The practicum experience at APU consists of 450 hours (required by the California Commission on Teacher Credentialing). A minimum of 300 hours must be completed in a pre-K-12 public school setting. Up to 150 hours may be completed through on-campus agencies (e.g., child study centers, psychology clinics) or community-based agencies (e.g., private schools, community-based mental health clinics). These hours are to be completed prior to beginning fieldwork/internship. The required hours are to be completed under the direct supervision of a credentialed school psychologist with no fewer than three years of experience.
- At some regional campuses, students may need to delay enrollment until there is a sufficient number of beginning students to provide the appropriate adult learning opportunities. Applicants can obtain detailed information about dates for beginning coursework by requesting an advisement appointment at the Azusa campus or any of the regional campuses.
- Students in an educational counseling or educational psychology program may request to waive a course (see Waivers (p. 1246)), provided that the student can document completion of an equivalent course at another institution in the five-year period prior to requesting the waiver. Department approval of the request is required. If the course accepted for waiver also meets all of the university standards for transfer credit (see Transfer Credit (p. 1245)), it may be transferred to meet requirements (up to 20 percent of the total program units may be transferred to meet requirements). If the course accepted for waiver does not meet the university standards for transfer credit (i.e., not applicable to a master’s degree at the university where it was taken, not taken from a regionally accredited institution, etc.), then the student must choose alternative elective courses to satisfy the unit requirements of the degree program.
- A student has a maximum of five years to complete all coursework, including waivers and transfer of units, beginning the first date of enrollment for coursework in the degree program.
- Students approaching program completion must obtain a credential application from the Office of Credentials (https://www.apu.edu/education/resources/credentials/) in the School of Education. Students must complete all credential requirements to apply for the credential.
• Students approaching graduation must obtain and complete a Graduation Application from the Office of the Registrar in accordance with published university deadlines. The registrar and department will collaborate to determine whether the student has met all requirements.

Admission
University graduate admission and program-specific requirements must be met before an application is complete (see Admission to the University p. 1092). Program-specific application requirements are available online. International students should contact Graduate and Professional Admissions for application procedures.

Program Learning Outcomes
Students who successfully complete this program shall be able to:
1. Demonstrate competency in data-based decision making and accountability.
2. Demonstrate competency in consultation and collaboration.
3. Demonstrate competency in interventions and instructional support to develop academic skills.
4. Demonstrate competency in behavior interventions and mental health services to develop social and life skills.
5. Demonstrate competency in direct and indirect services – school wide practices to promote learning.
6. Demonstrate competency in school-wide practices to promote behavioral and mental health.
7. Demonstrate competency in family-school collaboration.
9. Demonstrate competency in research and program evaluation.
10. Demonstrate competency in legal, ethical, and professional practice disposition.

For more information: (626) 815-5424

Azusa Pacific University’s Educational Specialist (EdS) in School Psychology: Applied Behavior Analysis with embedded Master of Arts in Education (MAEd): Educational Psychology and Pupil Personnel Services Credential in School Psychology program equips school psychology candidates with distinctive and marketable skills and competencies. Candidates acquire knowledge needed to provide intensive behavioral treatment and intervention services for students diagnosed with autism and related disabilities.

This program is a Verified Course Sequence (VCS) approved by the Behavior Analyst Certification Board (BACB) and meets the educational requirements for eligibility as a Board Certified Behavior Analyst (BCBA). Additional requirements to achieve certification include successful completion of supervised clinical experience, as well as the certification exam administered by the BACB.

The school psychology program is approved with conditions by the National Association of School Psychologists (NASP) and accredited by the National Council for Accreditation of Teacher Education (NCATE)—which is transitioning to the Council for the Accreditation of Educator Preparation (CAEP)—and the California Commission on Teacher Credentialing (CTC).
two degrees are completed in three years and comprise 89 graduate semester units, 450 hours of practicum, and 1,200 hours of fieldwork/internship. Upon successful completion of this program, candidates can apply to become Nationally Certified School Psychologists (NCSPs).

Program Structure

Years 1 and 2 (MAEd)
Candidates complete at least 49 units and 450 hours of practicum during the first two years of the program. Upon completion of all coursework, practicum hours, and the Graduate Research Project (GRP), the candidate is granted the Master of Arts in Education: Educational Psychology and may participate in commencement.

Year 3 (Post-Master’s Year, EdS)
During the Spring II session of the second year and the post-master’s year, candidates complete at least an additional 17 units of special focus coursework, including 10 units of fieldwork/internship (1,200 hours), and 23 units of applied behavior analysis specialization coursework. Candidates applying for an internship credential may submit their application once a paid internship at a public school in the field of school psychology has been secured. Prior to starting fieldwork/internship, students are required to provide an updated TB clearance.

Upon successful completion of post-master’s coursework and fieldwork/internship, and passing of the PRAXIS II (School Psychology) exam, the candidate is granted the Educational Specialist (EdS) degree and may file for the PPS Credential in School Psychology. Once these requirements are fulfilled, the student may apply to become a Nationally Certified School Psychologist (NCSP) through the National Association of School Psychologists (NASP); students are advised to review specific NCSP requirements online (https://www.nasponline.org/standards-and-certification/national-certification/ncsp-eligibility/).

Candidates should collaborate with the program director about where the applied behavior analysis specialization courses should be completed within the three-year sequence.

Additional Admission Requirements for School Psychology Applicants
1. After all admission materials have been submitted to the Office of Graduate and Professional Admissions (http://www.apu.edu/graduateprofessionalcenter/admissions/), the school psychology program reviews the file and notifies the applicant to schedule an admission interview with the department. The prospective candidate should come prepared to be interviewed by program faculty. The purpose of the interview is to meet the candidate, discuss career goals, evaluate match of the program to the student, and make an initial assessment of the applicant’s potential for success as a school psychologist.
2. All candidates who are admitted to the program are required to submit a copy of their California Certificate of Clearance (COC) or another form of clearance, such as a valid and current credential for teaching or counseling and/or nursing. The law requires Azusa Pacific University to keep these records on file while candidates are in attendance at APU.
3. Candidates must verify successful completion of the California Basic Skills Requirement (https://www.ctc.ca.gov/credentials/leaflets/basic-skills-requirement-(cl-667/) via one of the options approved by the California Commission on Teacher Credentialing (CTC) (https://www.ctc.ca.gov/) prior to admission.

Total Units 23

Additional Requirements

1. Students must pass the PRAXIS II School Psychology #5402 exam with a score of 147 or higher or PRAXIS II School Psychology #5403 exam with a score of 155 or higher to demonstrate their competence in school psychology prior to completion of the program.

2. Students prepare a Graduate Research Project (GRP), which includes a formal research paper or program evaluation and must be approved by APU’s Institutional Review Board (IRB). The GRP content should be related to a topic that the student chooses to study in depth and has relevance to the field of school psychology. The research portion of the project is completed through the following courses: EDPY 592, EDPY 690, and EDPY 636. In addition to the GRP, students are required to present their research findings and paper to a faculty and peer panel.

3. Students complete a performance-based portfolio during practicum and internship/fieldwork that is evaluated by program faculty and field experience mentors for evidence of skills competency.

Advisory Notes

- Students intending to pursue two Master of Arts in Education degrees should review the university requirements for additional master’s degrees as stated in the Academic Policies and Procedures (p. 1240) section of the catalog.

- Students cannot pursue the Master of Arts in Education: Educational Counseling (https://www.apu.edu/education/programs/masters-in-school-counseling/) as a second master’s degree after completing the requirements for the Master of Arts in Education: Educational Psychology and Educational Specialist in School Psychology.

- The practicum experience at APU consists of 450 hours (required by the California Commission on Teacher Credentialing). A minimum of 300 hours must be completed in a pre-K-12 public school setting. Up to 150 hours may be completed through on-campus agencies (e.g., child study centers, psychology clinics) or community-based agencies (e.g., private schools, community-based mental health clinics). These hours are to be completed prior to beginning fieldwork/internship. The required hours are to be completed under the direct supervision of a credentialed school psychologist with no fewer than three years of experience.

- At some regional campuses, students may need to delay enrollment until there is a sufficient number of beginning students to provide the appropriate adult learning opportunities. Applicants can obtain detailed information about dates for beginning coursework by requesting an advisement appointment at the Azusa campus or any of the regional campuses.

- Students in an educational counseling or educational psychology program may request to waive a course (see Waivers (p. 1246)), provided that the student can document completion of an equivalent course at another institution in the five-year period prior to requesting the waiver. Department approval of the request is required. If the course accepted for waiver also meets all of the university standards for transfer credit (see Transfer Credit (p. 1245)), it may be transferred to meet requirements (up to 20 percent of the total program units may be transferred to meet requirements). If the course accepted for waiver does not meet the university standards for transfer credit (i.e., not applicable to a master’s degree at the university where it was taken, not taken from a regionally accredited institution, etc.), then the student must choose alternative elective courses to satisfy the unit requirements of the degree program.

- A student has a maximum of five years to complete all coursework, including waivers and transfer of units, beginning the first date of enrollment for coursework in the degree program.

- Students approaching program completion must obtain a credential application from the Office of Credentials (https://www.apu.edu/education/resources/credentials/) in the School of Education. Students must complete all credential requirements to apply for the credential.

- Students approaching graduation must obtain and complete a G (http://www.apu.edu/graduateprofessionalcenter/registrar/forms/) Graduation Application (https://www.apu.edu/graduateprofessionalcenter/registrar/forms/) from the Office of the Registrar (https://www.apu.edu/graduateprofessionalcenter/registrar/) in accordance with published university deadlines. The registrar and department will collaborate to determine whether the student has met all requirements.

Admission

University graduate admission and program-specific requirements must be met before an application is complete (see Admission to the University (p. 1092)). Program-specific application requirements are available online (https://tracking.cirrusinsight.com/74647a2de9e34121-bb55-9959c7aad4/c/4ec/apu-edu-graduateprofessionalcenter-admissions-requirements-program/).

International students should contact Graduate and Professional Admissions (https://www.apu.edu/graduateprofessionalcenter/admissions/) for application procedures.
Program Learning Outcomes

Students who successfully complete this program shall be able to:
1. Demonstrate competency in data-based decision making and accountability.
2. Demonstrate competency in consultation and collaboration.
3. Demonstrate competency in interventions and instructional support to develop academic skills.
4. Demonstrate competency in behavior interventions and mental health services to develop social and life skills.
5. Demonstrate competency in direct and indirect services – school wide practices to promote learning.
6. Demonstrate competency in school-wide practices to promote behavioral and mental health.
7. Demonstrate competency in family-school collaboration.
9. Demonstrate competency in research and program evaluation.
10. Demonstrate competency in legal, ethical, and professional practice and disposition.
11. Demonstrate an understanding of basic concepts and principles from the field of Applied Behavior Analysis (ABA).
12. Learn single-subject design and how to collect, display, analyze, and interpret data using continuous and discontinuous measures.
13. Implement procedures and systems related to behavior change from the perspective of applied behavior analysis (ABA).
14. Conduct personnel supervision that is behavior analytic in nature.
15. Apply the industry’s ethical guidelines to their practice in the field of applied behavior analysis (ABA).
16. Conduct functional behavior assessment. This includes descriptive assessment (review of records, interview, observation, interpretation), functional analysis, and developing intervention plans.
17. Apply coursework in a fieldwork setting, supervised by a qualified professional.

Educational Specialist (EdS) in School Psychology: Clinical and Educationally Related Mental Health Counseling with Embedded MA in Education: Educational Psychology and Pupil Personnel Services Credential in School Psychology

For more information: (626) 815-5424

Azusa Pacific University’s Educational Specialist (EdS) in School Psychology: Clinical and Educationally Related Mental Health Counseling with embedded Master of Arts in Education (MAEd): Educational Psychology and Pupil Personnel Services Credential in School Psychology (https://www.apu.edu/education/programs/school-psychology-specialist-degree/pathways/) program equips school psychology candidates with distinctive and marketable skills and competencies. Candidates gain advanced skills to effectively meet the needs of students with emotional and behavioral challenges, and are equipped to provide educationally related mental health services or designated instructional services. Through supervised field experiences and classroom curriculum, candidates gain exposure to group and individual clinical counseling, addictions or substance abuse counseling and intervention, psychobiology/psychopharmacology, DSM-V diagnosis, and case conceptualization and treatment for school-based mental health services.

The school psychology program is approved with conditions by the National Association of School Psychologists (NASP) (https://www.nasponline.org/) and accredited by the National Council for Accreditation of Teacher Education (NCATE)—which is transitioning to the Council for the Accreditation of Educator Preparation (CAEP) (http://www.caepnet.org/)—and the California Commission on Teacher Credentialing (CTC) (https://www.ctc.ca.gov/). The two degrees are completed in three years and comprise 84 graduate semester units, 450 hours of practicum, and 1,200 hours of fieldwork/internship. Upon successful completion of this program, candidates can apply to become Nationally Certified School Psychologists (NCSPs).
Program Structure

Years 1 and 2
Candidates complete at least 61 units and 450 hours of practicum during the first two years of the program. Candidates also complete the Graduate Research Project (GRP).

Year 3 (MAEd and EdS)
Candidates complete at least an additional 23 units of special focus coursework, including 1,200 hours of fieldwork/internship and coursework for the clinical and educationally related mental health counseling specialization. Candidates applying for an internship credential may submit their application once a paid internship at a public school in the field of school psychology has been secured. Prior to starting fieldwork/internship, students are required to provide an updated TB clearance.

Upon successful completion of post-master’s coursework and fieldwork/internship, and passing of the PRAXIS II (School Psychology) exam, the candidate is granted the Educational Specialist (EdS) degree and may file for the PPS Credential in School Psychology. Once these requirements are fulfilled, the student may apply to become a Nationally Certified School Psychologist (NCSP) through the National Association of School Psychologists (NASP); students are advised to review specific NCSP requirements online (https://www.nasponline.org/standards-and-certification/national-certification/ncsp-eligibility/).

Candidates should collaborate with the program director about where the clinical and educationally related mental health counseling specialization courses should be completed within the three-year sequence.

Additional Admission Requirements for School Psychology Applicants
1. After all admission materials have been submitted to the Office of Graduate and Professional Admissions (http://www.apu.edu/graduateprofessionalcenter/admissions/), the school psychology program reviews the file and notifies the applicant to schedule an admission interview with the department. The prospective candidate should come prepared to be interviewed by program faculty. The purpose of the interview is to meet the candidate, discuss career goals, evaluate match of the program to the student, and make an initial assessment of the applicant’s potential for success as a school psychologist.
2. All candidates who are admitted to the program are required to submit a copy of their California Certificate of Clearance (COC) or another form of clearance, such as a valid and current credential for teaching or counseling and/or nursing. The law requires Azusa Pacific University to keep these records on file while candidates are in attendance at APU.
3. Candidates must verify successful completion of the California Basic Skills Requirement (https://www.ctc.ca.gov/credentials/leaflets/basic-skills-requirement-(cl-667/) via one of the options approved by the California Commission on Teacher Credentialing (CTC) (https://www.ctc.ca.gov/) prior to admission.

Course Requirements
Students take courses in the following sequence (students are required to seek academic advisement prior to initial registration).

### Total Units

84

1. Prerequisites must be completed prior to internship/fieldwork.

Students complete the following in order to earn the Master of Arts in Education: Educational Psychology (MAEd) and Educational Specialist (EdS) with an embedded Pupil Personnel Services Credential in School Psychology:

- Designated MAEd and EdS coursework (84 units)
- 550 hours of practicum
- 1,200 hours of fieldwork/internship (primary and secondary settings)
- Graduate research project
- Passing the PRAXIS II School Psychology #5402 with a 147 or higher OR PRAXIS II School Psychology #5403 with a 155 or higher

### Additional Requirements

1. Students must pass the PRAXIS II School Psychology #5402 exam with a score of 147 or higher or PRAXIS II School Psychology #5403 exam with a score of 155 or higher to demonstrate their competence in school psychology prior to completion of the program.

2. Students prepare a Graduate Research Project (GRP), which includes a formal research paper or program evaluation and must be approved by APU’s Institutional Review Board (IRB). The GRP content should be related to a topic that the student chooses to study in depth and has relevance to the field of school psychology. The research portion of the project is completed through the following courses: EDPY 592, EDPY 690, and EDPY 636. In addition to the GRP, students are required to present their research findings and paper to a faculty and peer panel.

3. Students complete a performance-based portfolio during practicum and internship/fieldwork that will be evaluated by program faculty and field experience mentors for evidence of skills competency.
Advisory Notes

• Students intending to pursue two Master of Arts in Education degrees should review the university requirements for additional master’s degrees as stated in the Academic Policies and Procedures section of the catalog.
• Students cannot pursue the Master of Arts in Education: Educational Counseling as a second master’s degree after completing the requirements for the Master of Arts in Education: Educational Psychology and Educational Specialist in School Psychology.
• The practicum experience at APU consists of 450 hours (required by the California Commission on Teacher Credentialing). A minimum of 300 hours must be completed in a pre-K-12 public school setting. Up to 150 hours may be completed through on-campus agencies (e.g., child study centers, psychology clinics) or community-based agencies (e.g., private schools, community-based mental health clinics). These hours are to be completed prior to beginning fieldwork/internship. The required hours are to be completed under the direct supervision of a credentialed school psychologist with no fewer than three years of experience.
• At some regional campuses, students may need to delay enrollment until there is a sufficient number of beginning students to provide the appropriate adult learning opportunities. Applicants can obtain detailed information about dates for beginning coursework by requesting an advisement appointment at the Azusa campus or any of the regional campuses.
• Students in an educational counseling or educational psychology program may request to waive a course (see Waivers), provided that the student can document completion of an equivalent course at another institution in the five-year period prior to requesting the waiver. Department approval of the request is required. If the course accepted for waiver also meets all of the university standards for transfer credit (see Transfer Credit), it may be transferred to meet requirements (up to 20 percent of the total program units may be transferred to meet requirements). If the course accepted for waiver does not meet the university standards for transfer credit (i.e., not applicable to a master’s degree at the university where it was taken, not taken from a regionally accredited institution, etc.), then the student must choose alternative elective courses to satisfy the unit requirements of the degree program.
• A student has a maximum of five years to complete all coursework, including waivers and transfer of units, beginning the first date of enrollment for coursework in the degree program.
• Students approaching program completion must obtain a credential application from the Office of Credentials (https://www.apu.edu/education/resources/credentials/) in the School of Education. Students must complete all credential requirements to apply for the credential.
• Students approaching graduation must obtain and complete a Graduation Application (https://www.apu.edu/graduateprofessionalcenter/registrar/forms/) from the Office of the Registrar (https://www.apu.edu/graduateprofessionalcenter/registrar/) in accordance with published university deadlines. The registrar and department will collaborate to determine whether the student has met all requirements.

Admission

University graduate admission and program-specific requirements must be met before an application is complete (see Admission to the University (p. 1092)). Program-specific application requirements are available online (https://tracking.cirrusinsight.com/74647a2d-e9a2-412f-9b55-9959c7aadce/apu-edu-graduateprofessionalcenter-admissions-requirements-program/).

International students should contact Graduate and Professional Admissions (https://www.apu.edu/graduateprofessionalcenter/admissions/) for application procedures.

Program Learning Outcomes

Program Learning Outcomes

Students who successfully complete this program shall be able to:
1. Demonstrate competency in data-based decision making and accountability.
2. Demonstrate competency in consultation and collaboration.
3. Demonstrate competency in interventions and instructional support to develop academic skills.
4. Demonstrate competency in behavior interventions and mental health services to develop social and life skills.

Pupil Personnel Services: School Psychology Credential

For more information: (626) 815-5424

Prerequisite: Master of Arts in Education: Educational Counseling with Embedded Pupil Personnel Services Credential in School Counseling (p. 750)

A required transcript evaluation of students' courses will determine which courses will count toward the PPS: School Psychology Credential.

Requirements are the same as for Azusa Pacific University’s Educational Specialist in School Psychology with Embedded Master of Arts in Education: Educational Psychology and Pupil Personnel Services Credential in School Psychology (p. 756) program, with the exception that no graduate research project is required.

Students must pass the PRAXIS II (School Psychology) Exam with a score of 147 or greater. Credential-only candidates may be eligible to become a Nationally Certified School Psychologist (NCSP); candidates are advised to contact the National Association of School Psychologists (NASP) certification board (https://www.nasponline.org/CERTIFICATION/) to determine if their degrees meet NCSP requirements.

Students must pass the PRAXIS II (School Psychology) Exam with a score of 147 or greater. Credential-only candidates may be eligible to become a Nationally Certified School Psychologist (NCSP); candidates are advised to contact the National Association of School Psychologists (NASP) certification board (https://www.nasponline.org/CERTIFICATION/) to determine if their degrees meet NCSP requirements.

A student has a maximum of five years to complete all coursework and assessments, beginning the first date of enrollment for coursework in the credential program.

Admission

University graduate admission and program-specific requirements must be met before an application is complete (see Admission to the University (p. 1092)). Program-specific application requirements are available online (https://tracking.cirrusinsight.com/74647a2d-e9a2-412f-9b55-9959c7aac4ec/apu-edu-graduateprofessionalcenter-admissions-requirements-program/).

International students should contact Graduate and Professional Admissions (https://www.apu.edu/graduateprofessionalcenter/admissions/) for application procedures.

Applied Behavioral Analysis Specialization

BCBA Certificate

23 units

For more information: (626) 815-5424

NOTE: A Board Certified Behavior Analyst® (BCBA) coordinator must approve admission to this emphasis. Admission to the BCBA program course sequence requires a separate application with the Student Services Center (https://www.apu.edu/graduateprofessionalcenter/) and interview with the BCBA committee.

The following nine-course sequence in applied behavior analysis, in its entirety, meets the 315 classroom hours of graduate-level instruction in the specified content areas established by the Behavior Analyst Certification Board® (BACB). Graduate students in the program must successfully complete all of the courses listed below to qualify to sit for the BCBA examination. Individual courses taken with a non-BCBA instructor or outside of APU's BCBA nine-course sequence may not meet BCBA requirements. Contact the BACB (https://bacb.com/) for additional information.

Total Units: 23
Special Note: A behavior analyst is certified by the BACB after passing the BCBA certification exam. To sit for the exam, a candidate must apply directly to the BACB and provide evidence of the following: a master’s degree in behavior analysis, education, or psychology from a qualifying institution; a passing grade in each course (note: the School of Education requires grades of B- or higher in its graduate courses), comprising a total of at least 315 classroom hours of graduate-level instruction from an approved university in the specified content areas established by the BACB; and completion of 1,500 hours of independent fieldwork in behavior analysis supervised by a qualified BCBA. Azusa Pacific University does not provide this supervision. For more information regarding the certification process, visit the BACB website (https://www.bacb.com).

Admission

University graduate admission and program-specific requirements must be met before an application is complete (see Admission to the University (p. 1092)). Program-specific application requirements are available online (https://tracking.cirrusinsight.com/74647a2d-e9a2-412f-9b55-9559c7aac4ec/apu-edu-graduateprofessionalcenter-admissions-requirements-program/).

Program Learning Outcomes

Program Learning Outcomes

Students who successfully complete this program shall be able to:

1. Demonstrate an understanding of basic concepts and principles from the field of Applied Behavior Analysis (ABA).
2. Learn single-subject design and how to collect, display, analyze, and interpret data using continuous and discontinuous measures.
3. Implement procedures and systems related to behavior change from the perspective of applied behavior analysis (ABA).
4. Conduct personnel supervision that is behavior analytic in nature.
5. Apply the industry’s ethical guidelines to their practice in the field of applied behavior analysis (ABA).
6. Conduct functional behavior assessment. This includes descriptive assessment (review of records, interview, observation, interpretation), functional analysis, and developing intervention plans.
7. Apply coursework in a fieldwork setting, supervised by a qualified professional.
Division of Teacher Education

The Division of Teacher Education (https://www.apu.edu/education/teacher/) prepares candidates to become public school teachers who demonstrate the content, pedagogical, and professional knowledge, skills, and dispositions necessary to help all K-12 students grow and learn. In keeping with a commitment to enhance teacher candidates’ understanding of the continuum of K-12 education, all programs emphasize a growing knowledge across the breadth of the program from theory to practice. Master’s degree programs with credentials embedded and credential-only programs provide the training and experience needed to qualify for California’s Multiple Subject and Single Subject Teaching Credentials, as well as Mild to Moderate Support Needs and Extensive Support Needs Education Specialist Credentials.

The Division of Teacher Education offers a BA in Liberal Studies (p. 785) with an optional integrated Mild to Moderate or Extensive Support Needs Education Specialist Credential, as well as a liberal studies minor (p. 790). Additionally, the Integrated Bachelor’s/Credential Program (p. 813) offers several options in other fields of study, including allied health and mathematics.

The division also offers two master’s degrees with a Multiple Subject or Single Subject Preliminary Teaching Credential embedded: the Master of Arts in Education: Learning and Technology (p. 780) and Master of Arts in Education: Teaching (p. 780). The division also offers two master’s degrees with a Mild to Moderate Support Needs or Extensive Support Needs Education Specialist Credential embedded: the Masters of Arts in Education: Learning and Technology (p. 801) and Master of Arts in Education: Special Education (p. 801). Additionally, the School of Behavioral and Applied Sciences offers the Master of Arts in Physical Education and Single Subject Teaching Credential (p. 524). (p. 524)

Learn more about the division below:

- Mission Statement (p. 769)
- Professional Standards for Credential Candidates (p. 769)
- Intern Credential Option and Eligibility Requirements (p. 769)

Mission Statement

The Division of Teacher Education produces teachers who are ethical, responsive, and informed practitioners who are faithful stewards of their time, talents, and resources. They model servanthood as a means to clarify and practice their faith and knowledge.

Professional Standards for Credential Candidates

APU credential candidates are highly desired because of the School of Education’s strong reputation for preparing highly qualified teachers who have been held to high professional standards. The Division of Teacher Education assesses candidates from admission through credential recommendation in credential standards and dispositions, including the following:

- All credential candidates are expected to maintain a high level of professional and ethical behavior throughout the program. Failure to do so may result in expulsion from the program.
- All credential standards and requirements for Multiple Subject and Single Subject Teaching Credentials, as well as the Mild to Moderate Support Needs and Extensive Support Needs Education Specialist Credentials, are subject to California Commission on Teacher Credentialing (CTC), National Council for Accreditation of Teacher Education (NCATE, transitioning to the Council for the Accreditation of Educator Preparation or CAEP), and federal policy changes, as well as graduate education policies. These standards, requirements, and policies supersede catalog descriptions of prior programs and requirements.
- The division reserves the right to change the admission process and requirements as needed, withhold credential recommendation due to a candidate’s failure to meet and/or maintain APU professional and ethical behavior standards and dispositions, and/or expel a candidate at any time in the program due to a candidate’s failure to meet and/or maintain APU professional and ethical standards and dispositions.
- Please refer to published general application requirements for credential programs.

Intern Credential Option and Eligibility Requirements

The Multiple Subject and Single Subject Credential programs, and the Education Specialist programs, offer an Intern Credential option specifically designed for the candidate who is teaching full time in an appropriate setting in a California public K-12 school. Candidates planning to complete their clinical experience via an Intern Credential should communicate with a credential analyst in the Office of Credentials (http://www.apu.edu/education/resources/credentials/) prior to beginning the eligibility process. To become eligible for an Intern Credential, a candidate must meet the following requirements:

1. Hold a baccalaureate or higher degree from a regionally accredited institution of higher education.
2. Gain admittance to a School of Education preliminary teaching credential program and be a candidate in good standing.
3. Successfully complete (grade of B- or higher in each course) at least 6 units of coursework in the School of Education preliminary teaching credential program. Candidates who already hold a California Multiple Subject, Single Subject, or Education Specialist Teaching Credential may check with the Office of Credentials for possible exemption from this requirement.
4. Verify successful completion of the California Basic Skills Requirement (https://www.ctc.ca.gov/credentials/leaflets/basic-skills-requirement-(cl-667/) via one of the options approved by the California Commission on Teacher Credentialing (CTC) (https://www.ctc.ca.gov/).

5. Verify successful completion of U.S. Constitution requirement (course or exam).

6. Verify successful completion of the California Subject Matter Requirement (https://www.ctc.ca.gov/educator-prep/subject-matter-requirements/) via one of the options approved by the California Commission on Teacher Credentialing (CTC) (https://www.ctc.ca.gov/).

7. Verify successful completion of the School of Education’s approved intern pre-service.

- Multiple Subject Preservice: TESP 501 Art of Teaching I: Foundations of Teaching, TESP 502 Science of Teaching I: How Students Learn, TEP 511 Art of Teaching II: Pedagogy and Instructional Design, and TEP 521 Methods of Teaching Reading and Writing (K-8)
- Single Subject Preservice: TESP 501 Art of Teaching I: Foundations of Teaching, TESP 502 Science of Teaching I: How Students Learn, TEP 511 Art of Teaching II: Pedagogy and Instructional Design, and TEP 531 Methods of Teaching Reading and Writing (7-12)
- Education Specialist Preservice: TESP 501 Art of Teaching I: Foundations of Teaching, TESP 502 Science of Teaching I: How Students Learn, SPED 517 Art of Teaching II: Pedagogy and Instructional Design for Education Specialists, and SPED 525 Methods of Teaching Reading and Writing

Candidates may also meet intern preservice requirements via completion of Alternative Certification Training (ACT) through the Kern County Superintendent of Schools. Candidates are required to work with their credential analyst for completion of preservice requirements through ACT or documented evidence of completing another CTC-approved preservice certification program. Note: For coursework or a CTC-approved preservice certification program to be considered toward meeting intern preservice requirements, the coursework or program must be completed within five years prior to recommendation for the Intern Credential.

8. Verify successful completion of 30 hours of early fieldwork experience via one of the following options:

- APU fieldwork that is embedded in courses. Courses must be completed within five years prior to recommendation for the Intern Credential.
- Current California Multiple Subject, Single Subject, or Education Specialist Teaching Credential.
- Life Ryan Credentials, out-of-state credentials, and previous teaching experience will be evaluated on a case-by-case basis.

9. Demonstrate competence in reading instruction via completion of the School of Education Methods of Teaching Reading and Writing course relevant to the candidate’s preliminary credential program AND proof of registration for the Reading Instruction Competence Assessment (RICA) exam OR proof of a passing score on the RICA exam. Candidates who already hold a California Multiple Subject or Education Specialist Teaching Credential may check with the Office of Credentials for possible exemption from this requirement.

10. Gain employment under a full-time public school contract at a school site located within 50 road-miles of Azusa or an APU regional campus offering School of Education preliminary teacher credential programs.

11. Verify employment as evidenced by a letter from school or district administration on school or district letterhead fully describing the teaching assignment.

12. Submit the credential application and Intern Credential Application Request through the Office of Credentials.

Completion of the above requirements does not guarantee recommendation for an Intern Credential; such recommendation is contingent upon the availability of university coaches/mentors. The School of Education must also have a valid Memorandum of Understanding (MOU) in place with the employing Local Education Agency (LEA) extending the offer of employment. Additionally, the intern coordinator and program director for the relevant preliminary teacher credential program will review the candidate’s file to determine if the candidate demonstrates appropriate academic progress and dispositions for recommendation for an Intern Credential.

Note: The School of Education at Azusa Pacific University is not approved to offer the Bilingual Crosscultural Language and Academic Development Certificate (BCLAD). At this time, the intern programs are not designed to support individuals employed in bilingual classrooms. We are unable to recommend a candidate for an Intern credential if their intern placement is in a bilingual classroom.

Once a candidate has been recommended for an Intern Credential, he/she must comply with the following requirements to maintain eligibility for the Intern Credential:

- Be continuously employed in a teaching assignment that requires the Intern Credential
- Be an APU School of Education candidate in good standing
- Be making satisfactory progress toward program completion for the duration of the Intern Credential
- Follow his/her signed advising plan
- Enroll in a candidate support and supervision course (SPED 500 or TEP 590) or clinical practice course each fall and spring 8-week session he/she holds an Intern Credential

Note: Once a candidate has progressed to the start of the second 8 weeks of clinical practice, the candidate has passed the point where he/she can be recommended for an Intern Credential. Upon completion of 16 weeks of clinical practice, a candidate with an Intern Credential has two 8-week sessions in which to complete the preliminary credential requirements and application and move to the preliminary credential. This includes passing the CatTPA (for all candidates) and passing the RICA (for those candidates working toward a preliminary credential requiring RICA). Failure to either maintain eligibility for the Intern Credential or to complete the preliminary credential requirements and application within the one semester immediately following completion of clinical practice will result in withdrawal of the Intern Credential, which could impact the candidate’s
employment. If an Intern Credential is withdrawn as a result of a lapse in professional responsibility, integrity, or ethical conduct, the intern may be dismissed from the program, and the intern must meet with the division chair to discuss remediation and next steps.

Programs

Department of Elementary and Secondary Education

- BA in Liberal Studies/Undergraduate Education K-8 Program (p. 785)
- Liberal Studies Minor (p. 790)
- Elementary and Secondary Education: Master's Degree Programs in Learning and Technology with Preliminary Teaching Credential
  - Master of Arts in Education: Learning and Technology and Multiple Subject Teaching Credential (p. 791)
  - Master of Arts in Education: Learning and Technology and Single Subject Teaching Credential (p. 793)
- Elementary and Secondary Education: Master's Degree Programs in Teaching with Preliminary Teaching Credential
  - Master of Arts in Education: Teaching and Multiple Subject Teaching Credential (p. 795)
  - Master of Arts in Education: Teaching and Single Subject Teaching Credential (p. 796)
- Elementary and Secondary Education: Credential-Only Programs
  - Multiple Subject Teaching Credential (p. 798)
  - Single Subject Teaching Credential (p. 799)

Department of Special Education

- Special Education: Master's Degree Programs in Learning and Technology with Education Specialist Preliminary Credential
- Master of Arts in Education: Learning and Technology and Mild to Moderate Support Needs Education Specialist Credential (p. 805)
- Master of Arts in Education: Learning and Technology and Extensive Support Needs Education Specialist Credential (p. 806)
- Special Education: Master's Degree Programs in Special Education with Education Specialist Preliminary Credential
- Master of Arts in Education: Special Education and Mild to Moderate Support Needs Education Specialist Credential (p. 808)
- Master of Arts in Education: Special Education and Extensive Support Needs Education Specialist Credential (p. 809)
- Special Education: Credential-Only Programs
  - Mild to Moderate Support Needs Education Specialist Credential (p. 811)
  - Extensive Support Needs Education Specialist Credential (p. 812)

Integrated Bachelor’s/Credential Program

- Bachelor of Science in Allied Health with Integrated Single Subject (Science) Teaching Credential (p. 71)
- Bachelor of Arts in Liberal Studies with Integrated Mild to Moderate Support Needs Education Specialist Credential (p. 816)
- Bachelor of Arts in Liberal Studies with Integrated Extensive Support Needs Education Specialist Credential (p. 816)
- Bachelor of Arts in Mathematics with Integrated Single Subject (Math) Teaching Credential (p. 187)

Courses

EDLS 200, Introduction to Teaching as a Profession K-12, 4 Units
This course provides an overview to the teaching profession, focusing on the art of teaching at the K-12 level. Issues addressed surround the Common Core standards, the California State Standards for the Teaching Profession, and the California Content Standards, including school organization, curriculum and pedagogical practices, classroom management, and assessment. The service-learning lab requires 45 hours in a K-12 school. Meets the General Education Requirement: Civic Knowledge and Engagement.
Prerequisite: Sophomore Standing

EDLS 202, Introduction to Teaching as a Profession (7-12), 4 Units
This course provides an overview to the teaching profession, focusing on the art of teaching at the 7-12 level. Issues addressed surround the Common Core standards, the California State Standards for the Teaching Profession, and the California Content Standards, including school organization, curriculum and pedagogical practices, classroom management, and assessment. The service-learning lab requires 45 hours in a 7-12 school. Meets the General Education Requirement: Civic Knowledge and Engagement.
Prerequisite: Sophomore Standing
EDLS 303, Introduction to Special Populations, 3 Units
Students explore the historical, social, cultural, and legal mandates that have influenced the treatment of, and educational programs for, individuals with mild to moderate or extensive support needs. Students explore eligibility criteria for special education under the Individuals with Disabilities Education Act (IDEA) and Child Find, as well as prereferral interventions, legal mandates for developing an Individualized Education Program (IEP), determining a Least Restrictive Environment (LRE), and offering a Free and Appropriate Public Education (FAPE) for individuals with special needs. Students consider how a Christian worldview, based on the principles of Imago Dei, guides their work with individuals with special needs to foster an environment where all students are treated with respect, dignity, and intrinsic value. Course includes embedded academic service-learning requirement for a total of 12 hours.
Prerequisite: Sophomore standing

EDLS 304, Introduction to Teaching Special Populations, 3 Units
Students explore educational and program considerations for individuals with special needs, including instructional considerations and strategies across the core content areas, as well as functional academics, for individuals with mild to moderate and extensive support needs. Attention is given to evidenced-based practices, culturally responsive teaching, and differentiation for individuals with special needs. Students reflect on the Christian worldview in relation to student diversity and developing a climate of inclusion, community, and belonging within classrooms. Course includes embedded academic service-learning requirement for a total of 12 hours.
Prerequisite: Sophomore standing

EDLS 405, Diversity in the Classroom, 3 Units
This course focuses on the examination of the interaction of the student's cultural background with ethics, racial, religious, and gender issues, the educational setting, and wider social forces that affect traditional success and failure for students who are linguistically and culturally different. The course evaluates the role that administrators and teachers play in nurturing a spirit of multiculturalism in schools. Includes service-learning hours in educational settings. Meets the General Education Requirement: Intercultural Competence.
Prerequisite: Junior standing

EDLS 495, Foundations of Education Capstone, 3 Units
This is the capstone course for seniors in the Liberal Studies program. In this course, students integrate the concepts and skills they have learned throughout their various Liberal Studies courses, apply their knowledge in a classroom service learning experience, and prepare to transition from college to their teaching careers. Students utilize the California State Common Core Standards for the Teaching Profession to reflect on their growth as educators, synthesize their knowledge and service learning experiences from across multiple courses to develop their personal philosophy of education, and generate cross-disciplinary projects that showcase their skills in curriculum development and pedagogy while preparing for the CSET (California Subject Examination for Teachers). In addition, students develop essential job searching and interviewing skills. Meets the General Education Requirement: Integrative and Applied Learning.
Prerequisite: EDLS 496, EDLS 200 or EDLS 202, EDLS 405, and senior standing

EDLS 496, Writing 3: Education and Professional Ethics, 3 Units
This writing 3 course prepares students to develop a written thesis which offers a cogent analysis of a complex topic while defending a clear thesis. Students will understand and express a Christian perspective on issues critical to the education profession through a written thesis. Biblical and theological themes relating to education provide a base, while historical biographies and examples supply a context in which students generate a distinctively Christian response to a contemporary problem facing education. Meets the General Education Requirement: Writing 3: Writing in the Disciplines.
Prerequisite: Junior standing, Writing 2

EDLS 497, Readings, 1-4 Units
This is a program of study concentrating on assigned readings, discussions, and writing arranged between, and designed by, a student of upper-division standing and a full-time professor. An independent study fee is assessed for each enrollment in this class.

EDUC 536, Family, Community, and School Connections, 3 Units
This course focuses on community dynamics, community building, and parental involvement as essential components in education. Successful school reform models of parental involvement are examined, along with their connection to higher student achievement. Master's degree candidates discuss and define their role in building strong partnerships with all families, especially those in underserved communities. They utilize asset-based community-building strategies in educational practice as they explore their school communities and conduct capacity inventories. Candidates develop an ethnography representing their deepening understanding of who their students are, how the families and communities in which they are embedded help shape them, and how they can utilize this knowledge to enhance holistic development of students through their practice.
Prerequisite: EDUC 560

EDUC 537, Curriculum Development, Revision, and Evaluation Process, 3 Units
This course applies a systems approach to curriculum design through examining the phases of the process, including analysis, design, development, and evaluation. Master's degree candidates are introduced to keys of effective curriculum design, including setting goals and developing clear and measurable objectives; determining related learning activities and resources to promote learning and accomplish objectives; designing and/or selecting appropriate forms of assessment (formative and summative) to chart student progress; and using multiple forms of feedback for assessing instructional effectiveness, to inform future modifications and revisions. Students learn the purpose of and approach to each phase of the instructional design process and create products for each phase in completing a curriculum design project.
Prerequisite: EDUC 560
EDUC 538, Current Issues in Education, 3 Units
In this course, master's degree candidates investigate, analyze, discuss, and propose solutions for the most significant problems, concerns, and challenges in education today. The course includes four areas of concentration: curriculum, with a focus on instructional design; teaching practice; school organization; and the politics of education. Candidates study current research relevant to course topics, analyze varying perspectives, and evaluate them in terms of teaching and learning effectiveness as well as the quality of life in the school community. Through compilation and synthesis of empirical work on a specific topic area, candidates craft a literature review to demonstrate expertise in current trends and future directions of research.
Prerequisite: EDUC 560

EDUC 546, Digital Communications, 3 Units
This course engages students in collaborative, investigative, and reflective learning opportunities through the exploration of relevant digital communication tools. Attention is given to current modes of communication that utilize a digital platform, and effective strategies for implementation within teaching/learning environments.
Prerequisite: EDUC 560

EDUC 547, Special Topics in Educational Technology, 3 Units
Students in this course explore the current technologies, trends, and a variety of special topics in educational technology. Course material covers practical and theoretical aspects, effectiveness, and problems related to the implementation of the topic into relevant teaching/learning environments. Different topics are offered at different times, so the course may be repeated for credit.
Prerequisite: EDUC 560

EDUC 548, Emerging Trends in Technology, 3 Units
This course covers the historical development of educational technology and the social issues influencing its growth and implementation. Attention is also given to a synthesis of research related to the field, professional organizations serving the discipline, and emerging innovative uses of educational technology.
Prerequisite: EDUC 560

EDUC 556, Historical and Philosophical Perspectives of Disability Studies, 3 Units
This course explores and analyzes the historically key definitions of disability in light of the major theories, methodological approaches, and proposed public policy uses that have shaped them. It also considers how civil rights, human rights, self-determination, social policy, and participative action research have influenced disability studies. A diverse set of current and historical research articles on disability studies is analyzed to model the ways in which different research topics have been addressed and introduce how current research can stimulate future studies. Emphasis is given to the formulation of important research questions and the development of testable hypotheses based on previous theory, literature, and experience, as master's candidates begin to develop initial sections of their capstone research project.
Prerequisite: EDUC 560

EDUC 557, Current Trends in Curriculum and Disability Studies, 3 Units
This course equips candidates with practical and theoretical understanding of curriculum in schooling, with an emphasis on the role performed by the special education teacher or differentiation expert. Course material covers the various approaches to curriculum construction and organization in schools by examining the principles of curriculum improvement, change, and evaluation. Focus is on the theories, research, and best practices related to planning and developing curriculum and its implementation in schools and classrooms in order to address the needs of students in diverse communities.
Prerequisite: EDUC 560

EDUC 558, Research and Collaboration for Special Education, 3 Units
This course provides educational specialists the communication and problem-solving skills to successfully collaborate with families, other educators, related service providers, and individuals with exceptionalities within the K-12 education environment. Additionally, this advanced course enables master's degree candidates in special education to build upon earlier courses and examine educational research within the special education framework, with an emphasis on data collection for action research.
Prerequisite: EDUC 560

EDUC 560, Action Research in Education, 1 Unit
This course introduces students to basic qualitative and quantitative research methods, designs, and reporting strategies. Master's degree candidates are enabled to develop an understanding of the research process by introducing the basic principles of research and academic writing. Through activities integrating theory with practice, candidates learn how to identify problems to study, develop research questions, specify data collection methods and design their action research projects which are continued in a subsequent course.

EDUC 569, Capstone Seminar, 2 Units
Culminating the MA emphasis courses, the capstone seminar helps students build on the coursework representing their repertoire of academic preparation from the credential and master's programs. Master's candidates complete their action research projects, and create an ePortfolio for compiling assignments that profile their professional identities (personal philosophy, identity and dispositions narrative), their scholarly work (ethnography, curriculum assessment, literature review), and their practical applications (lesson and unit plans, classroom management) in the classroom. In this way, students refine and contribute further to a body of work representing their accomplishments and professional identity. Finally, through this course, candidates enhance their understanding and experience of a community's connection to the school environment.
Prerequisite: EDUC 536, EDUC 537, and EDUC 538; or EDUC 546, EDUC 547, and EDUC 548; or EDUC 556, EDUC 557, and EDUC 558
**SPED 500, Candidate Support and Supervision, 1-3 Units**
Teacher candidates explore current educational practices and a variety of special topics in the field of education, and course material covers practical and theoretical aspects relevant to the teaching/learning environment. Interns may be required to take this course during their program in an effort to meet program requirements while receiving mandated supervision and support. This course may be repeated four (4) times for credit for a total of 4-12 units.

**SPED 525, Methods of Teaching Reading and Writing, 3 Units**
This course prepares teacher candidates to implement a comprehensive literacy program of systematic instruction in reading, writing, listening, speaking, and language aligned with the California Common Core State Standards for English Language Arts and the English Language Arts/English Language Development Framework. Through application of research-based instructional practices, candidates learn specific ways to address the diverse needs of all students.

**SPED 526, Specialized Academic Instruction: Reading, Writing, and Math, 3 Units**
This course introduces candidates to multifaceted and multitiered methodologies and strategies necessary for teaching and engaging diverse students with disabilities in mathematics and language arts. Candidates become proficient in making explicit connections between ongoing assessment, student characteristics and strengths, instruction, and curriculum. They learn to analyze data to plan effective and differentiated instruction and interventions, and also how to collaboratively design effective IEP goals while considering the role of technology in those goals.

**SPED 527, Teaching Students with Extensive Support Needs, 3 Units**
This course provides teacher candidates with a systems perspective for understanding and supporting individuals with extensive support needs and their families who come from culturally and linguistically diverse backgrounds. Using a person-centered planning approach, candidates examine effective collaborative strategies for team building, Individual Education Program (IEP) development, joint problem solving, and transition planning. Course material covers evidence-based strategies, adaptations, modifications, and technologies that provide access to Common Core standards, functional academics, and life skills. Various models are reviewed, including co-teaching, inclusion, community-based instruction, and vocational training.

**SPED 528, Assessment and IEP Development: Mild to Extensive Support Needs, 3 Units**
Teacher candidates in this course examine current assessment mandates for students with mild to extensive support needs, studying test development and learning to evaluate assessment tools based on current research-based policies and mandates. Candidates also learn to administer and interpret norm-criterion reference assessment instruments as well as informal surveys or assessment instruments, and gain an understanding of the influence of cultural and linguistic factors in the development of Individual Education Program (IEP) goals and Individual Transition Plans (ITPs).

**Corequisite:** SPED 550 or SPED 551 or SPED 570 or SPED 571

**SPED 529, Positive Behavior Supports for Students with Exceptional Needs, 3 Units**
This course equips teacher candidates with the skills and legal framework essential to the development of positive behavior supports and self-management outcomes for students with disabilities. Candidates examine foundations of behavior disorders, appropriate communication, and behavioral support strategies that align with best practices. The foundations of functional analysis of behavior that leads to the development of positive behavior intervention plans are examined. Models of collaborative practices that lead to positive relationships and critical partnerships with students, families, educators, and agencies are investigated through skill development and self-analysis.

**Corequisite:** SPED 552 or SPED 553 or SPED 572 or SPED 573

**SPED 550, Clinical Practice I: Mild to Moderate Support Needs, 2 Units**
Students with mild to moderate support needs require specialized support to address unique learning needs resulting from a range of specific learning disabilities, intellectual disabilities, autism, other health impairments, emotional disturbance, multiple disabilities, traumatic brain injury, orthopedic impairment, or other identified disabilities for which placement in a classroom for students with mild to moderate support needs is deemed appropriate. Teacher candidates, as part of their clinical practice, get on-site experience providing the support described in students' Individualized Education Programs (IEPs). These experiences include, but are not limited to, creating an appropriate physical classroom environment for students with mild/moderate disabilities, conducting formal and informal assessments in order to determine students' current levels of performance, planning for students' grade and instructional levels, and capturing data to support progress on annual goals and short-term objectives that are aligned with California Content Standards. Candidates also monitor students' progress toward instructional goals and state-adopted standards, and, if necessary, identify behaviors impeding learning, and remediate by implementing positive behavior supports. Candidates complete a semester of full-time, supervised student teaching in appropriate public school classrooms, with assignments in classroom grade levels K-12. Each placement provides teaching experiences with English learners and ethnically diverse students. *Meets the General Education Requirement: Integrative and Applied Learning.*

**Corequisite:** SPED 528
SPED 553, Clinical Practice II: Mild to Moderate Support Needs, 2 Units
Students with mild to moderate support needs require specialized support to address unique learning needs resulting from a range of specific learning disabilities, intellectual disabilities, autism, other health impairments, emotional disturbance, multiple disabilities, traumatic brain injury, orthopedic impairment, or other identified disabilities for which placement in a classroom for students with mild to moderate support needs was deemed appropriate. During their clinical practice experience, teacher candidates are provided with on-site experiences that provide the support described in the students’ Individualized Education Programs (IEPs). These experiences include, but are not limited to, creating an appropriate classroom physical environment for students with mild to moderate support needs, conducting formal and informal assessments in order to determine the students’ current levels of performance, planning for their grade and instructional level, and capturing data to support progress on annual goals and short-term objectives aligned with California Content Standards. Candidates also monitor students’ progress toward instructional goals and state-adopted standards and, if necessary, identify behaviors impeding learning, and remediate by implementing positive behavior supports. Candidates complete a semester of full-time, supervised student teaching in appropriate public school classrooms, with assignments in classroom grade levels K-12. Each placement provides teaching experiences with English learners and ethnically diverse students.
Prerequisite: SPED 550;
Corequisite: SPED 529

SPED 570, Clinical Practice I: Extensive Support Needs, 2 Units
Students with extensive support needs require specialized support to address unique learning needs resulting from a range of intellectual, behavioral, emotional, communication, sensory, autism spectrum disorder, and/or motor impairments. Teacher candidates, as part of their clinical practice, get on-site experience providing the support described in the students’ Individualized Education Programs (IEPs). These experiences include, but are not limited to, creating an appropriate classroom physical environment for students with extensive support needs, conducting formal and informal assessments in order to determine students’ current levels of performance, planning instructional-level annual goals and short-term objectives that are aligned with California Content Standards, monitoring students’ progress toward instructional goals and short-term objectives, and identifying behaviors impeding learning and then remediating by implementing positive behavior supports. Candidates complete a semester of full-time, supervised student teaching in appropriate public school classrooms, with assignments in classroom grade levels K-12. Each placement provides teaching experiences with English learners and ethnically diverse students.
Corequisite: SPED 528

SPED 573, Clinical Practice II: Extensive Support Needs, 2 Units
Students with extensive support needs require specialized support to address unique learning needs resulting from a range of intellectual, behavioral, emotional, communication, sensory, autism spectrum disorder, and/or motor impairments. Teacher candidates, as part of their clinical practice, get on-site experience providing the support described in the students’ Individualized Education Programs (IEPs). These experiences include, but are not limited to, creating an appropriate classroom physical environment for students with extensive support needs, conducting formal and informal assessments in order to determine students’ current levels of performance, planning instructional-level annual goals and short-term objectives aligned with California Content Standards, monitoring students’ progress toward instructional goals and short-term objectives, and identifying behaviors impeding learning and then remediating by implementing positive behavior supports. Candidates complete a semester of full-time, supervised student teaching in appropriate public school classrooms, with assignments in classroom grade levels K-12. Each placement provides teaching experiences with English learners and ethnically diverse students.
Prerequisite: SPED 570;
Corequisite: SPED 528

SPED 599, Readings in Special Education, 1-3 Units
Consists of a program of study concentrating on assigned readings, discussions, field experiences, and/or writing arranged between, and designed by, a student and a full-time professor. An independent study fee is assessed for each enrollment in this class.

TEP 511, Art of Teaching II: Pedagogy and Instructional Design, 3 Units
This course explores pedagogy as the combination of teachers’ professional knowledge, skills, and abilities, which are directed to create effective learning opportunities and outcomes for all students in a range of contexts. Building on broad themes from TESP 501 The Art of Teaching I, teacher candidates explore pedagogical methods and specific models for meeting individual student needs, utilizing universal and individualized strategies. Attention is given to culturally responsive teaching practices for learners with diverse cultural and ethnic identities, as well as differentiation practices for students with various learning needs. Candidates further analyze the relationship between curriculum, pedagogy, and assessment, and examine and reflect on the Christian worldview in relation to student diversity and developing a climate of equity and collaboration within classrooms. This course includes 15 hours of required field experience in a k-12 school.
Prerequisite: TESP 501
TEP 512, Science of Teaching II: Effective Assessment Strategies for All Learners, 3 Units
Students in this course explore strategies for designing standards and data-driven curricular plans and units to serve diverse (e.g., culturally, linguistically, and/or ability-diverse) student populations. Teacher candidates engage in the administration and analysis of formative, summative, and diagnostic assessment to inform the ongoing development of differentiated instruction that serves the unique academic needs of students from diverse, intersecting backgrounds and identities. In view of the academic achievement gap that exists in California K-12 schools, candidates utilize assessment results, alongside state frameworks and current standards specific to their specialization, in development of further curriculum/planning, instruction, and assessment cycles that demonstrate the use of instructional strategies, materials, technologies, and other resources to make content connected, contextualized, and accessible to all students. Candidates consider how a Christian worldview catalyzes their commitment to engage fully in the work of creating classrooms that meet the needs of all their students. This course includes 15 hours of required field experience in a K-12 school.
Prerequisite: TESP 502

TEP 521, Methods of Teaching Reading and Writing (K-8), 3 Units
This course prepares teacher candidates to implement a comprehensive literacy program of systematic instruction in reading, writing, listening, speaking, and language aligned with the California Common Core State Standards for English Language Arts and the English Language Arts/English Language Development Framework. Through application of research-based instructional practices, candidates learn specific ways to address the diverse needs of all students.

TEP 522, Methods of Teaching Mathematics (K-8), 3 Units
This course introduces teacher candidates to the California Common Core State Standards for Mathematics and the Standards for Mathematical Practice. In addition to relevant theory, the course focuses on pedagogical methods and strategies for teaching math to all students in K-8 classrooms. This course prepares teacher candidates to develop curriculum designed to ensure the success of diverse student populations. Moreover, issues addressed in the course include, but are not limited to technology integration; differentiated instruction and culturally appropriate pedagogical practices; and subject-specific strategies for teaching and assessing.

TEP 523, Methods of Teaching Science (K-8), 2 Units
This course introduces credential candidates to state-adopted K-8 Next Generation Science Standards and the 2016 Science Framework for California Public Schools: Kindergarten Through Grade Twelve, as well as science concepts and principles, scientific investigation, experimentation, and student assessment. Emphasis is on balanced instruction between Disciplinary Core Ideas, Crosscutting Concepts, and Scientific and Engineering Practices as described in the Next Generation Science Standards. This course also focuses on facilitating K-8 students' ability to independently read and comprehend instructional materials and graphic/media representations, integrate mathematical concepts and practices in scientific investigations, develop academic language, engage in disciplinary discourse practices, and understand the connections between science, society, technology, and the environment. The teaching of physical education and health education in grades K-8 is also covered.
Corequisite: TEP 551

TEP 524, Methods of Integrating the Humanities (K-8), 2 Units
This course, intended for students in clinical practice (student teaching or intern placements), introduces methods of connecting moral and civic education with the social sciences and the arts through thematic teaching, in ways that comply with state frameworks and academic content standards, specifically focusing on the California Common Core State Standards. Course material utilizes a wide range of high-quality children's literature and performing and visual arts strategies. Emphasis is on a meaning-centered, diverse humanities curriculum designed to promote critical thinking skills and meet the needs of all students, including those with special needs and those from culturally and linguistically diverse backgrounds.
Corequisite: TEP 552

TEP 531, Methods of Teaching Reading and Writing (7-12), 3 Units
This course includes intensive instruction in reading and language arts methods grounded in methodically sound research, to be incorporated in all subject areas. The study of secondary reading and language arts methods includes effective strategies and methods for guiding and developing the content-based reading and writing abilities of all students, including students with varied reading levels and language backgrounds. Teacher candidates examine well-designed systematic instructional programs, and the implementation of California Common Core State Standards (CCSS) for reading and writing in an integrated fashion with the standards for their subject area.

TEP 532, Secondary Pedagogy I: Teaching in Secondary Schools (7-12), 2 Units
This course is designed for individuals who are teaching in middle or high school subject areas, such as math, ELA, social studies, science, art, physical education, music, etc. Teacher candidates in this course explore the teacher's and the students' roles in middle and high school classrooms. This course focuses on the history, development, and reform measures of middle and high schools to create positive environments that foster inquiry and promote a meaningful learning setting, including trends addressing cultural diversity. Aspects of middle and high school covered in this course include student-centered learning; critical teaching skills for making lessons relevant to students (including culturally relevant practices); cognitive and behavioral development as it affects curriculum design; lesson planning; differentiated instruction; use of technology; assessment; and intentional, reflective teaching practices. All assignments are completed in the subject area for which the individual is seeking the Single Subject Teaching Credential.
Corequisite: TEP 561
**TEP 533, The Differentiated Classroom: Maximizing Capacity of Each Learner (7-12), 3 Units**

This course explores the philosophical and practical aspects of differentiation as defined by the entirety of classroom practice by the interdependence of the key aspects of curriculum, instruction, assessment, the learner, and the learning environment. Teacher candidates engage in activities that support the development of a teaching philosophy and practice that cultivates the K-12 learner as an active participant with a shared understanding of an investment in a differentiated classroom. Teacher candidates develop competence in analyzing and applying knowledge of K-12 students’ achievement, instructional needs, social-emotional needs, cultural and language factors, and other relevant data necessary to improve teaching and learning for all students. Candidates also begin the development of an Individualized Learning Plan to gain competence as a reflective practitioner and further develop the professional knowledge, skills, and dispositions necessary to meet the expectations for beginning teachers as outlined in the California Teaching Performance Expectations.

**TEP 534, Secondary Pedagogy II: Content-Specific Strategies, Teaching, and Assessment (7-12), 2 Units**

This course engages candidates who are in clinical practice (student teaching or intern placements) in discussion of common challenges faced by teacher candidates in secondary classrooms, and also focuses on content-specific pedagogical strategies by subject matter. Issues addressed in the course include, but are not limited to, teacher beliefs and their effect on student performance; classroom management; effective curriculum and lesson development; culturally appropriate pedagogical practices; the “plan, teach, assess, reflect, and apply” cycle; content-specific strategies for teaching and assessing; and preparation for the workforce. Individual concerns and issues raised during student teaching or the internship are addressed.

**Prerequisite:** TEP 532

**Corequisite:** TEP 562

**TEP 551, Clinical Practice I: Multiple Subject Credential, 2 Units**

Clinical practice gives teacher candidates a culminating preparatory experience toward which the teacher candidate’s entire teacher education program has been planned. The purpose is to develop and verify beginning-level teaching competency in candidates by the end of the clinical practice semester, according to standards set by the California Commission on Teacher Credentialing (CTC) and the Council for the Accreditation of Educator Preparation (CAEP). Clinical practice provides a full-time, experience-based program in which teacher candidates (contracted and noncontracted) have opportunities to participate as classroom teachers in schools while supervised by a university mentor. Focus is given to many areas of background learning and to coordinating those areas into a meaningful set of experiences. These experiences include, but are not limited to, designing and implementing instruction for their multiple subject grade level and learners, promoting and supporting rigorous and appropriate content in their lessons, creating a positive environment for students with diverse needs, and reflecting in order to monitor student learning and adjust instruction. Clinical practice also provides teaching experiences with English learners and ethnically diverse students. *Meets the General Education Requirement: Integrative and Applied Learning.*

**Corequisite:** TEP 552

**TEP 552, Clinical Practice II: Multiple Subject Credential, 2 Units**

Clinical practice gives teacher candidates a culminating preparatory experience toward which the teacher candidate’s entire teacher education program has been planned. The purpose is to develop and verify beginning-level teaching competency in candidates by the end of the clinical practice semester, according to standards set by the California Commission on Teacher Credentialing (CTC) and the Council for the Accreditation of Educator Preparation (CAEP). Clinical practice provides a full-time, experience-based program in which teacher candidates (contracted and noncontracted) have opportunities to participate as classroom teachers in schools while supervised by a university mentor. Focus is given to many areas of background learning and to coordinating those areas into a meaningful set of experiences. These experiences include, but are not limited to, designing and implementing instruction for their multiple subject grade level and learners, promoting and supporting rigorous and appropriate content in their lessons, creating a positive environment for students with diverse needs, and reflecting in order to monitor student learning and adjust instruction. Clinical practice also provides teaching experiences with English learners and ethnically diverse students. *Meets the General Education Requirement: Integrative and Applied Learning.*

**Prerequisite:** TEP 551

**Corequisite:** TEP 553

**TEP 561, Clinical Practice I: Single Subject Credential, 2 Units**

Clinical practice gives teacher candidates a culminating preparatory experience toward which the teacher candidate’s entire teacher education program has been planned. The purpose is to develop and verify beginning-level teaching competency in candidates by the end of the clinical practice semester, according to standards set by the California Commission on Teacher Credentialing (CTC) and the Council for the Accreditation of Educator Preparation (CAEP). Clinical practice provides a full-time, experience-based program in which teacher candidates (contracted and noncontracted) have opportunities to participate as classroom teachers in schools while supervised by a university mentor. Focus is given to many areas of background learning and to coordinating those areas into a meaningful set of experiences. These experiences include, but are not limited to, designing and implementing instruction for their single subject content area and learners, promoting and supporting rigorous and appropriate content in their lessons, creating a positive environment for students with diverse needs, and reflecting in order to monitor student learning and adjust instruction. Clinical practice also provides teaching experiences with English learners and ethnically diverse students. *Meets the General Education Requirement: Integrative and Applied Learning.*

**Corequisite:** TEP 552
TEP 562, Clinical Practice II: Single Subject Credential, 2 Units
Clinical practice gives teacher candidates a culminating preparatory experience toward which the teacher candidate's entire teacher education program has been planned. The purpose is to develop and verify beginning-level teaching competency in candidates by the end of the clinical practice semester, according to standards set by the California Commission on Teacher Credentialing (CTC) and the Council for the Accreditation of Educator Preparation (CAEP). Clinical practice provides a full-time, experience-based program in which teacher candidates (contracted and noncontracted) have opportunities to participate as classroom teachers in schools while supervised by a university mentor. Focus is given to many areas of background learning and to coordinating those areas into a meaningful set of experiences. These experiences include, but are not limited to, designing and implementing instruction for their single subject content area and learners, promoting and supporting rigorous and appropriate content in their lessons, creating a positive environment for students with diverse needs, and reflecting in order to monitor student learning and adjust instruction. Clinical practice also provides teaching experiences with English learners and ethnically diverse students. Meets the General Education Requirement: Integrative and Applied Learning.
Prerequisite: TEP 561; Corequisite: TEP 534

TEP 590, Candidate Support and Supervision, 1-3 Units
Teacher candidates explore current educational practices and a variety of special topics in the field of education, and course material covers practical and theoretical aspects relevant to the teaching/learning environment. Interns may be required to take this course during their program in an effort to meet program requirements while receiving mandated supervision and support. This course may be repeated four (4) times for credit for a total of 4-12 units.

TEP 599, Readings in Teacher Education, 1-3 Units
Consists of a program of study concentrating on assigned readings, discussions, field experiences, and/or writing arranged between, and designed by, a student and a full-time professor. An independent study fee is assessed for each enrollment in this class.

TESP 501, Art of Teaching I: Foundations of Teaching, 3 Units
This course provides an introduction to basic pedagogy, including classroom management, lesson planning and teaching, standards-based instruction, teaching strategies for students with diverse identities and needs, and the application of technology to support teaching and learning. Teacher candidates consider strategies, models, and processes for meeting the needs of a broad range of K-12 students, including special needs students, gifted students, English language learners, speakers of nondominant varieties of English, and students of all cultural or ethnic identities. This course is designed for direct application of classroom learning by candidates in a collaborative context that implements inclusion. Candidates examine Christian character and develop an understanding of grace in the Christian worldview as applied in classroom contexts, in consideration of meeting the needs of students and building community within the classroom. This course includes 15 hours of required field experience in a K-12 school.

TESP 502, Science of Teaching I: How Students Learn, 3 Units
This course comprises a basic overview of human growth and development for all students in the K-12 environment. Teacher candidates identify how research on the neuroscience of learning, theories of learning, and student motivation affect current understanding of student development through the K-12 education experience. They then creatively and collaboratively investigate how this knowledge can enable them to meet the needs of all students, including underserved populations, English language learners, and individuals with diverse learning needs (from gifted learners to individuals with mild to severe disabilities). Candidates also examine their own cultural beliefs, attitudes toward diversity, and related assumptions, identifying how these might affect student learning and achievement in their classrooms. Candidates demonstrate applied knowledge of communication styles and strategies for fostering positive cross-cultural interactions among students who are diverse in terms of culture, language, and ability. Finally, candidates reflect on the need to support the development of all students from a Christian worldview. This course includes 15 hours of required field experience in a K-12 school. Meets the General Education Requirement: Social Science.

TESP 503, The Soul of Teaching: Tapestry of American Education, 3 Units
This course introduces teacher candidates to the history of American education and a sampling of modern philosophies of education, examined through the lens of a Christian worldview. Specific consideration is given to the ways in which historical trends have contributed to today's education system, including how social and philosophical movements, as well as policy changes, have shaped the growth and inclusiveness of education in the U.S. Candidates reflect on the continued need for education equity for all students in U.S. schools, and explore inclusive practices for diverse populations, professional dispositions, teacher resiliency, and their role in perpetuating social justice in education. They engage culturally appropriate response strategies that enhance learning opportunities in a cross-cultural context, and identify how a Christian worldview enables and directs a commitment to principles of equity and justice in their practice. Meets the General Education Requirement: Intercultural Competence.

TESP 504, Schools and Educational Systems, 3 Units
This course explores the legal, ethical, and organizational systems (federal, state, district, and school) within which teachers conduct their work. Teacher candidates engage in an examination of school and community cultures and their impact on learning, by focusing on the ways teachers communicate and collaborate with external and internal stakeholders to provide equitable access to all students. Additionally, contractual responsibilities and professional expectations are addressed. Candidates also consider the ways in which educators, from a Christian worldview, can advocate to transform social problems impacting school culture. Meets the General Education Requirement: Civic Knowledge and Engagement.
Faculty

Chair, Division of Teacher Education; Program Director, Liberal Studies
Catherine Hahs Brinkley (http://www.apu.edu/faculty/cbrinkley/), EdD

Program Director, Multiple Subject and Single Subject Teaching Credentials
Regula Schmid (http://www.apu.edu/faculty/rschmid/), EdD

Program Director, Special Education Credential Programs
Angela Guta (http://www.apu.edu/faculty/aguta/), PhD

Instructor
Susan Hall, MA
Department of Elementary and Secondary Education

The Department of Elementary and Secondary Education offers a Bachelor of Arts in Liberal Studies to prepare undergraduate students seeking careers as elementary school teachers with the breadth of content knowledge needed to teach in an elementary setting. The department also offers master’s degree and credential programs for candidates seeking a California Preliminary Teaching Credential authorizing them to teach in a public elementary, middle, or high school setting. APU’s Multiple Subject Teaching Credential programs prepare teachers for positions at the elementary level, providing a breadth of knowledge over the K-8 continuum for self-contained classrooms. The Single Subject Teaching Credential programs prepare teachers for positions at the middle and high school levels (6-12), with focus in their specific subject area. The department assesses all candidates at admission, throughout their program, and up to the recommendation of credentials. Assessments are used to evaluate and inform candidate learning and include the following assessment areas: California Commission on Teacher Credentialing (CTC) (https://www.ctc.ca.gov/) teacher performance expectations, APU program learning outcomes, and teacher candidate dispositions.

Programs

Major

- Bachelor of Arts in Liberal Studies/Undergraduate Education K-8 Program (p. 785)

Minor

- Minor in Liberal Studies (p. 790)

Master’s

- Master of Arts in Education: Learning and Technology and Multiple Subject Teaching Credential (p. 791)
- Master of Arts in Education: Learning and Technology and Single Subject Teaching Credential (p. 793)
- Master of Arts in Education: Teaching and Multiple Subject Teaching Credential (p. 795)
- Master of Arts in Education: Teaching and Single Subject Teaching Credential (p. 796)

Credentials

- Multiple Subject Teaching Credential (p. 798)
- Single Subject Teaching Credential (p. 799)

Courses

EDLS 200, Introduction to Teaching as a Profession K-12, 4 Units
This course provides an overview to the teaching profession, focusing on the art of teaching at the K-12 level. Issues addressed surround the Common Core standards, the California State Standards for the Teaching Profession, and the California Content Standards, including school organization, curriculum and pedagogical practices, classroom management, and assessment. The service-learning lab requires 45 hours in a K-12 school. Meets the General Education Requirement: Civic Knowledge and Engagement.
Prerequisite: Sophomore Standing

EDLS 202, Introduction to Teaching as a Profession (7-12), 4 Units
This course provides an overview to the teaching profession, focusing on the art of teaching at the 7-12 level. Issues addressed surround the Common Core standards, the California State Standards for the Teaching Profession, and the California Content Standards, including school organization, curriculum and pedagogical practices, classroom management, and assessment. The service-learning lab requires 45 hours in a 7-12 school. Meets the General Education Requirement: Civic Knowledge and Engagement.
Prerequisite: Sophomore Standing

EDLS 303, Introduction to Special Populations, 3 Units
Students explore the historical, social, cultural, and legal mandates that have influenced the treatment of, and educational programs for, individuals with mild to moderate or extensive support needs. Students explore eligibility criteria for special education under the Individuals with Disabilities Education Act (IDEA) and Child Find, as well as prereferral interventions, legal mandates for developing an Individualized Education Program (IEP), determining a Least Restrictive Environment (LRE), and offering a Free and Appropriate Public Education (FAPE) for individuals with special needs. Students consider how a Christian worldview, based on the principles of Imago Dei, guides their work with individuals with special needs to foster an environment where all students are treated with respect, dignity, and intrinsic value. Course includes embedded academic service-learning requirement for a total of 12 hours.
Prerequisite: Sophomore standing
EDLS 304, Introduction to Teaching Special Populations, 3 Units
Students explore educational and program considerations for individuals with special needs, including instructional considerations and strategies across the core content areas, as well as functional academics, for individuals with mild to moderate and extensive support needs. Attention is given to evidenced-based practices, culturally responsive teaching, and differentiation for individuals with special needs. Students reflect on the Christian worldview in relation to student diversity and developing a climate of inclusion, community, and belonging within classrooms. Course includes embedded academic service-learning requirement for a total of 12 hours.
Prerequisite: Sophomore standing

EDLS 405, Diversity in the Classroom, 3 Units
This course focuses on the examination of the interaction of the student's cultural background with ethics, racial, religious, and gender issues, the educational setting, and wider social forces that affect traditional success and failure for students who are linguistically and culturally different. The course evaluates the role that administrators and teachers play in nurturing a spirit of multiculturalism in schools. Includes service-learning hours in educational settings. Meets the General Education Requirement: Intercultural Competence.
Prerequisite: Junior standing

EDLS 495, Foundations of Education Capstone, 3 Units
This is the capstone course for seniors in the Liberal Studies program. In this course, students integrate the concepts and skills they have learned throughout their various Liberal Studies courses, apply their knowledge in a classroom service learning experience, and prepare to transition from college to their teaching careers. Students utilize the California State Common Core Standards for the Teaching Profession to reflect on their growth as educators, synthesize their knowledge and service learning experiences from across multiple courses to develop their personal philosophy of education, and generate cross-disciplinary projects that showcase their skills in curriculum development and pedagogy while preparing for the CSET (California Subject Examination for Teachers). In addition, students develop essential job searching and interviewing skills. Meets the General Education Requirement: Integrative and Applied Learning.
Prerequisite: EDLS 496, EDLS 200 or EDLS 202, EDLS 405, and senior standing

EDLS 496, Writing 3: Education and Professional Ethics, 3 Units
This writing 3 course prepares students to develop a written thesis which offers a cogent analysis of a complex topic while defending a clear thesis. Students will understand and express a Christian perspective on issues critical to the education profession through a written thesis. Biblical and theological themes relating to education provide a base, while historical biographies and examples supply a context in which students generate a distinctively Christian response to a contemporary problem facing education. Meets the General Education Requirement: Writing 3: Writing in the Disciplines.
Prerequisite: Junior standing, Writing 2

EDLS 497, Readings, 1-4 Units
This is a program of study concentrating on assigned readings, discussions, and writing arranged between, and designed by, a student of upper-division standing and a full-time professor. An independent study fee is assessed for each enrollment in this class.

EDUC 536, Family, Community, and School Connections, 3 Units
This course focuses on community dynamics, community building, and parental involvement as essential components in education. Successful school reform models of parental involvement are examined, along with their connection to higher student achievement. Master's degree candidates discuss and define their role in building strong partnerships with all families, especially those in underserved communities. They utilize asset-based community-building strategies in educational practice as they explore their school communities and conduct capacity inventories. Candidates develop an ethnography representing their deepening understanding of who their students are, how the families and communities in which they are embedded help shape them, and how they can utilize this knowledge to enhance holistic development of students through their practice.
Prerequisite: EDUC 560

EDUC 537, Curriculum Development, Revision, and Evaluation Process, 3 Units
This course applies a systems approach to curriculum design through examining the phases of the process, including analysis, design, development, and evaluation. Master's degree candidates are introduced to keys of effective curriculum design, including setting goals and developing clear and measurable objectives; determining related learning activities and resources to promote learning and accomplish objectives; designing and/or selecting appropriate forms of assessment (formative and summative) to chart student progress; and using multiple forms of feedback for assessing instructional effectiveness, to inform future modifications and revisions. Students learn the purpose of and approach to each phase of the instructional design process and create products for each phase in completing a curriculum design project.
Prerequisite: EDUC 560

EDUC 538, Current Issues in Education, 3 Units
In this course, master's degree candidates investigate, analyze, discuss, and propose solutions for the most significant problems, concerns, and challenges in education today. The course includes four areas of concentration: curriculum, with a focus on instructional design; teaching practice; school organization; and the politics of education. Candidates study current research relevant to course topics, analyze varying perspectives, and evaluate them in terms of teaching and learning effectiveness as well as the quality of life in the school community. Through compilation and synthesis of empirical work on a specific topic area, candidates craft a literature review to demonstrate expertise in current trends and future directions of research.
Prerequisite: EDUC 560
EDUC 546, Digital Communications, 3 Units
This course engages students in collaborative, investigative, and reflective learning opportunities through the exploration of relevant digital communication tools. Attention is given to current modes of communication that utilize a digital platform, and effective strategies for implementation within teaching/learning environments.
Prerequisite: EDUC 560

EDUC 547, Special Topics in Educational Technology, 3 Units
Students in this course explore the current technologies, trends, and a variety of special topics in educational technology. Course material covers practical and theoretical aspects, effectiveness, and problems related to the implementation of the topic into relevant teaching/learning environments. Different topics are offered at different times, so the course may be repeated for credit.
Prerequisite: EDUC 560

EDUC 548, Emerging Trends in Technology, 3 Units
This course covers the historical development of educational technology and the social issues influencing its growth and implementation. Attention is also given to a synthesis of research related to the field, professional organizations serving the discipline, and emerging innovative uses of educational technology.
Prerequisite: EDUC 560

EDUC 560, Action Research in Education, 1 Unit
This course introduces students to basic qualitative and quantitative research methods, designs, and reporting strategies. Master's degree candidates are enabled to develop an understanding of the research process by introducing the basic principles of research and academic writing. Through activities integrating theory with practice, candidates learn how to identify problems to study, develop research questions, specify data collection methods and design their action research projects which are continued in a subsequent course.

EDUC 566, Capstone Seminar, 2 Units
Culminating the MA emphasis courses, the capstone seminar helps students build on the coursework representing their repertoire of academic preparation from the credential and master's programs. Master's candidates complete their action research projects, and create an ePortfoli for compiling assignments that profile their professional identities (personal philosophy, identity and dispositions narrative), their scholarly work (ethnography, curriculum assessment, literature review), and their practical applications (lesson and unit plans, classroom management) in the classroom. In this way, students refine and contribute further to a body of work representing their accomplishments and professional identity. Finally, through this course, candidates enhance their understanding and experience of a community's connection to the school environment.
Prerequisite: TESP 501, TESP 502, EDUC 536, EDUC 537, and EDUC 538; or EDUC 546, EDUC 547, and EDUC 548; or EDUC 556, EDUC 557, and EDUC 558

TEP 511, Art of Teaching II: Pedagogy and Instructional Design, 3 Units
This course explores pedagogy as the combination of teachers' professional knowledge, skills, and abilities, which are directed to create effective learning opportunities and outcomes for all students in a range of contexts. Building on broad themes from TESP 501 The Art of Teaching I, teacher candidates explore pedagogical methods and specific models for meeting individual student needs, utilizing universal and individualized strategies. Attention is given to culturally responsive teaching practices for learners with diverse cultural and ethnic identities, as well as differentiation practices for students with various learning needs. Candidates further analyze the relationship between curriculum, pedagogy, and assessment, and examine and reflect on the Christian worldview in relation to student diversity and developing a climate of equity and collaboration within classrooms. This course includes 15 hours of required field experience in a k-12 school.
Prerequisite: TESP 501

TEP 512, Science of Teaching II: Effective Assessment Strategies for All Learners, 3 Units
Students in this course explore strategies for designing standards and data-driven curricular plans and units to serve diverse (e.g., culturally, linguistically, and/or ability-diverse) student populations. Teacher candidates engage in the administration and analysis of formative, summative, and diagnostic assessment to inform the ongoing development of differentiated instruction that serves the unique academic needs of students from diverse, intersecting backgrounds and identities. In view of the academic achievement gap that exists in California k-12 schools, candidates utilize assessment results, alongside state frameworks and current standards specific to their specialization, in development of further curriculum/planning, instruction, and assessment cycles that demonstrate the use of instructional strategies, materials, technologies, and other resources to make content connected, contextualized, and accessible to all students. Candidates consider how a Christian worldview catalyzes their commitment to engage fully in the work of creating classrooms that meet the needs of all their students. This course includes 15 hours of required field experience in a k-12 school.
Prerequisite: TESP 502

TEP 521, Methods of Teaching Reading and Writing (K-8), 3 Units
This course prepares teacher candidates to implement a comprehensive literacy program of systematic instruction in reading, writing, listening, speaking, and language aligned with the California Common Core State Standards for English Language Arts and the English Language Arts/English Language Development Framework. Through application of research-based instructional practices, candidates learn specific ways to address the diverse needs of all students.
TEP 522, Methods of Teaching Mathematics (K-8), 3 Units
This course introduces teacher candidates to the California Common Core State Standards for Mathematics and the Standards for Mathematical Practice. In addition to relevant theory, the course focuses on pedagogical methods and strategies for teaching math to all students in K-8 classrooms. This course prepares teacher candidates to develop curriculum designed to ensure the success of diverse student populations. Moreover, issues addressed in the course include, but are not limited to technology integration; differentiated instruction and culturally appropriate pedagogical practices; and subject-specific strategies for teaching and assessing.

TEP 523, Methods of Teaching Science (K-8), 2 Units
This course introduces credential candidates to state-adopted K-8 Next Generation Science Standards and the 2016 Science Framework for California Public Schools: Kindergarten Through Grade Twelve, as well as science concepts and principles, scientific investigation, experimentation, and student assessment. Emphasis is on balanced instruction between Disciplinary Core Ideas, Crosscutting Concepts, and Scientific and Engineering Practices as described in the Next Generation Science Standards. This course also focuses on facilitating K-8 students’ ability to independently read and comprehend instructional materials and graphic/media representations, integrate mathematical concepts and practices in scientific investigations, develop academic language, engage in disciplinary discourse practices, and understand the connections between science, society, technology, and the environment. The teaching of physical education and health education in grades K-8 is also covered.
Corequisite: TEP 551

TEP 524, Methods of Integrating the Humanities (K-8), 2 Units
This course, intended for students in clinical practice (student teaching or intern placements), introduces methods of connecting moral and civic education with the social sciences and the arts through thematic teaching, in ways that comply with state frameworks and academic content standards, specifically focusing on the California Common Core State Standards. Course material utilizes a wide range of high-quality children’s literature and performing and visual arts strategies. Emphasis is on a meaning-centered, diverse humanities curriculum designed to promote critical thinking skills and meet the needs of all students, including those with special needs and those from culturally and linguistically diverse backgrounds.
Corequisite: TEP 552

TEP 531, Methods of Teaching Reading and Writing (7-12), 3 Units
This course includes intensive instruction in reading and language arts methods grounded in methodically sound research, to be incorporated in all subject areas. The study of secondary reading and language arts methods includes effective strategies and methods for guiding and developing the content-based reading and writing abilities of all students, including students with varied reading levels and language backgrounds. Teacher candidates examine well-designed systematic instructional programs, and the implementation of California Common Core State Standards (CCSS) for reading and writing in an integrated fashion with the standards for their subject area.

TEP 532, Secondary Pedagogy I: Teaching in Secondary Schools (7-12), 2 Units
This course is designed for individuals who are teaching in middle or high school subject areas, such as math, ELA, social studies, science, art, physical education, music, etc. Teacher candidates in this course explore the teacher’s and the students’ roles in middle and high school classrooms. This course focuses on the history, development, and reform measures of middle and high schools to create positive environments that foster inquiry and promote a meaningful learning setting, including trends addressing cultural diversity. Aspects of middle and high school covered in this course include student-centered learning; critical teaching skills for making lessons relevant to students (including culturally relevant practices); cognitive and behavioral development as it affects curriculum design; lesson planning; differentiated instruction; use of technology; assessment; and intentional, reflective teaching practices. All assignments are completed in the subject area for which the individual is seeking the Single Subject Teaching Credential.
Corequisite: TEP 561

TEP 533, The Differentiated Classroom: Maximizing Capacity of Each Learner (7-12), 3 Units
This course explores the philosophical and practical aspects of differentiation as defined by the entirety of classroom practice by the interdependence of the key aspects of curriculum, instruction, assessment, the learner, and the learning environment. Teacher candidates engage in activities that support the development of a teaching philosophy and practice that cultivates the K-12 learner as an active participant with a shared understanding of an investment in a differentiated classroom. Teacher candidates develop competence in analyzing and applying knowledge of K-12 students’ achievement, instructional needs, social-emotional needs, cultural and language factors, and other relevant data necessary to improve teaching and learning for all students. Candidates also begin the development of an Individualized Learning Plan to gain competence as a reflective practitioner and further develop the professional knowledge, skills, and dispositions necessary to meet the expectations for beginning teachers as outlined in the California Teaching Performance Expectations.

TEP 534, Secondary Pedagogy II: Content-Specific Strategies, Teaching, and Assessment (7-12), 2 Units
This course engages candidates who are in clinical practice (student teaching or intern placements) in discussion of common challenges faced by teacher candidates in secondary classrooms, and also focuses on content-specific pedagogical strategies by subject matter. Issues addressed in the course include, but are not limited to, teacher beliefs and their effect on student performance; classroom management; effective curriculum and lesson development; culturally appropriate pedagogical practices; the “plan, teach, assess, reflect, and apply” cycle; content-specific strategies for teaching and assessing; and preparation for the workforce. Individual concerns and issues raised during student teaching or the internship are addressed.
Prerequisite: TEP 532;
Corequisite: TEP 562
TEP 551, Clinical Practice I: Multiple Subject Credential, 2 Units
Clinical practice gives teacher candidates a culminating preparatory experience toward which the teacher candidate's entire teacher education program has been planned. The purpose is to develop and verify beginning-level teaching competency in candidates by the end of the clinical practice semester, according to standards set by the California Commission on Teacher Credentialing (CTC) and the Council for the Accreditation of Educator Preparation (CAEP). Clinical practice provides a full-time, experience-based program in which teacher candidates (contracted and noncontracted) have opportunities to participate as classroom teachers in schools while supervised by a university mentor. Focus is given to many areas of background learning and to coordinating those areas into a meaningful set of experiences. These experiences include, but are not limited to, designing and implementing instruction for their multiple subject grade level and learners, promoting and supporting rigorous and appropriate content in their lessons, creating a positive environment for students with diverse needs, and reflecting in order to monitor student learning and adjust instruction. Clinical practice also provides teaching experiences with English learners and ethnically diverse students. Meets the General Education Requirement: Integrative and Applied Learning.
Corequisite: TEP 523

Prerequisite: TEP 524

TEP 552, Clinical Practice II: Multiple Subject Credential, 2 Units
Clinical practice gives teacher candidates a culminating preparatory experience toward which the teacher candidate's entire teacher education program has been planned. The purpose is to develop and verify beginning-level teaching competency in candidates by the end of the clinical practice semester, according to standards set by the California Commission on Teacher Credentialing (CTC) and the Council for the Accreditation of Educator Preparation (CAEP). Clinical practice provides a full-time, experience-based program in which teacher candidates (contracted and noncontracted) have opportunities to participate as classroom teachers in schools while supervised by a university mentor. Focus is given to many areas of background learning and to coordinating those areas into a meaningful set of experiences. These experiences include, but are not limited to, designing and implementing instruction for their multiple subject grade level and learners, promoting and supporting rigorous and appropriate content in their lessons, creating a positive environment for students with diverse needs, and reflecting in order to monitor student learning and adjust instruction. Clinical practice also provides teaching experiences with English learners and ethnically diverse students. Meets the General Education Requirement: Integrative and Applied Learning.
Prerequisite: TEP 551;
Corequisite: TEP 524

TEP 561, Clinical Practice I: Single Subject Credential, 2 Units
Clinical practice gives teacher candidates a culminating preparatory experience toward which the teacher candidate's entire teacher education program has been planned. The purpose is to develop and verify beginning-level teaching competency in candidates by the end of the clinical practice semester, according to standards set by the California Commission on Teacher Credentialing (CTC) and the Council for the Accreditation of Educator Preparation (CAEP). Clinical practice provides a full-time, experience-based program in which teacher candidates (contracted and noncontracted) have opportunities to participate as classroom teachers in schools while supervised by a university mentor. Focus is given to many areas of background learning and to coordinating those areas into a meaningful set of experiences. These experiences include, but are not limited to, designing and implementing instruction for their single subject content area and learners, promoting and supporting rigorous and appropriate content in their lessons, creating a positive environment for students with diverse needs, and reflecting in order to monitor student learning and adjust instruction. Clinical practice also provides teaching experiences with English learners and ethnically diverse students. Meets the General Education Requirement: Integrative and Applied Learning.
Corequisite: TEP 532

Prerequisite: TEP 561;

TEP 562, Clinical Practice II: Single Subject Credential, 2 Units
Clinical practice gives teacher candidates a culminating preparatory experience toward which the teacher candidate's entire teacher education program has been planned. Clinical practice also provides teaching experiences with English learners and ethnically diverse students. Meets the General Education Requirement: Integrative and Applied Learning.
Prerequisite: TEP 561;
Corequisite: TEP 532

TEP 590, Candidate Support and Supervision, 1-3 Units
Teacher candidates explore current educational practices and a variety of special topics in the field of education, and course material covers practical and theoretical aspects relevant to the teaching/learning environment. Interns may be required to take this course during their program in an effort to meet program requirements while receiving mandated supervision and support. This course may be repeated four (4) times for credit for a total of 4-12 units.
TESP 501, Art of Teaching I: Foundations of Teaching, 3 Units
This course provides an introduction to basic pedagogy, including classroom management, lesson planning and teaching, standards-based instruction, teaching strategies for students with diverse identities and needs, and the application of technology to support teaching and learning. Teacher candidates consider strategies, models, and processes for meeting the needs of a broad range of K-12 students, including special needs students, gifted students, English language learners, speakers of nondominant varieties of English, and students of all cultural or ethnic identities. This course is designed for direct application of classroom learning by candidates in a collaborative context that implements inclusion. Candidates examine Christian character and develop an understanding of grace in the Christian worldview as applied in classroom contexts, in consideration of meeting the needs of students and building community within the classroom. This course includes 15 hours of required field experience in a K-12 school.

TESP 502, Science of Teaching I: How Students Learn, 3 Units
This course comprises a basic overview of human growth and development for all students in the K-12 environment. Teacher candidates identify how research on the neuroscience of learning, theories of learning, and student motivation affect current understanding of student development through the K-12 education experience. They then creatively and collaboratively investigate how this knowledge can enable them to meet the needs of all students, including underserved populations, English language learners, and individuals with diverse learning needs (from gifted learners to individuals with mild to severe disabilities). Candidates also examine their own cultural beliefs, attitudes toward diversity, and related assumptions, identifying how these might affect student learning and achievement in their classrooms. Candidates demonstrate applied knowledge of communication styles and strategies for fostering positive cross-cultural interactions among students who are diverse in terms of culture, language, and ability. Finally, candidates reflect on the need to support the development of all students from a Christian worldview. This course includes 15 hours of required field experience in a K-12 school. 

Meets the General Education Requirement: Social Science.

TESP 503, The Soul of Teaching: Tapestry of American Education, 3 Units
This course introduces teacher candidates to the history of American education and a sampling of modern philosophies of education, examined through the lens of a Christian worldview. Specific consideration is given to the ways in which historical trends have contributed to today’s education system, including how social and philosophical movements, as well as policy changes, have shaped the growth and inclusiveness of education in the U.S. Candidates reflect on the continued need for education equity for all students in U.S. schools, and explore inclusive practices for diverse populations, professional dispositions, teacher resiliency, and their role in perpetuating social justice in education. They engage culturally appropriate response strategies that enhance learning opportunities in a cross-cultural context, and identify how a Christian worldview enables and directs a commitment to principles of equity and justice in their practice. Meets the General Education Requirement: Intercultural Competence.

TESP 504, Schools and Educational Systems, 3 Units
This course explores the legal, ethical, and organizational systems (federal, state, district, and school) within which teachers conduct their work. Teacher candidates engage in an examination of school and community cultures and their impact on learning, by focusing on the ways teachers communicate and collaborate with external and internal stakeholders to provide equitable access to all students. Additionally, contractual responsibilities and professional expectations are addressed. Candidates also consider the ways in which educators, from a Christian worldview, can advocate to transform social problems impacting school culture. Meets the General Education Requirement: Civic Knowledge and Engagement.

BA in Liberal Studies/Undergraduate Education K-8 Program
84 units

Mission
The liberal studies major (https://www.apu.edu/education/programs/liberal-studies-major/) equips future teachers and other professionals by integrating coursework and service-learning experiences with the application of a Christian worldview as it relates to life vocation. It promotes awareness of cultural diversity issues and studies multiple curricula with an emphasis in specific subject areas aligned with Common Core standards for subject matter while fostering a holistic understanding of knowledge.

Program Overview
The Liberal Studies/Undergraduate Education K-8 program offers a Bachelor of Arts in Liberal Studies aligned with California Common Core subject-matter standards in order to prepare undergraduate students seeking careers as elementary school teachers with the breadth of content knowledge needed to teach in a K-8 setting.

The liberal studies degree provides future elementary school teachers with opportunities to teach in a self-contained classroom environment. Opportunities are available to take additional units toward a Supplementary/Subject Matter Authorization (SMA) if the student desires to teach content up to a ninth-grade level. Consult the Liberal Studies/Undergraduate Education K-8 program in the Division of Teacher Education for complete information.

During the first two years of college, it is suggested that undergraduate liberal studies majors complete university General Education requirements and prerequisites to upper-division coursework, which is embedded in the program’s four-year plan. Students may want to explore the teaching field by taking EDLS 200 or EDLS 202 as sophomores, juniors, or seniors, along with EDLS 405, EDLS 495, and EDLS 496. Students in this program participate
in a minimum of 75 hours of teacher-oriented, service-learning field experience and observation through several core liberal studies/undergraduate education K-8 courses.

APU candidates prepare to work in schools as teachers, and they must know and demonstrate the content, pedagogical, and professional knowledge, skills, and dispositions necessary to help all students learn. Therefore, the Division of Teacher Education assesses candidates in these standards from admissions through recommendation of credentials, making APU graduates highly sought-after professionals.

**Career Opportunities**

Though most liberal studies graduates enter teaching credential programs and find teaching positions in public and private schools locally, nationally, and abroad, demand exists in the business and communication fields as well because of the increasing need for college graduates with broad and diverse academic backgrounds. Potential teaching careers exist in multiple subject, single subject, and special education.

**Additional Preparation**

Multiple Subject and Education Specialist preliminary credential candidates seeking admission into the teacher education program (p. 769) may satisfy the California Basic Skills Requirement (https://www.ctc.ca.gov/credentials/leaflets/basic-skills-requirement-(cl-667/) and the California Subject Matter Requirement (https://www.ctc.ca.gov/educator-prep/subject-matter-requirements/) through coursework and/or completion of the Liberal Studies major. Those who satisfy the requirements by graduation may be hired on paid contracts with a school district once their bachelor’s degree has been conferred and while completing a program for their Multiple Subject Teaching Credential.

Concentrations

Select one concentration from the list below.  12

Total Units  84

1  This is a core liberal studies course. The 38 units of core liberal studies coursework must be completed with a grade of C or higher and an overall GPA of 3.0 or higher.
2  Meets the General Education Civic Knowledge and Engagement requirement.
3  Meets the General Education Social Sciences requirement.
4  Meets the General Education Intercultural Competence requirement.
5  Meets the General Education Integrative and Applied Learning requirement.
6  Meets the General Education Writing 3 requirement.
7  Meets the General Education Oral Communication requirement.
8  Meets the General Education Humanities: Literature requirement.
9  Meets the General Education Humanities: Fine Arts requirement.
10  Meets the General Education Quantitative Literacy requirement.
11  Meets the General Education Natural Sciences requirement.
12  Meets the General Education Humanities: History requirement.
13  California Education Code Section 44335 requires all candidates for a teaching credential to demonstrate knowledge of the United States Constitution by completing a college-level course or a college-level examination in the subject; successful completion of either with a grade of C or higher meets this California Education Code requirement.

Students in the liberal studies major are limited to completing only one concentration from those listed below. A concentration course cannot double-count to meet a concentration requirement and a major requirement listed above.

**Total Units** 12

1. SPAN 101, SPAN 102, SPAN 201, and SPAN 202 are prerequisites for 300-level SPAN courses.
2. Meets the General Education Intercultural Competence requirement.
4. Meets the General Education Writing 3 requirement.

**Program Learning Outcomes**

**Program Learning Outcomes**

Students who successfully complete this program shall be able to:
1. Analyze and demonstrate proficiency in subject matter required of K--8 teachers by the State of California.
2. Integrate K--8 curriculum concepts and disciplines.
4. Understand aspects of cultural diversity within the context of the classroom.
5. Identify a distinctive Christian perspective compared to a secular perspective as it pertains to current education issues.

**Minor in Liberal Studies**

22-23 units
The liberal studies minor is a multidisciplinary program that adds foundational elements of K-8 subject-matter preparation and practical field experience to any student's major course of study. The program provides students with the opportunity to develop a teaching philosophy and acquire basic subject-matter knowledge in five to seven content areas with an understanding of diversity and culture in a classroom setting; this may provide some preparation for substitute teaching and lesson planning. Students work closely with an advisor in major and minor fields in order to create an organized on-campus study.

**NOTE:** The minor does not fulfill the California Subject Matter Requirement ([https://www.ctc.ca.gov/educator-prep/subject-matter-requirements/](https://www.ctc.ca.gov/educator-prep/subject-matter-requirements/)). Liberal studies minors must maintain a C or higher in all courses credited toward the minor.

**Total Units:** 22-23

1. Meets the General Education Civic Knowledge and Engagement requirement.
2. Meets the General Education Intercultural Competence requirement.

### Program Learning Outcomes

**Program Learning Outcomes**

Students who successfully complete this program shall be able to:

1. Analyze and demonstrate proficiency in subject matter required of K-6 teachers by the State of California.
2. Integrate K8 curriculum concepts and disciplines through the application of lesson plans, papers, and projects in Children's Literature, Mathematical Concepts for Elementary Teachers, Science and Children, Fundamental Art Experiences, Music in the Elementary Schools, Physical Education in the Elementary Schools.
3. Define teaching methods of instruction using best practices with a Christian perspective while integrating K8 curriculum concepts and disciplines through the application of lesson plans, papers, and projects.
4. Understand cultural diversity issues within the context of the classroom through service-learning experiences and in class discussion.
5. Identify a distinctive Christian perspective compared to a secular perspective as it pertains to different education issues.

### MA in Education: Learning and Technology and Multiple Subject Teaching Credential

Azusa Pacific University’s Master of Arts in Education: Learning and Technology and Multiple Subject Teaching Credential program ([https://www.apu.edu/education/programs/masters-in-learning-technology-multiple-subject/](https://www.apu.edu/education/programs/masters-in-learning-technology-multiple-subject/)) prepares candidates to earn a Master of Arts in Education: Learning and Technology degree along with an embedded California Multiple Subject Preliminary Teaching Credential. This program includes comprehensive foundation courses emphasizing teaching and educational methods, as well as specialization courses providing content required for the multiple subject
MA in Education: Learning and Technology and Multiple Subject Teaching Credential

credential. Practical classroom and fieldwork experiences provide application to theory, preparing candidates to teach in diverse settings. Advanced coursework in the emphasis area of learning and technology provides candidates with the knowledge to effectively design and infuse technology-embedded curriculum into K-8 teaching and learning environments. The mode of delivery includes face-to-face instruction, campus-based classes, distance learning, online courses, and clinical experiences.

Approved by the California Commission on Teacher Credentialing (CTC) and the National Council for the Accreditation of Teacher Education (NCATE), which is transitioning to the Council for the Accreditation of Educator Preparation (CAEP), Azusa Pacific University’s Multiple Subject Teaching Credential program comprises specific methods courses that are accompanied by practical classroom applications and field experiences in both primary and upper-elementary school assignments.

Upon completion of the requirements listed below and all of the requirements detailed in the Steps to a Credential (p. 823), the candidate will have earned a Preliminary Multiple Subject Teaching Credential and a Master of Arts in Education: Learning and Technology degree.

Computer and Software Requirements

Each student must have a Mac or PC laptop or notebook running the latest operating system with a word processing program and a stable internet connection.

¹ These courses must be completed prior to beginning clinical practice.
² May be taken for credit up to three times as an additional elective as long as topics are not repeated.
³ Elective courses can be used toward the master’s degree only for individuals needing additional units to complete the degree. Elective courses cannot be used to replace foundation, specialization, or emphasis course requirements.
⁴ This program is designed to be completed with 44 units; the use of elective units to complete the degree may increase the unit total.

NOTE: A maximum of 8 units may be taken per 8-week session. Completion of all credential requirements—including all examinations, coursework, and other requirements—must be met before the master’s degree will be posted. A G (http://www.apu.edu/graduateprofessionalcenter/registrar/forms/graduation Application (https://www.apu.edu/graduateprofessionalcenter/registrar/forms/) must be completed and fees paid by the deadlines set by the registrar.

NOTE: Candidates who hold an intern credential must enroll in a candidate support and supervision course (TEP 590) during each 8-week session (fall or spring) in which they are not enrolled in a clinical practice course.
It is the candidate's responsibility to submit a credential application through the Office of Credentials (https://www.apu.edu/education/resources/credentials/) upon completion of a credential program to receive his/her California educator credential. This request may be submitted to the credentials office up to one month before completion of all credential requirements.

**Admission**

University graduate admission and program-specific requirements must be met before an application is complete (see Admission to the University (p. 1092)). Program-specific application requirements are available online (https://tracking.cirrusinsight.com/74647a2d-e9a2-412f-9b55-9959c7aac4ec/\-edu-graduateprofessionalcenter-admissions-requirements-program/).

International students should contact Graduate and Professional Admissions (https://www.apu.edu/graduateprofessionalcenter/admissions/) for application procedures.

**Program Learning Outcomes**

**Program Learning Outcomes**

Students who successfully complete this program shall be able to:
1. Engage and support all students in learning.
2. Create and maintain effective environments for student learning.
4. Plan instruction and design learning experiences for all students.
5. Assess student learning.
6. Develop as a professional educator.

**MA in Education: Learning and Technology and Single Subject Teaching Credential**

Azusa Pacific University's Master of Arts in Education: Learning and Technology and Single Subject Teaching Credential program (https://www.apu.edu/education/programs/masters-in-learning-technology-single-subject/) prepares candidates to earn a Master of Arts in Education: Learning and Technology degree along with an embedded California Single Subject Preliminary Teaching Credential. This program includes comprehensive foundation courses emphasizing teaching and educational methods, as well as specialization courses providing content required for the single subject credential. Practical classroom and fieldwork experiences provide application to theory, preparing candidates to teach in diverse settings. Advanced coursework in the emphasis area of learning and technology provides candidates with the knowledge to effectively design and infuse technology-embedded curriculum into 7-12 grade teaching and learning environments. The mode of delivery includes face-to-face instruction, campus-based classes, distance learning, blended and online courses, and clinical experiences.

The Master of Arts in Education: Learning and Technology is approved by the California Commission on Teacher Credentialing (CTC) and the National Council for the Accreditation of Teacher Education (NCATE), which is transitioning to the Council for the Accreditation of Educator Preparation (CAEP).

Upon completion of the requirements listed below and all of the requirements detailed in the Steps to a Credential (p. 823), the candidate will have earned a Preliminary Single Subject Teaching Credential and a Master of Arts in Education: Learning and Technology degree. Note: The preparation for a Preliminary Single Subject Teaching Credential is available in the following subject areas: art, business, English language arts, mathematics, music, physical education, science, social science, and world languages.

**Computer and Software Requirements**

Each student must have a Mac or PC laptop or notebook running the latest operating system with a word processing program and a stable internet connection.

MA in Education: Teaching and Multiple Subject Teaching Credential

Azusa Pacific University’s Master of Arts in Education: Teaching and Multiple Subject Teaching Credential program (https://www.apu.edu/education/programs/masters-in-teaching-multiple-subject/) prepares candidates to earn a Master of Arts in Education: Teaching degree along with an embedded California Multiple Subject Preliminary Teaching Credential. This program includes comprehensive foundation courses emphasizing teaching and educational methods, as well as specialization courses providing content required for the multiple subject credential. Practical classroom and fieldwork experiences provide application to theory, preparing candidates to teach in diverse settings. Advanced coursework in the emphasis area of teaching provides the context for evaluation, analysis, and continuous improvement of teaching practices and programs, providing breadth to a rich and robust program. The mode of delivery includes face-to-face instruction, campus-based classes, distance learning, online courses, and clinical experiences.

The Multiple Subject Teaching Credential program is approved by the California Commission on Teacher Credentialing (CTC) and the National Council for the Accreditation of Teacher Education (NCATE), which is transitioning to the Council for the Accreditation of Educator Preparation (CAEP).

Upon completion of the requirements listed below and all of the requirements detailed in the Steps to a Credential (p. 823), the candidate will have earned a California Multiple Subject Preliminary Teaching Credential and a Master of Arts in Education: Teaching.

</table>
Must be completed prior to beginning clinical practice.

NOTE: A maximum of 9 units may be taken per 8-week session. Completion of all credential requirements—including all examinations, coursework, and other requirements—must be met before the candidate will be recommended for a teaching credential. Candidates should meet with their credential analyst (https://www.apu.edu/education/resources/credentials/) for information regarding the credential application process.

NOTE: Candidates who hold an intern credential must enroll in a candidate support and supervision course (TEP 590) each 8-week session (fall or spring) in which they are not enrolled in a clinical practice course.

It is the candidate's responsibility to submit a credential application through the Office of Credentials (https://www.apu.edu/education/resources/credentials/) upon completion of a credential program to receive his/her California educator credential. This request may be submitted to the credentials office up to one month before completion of all credential requirements.

Admission

University graduate admission and program-specific requirements must be met before an application is complete (see Admission to the University (p. 1092)). Program-specific application requirements are available online (https://tracking.cirrusinsight.com/74647a2d-e9a2-412f-9b55-9959c7a9c74ec/apu-edu-graduateprofessionalcenter-admissions-requirements-program/).

International students should contact Graduate and Professional Admissions (https://www.apu.edu/graduateprofessionalcenter/admissions/) for application procedures.

Program Learning Outcomes

Program Learning Outcomes

Students who successfully complete this program shall be able to:

1. Engage and support all students in learning.
2. Create and maintain effective environments for student learning.
4. Plan instruction and design learning experiences for all students.
5. Assess student learning.
6. Develop as a professional educator.
Department of Special Education

The Department of Special Education offers master’s degree and credential programs for candidates seeking a California Preliminary Education Specialist Credential with either a mild to moderate support needs or extensive support needs specialization authorizing them to teach in the public K-12 environment. All Preliminary Education Specialist Credential programs are approved by the California Commission on Teacher Credentialing (CTC) (https://www.ctc.ca.gov/).

APU candidates are prepared to work in schools as education specialists. Candidates must demonstrate the content knowledge, pedagogical and professional knowledge, writing skills, and dispositions necessary to help all children learn. APU candidates are highly regarded in fulfilling these high professional standards. The department assesses all candidates from admission, throughout their program, and up to the recommendation of credentials. Assessments are used to evaluate and inform candidate learning and include the following assessment areas: CTC teacher performance expectations, APU program learning outcomes, and teacher candidate dispositions.

Programs

Master’s

- Master of Arts in Education: Learning and Technology and Mild to Moderate Support Needs Education Specialist Credential (p. 805)
- Master of Arts in Education: Learning and Technology and Extensive Support Needs Education Specialist Credential (p. 806)
- Master of Arts in Education: Special Education and Mild to Moderate Support Needs Education Specialist Credential (p. 808)
- Master of Arts in Education: Special Education and Extensive Support Needs Education Specialist Credential (p. 809)

Credentials

- Mild to Moderate Support Needs Education Specialist Credential (p. 811)
- Extensive Support Needs Education Specialist Credential (p. 812)

Courses

EDUC 546, Digital Communications, 3 Units
This course engages students in collaborative, investigative, and reflective learning opportunities through the exploration of relevant digital communication tools. Attention is given to current modes of communication that utilize a digital platform, and effective strategies for implementation within teaching/learning environments.
Prerequisite: EDUC 560

EDUC 547, Special Topics in Educational Technology, 3 Units
Students in this course explore the current technologies, trends, and a variety of special topics in educational technology. Course material covers practical and theoretical aspects, effectiveness, and problems related to the implementation of the topic into relevant teaching/learning environments. Different topics are offered at different times, so the course may be repeated for credit.
Prerequisite: EDUC 560

EDUC 548, Emerging Trends in Technology, 3 Units
This course covers the historical development of educational technology and the social issues influencing its growth and implementation. Attention is also given to a synthesis of research related to the field, professional organizations serving the discipline, and emerging innovative uses of educational technology.
Prerequisite: EDUC 560

EDUC 556, Historical and Philosophical Perspectives of Disability Studies, 3 Units
This course explores and analyzes the historically key definitions of disability in light of the major theories, methodological approaches, and proposed public policy uses that have shaped them. It also considers how civil rights, human rights, self-determination, social policy, and participative action research have influenced disability studies. A diverse set of current and historical research articles on disability studies is analyzed to model the ways in which different research topics have been addressed and introduce how current research can stimulate future studies. Emphasis is given to the formulation of important research questions and the development of testable hypotheses based on previous theory, literature, and experience, as master's candidates begin to develop initial sections of their capstone research project.
Prerequisite: EDUC 560

EDUC 557, Current Trends in Curriculum and Disability Studies, 3 Units
This course equips candidates with practical and theoretical understanding of curriculum in schooling, with an emphasis on the role performed by the special education teacher or differentiation expert. Course material covers the various approaches to curriculum construction and organization in schools by examining the principles of curriculum improvement, change, and evaluation. Focus is on the theories, research, and best practices related to planning and developing curriculum and its implementation in schools and classrooms in order to address the needs of students in diverse communities.
Prerequisite: EDUC 560
EDUC 558, Research and Collaboration for Special Education, 3 Units
This course provides educational specialists the communication and problem-solving skills to successfully collaborate with families, other educators, related service providers, and individuals with exceptionalities within the K-12 education environment. Additionally, this advanced course enables master's degree candidates in special education to build upon earlier courses and examine educational research within the special education framework, with an emphasis on data collection for action research.
Prerequisite: EDUC 560

EDUC 560, Action Research in Education, 1 Unit
This course introduces students to basic qualitative and quantitative research methods, designs, and reporting strategies. Master's degree candidates are enabled to develop an understanding of the research process by introducing the basic principles of research and academic writing. Through activities integrating theory with practice, candidates learn how to identify problems to study, develop research questions, specify data collection methods and design their action research projects which are continued in a subsequent course.

EDUC 569, Capstone Seminar, 2 Units
Culminating the MA emphasis courses, the capstone seminar helps students build on the coursework representing their repertoire of academic preparation from the credential and master's programs. Master's candidates complete their action research projects, and create an ePortfolio for compiling assignments that profile their professional identities (personal philosophy, identity and dispositions narrative), their scholarly work (ethnography, curriculum assessment, literature review), and their practical applications (lesson and unit plans, classroom management) in the classroom. In this way, students refine and contribute further to a body of work representing their accomplishments and professional identity. Finally, through this course, candidates enhance their understanding and experience of a community's connection to the school environment.
Prerequisite: EDUC 536, EDUC 537, and EDUC 538; or EDUC 546, EDUC 547, and EDUC 548; or EDUC 556, EDUC 557, and EDUC 558

SPED 500, Candidate Support and Supervision, 1-3 Units
Teacher candidates explore current educational practices and a variety of special topics in the field of education, and course material covers practical and theoretical aspects relevant to the teaching/learning environment. Interns may be required to take this course during their program in an effort to meet program requirements while receiving mandated supervision and support. This course may be repeated four (4) times for credit for a total of 4-12 units.

SPED 517, Art of Teaching II: Pedagogy and Instructional Design for Education Specialists, 3 Units
This course explores pedagogy as the combination of teachers' professional knowledge, skills, and abilities, which are directed to create effective learning opportunities and outcomes for all students in a range of contexts. Building on broad themes in Art of Teaching I, teacher candidates explore pedagogical methods and specific models for meeting individual student needs, utilizing universal and individualized strategies. Attention is given to culturally responsive teaching practices for learners with diverse cultural and ethnic identities, as well as differentiation practices for students with various learning needs. Candidates further analyze the relationship between curriculum, pedagogy, and assessment, and, finally, examine and reflect on the Christian worldview in relation to student diversity and developing a climate of equity and collaboration within classrooms. Course includes embedded field experience requirements for a total of 15 hours.
Prerequisite: TESP 501

SPED 518, Science of Teaching II: Effective Assessment Strategies for Learners with Special Needs, 3 Units
This course explores strategies for designing standards and data-driven curricular plans and units to serve diverse student populations (e.g., culturally, linguistically, and/or ability-diverse learners). Teacher candidates engage in the administration and analysis of formative, summative, diagnostic assessment to inform the ongoing development of differentiated instruction that serves the unique academic needs of students from diverse, intersecting backgrounds and identities. In view of the academic achievement gap that exists in California K-12 schools, candidates utilize assessment results, alongside state frameworks and current standards specific to their specialization, in development of further curriculum/planning, instruction, and assessment cycles, which demonstrate the use of instructional strategies, materials, technologies, and other resources to make content connected, contextualized, and accessible to all students. Candidates consider how a Christian worldview catalyzes their commitment to engage fully in the work of creating classrooms that meet the needs of all their students. This course includes 15 hours of required field experience in a K-12 school.
Prerequisite: TESP 502

SPED 525, Methods of Teaching Reading and Writing, 3 Units
This course prepares teacher candidates to implement a comprehensive literacy program of systematic instruction in reading, writing, listening, speaking, and language aligned with the California Common Core State Standards for English Language Arts and the English Language Arts/English Language Development Framework. Through application of research-based instructional practices, candidates learn specific ways to address the diverse needs of all students.

SPED 526, Specialized Academic Instruction: Reading, Writing, and Math, 3 Units
This course introduces candidates to multifaceted and multitiered methodologies and strategies necessary for teaching and engaging diverse students with disabilities in mathematics and language arts. Candidates become proficient in making explicit connections between ongoing assessment, student characteristics and strengths, instruction, and curriculum. They learn to analyze data to plan effective and differentiated instruction and interventions, and also how to collaboratively design effective IEP goals while considering the role of technology in those goals.
SPED 527, Teaching Students with Extensive Support Needs, 3 Units
This course provides teacher candidates with a systems perspective for understanding and supporting individuals with extensive support needs and their families who come from culturally and linguistically diverse backgrounds. Using a person-centered planning approach, candidates examine effective collaborative strategies for team building, Individual Education Program (IEP) development, joint problem solving, and transition planning. Course material covers evidence-based strategies, adaptations, modifications, and technologies that provide access to Common Core standards, functional academics, and life skills. Various models are reviewed, including co-teaching, inclusion, community-based instruction, and vocational training.

SPED 528, Assessment and IEP Development: Mild to Extensive Support Needs, 3 Units
Teacher candidates in this course examine current assessment mandates for students with mild to extensive support needs, studying test development and learning to evaluate assessment tools based on current research-based policies and mandates. Candidates also learn to administer and interpret norm-criterion reference assessment instruments as well as informal surveys or assessment instruments, and gain an understanding of the influence of cultural and linguistic factors in the development of Individual Education Program (IEP) goals and Individual Transition Plans (ITPs).
Corequisite: SPED 550 or SPED 551 or SPED 570 or SPED 571

SPED 529, Positive Behavior Supports for Students with Exceptional Needs, 3 Units
This course equips teacher candidates with the skills and legal framework essential to the development of positive behavior supports and self-management outcomes for students with disabilities. Candidates examine foundations of behavior disorders, appropriate communication, and behavioral support strategies that align with best practices. The foundations of functional analysis of behavior that leads to the development of positive behavior intervention plans are examined. Models of collaborative practices that lead to positive relationships and critical partnerships with students, families, educators, and agencies are investigated through skill development and self-analysis.
Corequisite: SPED 552 or SPED 553 or SPED 572 or SPED 573

SPED 550, Clinical Practice I: Mild to Moderate Support Needs, 2 Units
Students with mild to moderate support needs require specialized support to address unique learning needs resulting from a range of specific learning disabilities, intellectual disabilities, autism, other health impairments, emotional disturbance, multiple disabilities, traumatic brain injury, orthopedic impairment, or other identified disabilities for which placement in a classroom for students with mild to moderate support needs is deemed appropriate. Teacher candidates, as part of their clinical practice, get on-site experience providing the support described in students’ Individualized Education Programs (IEPs). These experiences include, but are not limited to, creating an appropriate physical classroom environment for students with mild/ moderate disabilities, conducting formal and informal assessments in order to determine students’ current levels of performance, planning for students’ grade and instructional levels, and capturing data to support progress on annual goals and short-term objectives that are aligned with California Content Standards. Candidates also monitor students’ progress toward instructional goals and state-adopted standards, and, if necessary, identify behaviors impeding learning, and remediate by implementing positive behavior supports. Candidates complete a semester of full-time, supervised student teaching in appropriate public school classrooms, with assignments in classroom grade levels K-12. Each placement provides teaching experiences with English learners and ethnically diverse students. Meets the General Education Requirement: Integrative and Applied Learning.
Corequisite: SPED 528

SPED 553, Clinical Practice II: Mild to Moderate Support Needs, 2 Units
Students with mild to moderate support needs require specialized support to address unique learning needs resulting from a range of specific learning disabilities, intellectual disabilities, autism, other health impairments, emotional disturbance, multiple disabilities, traumatic brain injury, orthopedic impairment, or other identified disabilities for which placement in a classroom for students with mild to moderate support needs was deemed appropriate. During their clinical practice experience, teacher candidates are provided with on-site experiences that provide the support described in the students’ Individualized Education Programs (IEPs). These experiences include, but are not limited to, creating an appropriate classroom physical environment for students with mild to moderate support needs, conducting formal and informal assessments in order to determine the students’ current levels of performance, planning for their grade and instructional level, and capturing data to support progress on annual goals and short-term objectives aligned with California Content Standards. Candidates also monitor students’ progress toward instructional goals and state-adopted standards and, if necessary, identify behaviors impeding learning, and remediate by implementing positive behavior supports. Candidates complete a semester of full-time, supervised student teaching in appropriate public school classrooms, with assignments in classroom grade levels K-12. Each placement provides teaching experiences with English learners and ethnically diverse students.
Prerequisite: SPED 550;
Corequisite: SPED 529
SPED 570, Clinical Practice I: Extensive Support Needs, 2 Units

Students with extensive support needs require specialized support to address unique learning needs resulting from a range of intellectual, behavioral, emotional, communication, sensory, autism spectrum disorder, and/or motor impairments. Teacher candidates, as part of their clinical practice, get on-site experience providing the support described in the students' Individualized Education Programs (IEPs). These experiences include, but are not limited to, creating an appropriate classroom physical environment for students with extensive support needs, conducting formal and informal assessments in order to determine students' current levels of performance, planning instructional-level annual goals and short-term objectives that are aligned with California Content Standards, monitoring students' progress toward instructional goals and short-term objectives, and identifying behaviors impeding learning and then remediating by implementing positive behavior supports. Candidates complete a semester of full-time, supervised student teaching in appropriate public school classrooms, with assignments in classroom grade levels K-12. Each placement provides teaching experiences with English learners and ethnically diverse students.

Corequisite: SPED 528

SPED 573, Clinical Practice II: Extensive Support Needs, 2 Units

Students with extensive support needs require specialized support to address unique learning needs resulting from a range of intellectual, behavioral, emotional, communication, sensory, autism spectrum disorder, and/or motor impairments. Teacher candidates, as part of their clinical practice, get on-site experience providing the support described in the students' Individualized Education Programs (IEPs). These experiences include, but are not limited to, creating an appropriate classroom physical environment for students with extensive support needs, conducting formal and informal assessments in order to determine students' current levels of performance, planning instructional-level annual goals and short-term objectives that are aligned with California Content Standards, monitoring students' progress toward instructional goals and short-term objectives, and identifying behaviors impeding learning and then remediating by implementing positive behavior supports. Candidates complete a semester of full-time, supervised student teaching in appropriate public school classrooms, with assignments in classroom grade levels K-12. Each placement provides teaching experiences with English learners and ethnically diverse students.

Prerequisite: SPED 570;
Corequisite: SPED 529

TESP 501, Art of Teaching I: Foundations of Teaching, 3 Units

This course provides an introduction to basic pedagogy, including classroom management, lesson planning and teaching, standards-based instruction, teaching strategies for students with diverse identities and needs, and the application of technology to support teaching and learning. Teacher candidates consider strategies, models, and processes for meeting the needs of a broad range of K-12 students, including special needs students, gifted students, English language learners, speakers of nondominant varieties of English, and students of all cultural or ethnic identities. This course is designed for direct application of classroom learning by candidates in a collaborative context that implements inclusion. Candidates examine Christian character and develop an understanding of grace in the Christian worldview as applied in classroom contexts, in consideration of meeting the needs of students and building community within the classroom. This course includes 15 hours of required field experience in a K-12 school.

Corequisite: SPED 573

TESP 502, Science of Teaching I: How Students Learn, 3 Units

This course comprises a basic overview of human growth and development for all students in the K-12 environment. Teacher candidates identify how research on the neuroscience of learning, theories of learning, and student motivation affect current understanding of student development through the K-12 education experience. They then creatively and collaboratively investigate how this knowledge can enable them to meet the needs of all students, including underserved populations, English language learners, and individuals with diverse learning needs (from gifted learners to individuals with mild to severe disabilities). Candidates also examine their own cultural beliefs, attitudes toward diversity, and related assumptions, identifying how these might affect student learning and achievement in their classrooms. Candidates demonstrate applied knowledge of communication styles and strategies for fostering positive cross-cultural interactions among students who are diverse in terms of culture, language, and ability. Finally, candidates reflect on the need to support the development of all students from a Christian worldview. This course includes 15 hours of required field experience in a K-12 school.

Meets the General Education Requirement: Social Science.

TESP 503, The Soul of Teaching: Tapestry of American Education, 3 Units

This course introduces teacher candidates to the history of American education and a sampling of modern philosophies of education, examined through the lens of a Christian worldview. Specific consideration is given to the ways in which historical trends have contributed to today's education system, including how social and philosophical movements, as well as policy changes, have shaped the growth and inclusiveness of education in the U.S. Candidates reflect on the continued need for education equity for all students in U.S. schools, and explore inclusive practices for diverse populations, professional dispositions, teacher resiliency, and their role in perpetuating social justice in education. They engage culturally appropriate response strategies that enhance learning opportunities in a cross-cultural context, and identify how a Christian worldview enables and directs a commitment to principles of equity and justice in their practice. Meets the General Education Requirement: Intercultural Competence.

Meets the General Education Requirement: Civic Knowledge and Engagement.

TESP 504, Schools and Educational Systems, 3 Units

This course explores the legal, ethical, and organizational systems (federal, state, district, and school) within which teachers conduct their work. Teacher candidates engage in an examination of school and community cultures and their impact on learning, by focusing on the ways teachers communicate and collaborate with external and internal stakeholders to provide equitable access to all students. Additionally, contractual responsibilities and professional expectations are addressed. Candidates also consider the ways in which educators, from a Christian worldview, can advocate to transform social problems impacting school culture. Meets the General Education Requirement: Civic Knowledge and Engagement.
MA in Education: Learning and Technology and Mild to Moderate Support Needs Education Specialist Credential

Azusa Pacific University’s Master of Arts in Education: Learning and Technology and Mild to Moderate Support Needs Education Specialist Credential program (https://www.apu.edu/education/programs/masters-in-learning-technology-mild-moderate/) prepares candidates to earn a Master of Arts in Education: Learning and Technology degree along with an embedded Mild to Moderate Support Needs Education Specialist Preliminary Credential. This program includes comprehensive foundation courses emphasizing teaching and educational methods, as well as specialization courses providing content required for the education specialist credential. Practical classroom and fieldwork experiences provide application to theory, preparing candidates to teach in diverse settings. Advanced coursework in the emphasis area of learning and technology provides candidates with the knowledge to effectively design and infuse technology-embedded curriculum into K-12 teaching and learning environments. The mode of delivery includes face-to-face instruction, campus-based classes, distance learning, online courses, and clinical experiences.

Approved by the California Commission on Teacher Credentialing (CTC) and the National Council for the Accreditation of Teacher Education (NCATE), which is transitioning to the Council for the Accreditation of Educator Preparation (CAEP), Azusa Pacific University’s Mild to Moderate Support Needs Education Specialist Credential program comprises specific methods courses that are accompanied by practical classroom applications and field experiences in public school assignments.

Upon completion of the requirements listed below and all of the requirements detailed in the Steps to a Credential (p. 823), the candidate will have earned a Mild to Moderate Support Needs Education Specialist Preliminary Credential and a Master of Arts in Education: Learning and Technology degree.

Computer and Software Requirements

Each student must have a Mac or PC laptop or notebook running the latest operating system with a word processing program and a stable internet connection.

¹ These courses must be completed prior to beginning clinical practice.
2 May be taken for credit up to three times as an additional elective as long as topics are not repeated.
3 Elective courses can be used toward the master’s degree only for the individual needing additional units to complete the degree. Elective courses cannot be used to replace foundation, specialization, or emphasis course requirements.
4 The program is designed to be completed with 46 units; the use of elective units to complete the degree may increase the unit total.

NOTE: A maximum of 8 units may be taken per 8-week session. Teacher candidates in master’s degree programs who have opted to waive coursework must take additional units to fulfill the unit requirement. Completion of all credential requirements—including all examinations, coursework, and other requirements—must be met before the master’s degree will be posted. A Graduation Application (https://www.apu.edu/graduateprofessionalcenter/registrar/forms/) must be completed and fees paid by the deadlines set by the registrar.

NOTE: Candidates who hold an intern credential must enroll in a candidate support and supervision course (SPED 500) during each 8-week session (fall or spring) in which they are not enrolled in a clinical practice course.

It is the candidate’s responsibility to submit a credential application through the Office of Credentials (https://www.apu.edu/education/resources/credentials/) upon completion of a credential program to receive his/her California educator credential. This request may be submitted to the credentials office up to one month before completion of all credential requirements.

Admission

University graduate admission and program-specific requirements must be met before an application is complete (see Admission to the University (p. 1092)). ⁴ The program is designed to be completed with 46 units; the use of elective units to complete the degree may increase the unit total.

**NOTE:** A maximum of 8 units may be taken per 8-week session. Teacher candidates in master’s degree programs who have opted to waive coursework must take additional units to fulfill the unit requirement. Completion of all credential requirements—including all examinations, coursework, and other requirements—must be met before the master’s degree will be posted. A Graduation Application ([https://www.apu.edu/graduateprofessionalcenter/registrar/forms/](https://www.apu.edu/graduateprofessionalcenter/registrar/forms/)) must be completed and fees paid by the deadlines set by the registrar.

**NOTE:** Candidates who hold an intern credential must enroll in a candidate support and supervision course (SPED 500) during each 8-week session (fall or spring) in which they are not enrolled in a clinical practice course.

It is the candidate’s responsibility to submit a credential application through the Office of Credentials ([https://www.apu.edu/education/resources/credentials/](https://www.apu.edu/education/resources/credentials/)) upon completion of a credential program to receive his/her California educator credential. This request may be submitted to the credentials office up to one month before completion of all credential requirements.

**Admission**

University graduate admission and program-specific requirements must be met before an application is complete (see [Admission to the University](p. 1092)). [Program-specific application requirements are available online](https://tracking.cirrusinsight.com/74647a2d-e9a2-412f-9b55-9959c7aac4ec/apu-edu-graduateprofessionalcenter-admissions-requirements-program/).

International students should contact Graduate and Professional Admissions ([https://www.apu.edu/graduateprofessionalcenter/admissions/](https://www.apu.edu/graduateprofessionalcenter/admissions/)) for application procedures.
Program Learning Outcomes

Students who successfully complete this program shall be able to:

1. Engage and support all students in learning.
2. Create and maintain effective environments for student learning.
4. Plan instruction and design learning experiences for all students.
5. Assess student learning.
6. Develop as a professional educator.

MA in Education: Special Education and Mild to Moderate Support Needs Education Specialist Credential

Azusa Pacific University's Master of Arts in Education: Special Education and Mild to Moderate Support Needs Education Specialist Credential program (https://www.apu.edu/education/programs/masters-in-special-education-mild-moderate/) prepares candidates to earn a Master of Arts in Education: Special Education degree along with an embedded Mild to Moderate Support Needs Education Specialist Preliminary Credential. This program includes comprehensive foundation courses emphasizing teaching and educational methods, as well as specialization courses providing content required for the education specialist credential. Practical classroom and fieldwork experiences provide application to theory, preparing candidates to teach in diverse settings. Advanced coursework in the emphasis area of special education provides candidates with knowledge needed to serve students with disabilities in K-12 public schools. The mode of delivery includes face-to-face instruction, campus-based classes, distance learning, online courses, and clinical experiences.

Approved by the California Commission on Teacher Credentialing (CTC) and the National Council for the Accreditation of Teacher Education (NCATE), which is transitioning to the Council for the Accreditation of Educator Preparation (CAEP), Azusa Pacific University’s Mild to Moderate Support Needs Education Specialist Credential program comprises specific methods courses that are accompanied by practical classroom applications and field experiences in public school assignments.

Upon completion of the requirements listed below and all of the requirements detailed in the Steps to a Credential (p. 823), the candidate will have earned both a Mild to Moderate Support Needs Education Specialist Preliminary Credential and a Master of Arts in Education: Special Education degree.

Computer and Software Requirements

Each student must have a Mac or PC laptop or notebook running the latest operating system with a word processing program and a stable internet connection.

2. Create and maintain effective environments for student learning.
4. Plan instruction and design learning experiences for all students.
5. Assess student learning.
6. Develop as a professional educator.

Mild to Moderate Support Needs Education Specialist Credential

Azusa Pacific University’s Mild to Moderate Support Needs Education Specialist Credential (https://www.apu.edu/education/programs/special-education-mild-moderate-credential/) program prepares candidates to earn a California Mild to Moderate Support Needs Education Specialist Preliminary Credential. This rigorous program includes comprehensive foundation courses emphasizing teaching and educational methods, as well as specialization courses providing content required for the education specialist credential. Practical classroom and fieldwork experiences provide application to theory, preparing candidates to teach in diverse settings. The mode of delivery includes face-to-face instruction, campus-based classes, distance learning, and clinical experiences.

Upon completion of the requirements listed below and all of the requirements detailed in the Steps to a Credential (p. 823), the candidate will have earned a Mild to Moderate Support Needs Education Specialist Preliminary Credential.

Computer and Software Requirements

¹ These courses must be completed prior to beginning clinical practice.

**NOTE:** A maximum of 9 units may be taken per 8-week session. Completion of all credential requirements—including all examinations, coursework, and other requirements—must be met before the candidate will be recommended for a credential.

**NOTE:** Candidates who hold an intern credential must enroll in a candidate support and supervision course (SPED 500) during each 8-week session (fall or spring) in which they are not enrolled in a clinical practice course.

It is the candidate’s responsibility to submit a credential application through the Office of Credentials (https://www.apu.edu/education/resources/credentials/) upon completion of a credential program to receive his/her California educator credential. This request may be submitted to the credentials office up to one month before completion of all credential requirements.

### Admission

University graduate admission and program-specific requirements must be met before an application is complete (see Admission to the University (p. 1092)). **Program-specific application requirements are available online** (https://tracking.cirrusinsight.com/74647a2d-e9a2-412f-9b55-9599c7aac4ec/apu-edu-graduateprofessionalcenter-admissions-requirements-program/).

International students should contact Graduate and Professional Admissions (https://www.apu.edu/graduateprofessionalcenter/admissions/) for application procedures.

### Program Learning Outcomes

**Program Learning Outcomes**

Students who successfully complete this program shall be able to:

1. Engage and support all students in learning.
2. Create and maintain effective environments for student learning.
4. Plan instruction and design learning experiences for all students.
5. Assess student learning.
6. Develop as a professional educator.

**Integrated Bachelor’s/Credential Program**

The Integrated Bachelor’s/Credential (APU IBC) program provides an accelerated, rigorous education leading to a bachelor’s degree and a preliminary California teaching credential. As part of this unique 3+1 model, students complete credential courses as undergraduates and work in the field alongside mentor-teachers throughout the credential portion of the program. The credential portion of the program is approved by the California Commission on
Teacher Credentialing (CTC) (https://www.ctc.ca.gov/) and accredited by the National Council for Accreditation of Teacher Education (NCATE), which is transitioning to the Council for the Accreditation of Educator Preparation (CAEP) (https://caepnet.org/).

The programs available are:

1. Bachelor of Science in Allied Health with Single Subject (Science) Teaching Credential (p. 71)
2. Bachelor of Arts in Liberal Studies with Mild to Moderate Support Needs Education Specialist Credential (p. 816)
3. Bachelor of Arts in Liberal Studies with Extensive Support Needs Education Specialist Credential (p. 816)
4. Bachelor of Arts in Mathematics with Single Subject (Math) Teaching Credential (p. 187)

Program Details

During the first three years, students complete most of the requirements for their major and participate in undergraduate field experiences in public school classrooms. Students formally apply for admission to the School of Education prior to or during their junior year. In the summer between their junior and senior years, students begin taking graduate-level courses offered through the School of Education. Throughout the program, students participate in service-learning projects, field experiences, and clinical practice (student teaching) in area K-12 public schools. The clinical practice component requires 16 weeks of full-time student teaching. All field experiences and clinical practice experiences must take place in a K-12 public school located within 50 miles of Azusa or an APU regional campus. Students must have access to reliable transportation.

Application to the Integrated Bachelor's/Credential Program

Admission to the School of Education is required for all students before they begin credential courses offered through the School of Education. Applications are available in the Office of Credentials (https://www.apu.edu/education/resources/credentials/) in Building One on West Campus. Students may apply to the APU IBC program once they have completed at least 32 semester hours of undergraduate credit and before they complete at 96 hours of undergraduate credit. Students who wish to enroll in the APU IBC program and want to begin School of Education credential courses in the summer must submit the application and accompanying requirements (see list below) to the Office of Credentials by April 1; students who wish to begin credential courses in the fall must submit the application and accompanying requirements by July 1; students who wish to begin credential courses in the spring must submit the application and accompanying requirements by November 1.

In addition to completing the application form for admission to the School of Education, a student must submit the following items to the School of Education:

- A one- to two-page personal statement addressing the following topics: experiences from the applicant’s background that enhance the teaching experience; the most rewarding and challenging aspects of working with youth; why the applicant wants to teach; preferred grade level and content areas and why; and how the applicant envisions supporting the success of all students and contributing to the profession.
- Proof of Certificate of Clearance (COC) (review instructions on Obtaining a Certificate of Clearance (https://www.apu.edu/apply/pdfs/ed_certificate_clearance.pdf)). Applicants are encouraged to begin this step early in their second year to allow time for processing by the California Commission on Teacher Credentialing.
- Proof that the California Basic Skills Requirement (https://www.ctc.ca.gov/credentials/leaflets/basic-skills-requirement-(cl-667/)) has been satisfied.
- Proof that the applicant is on track to satisfy the California Subject Matter Requirement (https://www.ctc.ca.gov/educator-prep/subject-matter-requirements/). For liberal studies majors and math majors, this means being a student in good academic standing within the major and making appropriate progress to degree completion. For allied health majors, this means submitting an official score report reflecting a passing score on an appropriate California Subject Examinations for Teachers (CSET) subtest or submitting proof of paid registration for the next appropriate CSET administration.
- Two letters of recommendation from a supervisor, former professor, or other professional. A third letter of recommendation from a current professor is encouraged.
- Current résumé.
- Current transcript indicating GPA of 3.0 or above*.

All applicants will also be required to interview with the credential program director or a designee from the IBC program.

*Admission to the APU IBC program is selective; among those accepted, the mean undergraduate GPA at time of application is 3.0+ with an SAT score of 993+ (2016 or earlier version) or 1490+ (2017 version), a composite ACT score of 20+, or a CBEST Reading subtest score of 50+ and Math subtest score of 52+.

International students must meet the following additional requirements:

- The admission requirement for international students with English as a second language (ESL) is a minimum TOEFL iBT score of 90 (22 on Reading, 22 on Listening, 22 on Speaking, and 24 on Writing) or IELTS score of 7.

During the first three years of the program, APU undergraduate students planning to participate in the APU IBC program are completing General Education requirements and degree major requirements for liberal studies, allied health, or math. Advising is coordinated by the degree major
department. Once undergraduate students are admitted to the APU IBC program, the Office of Credentials and APU IBC program director advise them in regard to the California preliminary teaching credential and credential requirements.

**Credential Tracks**

Program graduates earn a Preliminary California Teaching credential in one of the following:

**Special Education Track**

This track prepares students to effectively teach individuals with special needs. Preliminary Education Specialist credentials are offered in the areas of:

- Mild to Moderate Support Needs, which includes specific learning disabilities, mild to moderate intellectual disabilities, autism, other health impairment, and emotional disturbance
- Extensive Support Needs, which includes autism, deaf-blindness, moderate to severe intellectual disabilities, multiple disabilities, and emotional disturbance

**Single Subject Track**

This track prepares students to teach at the middle/high school level (6-12). Preliminary Single Subject credentials that can currently be completed via the APU IBC program are Math and Science. The School of Education offers the graduate Single Subject Credential program in additional subject areas. Please visit the Division of Teacher Education section of the Graduate Catalog for additional information.

**Clinical Practice Clearance**

The following requirements must be met before undergraduate students may progress to clinical practice (student teaching).

Applications for clinical practice must be submitted to the Office of Student Placements by April 10 for the fall semester and September 10 for the spring semester. Students must also submit the following to the Office of Student Placements by April 30 for fall semester and September 30 for spring semester:

- Transcript(s) demonstrating successful completion of at least 110 undergraduate units and an undergraduate GPA of 3.0 or higher.
- Proof that student is on track to graduate at the conclusion of the clinical practice semester, which could include a recommendation letter from the undergraduate major advisor, a current advisement form, or current transcripts.
- Proof that the California Basic Skills Requirement (https://www.ctc.ca.gov/credentials/leaflets/basic-skills-requirement-(cl-667/) has been satisfied.
- Proof that the California Subject Matter Requirement (https://www.ctc.ca.gov/educator-prep/subject-matter-requirements/) has been met. For liberal studies and math majors, this means proof that the student is on track to graduate at the conclusion of the clinical practice semester with a degree major in liberal studies or math.
- Tuberculosis (TB) clearance, which must be valid for a two-year time period that runs through the end date of the assigned clinical practice term.
- Certificate of Clearance or other appropriate CTC-issued document that will be valid throughout the clinical practice semester.
- Proof of U.S. Constitution coursework or exam.

Clinical practice courses are taken as Credit (CR)/No Credit (NC). Students who earn an NC grade are required to meet with their program director to identify knowledge, skills, and/or dispositions that may need strengthening and develop a performance improvement plan. Students will not receive another placement for clinical practice until after they have met with their program director and received their performance improvement plan. Students who earn an NC grade will be placed on probation and given one enrollment period to demonstrate satisfactory progress according to the terms of the improvement plan. Students who do not meet the standards for satisfactory progress after a probation period may be dismissed from the credential program.

Students are expected to successfully complete their culminating clinical practice courses at first attempt. On rare occasions, students with unsuccessful first attempts will be eligible to petition the Division of Teacher Education to repeat the course, but a successful petition is required for a student to repeat. A culminating clinical practice course can be repeated only once.

Students who earn an NC grade in a culminating clinical practice or during fieldwork as a result of a lapse in professional responsibility, integrity, or ethical conduct may not be eligible to petition to repeat the course for which they received the nonpassing grade.

**Credential Application**

To be eligible for a credential, students must demonstrate the following:

- Conferral of a bachelor’s degree from APU in allied health, liberal studies, or math.
- Successful completion of credential coursework (i.e., competency on each student learning outcome and a course grade of B- or better).
- Evaluation of required assignments in the Division of Teacher Education’s assessment tool, Watermark’s™ Student Learning & Licensure.
- Proficiency in the Teaching Performance Expectations (TPEs).
• Passage of all state-required examinations:
  • RICA is required for students who wish to become certified for teaching special education.
  • Passage of CalTPA (Instructional Cycle 1 and Instructional Cycle 2) is required for candidates who wish to become credentialed for teaching a single subject (math or science).
  • Passage of Education Specialist CalTPA (Instructional Cycle 1 and Instructional Cycle 2) for candidates who wish to become credentialed for teaching students with mild to moderate support needs and extensive support needs.
• Successful completion of CPR for infants, children, and adults.
• Successful completion of an Induction Individual Development Plan approved by the program director.
• Completion of all other credential requirements.

It is the student’s responsibility to submit a credential application through the Office of Credentials (https://www.apu.edu/education/resources/credentials/) upon completion of a credential program to receive their California preliminary teaching credential. This request may be submitted to the office up to one month before completion of all credential requirements.

Program Expectations

• Students in the APU IBC program prepare to work in schools as educators. They must demonstrate the content, pedagogy, and writing skills and dispositions required for the profession. Therefore, the School of Education assesses students, in academic and dispositional standards, from the time of admission to the program through recommendation of credential.
• Students are expected to maintain a high level of professional and ethical behavior throughout the program; failure to do so may result in discipline up to and including dismissal from the program.
• Students must be covered by professional liability insurance during the semesters in which they are participating in field experience and clinical practice.
• Students participating in field experience and clinical practice who are driving onto K-12 school sites must have proof of auto insurance.
• Students are required to have and maintain a valid Certificate of Clearance (COC) from their time of admission to the program through recommendation of credential. Students who allow their COC to expire will be prevented from enrolling in future terms until they once again have a valid COC.
• Students are required to ensure access to an active Watermark™ account, enrollment in the correct Directed Response Folio for the APU IBC program, and submission of assignments and other required documents to the correct evaluator by published deadlines in Watermark™. Students failing to submit the signature assignment for courses in Watermark™ by the last day of the session will receive a nonpassing grade in the course. Successful submission of Watermark™ items is required for recommendation for a credential to the California Commission on Teacher Credentialing (CTC).
• Students must earn a B- or better in all credential coursework. Students who earn a C+ or below must retake the course for the course to be used toward credential requirements, and must meet with their academic advisor for a revised course sequence plan before progressing in the program.
• All standards and requirements for the credential portion of the program are subject to CTC, NCATE (transitioning to CAEP), and federal policy changes, and these supersede catalog descriptions of prior programs and requirements.

An integrated bachelor’s/credential is granted based on the completion of all credential and degree requirements. If a student does not complete all credential and degree requirements, as indicated in the Graduation Clearance Pending letter, within two years of filing their graduation application, but has completed degree requirements for the undergraduate degree major without the integrated bachelor’s/credential, he or she will be subject to automatically having their stand-alone degree posted. If the remaining requirements for the stand-alone degree are not completed by the deadline, the student will be subject to policies governing reentering students, and a new catalog year will apply.

BA in Liberal Studies with Integrated Credential

118 units

In this program, students earn a Bachelor of Arts in Liberal Studies and a mild to moderate support needs or extensive support needs education specialist credential in a total of four years. The only concentration offered with the Liberal Studies Integrated Bachelor’s/Credential Program is Special Education. Full program details and requirements are available on the Integrated Bachelor’s/Credential Program (p. 813) page of this catalog.

**Total Units**: 84

---

1. This is a core liberal studies course. The 38 units of core liberal studies coursework must be completed with a grade of C or higher and an overall GPA of 3.0 or higher.
2. Meets the General Education Civic Knowledge and Engagement requirement.
3. Meets the General Education Social Sciences requirement.
5. Meets the General Education Integrative and Applied Learning requirement.
6. Meets the General Education Writing 3 requirement.
8. Meets the General Education Humanities: Literature requirement.
10. Meets the General Education Quantitative Literacy requirement.
11. Meets the General Education Natural Sciences requirement.
Meets the General Education Humanities: History requirement.

California Education Code Section 44335 requires all candidates for a teaching credential to demonstrate knowledge of the United States Constitution by completing a college-level course or a college-level examination in the subject; successful completion of either with a grade of C or higher meets this California Education Code requirement.

Students in the liberal studies major are limited to completing only one concentration from those listed below. A concentration course cannot double-count to meet a concentration requirement and a major requirement listed above.

Program Learning Outcomes
Liberal Studies Major

Program Learning Outcomes
Students who successfully complete this program shall be able to:
1. Analyze and demonstrate proficiency in subject matter required of K--8 teachers by the State of California.
2. Integrate K--8 curriculum concepts and disciplines.
4. Understand aspects of cultural diversity within the context of the classroom.
5. Identify a distinctive Christian perspective compared to a secular perspective as it pertains to current education issues.

Integrated Credential

Program Learning Outcomes
Students who successfully complete this program shall be able to:
1. Engage and support all students in learning.
2. Create and maintain effective environments for student learning.
4. Plan instruction and design learning experiences for all students.
5. Assess student learning.
6. Develop as a professional educator.
Steps to a Credential

The three major steps to completing a Preliminary Teaching Credential through APU’s Division of Teacher Education (DTE) are described as follows. Credential candidates should refer to the DTE Teacher Candidate Handbook for further details.

- Step 1: Admission (p. 823)
- Step 2: Clinical Practice Clearance (p. 824)
- Step 3: Credential Application (p. 825)

Credential Requirements

All candidates must meet the following requirements to be considered for a Multiple Subject or Single Subject Preliminary Teaching Credential or a Mild to Moderate Support Needs or Extensive Support Needs Education Specialist Preliminary Credential:

1. Successful completion of all coursework (note: all candidates must earn a B- or better in all coursework. Candidates who earn below a B- must retake the course and meet with their academic advisor for a revised course sequence plan before progressing in the program. All admitted candidates must maintain a cumulative GPA of 3.0. Candidates who do not meet the above requirements will be reviewed for dismissal from the program).

2. Completion of each of the following program requirements:
   - U.S. Constitution requirement (course or exam)
   - Verification of subject-matter competency (CSET exam or completion of a state-approved subject-matter program; note: passing examination or subtest scores must be used for certification purposes within 10 years of the individual test date.)
   - Verification of tuberculosis clearance
   - Continuing verification from instructors of positive dispositions characteristic of the teaching profession (emotional stability, strong interpersonal relations, good mental and physical health, and other character standards listed on the application)
   - Receipt of favorable results of Certificate of Clearance (note: candidates must report any changes in character standings, including unresolved issues with the law and/or the California Commission on Teacher Credentialing (CTC) (https://www.ctc.ca.gov), to their credential analyst; failure to do so may result in expulsion from the program)

3. Successful completion of fieldwork and clinical practice. Traditionally, clinical practice is met through student teaching with a cooperating teacher, but candidates who hold a contracted teaching position may request approval to complete clinical practice in their own classrooms.

4. Prior to applying for a preliminary credential, candidates must:
   - Verify successful completion of CPR for infants, children, and adults.
   - Verify successful completion of all assessments and forms required in the Division of Teacher Education’s assessment system (Watermark’s™ Student Learning & Licensure).
   - Multiple Subject and Single Subject Credential candidates must submit and pass Instructional Cycle 1 and Instructional Cycle 2 of the California Teaching Performance Assessment (CalTPA) as required by CTC.
   - Mild to Moderate Support Needs and Extensive Support Needs Credential candidates must submit and pass Instructional Cycle 1 and Instructional Cycle 2 of the Education Specialist California Teaching Performance Assessment (CalTPA) as required by the CTC.
   - Multiple Subject and Special Education Credential candidates must show proof of passage of the Reading Instruction Competence Assessment (RICA).
   - All candidates must complete an Individual Development Plan (IDP) that is approved by the program director.

Contact a credential analyst (https://www.apu.edu/education/resources/credentials/) for information on applying for a preliminary credential after the above requirements have been completed. Your credential analyst will provide information needed to complete your credential application. Preliminary credentials are valid for five years and are nonrenewable. A Clear Credential is obtained through a CTC-approved induction program with either a California local education agency (e.g., public school district, county office of education) or California institution of higher education.

Step 1: Admission

General Requirements

All educator preparation programs within the Division of Teacher Education require the following:

- A completed graduate or integrated bachelor’s/credential application for admission
- A $45 nonrefundable application fee (not required for students previously admitted to a graduate program at Azusa Pacific University or students applying to the integrated bachelor’s/credential program)
- Official transcripts from all institutions leading to, and awarding, the applicant’s baccalaureate degree from a regionally accredited college or university and all postbaccalaureate study
The following requirements must be met before any clinical practice experiences can take place:

- A minimum baccalaureate or master’s grade-point average of 3.0 on a 4.0 scale. Provisional admittance may be granted to individuals with a grade-point average between 2.5 and 2.9.
- Two letters of recommendation
- A personal statement or essay
- A valid California Certificate of Clearance (COC) or other appropriate and valid document from CTC
- Proof the California Basic Skills Requirement (https://www.ctc.ca.gov/credentials/leaflets/basic-skills-requirement-(cl-667/)) has been satisfied
- Proof the California Subject Matter Requirement (https://www.ctc.ca.gov/educator-prep/subject-matter-requirements/) has been satisfied. Candidates seeking admission to a graduate degree program with a teaching credential embedded may submit proof of paid registration for the next appropriate California Subject Examinations for Teachers (CSET) administration.
- A percentage of candidates will also be required to interview with the program director or his/her designee prior to an admission decision.

Note: University graduate or integrated bachelor’s/credential admission and program acceptance requirements must be met before an application is complete (see Admission to the University (p. 1113)) (http://catalog.apu.edu/graduateprofessional/admission-policies/graduate-admission-university/). Program-specific application requirements are available online (https://www.apu.edu/graduateprofessionalcenter/admissions/requirements/program/graduate/).

Departments reserve the right to change the admission process and requirements. Students who are in continuous enrollment status are subject to the requirements in effect at the time of their initial enrollment.

Questions about successful completion of the Basic Skills Requirement or Subject Matter Requirement should be directed to the Office of Credentials (https://www.apu.edu/education/resources/credentials/). Candidates are advised by their assigned credential analyst prior to enrollment in the program to support a successful start in the credential program.

International Students

International students have a separate application procedure. Contact Graduate and Professional Admissions (https://www.apu.edu/graduateprofessionalcenter/admissions/) for application procedures.

**Step 2: Clinical Practice Clearance**

The following requirements must be met before any clinical practice experiences can take place:

- Applications for clinical practice must be submitted to the Office of Student Placements (https://www.apu.edu/education/teacher/placements/) by April 10 for fall term and September 10 for spring term. A candidate’s Academic Plan indicates the term for clinical practice.
- In addition to the application for clinical practice, candidates must submit the following to the Office of Student Placements by April 30 for fall term and September 30 for spring term to clear for clinical practice for the advised term:
  - Candidates in the graduate programs must have a posted bachelor’s degree from a regionally accredited college or university. For candidates in the Single Subject program, the degree major must be in an area other than professional education. Candidates in the integrated bachelor’s/credential program must submit transcripts demonstrating successful completion of at least 110 undergraduate units and an undergraduate GPA of 3.0 or higher.
  - Verification of successful completion of the Basic Skills Requirement.
  - Successful completion (B- or better) of all coursework from Modules 1 through 5 of the Academic Plan, in accordance with program advising.
  - Tuberculosis (TB) clearance, which must be valid for a two-year time period that runs through the end date of the assigned clinical practice term. Negative TB test requirements must be provided to the Office of Student Placements.
  - Valid Certificate of Clearance or other appropriate CTC-issued document throughout clinical practice.
  - Proof of successful completion of U.S. Constitution coursework or exam.
  - Original, passing scores of CSET exams, official verification of completion of a CTC-approved subject-matter program signed by the credential analyst at the California institution of higher education at which the courses were successfully completed, or meet one of the CTC-approved options (https://www.ctc.ca.gov/educator-prep/subject-matter-requirements/). Note: CSET subtest exams must be used for credential purposes within 10 years of the individual passing date of each subtest or they expire. Candidates in the integrated bachelor’s/credential program may submit official verification of completion of four-fifths of a CTC-approved subject-matter program confirmed by a credential analyst.
  - Graduate candidates seeking to use a contracted teaching position, either intern or nonintern, for clinical practice must submit all required documents by December 15 for spring term and August 15 for fall term, including but not limited to a copy of their teaching contract for the appropriate school year and a principal’s letter on school letterhead. Templates with the requirements for the principal letter can be obtained from the Office of Student Placements. All contracted teaching positions must be approved as part of the clinical practice clearance process prior to placement to ensure they meet all placement requirements. Candidates should contact the Office of Student Placements prior to accepting a contracted teaching position if they intend to use the position for completion of clinical practice. All candidates seeking intern positions must work with their credential analyst regarding any proposed teaching position.

**All contracted teaching positions must be approved as part of the clinical practice clearance process prior to placement to ensure they meet all placement requirements.** Candidates should contact the Office of Student Placements prior to accepting a contracted teaching position if they intend to use the position for completion of clinical practice. All candidates seeking intern positions must work with their credential analyst regarding any proposed teaching position.
Step 3: Credential Application

To be eligible for a credential, candidates must demonstrate the following:

- Successful completion of coursework (competency on each student learning outcome, a grade of B- or better on each credential course, earned credit in clinical practice coursework).
- Evaluation of required assignments in the division’s assessment tool (Watermark’s™ Student Learning & Licensure).
- Proficiency in the Teaching Performance Expectations (TPEs).
- Passage of all state-required examinations, as follows:
  - Passage of the RICA examination is required for candidates who wish to become credentialed for teaching multiple subjects or special education.
  - Passage of CalTPA (Instructional Cycle 1 and Instructional Cycle 2) is required for candidates who wish to become credentialed for teaching multiple subjects or a single subject.
  - Passage of Education Specialist CalTPA (Instructional Cycle 1 and Instructional Cycle 2) for candidates who wish to become credentialed for teaching students with mild to moderate support needs or extensive support needs.
- Completion of all other credential requirements.
- For integrated bachelor’s/credential candidates, the bachelor’s degree from Azusa Pacific University must be conferred.

It is the candidate’s responsibility to submit a credential application through the Office of Credentials (https://www.apu.edu/education/resources/credentials/) upon completion of a credential program to receive their California educator credential. This request may be submitted to the credentials office up to one month before completion of all credential requirements.
School of Nursing

School of Nursing Mission Statement
To serve God through excellence in professional nursing education, scholarship, and practice.

Degrees, Certifications, and Credentials Offered
The School of Nursing (https://www.apu.edu/nursing/) offers traditional undergraduate and professional programs, as well as various pathways to the Master of Science in Nursing, post-master’s certificates, a Doctor of Philosophy in Nursing, and a Doctor of Nursing Practice.

Traditional BSN (p. 879)
The Traditional BSN program is a prelicensure program that leads to a Bachelor of Science in Nursing degree. Students completing the BSN are eligible for licensure as a Registered Nurse in California and for certification as a public health nurse.

RN to BSN (p. 873)
The RN to BSN degree completion program offers the registered nurse an alternative to the traditional method of pursuing a baccalaureate degree in nursing (BSN).

Upper-Division BSN Transfer Program (p. 876)
The Upper-Division BSN program is designed for transfer students with at least 48 units of transferable prerequisite nursing coursework who are interested in pursuing a BSN.

LVN to BSN and LVN to RN (p. 876)
Two programs are offered for the licensed vocational nurse (LVN)—the LVN to BSN Option (p. 876) and LVN to RN 30-Unit Option (p. 876).

Entry-Level Master of Science in Nursing (ELM) (p. 903)
For those who have completed a BA or BS in another field.
1. Total prelicensure units is 69. Specific courses required.
2. Postlicensure units to complete the MSN depend on the specialty chosen by the student.

Master of Public Health (p. 966)
For those who have completed a BA or BS in any field.
1. Total units required is 43 units.
2. Culminating experiences include 135-hour internship and either a capstone project or a thesis.
3. Elective units depend on the elective group chosen by the student.

Master of Science in Nursing (MSN) with Single Specialties (p. 945)
For those who have completed a bachelor's degree in nursing.
- Adult-Gerontology or Pediatric Clinical Nurse Specialist (CNS)
- Adult-Gerontology Primary Care Nurse Practitioner (AGNP) Specialty
- Family Nurse Practitioner (FNP) Specialty
- Pediatric Nurse Practitioner–Primary Care (PNP-PC) Specialty
- Psychiatric Mental Health Nurse Practitioner (PMHNP) Specialty

MSN with Credentials (p. 942)
- Family Nurse Practitioner (FNP) and School Nurses Services Credential (SNSC)
- Pediatric Nurse Practitioner–Primary Care (PNP-PC) and School Nurse Services Credential (SNSC)
- School Nurse Services Credential (SNSC)

MSN in Nursing Education (p. 961)
The MSN in Nursing Education prepares nurses for teaching roles in a variety of healthcare settings and prepares students to complete the Certified Nurse Educator (CNE) examination.
MSN in Healthcare Administration and Leadership (http://catalog.apu.edu/academics/school-nursing/healthcare-administration-leadership/healthcare-administration-leadership-msn/)

The MSN in Healthcare Administration and Leadership is designed for BSN-prepared registered nurses who are looking to advance their careers and move into early- to midlevel management and leadership roles in a variety of healthcare settings.

Master of Science in Healthcare Administration (p. 919)

The Master of Science in Healthcare Administration is designed for those with bachelor’s degrees in nonclinical fields who are working professionals who want to advance and are interested in management and leadership positions in healthcare settings.

Post-Bachelor’s Credential (p. 950)

• School Nurse Services Credential (SNSC) (a nondegree post-bachelor’s program)

Post-Master’s Nursing Certificates (p. 951)

• Adult-Gerontology Clinical Nurse Specialist (CNS)
• Adult-Gerontology Primary Care Nurse Practitioner (AGPCNP)
• Family Nurse Practitioner (FNP)
• Healthcare Administration and Leadership
• Nursing Education
• Oncology Nurse Practitioner
• Pediatric Clinical Nurse Specialist (CNS)
• Pediatric Nurse Practitioner–Primary Care (PNP-PC)
• Psychiatric Mental Health Nurse Practitioner (PMHNP)

Doctor of Philosophy in Nursing (p. 992)

The PhD in Nursing, with emphasis in either health of the family and the community or international health, is a research-based program designed to prepare graduates for a life of scholarship and teaching. The coursework for the PhD in Nursing consists of 46 units beyond the master’s degree, with an additional 9 units for dissertation research.

Doctor of Nursing Practice (DNP) (p. 987)

Based on a strong scientific foundation, evidence-based practice, leadership, and organizational analysis, the DNP program prepares nurses at the highest level of practice for the current, complex healthcare environment. An evidence-based clinical approach emphasizes the prevention, assessment, and treatment of complex health issues. Students may apply for admission to the BSN to DNP or MSN to DNP. This program is available online.

Graduate Status

In the School of Nursing, graduate full-time status is considered to be 6 units per semester or 12 units per 12-month academic year. A student has a maximum of eight years to complete a graduate program, beginning from the date of initial enrollment in the specific degree program.

Accreditation

• All Azusa Pacific University programs are accredited by the WASC Senior College and University Commission (WSCUC). (https://www.wscuc.org/)
• All nursing programs at Azusa Pacific University (APU) are accredited by the Commission on Collegiate Nursing Education (https://www.aacnnursing.org/CCNE/), 655 K Street NW, Suite 750, Washington, DC 20001, (202) 887-6791.
• School of Nursing prelicensure and advanced practice registered nursing (APRN) programs are approved by the California Board of Registered Nursing (BRN) (https://www.rn.ca.gov/). Graduates of prelicensure programs are qualified to apply for registered nursing licensure and public health nursing (PHN) certification. APRN graduates are qualified to apply for nurse practitioner (NP) certification and clinical nurse specialist (CNS) certification depending on the program completed.
• Graduates of the APRN programs are qualified to apply for the appropriate national nurse practitioner (NP) or clinical nurse specialist (CNS) specialization certification.
• APU cannot confirm whether specific programs meet out-of-state requirements for professional licensure or certification. Information about out-of-state requirements and authorizations is provided on the Office of the Provost website (https://www.apu.edu/provost/accreditation/state-authorizations/) and the National Council of State Boards of Nursing (https://www.ncsbn.org/boards.htm) website.

Departments

• Department of Doctoral Studies (p. 969)
• Department of Entry-Level Master of Science in Nursing (p. 885)
• Department of Healthcare Administration (p. 916)
Courses

**GNRS 500, Conceptual Foundations of Professional Nursing, 3 Units**
This course focuses on the introductory concepts crucial to the socialization of second career students to professional nursing. The history of nursing, the evolution of nursing in the U.S., the art and science of nursing, the legal and professional basis of nursing, the role of nursing in the health care delivery system, and current issues and trends in nursing education, practice and research are emphasized.

**GNRS 501, Theoretical Thinking in Nursing, 2 Units**
This course examines questions about the nature and construction of theory and how theoretical ideas are developed and used in nursing practice and research. Philosophical ideas underlying theory are examined, and selected theoretical models and theories are explored.
**Prerequisite:** Completion of undergraduate research course or instructor's consent; admission to ELM or MSN program.

**GNRS 503, Cultural Competency in Health Care, 3 Units**
This course focuses on transforming graduate nursing students, preparing them for nursing leadership in nursing practice, nursing research, education, and public health policy for the improvement of patient healthcare outcomes in our increasingly diverse society. Students move from cultural sensitivity and awareness to critical reflection and action, challenging their assumptions and broadening their perspectives. The Essentials of Master's Education in Nursing (American Association of Colleges of Nursing, 2011) serves as the foundation for the development of core cultural competencies.
**Prerequisite:** Graduate standing in the School of Nursing.

**GNRS 504, Bioethics and Healthcare Policy, 3 Units**
This course will outline the role of the healthcare leader in ensuring human rights are upheld in healthcare systems. This course focuses on bioethical analysis, decision-making and moral policy analysis, and formulation. Through course discussion, group and individual assignments, and oral and written presentations, students will analyze and apply bioethical principles to decision- and policy-making processes in the workplace and at national levels. Healthcare ethics and policy will be considered from a Christian worldview.
**Prerequisite:** Graduate standing

**GNRS 505, Christian Formation for Holistic Care, 3 Units**
Students engage in the process of discovering the foundational values of Azusa Pacific University that serve as guiding principles for the distinctive education they will receive. They are made aware of the Christian worldview and its implications for personal holistic development and care. With a focus on developing motivating character and integrated caregivers, the course brings heightened self-awareness, the impact of a Christian worldview on vocation, scriptural awareness especially emphasizing healing themes in the life of Christ, and the importance of spiritual growth on the journey toward formation.

**GNRS 506, Spiritual Concept Analysis in Health Care, 3 Units**
Scholarly research and analysis of selected concepts in the spiritual care of persons from the Judeo-Christian perspective provide a central focus to the course. Students also examine healthcare research/other healthcare literature for adequacy with respect to the concept they select. Various assignments facilitate greater student awareness of their own spiritual journey and knowledge of faith traditions other than their own. The course is conducted as a tutorial/seminar experience.
**Prerequisite:** Graduate standing

**GNRS 507, Scientific Writing, 3 Units**
This course provides opportunities for students to learn how to introduce a topic or issue, articulate a thesis, support and develop a thesis and subordinate claims, work with secondary sources, and organize an argument.

**GNRS 508A, Research and Theory in Advanced Practice Nursing, 4 Units**
This course prepares nurses to use theory and research evidence in advanced clinical practice. The relationship between theory and research is examined, exploring questions about the nature, construction, and use of each. Selected theoretical models and theories are explored, and students learn how ideas are developed and used in nursing practice and research. Students deepen their understanding of the research process by engaging in a systematic search, critique, and summary of research studies with direct application to nursing practice. Experience in statistical analysis of research data is included.
**Prerequisite:** Computer literacy, undergraduate research course, undergraduate statistics course, and graduate standing
GNRS 508B, Research and Theory in Healthcare, 4 Units
This course prepares the healthcare administrator to apply theory and research evidence in healthcare environments. The relationship between theory and research is examined, exploring questions about the nature, construction, and use of each. Selected theories are explored, and students learn how ideas are developed and used in practice and research. Students learn the fundamentals of quantitative, qualitative, and mixed methods research and deepen their understanding through systematic search, critique, and summary of research studies with application to healthcare. Students work in groups to develop a research plan addressing a healthcare-derived question. Experience in statistical analysis of research data is included.
Prerequisite: GNRS 613

GNRS 510, Family Theory in Health Care, 2 Units
The major theoretical perspectives for understanding the family as a core unit of analysis are studied. This course fosters the student's recognition of the family's responsibility for health. Factors such as family patterns and care-giving tasks of families experiencing catastrophic or chronic alteration in health care are examined. This class is offered online.
Prerequisite: Graduate standing

GNRS 511, Advanced Pediatric Health Assessment and Health Promotion, 4 Units
This course develops the graduate nurse's assessment skills and focuses on the promotion of health in the pediatric population from the newborn period through adolescence. Emphasis is on adapting and expanding the medically focused history and physical assessment to incorporate the assessment of traditional health practices and identify culturally relevant and age-appropriate health promotion strategies. Outcomes are examined in light of related theoretical concepts. Strategies for health promotion include a focus on developmental and behavioral assessments, emotional health, nutrition, counseling to modify risk factors, and screening tests/prophylaxis for early detection and prevention of disease.
Prerequisite: Undergraduate health assessment and GNRS 610;
Corequisite: Practicum

GNRS 513, Advanced Nursing Practice Role, 2 Units
This course focuses on the concepts of role development and performance competence of the nurse in advanced clinical practice within the context of a reformed health care delivery system. Emphasis is placed on the clinician, educator, clinical program manager, consultant, researcher, and case manager roles of the advanced practice nurse. The leadership aspects of the roles of advanced practice are explored in relation to health care delivery, policy formulation, and legislation. The course explores theories and issues related to the advanced nursing practice role.
Prerequisite: Graduate standing

GNRS 514, Research Proposal Writing, 2 Units
This course focuses on the application of the concepts in GNRS 508A. The goal is the completion of a research proposal that details the problem, the research purpose, questions or hypotheses to be tested, a critique of the literature, the design and methods of the study including protection of human subjects, the plans for analysis, use of the study, and the budget and personnel.
Prerequisite: GNRS 508A

GNRS 516, Integrative Disease and Symptom Management, 3 Units
Using a systems-based approach, this course provides the student with a broad-based, graduate-level overview for understanding disease processes, treatment modalities, assessment and interventional strategies for patients across the life span.

GNRS 517, Fundamentals in Nursing Practice, 2 Units
This is an experiential learning course designed to teach basic nursing skills in a clinical skills or simulation laboratory setting to prepare students to deliver safe and patient-focused nursing care. Utilizing the nursing process, students perform basic skills in assessment, patient care across the continuum, documentation, patient-family teaching, and infection control.

GNRS 518, Supervised Practicum in Health Care, 3 Units
This course prepares students to integrate and apply theory, evidence-based practice, and national guidelines and standards in practicum settings. Students select practicum areas in which, with faculty approval, they will participate in experiences led by preceptors. The purpose of the course is to equip students with current, evidence-based knowledge in a selected practice area.

GNRS 520, Theory and Practice of the Clinical Nurse Specialist in Nursing Care of Adult-Gerontology Patients, 6 Units
Critical concepts in advanced collaborative management of adult-gerontology client populations by Clinical Nurse Specialists are studied. Differential diagnosis, pharmacologic management, cultural sensitivity, adult-gerontology continuum of health and illness (i.e., wellness, health promotion, disease prevention), teaching-learning theory, and evidence-based best practices for clinical decision-making for the Adult and Geriatric population are highlighted. CNS roles, competencies, and professional issues and integrated clinical rotations will be chosen from critical care or medical-surgical adult-gerontology populations. Clinical seminar times allow students to discuss and analyze current professional issues and clinical problems in a collegial atmosphere.
Prerequisite: Academic Core and Advanced Practice Core courses, current RN license, CPR certificate, and meets health screening requirements;
Corequisite: Practicum
GNRS 521, Clinical Specialization in the Care of Adult-Gerontology Patients, 6 Units
The course prepares the student to apply concepts introduced in GNRS 520. It focuses on diagnosis and collaborative disease management of acute illness in the adult-gerontology patient by the Clinical Nurse Specialist. The integration of advanced skill development, theory and evidence based practice, disease management, clinical decision making, unit and organization management issues, professional issues and APRN role competencies are the foundation for this course. Practicum and seminars are planned to span the breadth of the students' clinical opportunities.
Prerequisite: Academic Core and Advanced Practice Core courses, GNRS 520, current RN license, CPR certificate, and meets health screening requirements;
Corequisite: Practicum

GNRS 522, Disaster Nursing and Emergency Preparedness, 3 Units
This course explores the nature of disasters and prepares nurses to respond to various types of disasters - including natural, environmental, mass casualty, public health emergencies, terrorism, and bioterrorism - by utilizing essential knowledge, skills, values, meanings, and experience in the basic competencies of emergency preparedness and disaster nursing. In accordance with the position of major nursing organizations, emphasis is placed on evidence-based best practices for personal preparedness.
Prerequisite: Comparable course, such as UNRS 312 Nursing Management of Adults, a human growth and development course, a lifespan course OR an RN licensure.

GNRS 530, Theory and Practice of the Clinical Nurse Specialist in the Care of the Pediatric Patient, 6 Units
Critical concepts in the advanced collaborative management of pediatric client populations by the Clinical Nurse Specialists are studied. Differential diagnosis, pharmacologic management, cultural sensitivity, pediatric continuum of health and illness (i.e., wellness, health promotion/disease prevention), teaching-learning theory, and evidence-based/best practices for clinical decision-making for the Pediatric population are highlighted. CNS roles, competencies, and professional issues are integrated. Clinical rotations will be chosen from critical care or medical-surgical pediatric populations. Clinical seminar times allow students to discuss and analyze current professional issues and clinical problems in a collegial atmosphere.
Prerequisite: Academic Core and Advanced Practice Core courses, current RN license, CPR certificate, and meets health screening requirements;
Corequisite: Practicum

GNRS 531, Clinical Specialization in the Care of the Pediatric Patient, 6 Units
The course prepares the student to apply concepts introduced in GNRS 530. It focuses on diagnosis and collaborative disease management of acute illness in the pediatric patient by the Clinical Nurse Specialist. The integration of advanced skill development, theory and evidence based practice disease management, clinical decision making, unit and organization management issues, professional issues and APRN role competencies are the foundation for this course. Practicum and seminars are planned to span the breadth of the students' clinical opportunities.
Prerequisite: Academic Core and Advanced Practice Core courses, GNRS 530, current RN license, CPR certificate, and meets health screening requirements;
Corequisite: Practicum

GNRS 532, Advanced Nursing Practice in Pediatrics, 6 Units
This course emphasizes physiological and psychological bases for critical and chronic conditions in children, focusing on an advanced science base for the assessment, diagnosis, and management of children and families to promote wellness. Exploration of traditional versus alternate medicine treatment plans, as well as relevant cultural, spiritual, and health promotion strategies, is incorporated.
Prerequisite: Graduate status and GNRS 590A;
Corequisite: Practicum

GNRS 533, Psychiatric Theories across the Life Span, 2 Units
This course presents neurobiologic, neuroendocrine, genomic, behavioral, and psychodynamic theories of psychiatric mental illnesses as they manifest among members of diverse cultural groups across the life span. A theoretical foundation for subsequent coursework in primary psychiatric mental health care is provided for the role of the psychiatric mental health nurse practitioner.
Prerequisite: Graduate standing, Advanced Practice Core

GNRS 534, Integrated Psychiatric and Health Assessment across the Life Span, 2 Units
This course teaches the role of the psychiatric mental health nurse practitioner in interviewing, assessing, and utilization of other data collection methods to elicit, analyze, and evaluate bio-psychosocial information regarding psychiatric mental health illness as experienced and understood by the clients, across the lifespan. Assessment and integration of the effects of potential and/or existing co-morbid health problems are focused upon. Diagnostic reasoning that is based on the Diagnostic Statistical Manual is foundational in the course. Development of differential diagnoses and disease management, evidence-based practice, and health promotion that includes client and nurse practitioner collaboration is emphasized.
Prerequisite: Advanced Practice Core, GNRS 533 (May be taken concurrently)
GNRS 535, Psychiatric Interventions and Health Promotion across the Life Span, 6 Units
In this course students learn historical, theoretical, and contemporary evidence-based psychotherapies that promote and support client stabilization, rehabilitation, and recovery. The client as a collaborating decision making consumer and the client-clinician therapeutic alliance are central to this course. Students increase competence in assessment of psychiatric mental health illnesses, differential diagnoses and disease management, implementation of psychotherapy (individual, group, family), medication management, and health promotion interventions, including motivational interviewing. Student competence in developing and facilitating therapeutic groups as a recovery modality are included in the course. The role of the psychiatric mental health nurse practitioner in the integration and coordination of support services that impact mental health and illness is also included. Students practice verbal psychotherapeutic skills that motivate and facilitate client self-management and progression toward recovery.
Prerequisite: Advanced Practice Core, GNRS 533 and GNRS 534; GNRS 539 may be taken concurrently;
Corequisite: Practicum

GNRS 536, Psychiatric Mental Health Care with Adults and Older Adults, 6 Units
In this course students increase their knowledge and competence in the assessment of psychiatric mental health illnesses, differential diagnoses and disease management, implementation of psychotherapy (individual, family, group), evidence-based practice, medication management, health promotion and disease prevention interventions, integration and coordination of support services, with adults and older adults.
Prerequisite: GNRS 533, GNRS 534, GNRS 535, GNRS 539;
Corequisite: Practicum

GNRS 537, Psychiatric Mental Health Care with Children and Adolescents, 6 Units
In this course, students increase competence in the role of the psychiatric mental health nurse practitioner in the assessment of psychiatric mental health illnesses, differential diagnosis and disease management, implementation of psychotherapy (individual, family, group), evidence-based practice, medication management, health promotion and disease prevention interventions, integration and coordination of support services with children, adolescents, and families.
Prerequisite: GNRS 533, GNRS 534, GNRS 535, GNRS 536, GNRS 539;
Corequisite: Practicum

GNRS 538, Psychiatric Mental Health Care with Selected Populations, 5 Units
Students increase knowledge and competence in the assessment of psychiatric and mental health illnesses, differential diagnosis and disease management, implementation of psychotherapy (individual, family, group), medication management, health promotion and disease prevention interventions, and integration and coordination of support services with a selected population. Focus is on integrating and practicing all aspects of the role of the psychiatric mental health nurse practitioner with clients who are experiencing acute and/or chronic mental health problems and psychiatric disorders.
Prerequisite: GNRS 533, GNRS 534, GNRS 535, GNRS 536, GNRS 539;
Corequisite: Practicum

GNRS 539, Psychopharmacology, 2 Units
Students in this course build upon knowledge of advanced practice nursing and provides content essential for the psychiatric mental health nurse practitioner to prescribe appropriate pharmacologic treatment in practice. Mechanisms of action, interactions, side effects, and prescribing guidelines for psychopharmaceuticals commonly utilized across the lifespan are addressed.
Prerequisite: GNRS 533, GNRS 534; GNRS 535 (May be taken concurrently)

GNRS 542, Advanced Concepts and Competencies in Pediatric Primary Health Care, 3 Units
This course offers a comprehensive review and synthesis of core concepts and competencies for the pediatric advanced practice nurse in the primary care setting. This culminating experience for pediatric nurse practitioner students incorporates seminar discussions and clinical practicum placement, and also allows for a discussion of developmental/behavioral issues, management of acute and chronic care illnesses seen in primary care settings, and preventative health care.
Prerequisite: Graduate standing, GNRS 532 (may be taken concurrently with instructor's permission), and GNRS 590A;
Corequisite: Practicum

GNRS 543, Transitions Across the Care Continuum, 4-6 Units
This course focuses on principles and models of care and their implementation in a multidisciplinary practice environment that emphasizes healthcare delivery through integration of services and transition management. Students are introduced to decision making related to allocation of resources and services, development of protocols, and evaluation of management approaches. Evidence-based approaches to the clinical, administrative, educational, and research dimensions of patient care are emphasized. Evaluation of care management activities with the student's selected clinical population is an integral component of the course.
Prerequisite: NP students: completion of Advanced Practice Core; CNS students: completion of Advanced Practice Core and GNRS 520 or GNRS 530; HAL students: completion of MSN Core and GNRS 560.
Corequisite: Practicum
GNRS 544, Clinical Specialization Residency, 2-4 Units
This elective residency program, formed through a partnership between the School of Nursing and selected community healthcare organizations, is an intensive, precepted clinical experience that helps students transition to beginning professional nurses in a specialized setting. It enhances students’ skill and practice knowledge in preparation for the RN licensing examination, and increases their ability to perform clinical reasoning with the assigned patient population and evaluate the QSEN competencies of patient-centered care, safety, evidence-based practice, informatics, and teamwork and collaboration.
Prerequisite: ELM students must complete GNRS 573 (may be taken concurrently), but GNRS 573 is not required for nurses in community partnerships who are taking GNRS 544 for continuing education credit.

GNRS 546, Theory and Practice in Health Care Systems in the Community, 6 Units
This specialized course prepares RNs without a bachelor's degree for graduate study in nursing. A multiple theoretical focus that includes concepts from systems, stress, adaptation, developmental, and role theory is emphasized. A beginning practice in the utilization of the nursing process with an emphasis on nursing diagnosis and the nurse's role in assessing, planning, implementing, and evaluating care of clients in a variety of community settings is provided. Collaboration with community-based organizations and services that provide health restoration, maintenance, illness prevention, and client education services to individuals and families at home are essential course components. A review of legal mandates for practice and discussion of ethical dilemmas and issues related to high quality nursing care are included. Specific content varies based on the students’ prior education and experience. Clinical placements are arranged to meet the individual student's needs.
Prerequisite: Undergraduate research, pathophysiology, and health assessment;
Corequisite: Practicum

GNRS 547, Nursing Leadership in Acute Care Settings, 6 Units
This is one of two clinical courses provided for the RN who seeks both a bachelor's and master's degree in nursing. The course synthesizes selected information from the generic bachelor's and master's programs for presentation in a condensed format, addressing the development and nature of today’s health care systems and associated issues in the United States. Further, content familiarizes the student with several roles and responsibilities of the contemporary nurse, such as leader, consultant, teacher, manager, and client advocate. The course focuses on client needs in acute health care settings and emphasizes the relationship between the health care system and the advocate.
Prerequisite: Undergraduate research, pathophysiology, and health assessment;
Corequisite: Practicum

GNRS 548, Health Promotion Across the Lifespan, 2 Units
The course focuses on health promotion and disease prevention across the lifespan and around the globe. The course includes exploration of population health issues, environmental implications in health and health policy, impact on health promotion and the development of disease.
Prerequisite: Academic Core and Advanced Practice Core courses, current RN license, CPR certificate, and meets health screening requirements

GNRS 550A, Theory and Practice in School Nursing, 6 Units
This combined didactic and clinical course provides theoretical content and field experiences that emphasize the multifaceted role of the school nurse. Students participate in field experiences and classroom learning activities that focus on the assessment and management of children's healthcare needs in various school settings. This course equips students with the necessary skills and tools to effectively function as professional school nurses. At the conclusion of this course, students are able to successfully function as providers of health education as well as providers, planners, and coordinators of health care in school settings.
Prerequisite: GNRS 612 or instructor consent, and admission to School Nurse Services Credential program;
Corequisite: Practicum

GNRS 554, Medical-Surgical Care of the Adult and Geriatric Patient, 5 Units
This course introduces crucial concepts in professional nursing care, such as the nursing process, communication, therapeutic interventions, critical thinking, and critical reasoning. Course material focuses on the application of biological, psychosocial, and spiritual concepts to adult and elderly clients in various healthcare settings with acute and/or chronic illnesses. The nursing process is utilized to provide care to one or two patients within the healthcare delivery system. The clinical holistic approach focuses on the cognitive, functional, and physical perspective of the psychomotor skills used when providing nursing care.
Prerequisite: Admission to the ELM program, completion of all prerequisite courses for the program.
Corequisite: GNRS 554P

GNRS 555, Medical Surgical Care of the Adult and Geriatric Patient, 7 Units
This course introduces crucial concepts to professional nursing care such as nursing process, communication, therapeutic interventions, and critical thinking and clinical reasoning. The course focuses on the application of biological, psychosocial, and spiritual concepts to hospitalized adult and elderly clients with acute and/or chronic illnesses. Students will be guided in critical thinking and clinical reasoning exercises in the management of hospitalized clients. Nursing process is utilized to provide care to one or two adult clients in the healthcare delivery system of an acute care setting. The clinical practicum focuses on the cognitive basis, scientific principles, and manipulative component of psychomotor skills used when providing nursing care. Students have an opportunity to practice simulated clinical skills.
Prerequisite: Admission to the ELM program, completion of all prerequisite courses for the program;
Corequisite: Practicum
GNRS 556, Intermediate Medical Surgical Care of the Adult, 7 Units
This course is designed to build on the base of medical-surgical nursing knowledge from GNRS555. The course focuses on comprehensive nursing care to patients with acute need for continuous cardiac monitoring, pulse oximetry monitoring, or ventilator assistance in telemetry units, in restorative care setting, or long-term care setting.
Prerequisite: Admission to the ELM program; successful completion of GNRS 555;
Corequisite: Practicum

GNRS 557, Medical Spanish for Advanced Practice Nurses, 3 Units
This course provides non-Spanish-speaking advanced-practice nursing students with foundational knowledge of Spanish language structure and vocabulary, helping them build appropriate phrasing to facilitate communication in healthcare settings. Cultural issues relevant to health and illness in the Latino community are also addressed.
Prerequisite: Graduate nursing student standing, or instructor's permission

GNRS 558, Intermediate Medical-Surgical Care of the Adult, 6 Units
This course is designed to build on the base of medical-surgical nursing knowledge from prior nursing courses. The course focuses on comprehensive nursing care to patients with acute need for continuous cardiac monitoring, pulse oximetry monitoring, or ventilator assistance in telemetry units, restorative care settings and long-term care settings.
Corequisite: GNRS 555P

GNRS 559, Audiometry for School Nurses, 3 Units
This course provides didactic instruction via eCollege and eight hours of on-site practicum experience that emphasizes the content and clinical expertise necessary to fulfill the requirements of the State of California School Hearing Conservation Program and training for the school audiometrist. The course focuses on the physiologic process of hearing and how to assess for deficits in hearing in children of all ages. At the conclusion of the course, and after having completed successfully all learning objectives, the student is eligible to submit an Application for Registration as a School Audiometrist in the State of California (a $10 registration fee is required with the application).

GNRS 560, Strategic Leadership in Health Care, 3 Units
This course is designed to develop knowledge, skills and attitudes about leadership across the healthcare continuum. The student will consider the professional role of the healthcare administrator both from a leadership and a management perspective. Areas of concentration will include leadership theory, structure of healthcare institutions, systems thinking and decision-making, performance improvement including quality and safety issues, risk management and effective communication skills. Application of business skills will be integrated. Students will consider the theoretical and research background, current issues and trends, leadership and administrative implications of specific topics.

GNRS 564, Nutrition and Therapeutics, 2 Units
Students in this course explore the functions of nutrients and the consequences of nutrient deficiencies and excesses in the body. Course material introduces a variety of tools for planning and evaluating diets, including a computer diet analysis, and the application of nutrition concepts is interwoven into health care and fitness conditions. Students also study the prevention of chronic disease as it relates to proper nutrition and adequate exercise.
Prerequisite: Admission to the ELM program

GNRS 566, Healthcare Administration and Leadership Supervised Practicum, 3 Units
This course provides the student with the opportunity to experience the role of healthcare administrator. An individualized administration practicum in a specific area of clinical emphasis is chosen by the student and approved and monitored by the faculty and preceptor. Competencies that govern the role of the healthcare administrator are explored in depth. Students focus on the context for enacting the role of administrator in a healthcare delivery system.
Prerequisite: All core and role courses

GNRS 570, Parish Nursing/Health Ministries, 2 Units
This course provides an introduction to and overview of health ministry and parish nursing theory and practice. The philosophy of the course is that (a) the parish nursing role is that of a specialist in spiritual aspects of patient care in the congregational context, requiring the integration of graduate level theology/ministry and nursing theory and praxis; and (b) health ministry is an emerging role and trend in pastoral ministry that seeks to bring professional ministry skill to bear upon the integration of health, faith, and spirituality in the parish setting.
GNRS 571, International Health Care, 2-4 Units
This course provides students with experience in nursing care in other countries. Students prepare with coursework in the United States, then travel abroad, where they have experiences in acute and/or chronic care settings, exploring cultural, economic, systems, philosophical, and other aspects of care that influence the provision of health care in other countries. A debriefing period is provided upon return.

GNRS 573, Clinical Residency, 4 Units
The clinical residency is an internship clinical experiential program designed as a collaborative partnership between the School of Nursing and selected community in-patient health care organizations. This residency is an intensive preceptored clinical experience planned to ease the role transition from a student nurse to a beginning professional nurse in an acute-care setting. In addition, it enhances the skill and practice knowledge of the student in preparation for the RN licensing examination.
Prerequisite: Successful completion of all pre-licensure clinical courses

GNRS 575, Nursing Care in Maternal, Newborn, and Women’s Health, 4 Units
This course focuses on the theoretical and clinical concepts of the childbearing patient, her infant, and her family. The students study both normal and complicated obstetrics. Selected issues of women's health are explored. The student is introduced to birth preparation, prenatal care, normal neonatal, and postpartum care with concurrent clinical experiences.
Prerequisite: Admission to the ELM program, successful completion of semesters one and two;
Corequisite: Practicum

GNRS 576, Pharmacology, 2 Units
This course is designed for students who have completed organic chemistry, inorganic chemistry, and biochemistry. The content focuses on principles of pharmacology and specifics of the major drug classifications.
Prerequisite: Admission to the ELM program

GNRS 578, Health Assessment, 3 Units
This course provides the nursing student with skills in physical, spiritual, and psychosocial assessment of adult clients. History-taking and physical examination techniques presented in the course help the student develop strong assessment skills upon which further knowledge and practice can be built. Basic concepts related to assessment of geriatric, pediatric, and childbearing patients are included.
Prerequisite: Admission to the ELM program;
Corequisite: Practicum

GNRS 580, Gerontology, 2 Units
This course integrates research and writings about the major trends and developments in the field of gerontology as they apply to the field of nursing. The approach is interdisciplinary - course material includes information from the fields of sociology, psychology, anthropology, biological sciences, medicine, nursing, and psychiatry. Development in adulthood is viewed from multiple perspectives including cognitive, behavioral, biological, sociocultural, and spiritual, and the influences these perspectives have on the successful negotiation of age-related issues are considered. Finally, students examine aspects of human aging in contemporary American society and from a cross-cultural and ethnic perspective.
Prerequisite: Graduate standing in the School of Nursing.

GNRS 581, Primary Health Care of the Older Adult, 5 Units
GNRS 581 focuses on the role of the adult-gerontology primary care nurse practitioner in the management of the older adult including health promotion, assessment, treatment, and maintenance of common primary care health problems. The clinical practicum emphasizes the application of theory and evidence-based research for the delivery of culturally competent assessment and treatment of the older adult within the context of their families and in a variety of outpatient settings.
Prerequisite: Graduate status in the School of Nursing, completion of Advanced Practice Core courses;
Corequisite: Practicum

GNRS 582A, Pathophysiology, 2 Units
This course presents an introduction to human pathophysiology. Mechanisms causing alterations in cellular activity, maintenance of cellular tissue oxygenation, fluid and electrolyte balance, and neuroendocrine control of the body are included. Common pathophysiologic disorders are emphasized.
Prerequisite: Admission to the ELM program

GNRS 582B, Pathophysiology, 2 Units
This course continues the presentation an introduction to human pathophysiology. Mechanisms causing alterations in cellular activity, maintenance of cellular tissue oxygenation, fluid and electrolyte balance, and neuroendocrine control of the body are included. Common pathophysiologic disorders are emphasized.
Prerequisite: Admission to the ELM program, successful completion of GNRS 582A
GNRS 583, Nursing Care of Children and Young Adults, 4 Units
This theoretical and clinical course focuses on the care of children from birth through adolescence. The effects of acute and chronic illness on growth and development are studied in the acute and community health care setting. Education of the child and family on health promotion, disease prevention, and safety issues are addressed. Ethical issues are discussed regarding the relationship to the child and family, including issues such as child abuse, informed consent, and the impact of diverse cultural and spiritual beliefs on health care decisions in the family.
Prerequisite: Admission to the ELM program, successful completion of semesters one and two;
Corequisite: Practicum

GNRS 584, Mental Health Nursing, 4 Units
This theoretical and clinical course focuses on the dynamics of psychosocial stress within the interpersonal and intrapersonal systems of clients with acute and chronic psychiatric disorders.
Prerequisite: Admission to the ELM program, successful completion of semesters one and two;
Corequisite: Practicum

GNRS 586, Leadership and Management in Professional Practice, 2 Units
This course emphasizes leadership and management theory including systems theory in a number of applications and settings, equipping students with the ability to adjust to various organizations encountered by professional nurses serving in a variety of roles. Core concepts relevant to clinical settings are presented using a systems approach. Emphasis on nursing case management is included.

GNRS 587, Community Health Nursing, 5 Units
This course has two areas of focus within the community setting: the study of principles and practices involved in community health nursing, and the development of skills for teaching a group of clients. The emphasis is on the role of the nurse in assessing, planning, implementing, and evaluating care of clients in a variety of community-based settings, with a focus on care of the gerontological client. Collaboration with community-based organizations and services that provide health restoration, maintenance, illness prevention, and client education services to individuals, families, and aggregates are essential components of this course. A review of legal mandates and regulations, as well as discussion of ethical dilemmas and issues related to community-based care is included.
Prerequisite: Admission to the ELM program, successful completion of semesters one, two, and three;
Corequisite: Practicum

GNRS 588, Advanced Nursing Care of Adults - Leadership, 6 Units
This course involves the application of pathophysiological, psychosocial, and spiritual concepts to adult and geriatric clients experiencing the stress of illness in acute settings. The primary focus of the course is to care for critically ill clients and their families with complex health care needs in a critical-care setting. A second area of focus is on the utilization of leadership and management concepts/skills in providing comprehensive care to groups of clients and families. Emphasis is placed on preparing the student to practice in a beginning leadership role in managing client care. Legal and ethical issues related to acute care are included.
Prerequisite: Admission to the ELM program;
Corequisite: Practicum

GNRS 589, Adolescent Health Care, 2-4 Units
This course focuses on the growth and development of adolescents, including assessment, prevention, and management of common health and psychosocial problems in this population. Emphasis is on age-appropriate and culturally competent provision of primary health care to adolescents in a family system.
Prerequisite: Graduate status in the School of Nursing; 2-unit version of this course requires prior completion of GNRS 610, while the 4-unit version requires prior completion of GNRS 610, GNRS 611, and GNRS 511 or GNRS 612.

GNRS 590A, Primary Health Care of the Young Family, 6 Units
This combined theory and clinical course focuses on management of health care of children (from birth through adolescence) and their families. Theory and clinical experiences emphasize assessment, prevention, and management of physiological, social, emotional, intellectual, spiritual, and educational needs of the child as an individual and as a family member. The effects of culture on development, parenting, and health care practices are emphasized. The course provides theory and clinical experiences in the management of normal and common pathological conditions to prepare students for advanced nursing practice in the role of nurse practitioner.
Prerequisite: Advanced Practice Core courses;
Corequisite: Practicum

GNRS 590B, Clinical Practicum in Pediatrics, 4 Units
The student develops expanded skills in the comprehensive assessment and management of common childhood illnesses and problems and continues to gain skill in promoting child wellness. Application of theory and research is emphasized in the care of common illnesses throughout the childhood years.
Prerequisite: GNRS 511 or GNRS 612, and GNRS 590A
GNRS 590C, Primary Health Care of the Young Family for the School Nurse Services Credential, 6 Units
Using a system-based approach, this combined didactic and practical course focuses on assessment, nursing interventions, and follow-up for common illness presentations in children, as well as illness-related impact on social, emotional, and educational functioning. The effects of culture on child development, parenting, and healthcare practices is also emphasized.
Prerequisite: GNRS 612; Corequisite: Practicum

GNRS 590D, Primary Health Care of the Young Family, 3 Units
This theory course focuses on management of health care of children (from birth through adolescence) and their families, with an emphasis on assessment, prevention, and management of physiological, social, emotional, intellectual, spiritual, and educational needs of the child as an individual and as a family member. The effects of culture on development, parenting, and health care practices are emphasized. The course provides theory in the management of normal and common pathological conditions to prepare students for advanced nursing practice in the role of nurse practitioner.
Prerequisite: Advanced Practice Core courses

GNRS 591, Primary Health Care of the Childbearing Family, 4 Units
This course focuses on the assessment and management of the primary health care needs of the reproductive family. Emphasis is placed on health promotion and maintenance, disease prevention, curative, and restorative care. Cross-cultural aspects related to parents, male and female, of the childbearing family are addressed.
Prerequisite: Advanced Practice Core courses; Corequisite: Practicum

GNRS 592A, Primary Health Care of the Adult and Aging Family, 6 Units
This combined theory and clinical course focuses on the role of the nurse practitioner (NP) in caring for mature adults and aging family members, from young adulthood to elderly adulthood. Emphasis is placed on the management of common primary health problems of these age groups. The delivery of culturally competent primary health care interventions of young, middle-aged, and elderly adults is addressed.
Prerequisite: Advanced Practice Core courses; Corequisite: Practicum

GNRS 592B, Primary Health Care Clinical Practicum, 2 Units
This course provides the final comprehensive clinical management experience, allowing FNP and AGNP students to apply knowledge gained throughout their course of study. Clinical conferences provide opportunity for discussion of role development issues and clinical case studies. Students engage in the clinical assessment and management of adults of diverse cultural backgrounds with routine and complex health problems in out-patient settings. Under the supervision of qualified preceptors and School of Nursing faculty, the student must complete his/her clinical hours and demonstrate mastery to perform the role of an entry-level nurse practitioner.
Prerequisite: Completion of clinical courses for the FNP or AGNP program track

GNRS 593, Psychosocial Primary Health Care of the Adult and Aging Family, 4 Units
This combined didactic and clinical course focuses on psychosocial primary health care of the mature and aging family. Didactic content and clinical experiences emphasize the advanced practice nursing role in the medical management of chronic illness with concurrent assessment for psychosocial stressors that impact the experience and management of chronic illness. Students learn to tailor patient-centered therapeutic strategies, including presence, multi-faceted functional assessment, motivational interviewing, stress reduction techniques and spiritual support to individual patients.
Prerequisite: Advanced Practice Core courses; Corequisite: Practicum

GNRS 595, Special Topics in Nursing, 1-6 Units
In this course, a topic of current interest to students is examined in depth. Students analyze and evaluate topics/issues to reach and express a position, enhance personal development and/or to develop a particular project. If students elect this course more than once during their program, each such course must address a different topic.
Prerequisite: Graduate standing

GNRS 596, Foundations of Healthcare Informatics, 3 Units
This course provides an overview of basic concepts for practice in healthcare-oriented informatics. These core concepts include an introduction to clinical and translational informatics; foundational theory and practical application of clinical decision making and computerized decision support; healthcare systems and their organization; the special issues of administration, security, and operations of electronic records in the healthcare setting; human factors issues; information science in the healthcare domain; standards, terminologies, and the uniqueness of biomedical data; and a special focus on emerging technologies.

GNRS 597, Comprehensive Examination Directed Study, 1 Unit
This course guides the student through the process of demonstrating an integration of theoretical, clinical, and research knowledge. Critical thinking is enhanced through careful consideration of information presented during discussion. The examinations are taken as part of this seminar.
Prerequisite: Completion of all Academic Core and degree specialty courses. Final specialty course may be taken concurrently.
GNRS 598, Thesis, 1 Unit
A student initially enrolls in this option toward the latter part of the program for one unit of credit. The student registers for one unit of thesis credit each semester (two of three semesters per year) until the thesis is completed.
**Prerequisite:** GPA of 3.5 or above, chair's consent for thesis option, and completion of all Academic Core and Advanced Practice Core courses.

GNRS 599, Readings/Independent Study in Nursing, 1-4 Units
A student may elect to pursue special interests for credit at any time during the program under the supervision of a faculty member. University policy states that the student must earn a grade in an independent study course in order to receive credit toward graduation.
**Prerequisite:** Graduate standing

GNRS 600, Nurse Practitioner Clinical Experience, 2-6 Units
The AGPCNP and NP programs require 765 hours of supervised direct patient care experience. Students in this course function in the role of student nurse practitioners under the direct supervision of approved preceptors, and receive feedback from their preceptors and from their clinical faculty. This course gives students an opportunity to complete the documentation necessary to be awarded clinical units. Students progressively integrate advanced-practice nursing competencies, demonstrate professional nursing behavior, and keep accurate records. Upon completion of 765 hours, students are given access to a clinical portfolio.
**Prerequisite:** GNRS 612 and faculty permission

GNRS 601, Primary Healthcare I: Adult and Aging, 3 Units
This course integrates knowledge from advanced pathophysiology, advanced pharmacology, and advanced health assessment and apply it to create a diagnostic hypothesis for common acute and chronic primary care health problems in adolescents, adults, and older adults. The course examines a variety of treatment options for each disease presented and for diseases that don't respond to first-line therapy.
**Prerequisite:** GNRS 612
**Corequisite:** GNRS 600

GNRS 602, Primary Healthcare II: Population-based Health Interventions, 3 Units
Primary Healthcare II recognizes that individuals with healthcare needs belong to a variety of discrete groups. This course introduces population health principles to be integrated with psychosocial assessment, cultural competency, social determinants of health, and the nurse-client relationship to foster the development of competence to motivate patients in a way that respects their diversity and to assist them to find resources to address social vulnerabilities. Students will employ statistical analysis as well as nursing experience to analyze risk to create a patient education plan.
**Prerequisite:** GNRS 601
**Corequisite:** GNRS 600

GNRS 603, Primary Healthcare III: Restorative and Palliative Interventions, 3 Units
This course is designed to integrate disease management and communication techniques to support the physical, emotional, and spiritual transitions of chronic illness. The course examines developing a prognosis, transitioning care, interprofessional care planning, and care of the caregiver. Grounded in spiritual concepts, this course is designed to provide the student with tools to give patients and families unpleasant information that will likely evoke fear or sadness.
**Prerequisite:** GNRS 602

GNRS 610, Advanced Pathophysiology, 3 Units
This course builds on basic anatomy and physiology and undergraduate study of pathophysiology. It focuses on the development of an advanced understanding of the pathophysiologic mechanisms of human health disorders including those that are genetic. Diagnostic reasoning that facilitates the clustering of signs and symptoms leading to diagnosis is a key process undergirding the course. This course requires the integration of signs and symptoms, clinical testing (such as laboratory and radiologic studies), and pathophysiologic mechanisms with diagnoses. This course introduces epidemiological principles and methods to be applied to population health models.
**Prerequisite:** Graduate standing and undergraduate pathophysiology

GNRS 611, Advanced Pharmacology, 3 Units
This course builds upon basic knowledge in pharmacology and provides content essential for the advanced practice nurse to render appropriate pharmacological treatment in practice. Mechanisms of action, interactions, side effects, and prescribing guidelines for drugs commonly utilized across the life cycle are addressed. The course introduces the principles of pharmacogenomics and their application to clinical practice. Variations in pharmacological reactions attributed to cultural factors are emphasized. Strategies for fostering individual/family adherence to pharmacological regimens are examined. This course meets the requirements of the California Board of Registered Nursing in the application of a “furnishing number” by the advanced practice nurse in California.
**Prerequisite:** GNRS 610 (may be taken concurrently)
GNRS 612, Advanced Health Assessment and Diagnostic Reasoning, 4 Units
This course develops the graduate nurse's assessment skills and focus on the promotion of health in individuals across the age range and within family, community, and cultural contexts. Emphasis is on adapting and expanding the medically focused history and physical assessment to incorporate the assessment of traditional and nontraditional therapies and identify culturally relevant and age-appropriate health promotion strategies for common episodic complaints and chronic health conditions. Outcomes are examined in light of theoretical concepts. Strategies for health promotion include a focus on lifestyle, mental health, nutrition, counseling to modify risk factors, and screening tests/prophylaxis for the early detection and prevention of disease.
Prerequisite: Undergraduate health assessment and GNRS 610;
Corequisite: Lab

GNRS 613, Graduate Statistics, 3 Units
This course presents the knowledge of descriptive, correlational, and inferential statistics used in research that serves as the basis for evidence-based practice. Students develop the ability to perform descriptive and inferential data analysis techniques, use software applications to aid in statistical calculations and presentation, and interpret findings.

GNRS 616, APRN Intensive II, 1 Unit
This is the second of four APRN Intensive courses that give NP students an interactive experience through out-of-classroom work. Course activities and games will evaluate the student's ability to perform the clinical role of the NP. Students will understand and develop the skills of virtuous leadership and collaboration from a biblical perspective.
Prerequisite: GNRS 615;
Corequisite: GNRS 601

GNRS 617, APRN Intensive III, 1 Unit
This is the third of the APRN intensives that give APRN students an interactive experience with out-of-classroom work that includes team activities, simulation experiences, and problem-solving activities. Topical content includes managing patients with complex co-morbidities, ethical reasoning, and advanced communication skills. Students will be observed performing the professional and clinical skills of the APRN.
Prerequisite: GNRS 616;
Corequisite: GNRS 602

GNRS 618, APRN Intensive IV, 1 Unit
This is the fourth of the APRN intensives that give APRN students an interactive experience with out-of-classroom work that includes team activities, simulation experiences, and problem-solving activities. Topical content practice-based quality improvement, office-based procedures, and certification exam preparation. Students will be observed performing the professional and clinical skills to demonstrate readiness to enter NP practice.
Prerequisite: GNRS 617; Faculty permission.

GNRS 620, Genome Science in Healthcare, 3 Units
This course covers basic genomic concepts and technologies intended for personalizing healthcare. The primary goal is to provide the student with clinically relevant knowledge that can be used in practice and for teaching other healthcare professionals, patients and families. Applications of genome science and technology are analyzed in the context of real world examples taken from a variety of clinical specialty areas to better understand the relation between genomics, health, and illness.

GNRS 622, Genome Science and Ethical Issues, 3 Units
This course examines current applications and implications of genome science and technology to healthcare, public health policy, economics, ethics, federal and state laws and societal issues. The following discussion topics are at the leading edge of healthcare and social debate: DNA biobanking, genetic profiling, and genomic technologies used in genome medicine such as stem cell research, gene therapy, and genetic enhancements. In addition, the course addresses ethics, philosophy, and theology literature to explore thoughtful discussions that cover a wide range of genome applications in healthcare and health science research.
Prerequisite: GNRS 620

GNRS 630A, Oncology Nurse Practitioner Fellowship A, 4 Units
This course is the first in a series of three fellowship courses that enhance students' critical thinking, diagnostic reasoning, and interpretation and management skills for advanced practice nursing in the field of oncology. Students gain a deeper understanding of the sciences necessary for enhanced role development, knowledge, and skills for advanced practice nursing scholarship, and practice in a designated appropriate setting under the direction of a faculty advisor in collaboration with selected clinical experts, with a focus on exploring the development and scientific underpinnings of components of expert clinical oncology practice.
Prerequisite: Enrollment in the oncology nurse practitioner fellowship certificate program.
GNRS 630B, Oncology Nurse Practitioner Fellowship B, 4 Units
This course is the second in a series of three fellowship courses that enhance students' critical thinking, diagnostic reasoning, and interpretation and management skills for advanced practice nursing in the field of oncology. Students gain a deeper understanding of the sciences necessary for enhanced role development, knowledge, and skills for advanced practice nursing scholarship, and practice in a designated appropriate setting under the direction of a faculty advisor in collaboration with selected clinical experts, with a focus on exploring the development and scientific underpinnings of components of expert clinical oncology practice.
Prerequisite: Enrollment in the oncology nurse practitioner fellowship certificate program.

GNRS 630C, Oncology Nurse Practitioner Fellowship C, 4 Units
This course is the third in a series of three fellowship courses that enhance students' critical thinking, diagnostic reasoning, and interpretation and management skills for advanced practice nursing in the field of oncology. Students gain a deeper understanding of the sciences necessary for enhanced role development, knowledge, and skills for advanced practice nursing scholarship, and practice in a designated appropriate setting under the direction of a faculty advisor in collaboration with selected clinical experts, with a focus on exploring the development and scientific underpinnings of components of expert clinical oncology practice.
Prerequisite: Enrollment in the oncology nurse practitioner fellowship certificate program.

GNRS 631, ONP: Cancer Biology and Assessment, 2 Units
This course builds on knowledge of the anatomy and physiology of DNA, RNA, and differentiated and nondifferentiated human cells. Focus is on the pathophysiologic mechanisms of human cancer disorders. Diagnostic reasoning that facilitates the clustering of signs and symptoms is a key process undergirding the course. The course also provides the foundation for the integration of diagnostic testing, physical assessment, and understanding of the predictable pathophysiology of cancer in order to stage tumors and predict metastatic risk in individuals.
Prerequisite: Admission to the Oncology Nurse Practitioner Post-Master's Certificate program.

GNRS 632, ONP: Cancer Therapeutics, 2 Units
This course builds on knowledge of the predicted behavior of human cancer. Technology in cancer treatment is evolving rapidly, and this course provides a pathophysiological foundation for understanding cancer protocols. Current cancer protocols, classes and categories of therapeutics, technologies in development, and tumor resistance are discussed, along with the cost benefit, side effects, and availability of the covered therapeutics.
Corequisite: GNRS 631

GNRS 633, ONP: Symptom and Side Effect Burden, 2 Units
Patients with advanced cancer often suffer significant symptomatic burden and the iatrogenic complications of treatment. This course helps students develop a patient-centered approach to evidence-based management of common symptoms of cancer and side effects of treatment.
Prerequisite: GNRS 631 and GNRS 632

GNRS 634, ONP: Survivorship and the Psychosocial Impact of Cancer, 2 Units
Cancer patients and their caregivers face complicated psychological, financial, and spiritual changes, beginning at diagnosis and extending into the posttreatment phases. This course covers the common problems related to those changes, and best-practice strategies and techniques to help patients and families cope with cancer.

GNRS 635, ONP: Team-Based Care and the Role of the Oncology Nurse Practitioner, 2 Units
The clinician role of the oncology nurse practitioner requires familiarity with the incidence, prevalence, and risk assessment competencies for all common cancers. In addition, the oncology nurse practitioner must be prepared for a wide variety of leadership roles. Strategies for care coordination, designing and measuring interdisciplinary team outcomes, mentoring, collaborating with primary care providers, and rapid-cycle quality improvement are examined.

GNRS 636, ONP: Clinical Trials in Oncology Nursing, 2 Units
The advanced-practice oncology nurse practitioner is prepared to provide direct patient care, design a plan for outcome evaluation, and take a leadership role in medical and nursing oncological research.
Prerequisite: GNRS 610, GNRS 611, GNRS 612, and GNRS 613

GNRS 650, History of Professional Nursing: From Origins to Nursing in Transition, 3 Units
Students in this course explore conceptual and methodological issues in historical nursing research, including the use of biographic methods in nursing history and working with primary sources/archival materials/artifacts and material culture. Focus is on the origins of professional nursing up to the period of nursing in transition in the United States. Students examine ethics guidelines and standards for historical research in nursing, and critically analyze the origins of nursing and early nursing contributions to the evolution of modern health systems and interventions. Class discussion and composition facilitate critical thinking about the history of nursing as a scholarly inquiry, focusing on issues and methods of nursing historical research.
GNRS 651, History of Professional Nursing: From Colonial Times to Present Day, 3 Units
Students in this course explore the foundations of professional nursing in the United States in the context of influential historical, global, societal, and scientific events. Students examine issues faced by nurses from colonial times to today, critically analyzing nurses' contributions to the development of modern health systems and interventions. Class discussion and composition facilitate critical thinking about the history of nursing as a scholarly inquiry, since historical perspectives form the basis for analysis of contemporary healthcare issues and projected development of the nursing profession, its practice, and healthcare policy.

GNRS 660, Theories of Teaching and Instruction, 3 Units
This course analyzes selected teaching and learning models that are applicable to nursing education. Strategies for classroom and clinical teaching are examined. Research relative to nursing education is reviewed and critiqued. Design of research methods to determine effectiveness of teaching strategies is incorporated. Course development and student evaluation are emphasized. Selected faculty and nursing education issues are also explored.

GNRS 661, Leadership and Role Development in Nursing Education, 3 Units
This course includes an analysis of educational leadership and the multiple roles of the nurse educator related to teaching, scholarship, service, and practice. Theoretical perspectives and practical approaches supported by research in nursing and higher education literature, as well as the Christian educator's role promoting faith integration, are addressed.

GNRS 662, Assessment, Curriculum, Development, and Outcomes, 3 Units
This course addresses theoretical approaches to educational assessment, the development and implementation of nursing curriculum, and student and program outcomes. Emphasis is given to the importance of incorporating Christian values in the curriculum. The course also includes critical analyses of related topics based upon current research in nursing and higher education literature.

GNRS 663, Clinical Practicum in Nursing Education, 3 Units
This practicum course builds on the academic and clinical preparation of previous courses and prepares students to teach in academic and clinical settings. Under the supervision of a preceptor, this practical classroom experience focuses on: a) writing of learning/teaching objectives, b) selecting teaching strategies and learning activities, c) designing and implementing teaching plans for units of instruction, d) evaluating student learning outcomes, and e) obtaining feedback on teaching performance from faculty mentors/preceptors, fellow students, and self-evaluation and reflection. It is recommended that students take GNRS 660, GNRS 661, and GNRS 662 prior to taking this class. GNRS 664 may be taken concurrently.

GNRS 664, Teaching and Learning Strategies for Nursing Education, 3 Units
This course equips academic nurse educators to develop and evaluate teaching and learning strategies that facilitate learning in different nursing educational settings. Course material includes examining the challenges nursing faculty face in implementing this role, and strategies to successfully navigate those challenges. Also included are two projects to prepare students for the application process of the nurse educator. It is recommended that students take GNRS 660 prior to taking this class.

GNRS 695, Special Topics, 1-4 Units
A subject of current interest is examined in depth. Students analyze and evaluate controversial issues to reach and express a reflective position. This course may be repeated for credit to a maximum of 6 units applied toward the MSN or PhD degree; each course must address a different topic.

GNRS 700, Philosophy of Science, 3 Units
This course equips students with the knowledge and critical analytic skills to comparatively evaluate the philosophical foundations of scientific theories and the influence of Western philosophical schools of thought on the development of nursing science. Course content is organized to engage students in discussion and critical analysis of the epistemological and philosophic foundations of scientific theories and the characteristics of scientific knowledge according to the received view, paradigmatic view, perceived postmodern view, and feminist tradition. Special emphasis is given to the critical debate within nursing about the nature of nursing science.

GNRS 701, Nursing Knowledge Development, 3 Units
Students in this course focus on analyzing and critiquing the theoretical and methodological processes that are utilized in theory building and knowledge development in nursing. Discussion and critique of the different stages of theory development and students' experimentation with conceptualizing and developing their theoretical stance go hand in hand. Patterns of knowing, knowledge development, and criteria for evaluating nursing knowledge are examined in relation to the discipline's domain and the phenomena of concern in nursing.

GNRS 702, Nursing Theory, 3 Units
This course focuses on strategies for theory development such as concept analysis, conceptual mapping, and theoretical modeling as applied to the student's phenomenon of concern. It also provides critique and analysis of the major models and theories used in a variety of nursing settings in relation to existing interdisciplinary theoretical knowledge.
GNRS 703, Spirituality and Health, 3 Units
This course provides an introduction to spirituality, including spiritual experience, as it relates to individual health and illness. Communal spirituality is also considered. Differentiation is made between and among generic religious and Christian spiritualities. While the course covers theoretical aspects of spirituality and their interaction with health and illness, concentration is on the movement from theory to praxis. This lecture/seminar course is oriented toward nursing educators who seek to develop a foundation in spirituality for spiritual integration as well as for its development in nursing practice.
Prerequisite: Admission to DNP or PhD program

GNRS 704, Faith Integration and Nursing Scholarship, 3 Units
This course begins with an exploration of the nature, role, problems, and possibilities of faith integration in higher education and in the nursing curriculum at all levels of higher education. The special circumstances of faith integration and its implications for teaching in secular college settings are explored. This course further provides a critical explication of theological method and content in three domains: biblical hermeneutics, constructive theology, and ministry praxis for education. The focus of the course is on the appropriation of theological method and knowledge for the purposes of integration into nursing education and practice especially (but not exclusively) within the context of a Christian or church-affiliated college.

GNRS 705, Social Ethics and Health Policy, 3 Units
This course seeks to provide a social ethics frame of reference for health care. Medical and biological advances have contributed to a rapidly expanding amount of human control over human and natural processes, including genetic potential and behaviors. This new power raises questions of morality and highlights the need for discussion and legislation regarding the complex issues raised by developments in health care, medical technology, and science. A comprehensive social ethic places decisions about health care within the context of a fuller account of purpose and meaning in life.
Prerequisite: Admission to DNP or PhD program

GNRS 706, Methods of Inquiry, 3 Units
Students in this course explore various methods of inquiry as they focus on the difference between scientific thinking, wisdom, and alternative concepts of knowledge. Existential dilemmas intrinsic to the pursuit of truth, the exploration of the meaning of actions, the process of reason and interpretation, the perception of reality, and empirical generalizations are discussed, and their influence on the definition of research problems and designs is explored. Research designs and methods are introduced as they relate to problem definition and theory, including an overview of the principles of basic and applied experimental research, evaluation research, and the traditions and foundation of qualitative and historical research. Students are required to explore, synthesize, and debate current issues that will affect their research careers.
Prerequisite: Admission to DNP or PhD program

GNRS 707, Quantitative Nursing Research Design I, 3 Units
This course focuses on advanced multiple research designs and data collection approaches. Emphasis is on experimental and quasi-experimental designs, epidemiological methods, survey research, and evaluation and outcomes research, as well as on planning design and sampling. Inferential statistics and advanced statistical analysis methods including ANOVA and various types of multiple regression analysis are incorporated within the course content.
Prerequisite: Admission to DNP or PhD program

GNRS 708, Qualitative Nursing Research Design I, 3 Units
This course focuses on analyzing the epistemological foundations and the assumptions of qualitative research methodologies. It provides an introduction to the major qualitative research methodologies including grounded theory, phenomenology, and ethnography. Each methodology is analyzed as to its appropriateness for the research question. Experience in carrying out a pilot study in the selected methodology is provided.

GNRS 709, Advanced Statistical Analysis II, 3 Units
This course presents advanced methods of quantitative inquiry. The emphasis is on the use of factor analysis, confirmatory factor analysis, path analysis, and structural equation modeling. Assumptions of the techniques are addressed. The course provides the student experience in using statistical packages for entering and analyzing data. Reporting results of the analyses is also incorporated. Making appropriate decisions regarding which of the advanced statistical techniques to use is stressed. Critique of the advanced statistical analyses of published health care research is also emphasized.
Prerequisite: GNRS 707

GNRS 710, Advanced Qualitative Research Methods, 3 Units
This course provides advanced knowledge and training in the use of qualitative research methods including phenomenological interpretation, grounded theory interpretation, ethnographic interpretation, focus groups interpretation, and feminist interpretation. Intensive interpretive and structured approaches to analysis and methods of establishing plausibility, credibility, and adequacy of qualitative data are emphasized.
Prerequisite: GNRS 708

GNRS 711, Advanced Research Methods in the Humanities, 3 Units
This seminar and consultation course introduces PhD students to nonscientific research methodologies as used in the arts, letters, humanities and aspects of the social sciences for the (a) conduct of original dissertation research on one of the disciplines of arts, letters, humanities, or nonscientific aspects of one of the social sciences, (b) conduct humanities-based research to widen and deepen a scientific dissertation topic, or (c) to enlarge the student's methodological repertoire, knowledge, and skill. The course is intended for those whose primary research education and experience has been in scientific methods and disciplines. (Enrollment limited to eight.)
Prerequisite: (a) successful completion of GNRS 701 and GNRS 706, (b) permission of the instructor
GNRS 712, Healthcare Quality Improvement, Program Planning, and Evaluation, 3 Units
This core course bridges the gap between the uptake of new health research discoveries and their translation, adoption, and implementation in practice. Course content includes the examination, integration, and application of quality improvement, program planning, and evaluation processes, strategies, and tools. The outcome of the course is a well-designed evaluation plan for an evidence-based quality improvement project.
**Prerequisite:** Admission to DNP or PhD program

GNRS 713, Advanced Statistical Analysis I, 3 Units
This course presents common nonparametric and parametric statistical techniques used in healthcare research. Assumptions of the techniques are addressed. Specifically, the course emphasizes t-tests, ANOVA, ANCOVA, RANCOVA, correlation, odds ratio, regression, and power analysis, and provides the student experience in using SPSS for entering and analyzing data. Reporting results of the analyses is also incorporated. Making appropriate decisions regarding which statistical techniques to use is stressed. Critique of statistical analyses of published healthcare research is also emphasized.

GNRS 715, Psychosocial Issues of Older Adults, 3 Units
This course focuses on the biological and psychosocial processes throughout adulthood and the older years. Theories of aging are examined, as well as social role changes, social stratification, and the development of institutions of the aged. The course explores both normal aging and psychopathology, and the systematic intrinsic psychological or personality changes associated with development and adaptation in later life. Other topics include clarification of the causes and prevention of health maladies in the later years, and the nature and treatment of the most common psychopathologies. The psychodynamics of institutionalization and family care of the very old are also examined.

GNRS 716, Translation of Research to Practice, 3 Units
The goal of this core course is to help prepare Doctor of Nursing Practice (DNP) nursing students to be nurse scholars and to identify strategies within a multidisciplinary model and in intraprofessional relationships that promote the ready translation of research into practice. This course exposes DNP students to evidence-based practice, quality improvement methodologies, concepts and theories, and deepens their knowledge regarding the phenomenon of interest. This prepares them for foundational competencies needed for evidence-based problem identification, PICOT writing, literature search, integrated literature review, evidence appraisal, and synthesis. There are iterative assignments to develop skill and the milestone assignment is a final integrated review and synthesis paper with in-depth knowledge of their phenomenon (vs. topic) of interest.
**Prerequisite:** Admission to DNP or PhD program

GNRS 717, Health Technology and Informatics, 3 Units
This course presents an overview of the evolution of health care informatics from an interdisciplinary perspective. Students learn health care informatics history, concepts, theories, legal and ethical implications, and applications within the health care industry. This course introduces the student to the information system life cycle, human factor issues in health care informatics, critical issues affecting the development and implementation of information and communication systems and technologies (clinical, administrative, and learning), knowledge management principles, professional practice trends, and emerging ICT (information and communication technology) in health care.

GNRS 718, Organizational Leadership and Strategic Planning, 3 Units
In this core course, students acquire knowledge and skill to effectively manage systems level change, empower others, and influence political processes. Advanced nursing practice leadership occurs in clinical practice with clients and staff, within healthcare institutions, professional organizations, and in healthcare policy making arenas, using knowledge of nursing and other professions to address healthcare needs and direct interprofessional activities and initiatives. To develop the leadership role, students implement strategies for creating organizational change to provide high-quality services and outcomes at reasonable costs and lead the development of a business plan for quality improvement initiatives. Students advocate for change related to financial policies that impact the relationship between economics and quality care delivery. Focus is on organizational process, including the associated management of conflict, change, promotion of safety for clients and providers, and control of risk within a dynamic healthcare environment.
**Prerequisite:** Admission to DNP or PhD program

GNRS 720, Wellness Promotion and Health Maintenance, 3 Units
This course focuses on the critical appraisal of theories and models of health promotion and on the evaluation of health initiatives developed for national health promotion and maintenance. Relevant risk prevention, control, and health promotion intervention strategies are emphasized. Communicable diseases; health hazards; high-risk health factors; acute and chronic illness across ethnicities, genders, and the life span; and morbidity and mortality of the nation's leading health problems are analyzed. Students' research questions are generated from a synthesis of knowledge regarding a specific phenomenon relevant to the student's individual area of study.
**Prerequisite:** Admission to DNP or PhD program

GNRS 721, Health Disparities and Vulnerable Populations, 3 Units
This course offers an analysis and evaluation of various topics and issues on health disparities of underserved ethnic or minority vulnerable populations as well as an analysis of research that describes, explains, and examines variables influencing health disparities and intervention strategies to reduce these disparities.
GNRS 722, Research in Nursing and Health, 3 Units
This course is team taught and reflects the research expertise and program of study of the nursing doctoral faculty. It focuses on analysis of determinants of health and illness across demographic, biological, psychological, familial/cultural, and societal dimensions. Attention is given to theoretical explanations toward promoting development of students' programs of research.

GNRS 724, Quantitative Nursing Research Design II: Psychometrics, 3 Units
This course introduces students to the methods of survey research. Course material covers practical considerations in the construction of questionnaires, including determining questionnaire content, selection of item types and wording of items, selection of an administration method, piloting questionnaires, and locating existing questionnaires. Discussions about conducting survey research focus on sample selection, analyzing information obtained from questionnaires using SPSS, evaluating questionnaires, sources of error, and how to reduce measurement error in survey research.

Prerequisite: GNRS 707

GNRS 725, Research Practicum, 1 Unit
The practicum further develops, mentors, and socializes students into the roles and activities of research scientists and scholars. Emphasis is on mentoring to facilitate student progression in research methodology, culturally appropriate research strategies, data management, and data analysis. Students can choose either a qualitative or qualitative practicum experience.

GNRS 726, Advanced Scientific Writing, 3 Units
This course provides opportunities for students to learn how to research and introduce a topic in writing, articulate a thesis statement, support and develop a literature review, work with secondary sources, and organize a written paper that can be developed into a dissertation or translational research paper.

GNRS 727, Genome Science in Clinical Cases and Disease Management, 3 Units
This course focusing on medical family history taking, constructing and analyzing the pedigree, genetic counseling, clinical decision making and clinical case management for a wide variety of inherited and acquired diseases through the lens of emerging genome science. Clinical cases are discussed from a holistic perspective including; genome science, epidemiology, genomic profiling, genetic technologies, personalized medicine, interprofessional collaboration, ethical and legal issues, and health policy.

Prerequisite: GNRS 620

GNRS 728, Genome Science Research Methods, 3 Units
This course focuses on genome research methods for understanding and translating genome science to practice and to genome related nursing research. Understanding the research methods fosters a deeper understanding of the strength and the weaknesses of the science and an ability to critique the benefits and the limitations of the science for designing nursing research. The course includes a wide range of research methods that explore genetics or genomics in human populations. A key outcome of this course is to develop a research proposal using genome methods to design nursing research aimed at improving quality of health for individuals, families and populations.

Prerequisite: GNRS 620, GNRS 622, GNRS 727

GNRS 729, Population Health and Epidemiology, 3 Units
The concept of population health includes aggregate, community, environmental/occupational, and cultural/socioeconomic definitions of health. The implementation of clinical prevention and population health activities is central to achieving the national goal of improving health status and reducing health disparities among different aggregate groups. This course covers the basic elements and methodological concepts used in the epidemiologic study of factors related to health promotion and disease prevention in human populations. It brings together considerations from several fields of investigation, such as epigenetics, epidemiology, psychology, and public health, to study the effects on health and health-related outcomes.

Prerequisite: GNRS 620, GNRS 622, GNRS 727

GNRS 730, Comparative Health Care Systems, 3 Units
This course focuses on exploring/analyzing environmental, social, cultural, political and economic determinants of health across the globe. Comparative analysis of international health care systems including governmental, nongovernmental, traditional, and faith-based organizations are emphasized. Epidemiological analysis of morbidity and mortality, analysis of health and illness responses, and health-seeking behavior across the age span and gender/ethnic variables are discussed with the intent to identify areas of research relevant to students' interest. Presented from a Christian perspective, this course investigates research and practice opportunities and responsibilities for advanced practice nurses in global arenas.

Prerequisite: Admission to DNP or PhD program

GNRS 732, DNP Clinical Residency, 0 Units
This course provides students enrolled in the Doctor of Nursing Practice (DNP) program with opportunities to develop professional nursing skills at the doctoral level. The focus of the course is to explore the development and scientific underpinnings of components of expert advanced clinical practice. Students select a population of interest for the DNP clinical residency and apply evidence-based practice and research findings in order to develop and improve practice. Over the course of the DNP program, students integrate previous nursing education and practice experiences with the DNP residency and concurrent doctoral coursework to meet the AACN Essentials of Doctoral Education for Advanced Nursing Practice and complete a DNP scholarly project. The course may be repeated to enable the student to obtain a minimum of 1,000 residency hours. Previous hours from graduate clinical courses may apply, so residency hour requirements will vary.

Prerequisite: Admission to DNP program
GNRS 733A, Residency IA, 1 Unit
This is the first in a series of three residency courses designed to enhance students’ critical thinking, diagnostic reasoning, interpretation, and management skills for advanced clinical practice. This course broadens and enhances understanding of the sciences necessary for enhanced role development, knowledge, and skills for advanced practice clinical nurse scholarship. Students practice in a designated appropriate setting under the direction of a faculty advisor in collaboration with selected clinical experts. The course focuses on exploring the development and scientific underpinnings of components of expert advanced clinical practice, and attention is given to the development of skills necessary to attain that goal. By the end of this course, students select their population of interest for their clinical residency and apply evidence-based findings to this population to identify potential areas of intervention.
Prerequisite: Admission to DNP program

GNRS 733B, Residency IB, 1 Unit
The second of a three-course sequence, this course may be taken concurrently with GNRS 733A and/or GNRS 733C with approval of the DNP director or designee. Grading: pass/fail

GNRS 733C, Residency IC, 1 Unit
The third of a three-course sequence, this course may be taken concurrently with GNRS 733A and GNRS 733B with approval of the DNP director or designee. Grading: pass/fail

GNRS 734A, Residency IIA, 1 Unit
The first of a three-course sequence, this course may be taken concurrently with GNRS 734B and GNRS 734C with approval of the DNP director or designee. Grading: pass/fail

GNRS 734B, Residency IIB, 1 Unit
The second of a three-course sequence, this course may be taken concurrently with GNRS 734A and/or GNRS 734C with approval of the DNP director or designee. Grading: pass/fail

GNRS 734C, Residency IIC, 1 Unit
This is the last of a three-course series of clinical residencies with a focus on transformative and collaborative leadership, including completion of the evidence-based practice project, assessment of project outcomes, and planned dissemination of findings. Students apply relevant clinical and research findings to develop and improve practice. Content emphasizes critical appraisal of skills and interventions necessary to ensure meaningful translation of scientific evidence into practice, including a cost-benefit analysis for implementing a change into clinical practice. The course also emphasizes the professional role of the nurse as a collaborator, leader, and provider of care with nursing colleagues and other members of the interprofessional healthcare team within the context of complex healthcare systems, preparing students to implement an advanced nursing practice role that results in practice and/or policy change at the local, state, and/or national levels.
Prerequisite: Successful completion of GNRS 733A, GNRS 733B, GNRS 733C, GNRS 734A and GNRS 734B

GNRS 735, DNP Scholarly Project Seminar, 3 Units
The DNP program requires a rigorous clinical project focused on translating scientific research to health care in a timely manner so that patients experience the best applications of science and practice. The project is a scholarly experience that implements the principles of evidence-based practice and translation under the guidance of a faculty mentor. In line with the AACN Essentials of 2007, the outcome of the DNP scholarly project is a tangible and deliverable academic product that is derived from the practice immersion experience and reviewed and evaluated by an academic committee. The project also serves as a foundation for future scholarly practice.

GNRS 736, DNP Scholarly Project Seminar: Evaluation and Dissemination, 2 Units
This course focuses on presentation to and approval of a completed DNP Scholarly Project. The DNP program requires a rigorous clinical project focused on translating scientific research to health care to improve the patients experience utilizing the best evidence of science and practice. This scholarly project is a culminating, independent experience which demonstrates the student’s synthesis of coursework and lays the foundation for future scholarship.

GNRS 780, Doctoral Seminar I: Elements of a Proposal and IRB Application, 3 Units
This seminar directs the development of either a PhD dissertation or a DNP Scholarly Project proposal draft that details a problem, the research/project purpose, questions or hypotheses to be examined, a synopsis of the relevant literature, the design and methods of the study including its timeline, protection of human subjects, plans for analysis, and the budget. The seminar also includes preparation of IRB applications, and peer review and critique of student proposals.
Prerequisite: Admission to DNP or PhD program

GNRS 781, Doctoral Seminar II: Developing a Grant Proposal, 3 Units
This doctoral seminar provides students with the opportunity to acquire knowledge, skills, and insights in the writing of a grant proposal. Discussion will focus on the value of writing grant proposals, the basic principles in writing a grant proposal, the components of a grant proposal, identification of funding sources, the difference between a research and a program grant proposal, as well as administrative factors in submitting a grant proposal. Students will craft and a grant proposal in response to a Request for Funding Proposal (RFP) that aligns with the guidelines of the funding agency, and additionally, a budget plan with justification, timelines, and a bio-sketch. In addition, students will conduct a peer review of class completed grant proposals.
GNRS 792, Doctoral Seminar III: Writing for Publication, 3 Units
This seminar focuses on various aspects of writing for publication and directs the development of a manuscript suitable for publication from a previously written paper (e.g., a course term paper). This course will help the student get started on writing; identify writing styles for various forms of publication including abstracts, journal articles, papers, and books; and determine appropriate journals to consider for article submission. The student will acquire practice in reviewing and critiquing scholarly writing by others. It will also address the editorial and publication process, as well as ethical aspects of writing for publication.

GNRS 793, Doctoral Seminar IV: Developing Professional Presentations, 3 Units
This seminar course identifies approaches to developing an effective and successful presentation, helping students find their voice and showcase their areas of expertise. Discussions focus on planning as essential to deciding on the content and the order in which the information is presented. Emphasis is on developing a logical sequence, one that flows naturally and is accompanied by audiovisuals that facilitate understanding of the material.

GNRS 784, Dissertation Seminar V, 2-4 Units
This fifth dissertation seminar provides the student a forum to explore with their peers research findings, theoretical and empirical implications, and potential venues for publication of manuscripts. Format and procedures for progression in the dissertation process are also discussed. Placement of the Course: This seminar is not required if dissertation seminar requirement of 12 units has been met by GNRS 780, GNRS 781, GNRS 782, GNRS 783, and student has defended dissertation. Grading: Pass/Fail.
Prerequisite: GNRS 783

GNRS 791, Doctor of Nursing Practice Intensive I, 1 Unit
This is the first of four intensive courses that give DNP students a face-to-face interactive experience through out-of-classroom work. This course introduces students to the role of the DNP nurse in a variety of healthcare settings. Students acquire advanced practice and academic skills necessary for selecting a population of interest and applying evidence-based practice to it as part of an evidence-based DNP scholarly project consistent with the DNP role within a healthcare organizational setting.
Admission to the DNP program; corequisite: GNRS 716

GNRS 792, Doctor of Nursing Practice Intensive II, 1 Unit
This is the second of four intensive courses that give DNP students a face-to-face interactive experience through out-of-classroom work. This course helps students identify strategies within a multidisciplinary model that promotes evidence-based practice in various clinical, community, and educational settings. Students receive support and direction in collaboration with the sponsoring facility and mentor as they develop a comprehensive, site-specific DNP scholarly project proposal.
GNRS 791; corequisite: GNRS 780

GNRS 793, Doctor of Nursing Practice Intensive III, 1 Unit
This is the third of four intensive courses that give DNP students a face-to-face interactive experience through out-of-classroom work. This course equips students with the skills, competencies, and points of view needed for developing the ethical reasoning/decision-making skills necessary for conducting their DNP scholarly projects.
GNRS 792; corequisite: GNRS 790

GNRS 794, Doctor of Nursing Practice Intensive IV, 1 Unit
This is the last of four intensive courses that give DNP students a face-to-face interactive experience through out-of-classroom work. As in the other intensive experiences, course content for each student reflects the interests of the student and is designed to meet that student's needs and career goals. This course allows students, with guidance from their mentors and faculty, to complete the DNP scholarly project and finalize the written and oral scholarly reports that disseminate and integrate new knowledge. Each student's final product reflects their ability to employ effective communication and collaboration skills, take a leadership role, integrate core DNP concepts and competencies that influence healthcare quality and safety, and successfully negotiate change in healthcare delivery for individuals, families, populations, or systems across a broad spectrum of health care.
Prerequisite: GNRS 793;
Corequisite: GNRS 736

GNRS 795, Special Topics, 1-4 Units
In this course, a subject of current interest is examined in depth. Students analyze and evaluate controversial issues to reach and express a reflective position. Students may repeat the course for credit to a maximum of six units applied toward the doctoral program; each course must address a different topic.

GNRS 798, Continuous Doctoral Study, 0 Units
This course is for doctoral students working on dissertations or translational research projects. Students must re-enroll each semester until the dissertation or translational research project is completed, defended, submitted to the library, and approved.

GNRS 799, Independent Study, 1-4 Units
Students enroll in this course to pursue independent study investigating subjects and interests that lie beyond regular course offerings. The student explores topics in greater depth than in other courses, and/or initiates an individual project. Readings are pursued in accordance with a study plan, which is developed in consultation with a sponsoring doctoral faculty member and approved by the doctoral department.
GSPH 504, Bioethics and Healthcare Policy, 3 Units
This course will outline the role of the healthcare leader in ensuring human rights are upheld in healthcare systems. This course focuses on bioethical analysis, decision-making and moral policy analysis, and formulation. Through course discussion, group and individual assignments, and oral and written presentations, students will analyze and apply bioethical principles to decision- and policy-making processes in the workplace and at national levels. Healthcare ethics and policy will be considered from a Christian worldview.

GSPH 506, Spiritual Concept Analysis in Health Care, 3 Units
This course focuses on scholarly research and analysis of selected concepts in the spiritual care of people from the Judeo-Christian perspective. Students also examine healthcare research/other healthcare literature for adequacy with respect to the concept they select. Various assignments facilitate greater student awareness of their own spiritual journeys and knowledge of faith traditions other than their own. The course is conducted as a tutorial/seminar experience.

GSPH 508C, Research and Theory in Health Care, 3 Units
This course prepares the healthcare practitioner to apply theory and research evidence in healthcare environments. The relationship between theory and research is examined as students consider questions about the nature, construction, and use of each. Selected theories are explored, and students learn how ideas are developed and used in practice and research. Students also learn the fundamentals of quantitative, qualitative, and mixed-methods research and deepen their understanding through systematic search, critique, and summary of research studies with application to health care. Students work in groups to develop a research plan addressing a healthcare-derived question. Experience in statistical analysis of research data is included.

GSPH 510, Social Determinants of Health, 3 Units
A central focus of the public health field is understanding the etiology, occurrence, and distribution of health outcomes (morbidity and mortality). One growing area of importance within the field is examining how health and disease are influenced and maintained by social, economic, and political risk factors—called social determinants of health. This course provides a macro-level overview of concepts, research, and theoretical models of social determinants of health. Through interactive lectures, readings, and assignments, students are exposed to major areas of study linked to social determinants of health, with discussions centered on the following key questions: What social factors are the greatest challenge to health outcomes within local communities? What does it mean to use a social determinants lens when studying health outcomes among diverse multicultural populations? What are health disparities and how might they best be addressed? What behavioral lifestyle factors commonly interplay with social determinants of health?

GSPH 512, Health, Culture, and Diversity, 3 Units
This course covers the issues of health disparities in the United States and the development of culturally competent programs. Students examine what is meant by culture, the ways in which culture and health issues intersect, and how public health efforts can benefit by understanding and working with cultural processes.

GSPH 514, Research Proposal Writing, 2 Units
This course focuses on the application of the concepts in GSPH 508C Research and Theory in Health Care. The goal is the completion of a research proposal that details the problem, the research purpose, questions or hypotheses to be tested, a critique of the literature, the design and methods of the study including protection of human subjects, the plans for analysis, use of the study, and the budget and personnel.
Prerequisite: GSPH 508C

GSPH 515, Health Care Entrepreneurship, 3 Units
The course provides an opportunity to combine the strengths of public health training with new and existing approaches to social innovation and entrepreneurship from a Christian perspective. Students have opportunities to imagine solutions and mobilize resources to advance the public good and strengthen public health service. Course material introduces entrepreneurial concepts and tools to develop skills for use in various business environments.

GSPH 518, Population Health Management, 3 Units
This course covers important topics in the effective management of public health departments and agencies. Students develop knowledge and skills to fulfill roles in public health management as leaders, administrators, fundraisers, and internal and external communicators. Course content includes ways to be an effective coach to maximize the team's performance, the essentials of effective partnerships, how to create and sustain public health initiatives using business skills, how to run meetings, ways to manage electronic correspondence, and effective strategies to keep the public health organization running smoothly.

GSPH 519, Global Health Systems, 3 Units
This course examines international health systems in terms of infrastructure and function. Students examine the benefits and risks of universal healthcare, third party reimbursement systems, and global availability and access to medical services.

GSPH 520, Public Policy, the Health Care System, and Public Health Policy in the United States, 3 Units
This course is designed to provide students with an overview of public policy, health care systems and public health policy process in the United States. Students will gain an understanding of how the healthcare system works and how United States public health care policy has been developed. Review and analysis of current various proposals for healthcare reform will be conducted.
GSPH 521, Poverty and Health Policy, 3 Units
This course examines the nature and extent of poverty, health equity, and policy primarily in the United States. It considers possible causes and consequences, and the antipoverty effects of existing and proposed policies. This course will discuss labor markets, culture, and discrimination in shaping poverty. Also, it will explore how health policies seek to ameliorate poverty and other forms of social disadvantage throughout the life course. Finally, we explore the public health implications regarding poverty, inequality, and policy.

GSPH 522, Cultural Inclusivity in Health Care, 3 Units
In this course, students explore the topics and tools necessary for the application of cultural inclusivity processes in various healthcare settings. Curriculum includes an overview of demographic changes in the United States, cultural inclusivity, diversity related to specific groups, and the paradigm of cultural and linguistic diversity. Attention is also given to the costs, time, and skill sets associated with the process of moving a healthcare organization toward cultural inclusivity.

GSPH 525, Epidemiology, 3 Units
This course covers the application of epidemiological procedures to the understanding of the occurrence and control of conditions such as infections and chronic diseases, mental disorders, community and environmental health hazards, unintentional injuries, and geriatric problems. Other topics include quantitative aspects of epidemiology, including data sources, measures of morbidity and mortality, evaluation of association and causality, study design, and screening for disease.
Prerequisite: Undergraduate statistics and biology courses.

GSPH 526, Public Health Biology, 3 Units
Human health problems comprise a wide range of infectious, degenerative, neoplastic, and genetically based disease factors. In addition to these factors, human disease results from a wide range of environmental and socially caused pathologies. This course presents the basic scientific and biomedical concepts of modern public health problems and explores the mechanisms and models of the major categories of disease. An integrative approach using knowledge of nutrition, exercise, mind-body, and spiritual practices is explored. The biologic principles presented in this course are foundations to developing and implementing public health disease prevention, control, or management programs in the students' future.

GSPH 527, Advanced Biostatistics and Epidemiology, 3 Units
This course focuses on the application of statistical approaches in epidemiologic research, covering data management and selection of the appropriate statistical model. Regression analysis including linear regression, logistic regression, Poisson regression, and Cox regression is reviewed. Content also covers basic concepts in survival analysis including censoring, survival function, and hazard function. Epidemiologic methods for assessing causation, including mediation analysis, propensity score matching, and instrumental variable analysis, are also covered. Students learn to apply different analytic approaches using public databases.

GSPH 532, Infectious Disease Epidemiology, 3 Units
This course covers key methods for practicing infectious disease epidemiology, including study design, interpretation of data, and assessment of validity. Course content covers methods in infectious disease epidemiology, airborne transmission, diarrheal diseases, blood and body fluids as reservoirs of infectious disease, vector-borne/zoonotic diseases, and parasitic diseases. Students learn how to apply content and use problem-solving skills to develop effective prevention strategies.

GSPH 535, Environmental Health, 3 Units
This course examines essential issues in environmental health, including the scientific and historical foundations, regulatory and policy issues, models and tools for assessing community environmental health, and an overview of select issues and implications of the environment on national and global health. Topics explored include select environmental pollutants in the air, water, soil, and food sources; hazardous waste, risk assessment and communication; and issues of environmental justice and vulnerable populations, nationally and globally.
Prerequisite: Undergraduate biology, chemistry, or ecology

GSPH 537, Occupational Health and Safety, 3 Units
This course examines concepts and issues in occupational health and safety, identifying the significance to workers and public health. Students study social influences, historical events of worker injuries, industrial hygiene, and applicable principles of toxicology, worker quality of life, and safety in the workplace.

GSPH 540, Global Health, 3 Units
Students in this course examine global health issues, emerging priorities, and worldwide challenges affecting population health and disease. They also address opportunities in and challenges to international health, holistically examine determinants of human health, and plan, implement, and evaluate programs and potential solutions to promote international prevention interventions and optimal human health worldwide, with a focus on global health equity.

GSPH 543, Public Health Communication, 3 Units
This course provides an overview of the use of communication strategies to inform and influence individual and community health decisions, with a focus on how communication concepts, theories, and methods are used for public health promotion and practice. Health communication theories include models of persuasive communications/mass media effects, social marketing, interpersonal communications, risk perceptions, and diffusion of innovations. Students work in pairs to develop/evaluate a health communication intervention that addresses a current public health issue within a specific target group.
GSPH 546, Principles and Practices of Toxicology, 3 Units
Students in this course examine the principles of toxicology, including dose-response relationships, toxicokinetics, mechanisms and methods of toxicity, select exposures to toxic substances and accompanying toxidromes, the use of antidotes, and relevance to public health.

GSPH 550, Assessment, Program Planning, and Evaluation, 3 Units
Assessment, program planning, and evaluation bridges the gap between conceptual definitions, conceptual frameworks, and practice. Students take the lead in translating evidence-based research findings to evaluation of existing and proposed public health programs in order to assess and address population health needs. Students develop a program and evaluation plan that includes evidence-based and best practices, a logic model, and formative and summative evaluation.

GSPH 551, Theories of Health Behavior, 3 Units
This course helps students develop a knowledge foundation of health behavior theories and skills for developing theoretically based behavior-change programs. Given that a major focus of public health promotion, education, and prevention programs is on "changing health behavior," there is an ongoing quest to understand why people do what they do to (a) improve or maintain their health, and/or (b) worsen their health. Through lectures, readings, and assignments, students critically review and apply a range of health behavior theories that target the intrapersonal, interpersonal, and community levels.

GSPH 555, Infectious Diseases and Public Health, 3 Units
Students in this course examine the role of infectious diseases in regional, national, and global public health. Students study the historical context and surveillance of communicable diseases, as well as emerging issues in the field. Course content also includes the identification and management of infectious diseases, with students using case studies and proposing threats along with opportunities in prevention, education, and health promotion.

GSPH 560, Strategic Leadership in Health Care, 3 Units
This course is designed to develop knowledge, skills and attitudes about leadership across the healthcare continuum. The student will consider the professional role of the healthcare administrator both from a leadership and a management perspective. Areas of concentration will include leadership theory, structure of healthcare institutions, systems thinking and decision-making, performance improvement including quality and safety issues, risk management and effective communication skills. Application of business skills will be integrated. Students will consider the theoretical and research background, current issues and trends, leadership and administrative implications of specific topics.

GSPH 561, Public Health Across the Disaster Cycle, 3 Units
Students in this course evaluate the roles of public health in natural and human-caused disasters, from "simple" to complex humanitarian events. Using case studies, students analyze the functions of public health agencies and practitioners in the context of institutional systems and the disaster cycle (prevention/preparedness, response, recovery, and mitigation). Field trips outside of class hours may be required.

GSPH 566, Politics and Policies in Disaster Health and Emergency Preparedness, 3 Units
Students in this course evaluate existing governmental and institutional policies related to disaster health and emergency management (DHEM) within political systems. Implementation and evaluation of policy are analyzed and applied.

GSPH 568, Health Care Finance, 3 Units
This course is an introduction to financial concepts and skills needed for healthcare leaders, managers, and executives. Students develop skills in assessing multiple dimensions of financial performance and learn methods to improve the financial health of an organization in the context of the current patient care system.

GSPH 571, International Health Care, 2-4 Units
This course provides students with experience in nursing care in other countries. Students prepare with coursework in the United States, then travel abroad, where they have experiences in acute and/or chronic care settings, exploring cultural, economic, systems, philosophical, and other aspects of care that influence the provision of health care in other countries. A debriefing period is provided upon return.

GSPH 581, Disaster Health and Emergency Management Principles and Practices, 3 Units
Students in this course examine the practice of emergency management and the evolving field of disaster health. Content addresses traditional and current perspectives related to understanding disaster cycles and the relationship between disaster research and practice.

GSPH 593, Field Practicum, 3 Units
In this integrative learning experience, students complete hours in the field applying coursework and classroom learning in a real-world setting under the guidance and supervision of faculty and community-based preceptors, preparing them for professional careers in public health.
GSPH 594, Additional Field Practicum Experience, 1-5 Units
This field practicum elective gives students the opportunity to complete additional hours of practicum experience, allowing them to directly apply course content, public health knowledge, and skills acquired from the MPH program, under the guidance and supervision of faculty and community-based preceptors. This experience enriches classroom activity with practical understanding, and give students the chance to demonstrate an integration of coursework into a real-world setting, preparing them for a professional career in public health.
Prerequisite: GSPH 593

GSPH 595, Special Topics in Public Health, 1-6 Units
In this course, a topic of current interest to students is examined in depth. Students analyze and evaluate topics/issues to reach and express a position, enhance personal development and/or to develop a particular project. If students elect this course more than once during their program, each such course must address a different topic.
Prerequisite: Graduate standing

GSPH 597, Capstone, 1 Unit
This guided-study course provides a summative experience for completion of the Master in Public Health program and guides the student through the process of demonstrating an integration of theoretical, clinical, and research knowledge from course work throughout the program to the solution of a major public health problem in this culminating project. Each graduate candidate will identify a unique health problem in an actual healthcare setting to address, perform a thorough review and synthesis of current literature, select an appropriate theoretical framework, and develop a creative and innovative solution to the problem. Candidates will meet regularly throughout the semester with course faculty to prepare for and discuss their progress and will submit their work for publication or comparable external review format at the end of the semester.
Prerequisite: Completion of all Academic Core and Specialty courses

GSPH 598, Thesis, 1 Unit
This course is the second part of a two-course sequence (after GSPH 514 Research Proposal Writing) that supports student development of a thesis in the Master of Public Health program. The thesis has served as an option to the master's capstone project.
Prerequisite: GSPH 514

GSPH 599, Readings in Public Health, 1-3 Units
A student may elect to pursue special interests for credit at any time during the program under the supervision of a faculty member. This course is an independent study, arranged with a faculty member of the Department of Public Health.
Prerequisite: Graduate standing

GSPH 613, Graduate Statistics, 3 Units
This course presents the knowledge of descriptive, correlational, and inferential statistics used in research that serves as the basis for evidence-based practice. Students develop the ability to perform descriptive and inferential data analysis techniques, use software applications to aid in statistical calculations and presentation, and interpret findings.
Prerequisite: Undergraduate statistics and biology courses.

MHA 560, Strategic Leadership in Health Care, 3 Units
Students in this course develop knowledge, skills, and attitudes about leadership across the healthcare continuum as they consider the professional role of the healthcare administrator from leadership and management perspectives. Areas of emphasis include leadership theory, structure of healthcare institutions, systems thinking and decision making, and performance improvement including quality and safety issues, risk management, and effective communication skills. Application of business skills is integrated, and students consider the theoretical and research background, current issues and trends, and leadership and administrative implications of specific topics.
Prerequisite: Admission to the M.S. in Healthcare Administration program.

MHA 570, Quality Management, 3 Units
The course focuses on the conceptual foundation of healthcare quality, systems thinking, and the principles of healthcare quality management that include measurement, assessment, and improvement. Students use improvement models, apply tools and process techniques to communicate organizational, clinical, and safety outcomes. The integration of evidence for organizational decision-making with quality improvement processes serve as the framework for students to create a data-driven, quality management project plan. Students incorporate practical solutions to craft measurable expectations, realistic timelines, and an organized project management approach for direct application.
Prerequisite: PADM 512

MHA 571, Integrative Theories of Innovation in Health Care, 3 Units
This course helps student identify and develop skills in producing lasting innovations in healthcare settings. Course material builds on past theories of change, such as those by Lewin and Kotter, and includes other theories that support and sustain organizational change. It also features content on Rogers’ diffusion of innovation theory, disruptive innovation, and strategies to promote the adoption of innovation.
MHA 574, Global Field Study in Health Care, 3 Units
This course provides a framework for graduate students to engage in field study in various countries around the world. Students participate in organizational assessment visits to healthcare organizations locally and globally to discuss the role of the administrator and how they apply and practice leadership, management, and change principles, concepts, and theories covered in the graduate curriculum. The global competency domains for healthcare leaders - leadership, communication and relationship management, professional and social responsibility, health and the healthcare environment, and business - are explored as part of the healthcare management profession.

MHA 580, Administrative Practicum, 2 Units
This course gives students the opportunity to experience the role of the healthcare administrator. Each student chooses an individualized administration practicum in a specific area of emphasis, approved and monitored by the faculty member and preceptor. Competencies that govern the role of the healthcare administrator are explored in depth, and students focus on the context for enacting the role of an administrator in a healthcare delivery system.

Prerequisite: All Academic Core and Administrative courses; MHA 597 can be taken concurrently.

MHA 586, Healthcare Analytics, Big Data, and Applied Statistics, 3 Units
This course is an introduction to healthcare data science and analysis that builds knowledge of the technical infrastructure, sources, and storage of electronic data. Statistical analysis, data mining, text analytics, and predictive analytics are explored to frame questions and inform decision making. Students utilize different information retrieval methods to answer clinical and operational questions by performing simple data analysis and visualization of healthcare data. Strategies are discussed for how to optimally use data and glean knowledge from within big data to advance healthcare organizations and demonstrate value. Students also explore Christian worldview principles demonstrating ethical data use in health informatics that respects the dignity and uniqueness of others, and the security and privacy of data.

Prerequisite: MHA 596

MHA 595, Special Topics, 3 Units
In this course, a topic of current interest to students is examined in depth. Students analyze and evaluate topics/issues to reach and express a position, enhance personal development and/or to develop a particular project. If students elect this course more than once during their program, each such course must address a different topic.

MHA 596, Foundations of Healthcare Informatics, 3 Units
This course provides an overview of basic concepts for practice in healthcare-oriented informatics. These core concepts include an introduction to clinical and translational informatics; foundational theory and practical application of clinical decision-making and computerized decision support; healthcare systems and their organization; the special issues of administration, security, and operations of electronic records in the healthcare setting; human factors issues; information science in the healthcare domain; standards, terminologies, and the uniqueness of biomedical data; and a special focus on emerging technologies.

MHA 597, Capstone, 1 Unit
Students integrate prior learning through the formulation of a case report providing strategic direction to a healthcare organization. The completed strategic plan demonstrates integration of theoretical, clinical, and research knowledge from coursework throughout the program, and is applied to a healthcare problem in an actual healthcare setting: Students perform a SWOT analysis, a review and synthesis of current literature, select an appropriate theoretical framework, determine solutions to the problem, and develop an implementation plan. Students also create an electronic professional portfolio to highlight competencies gained throughout the program. Course success is dependent upon the candidate's ability to clearly identify a healthcare problem and develop an evidence-based solution. Participation in writing assignments is required for successful completion of this course. The responsibility for deep exploration of the chosen scenario and preparation for writing the case report rests with each candidate.

Prerequisite: All Academic Core and Administrative courses must be completed; MHA 580 may be taken concurrently.

MHA 599, Readings in Healthcare Administration, 1-3 Units
A student may elect to pursue special interests for credit at any time during the program under the supervision of a faculty member. University policy states that the student must earn a grade in an independent study course in order to receive credit toward graduation.

RNRS 221, Health Assessment, 3 Units
This course provides the nursing student with skills in physical and psychosocial assessment of adult clients. History-taking and physical examination techniques presented in the course help the student develop strong assessment skills upon which further knowledge and practice can be built.

RNRS 272, Professional Concepts in Nursing, 4 Units
This course is designed to provide an introduction to theories, concepts and roles that help define the profession of nursing. Utilization of the nursing process to provide safe care is analyzed. Concepts of informatics, group dynamics, conflict/management, and techniques to analyze and solve problems are examined. Evidence based nursing practice is introduced through instruction in Library/data base searches.

RNRS 298, Communication and Teamwork in Patient and Family Centered Care, 3 Units
This elective course is designed to simulate and enhance clinical experiences for the inexperienced graduate licensed RN entering the RN to BSN Accelerated Degree Program. Thirty-six hours of clinical experience will be completed in a healthcare setting with a preceptor. Concepts related to communication and teamwork are emphasized.

Prerequisite: Admission requirements for admission into the RN-BSN program apply
RNRS 299, Transition to Professional Practice, 3 Units
This is a bridge course designed to be taken by inexperienced licensed RNs who are admitted to the RN to BSN program. Completion of the course provides the new RN experience with effective decision making skills related to clinical judgment and performance in the clinical setting as well as ways to incorporate evidence based interventions in the practice setting. This course includes a clinical/simulation component with participation in an online post conference discussion board.
Prerequisite: RNRS 298

RNRS 307, Theoretical Frameworks in Nursing, 3 Units
The focus of this course is exploration and integration of theoretical models in stress, development and health care adaptation as applied to nursing practice. Through writing and experiential activities the students will express a knowledge of family assessment and analysis of the family unit utilizing a variety of theoretical models.

RNRS 321, Health Assessment, 5 Units
This course develops the nursing student's history taking and assessment skills across the life span. Analysis of health data and identification of risks, including genetics and genomics in specific groups, are emphasized. Culturally sensitive interventions and identification of health risk are discussed to reduce risk and promote health.

RNRS 327, Nursing Research and Statistics, 4 Units
This course introduces the steps in the nursing research process, with emphasis on principles and methods. Basic statistical concepts and methods of collecting, summarizing, presenting, and interpreting data for professional nurses are addressed. Current issues impacting nursing research are analyzed. Ethical considerations and rights of human subjects are explored.
Prerequisite: The RN-BSN program is designed with a specific course sequence determined by the School of Nursing. A progression schedule is reviewed by the student and advisor after program acceptance. Courses must be taken in the assigned sequence.

RNRS 358, Writing 3: Evidence-Based Practice in Nursing and Healthcare, 3 Units
The focus of this course is to integrate evidence-based clinical practice into the current healthcare systems. The student will review and evaluate the clinical and research literature for application to practice. The process of an integrative literature review and the development of writing skills specific to the discipline of nursing will be conducted. Select research designs frequently used in practice settings will be explored. Quality improvement strategies, methods and issues will be discussed and applied to practice. Meets the General Studies Writing Three requirement. Meets the General Education Requirement: Writing 3: Writing in the Disciplines.
Prerequisite: Writing 2. Current enrollment in the RN to BSN Program is required

RNRS 368, Pathophysiology, 5 Units
This course presents an introduction to alterations in health status across the life span and their applications to nursing practice. Major pathophysiologic concepts are explored using a body systems approach. Theories relating to etiology, pathogenesis, and clinical manifestations are used to study selected disease processes. Mechanisms causing alterations in cellular function and environment, maintenance of cellular tissue oxygenation, fluid and electrolyte balance, genetics processes, and neuroendocrine control of the body are included. Concepts from anatomy and physiology courses are considered prerequisite and provide the foundation for exploring human dysfunction.

RNRS 396, Professional Practice: Ethics, Issues, and Spirituality in Health Care, 6 Units
This course focuses on the examination and application of the religious, theological, philosophical, and cultural foundations of ethics in professional nursing practice. Participants develop knowledge and skills in ethical decision making that are theoretically sound, evidence based, holistic, and applicable to current healthcare issues. The course also addresses the expanding roles and responsibilities of professional nurses in meeting the healthcare needs of a dynamic society, with attention to the spiritual formation of nurses. Meets the General Education Requirement: UP Bible Requirement.
Prerequisite: The RN-BSN program is designed with a specific course sequence determined by the School of Nursing. A progression schedule is reviewed by the student and advisor after program acceptance. Courses must be taken in the assigned sequence.

RNRS 412, Spiritual Formation and the Profession of Nursing, 3 Units
This course guides students as they examine and articulate the Christian worldview, which can be applied personally and to the broader issues of society. This knowledge allows the students to develop and implement an integrated approach to nursing and the common good, and formulate responses to the worldview aspect of current professional and social issues.

RNRS 448, Leadership in Health Care Settings, 6 Units
This course presents concepts of organizational and systems leadership and management. Today's health care systems related to patient safety are addressed. The content examines inter-professional teamwork and collaboration, shared decision making, and major nursing roles. The quality improvement process is investigated as to its ability to continuously improve the quality & safety of the health care system. The relationship between the health care system's effectiveness and individual performance in securing patient safety and quality outcomes are identified. Integration of EBP with clinical practice and the role of Informatics to communicate, manage knowledge, mitigate error, and support decision making are developed. Health care policy, finance, and regulatory agency/environments are examined. Ninety hours of practicum are required to establish competency in this course.
Prerequisite: Enrollment in the RN to BSN Program
RNRS 449, Theory and Practice in Community Health Settings, 6 Units
This course has two areas of focus within the community setting: the study of principles and practices involved in community health nursing and the development of skills for teaching a group of clients. The emphasis is on the role of the nurse in assessing, planning, implementing, and evaluating care of clients in a variety of community-based settings. Collaborating with community-based organizations and services that provide health restoration, maintenance, illness prevention, and client education services to individuals, families, and aggregates are essential components of this course. A review of legal mandates and regulations, as well as discussion of ethical dilemmas and issues related to community-based care is included. A multiple theoretical focus that includes concepts from systems, stress, adaptation, development, and role theory is emphasized.

RNRS 458, Writing 3: Evidence-Based Practice, Theory, and Clinical Pathways, 5 Units
The focus of this course is exploration and integration of the evidence-based practice (EBP) process, including EBP implementation and critique of clinical pathways within individual organizations, and the role of informatics in health care and its importance in evidence-based practice. Theoretical nursing and nonnursing models are reviewed, with a focus on examining how theoretical principles are reflected in professional practice. Meets the General Education Requirement: Writing 3: Writing in the Disciplines.

RNRS 469, Improving Patient Outcomes: Quality, Safety, and Risk Management, 5 Units
The focus of this course is the implementation of quality and safety mechanisms into clinical practice to improve patient outcomes. Utilizing national standards for quality and safety in health care, students examine initiatives necessary to improve patient outcomes. Concepts of informatics, patient-centered care, leadership, inter- and intraprofessional teamwork, collaboration, and communication are addressed.

RNRS 479, Population Health and Public Health Nursing, 4 Units
This course focuses on population-based public health nursing practice. The assessment of systematic differences in outcomes across populations, including the complexity of interactions among health determinants (such as social environment, resource allocation, and biological pathways), provides the foundation for public health nursing practice. Exploration of how these determinants exert their influence over time and throughout the life cycle, with variations in their patterns of occurrence (including health inequities and inequalities), is central to the course. The role of the public health nurse in assessing and understanding health systems and the health status of a population is emphasized.
Corequisite: RNRS 482P

RNRS 480, Community Health and Care Transitions, 4 Units
This course builds on the concepts of population health and public health nursing and describes the interaction of the nurse and the client in the home and in the community. Given an assessment of a community’s priority health needs, students use course content to identify change-agent functions to promote and preserve health and to prevent disease and disability. All levels of prevention for the individual, family, and community system are addressed as community health nursing interventions. Course topics include the role of community health nursing in supporting care transitions across varied clinical and community settings, legal and regulatory considerations, and ethical issues related to community health.
Prerequisite: RNRS 479;
Corequisite: RNRS 482P

RNRS 482P, Clinical Practicum, 2 Units
This course is the clinical component to RNRS 479 Population Health and Public Health Nursing and RNRS 480 Community Health and Care Transitions. The focus of this course is on students implementing the systematic assessment of a community health population and creating an intervention that supports health promotion and disease prevention. Students develop a strategy for change, guided by epidemiological evidence and an understanding of the complex determinants of health, for implementation in collaboration with community resources and other health professionals. Meets the General Education Requirement: Integrative and Applied Learning.
Corequisites: RNRS 479 and RNRS 480

RNRS 495, Special Topics in Nursing, 1-4 Units
In this course, a topic of current interest to students is examined in depth. Students analyze and evaluate topics/issues to reach and express a position, enhance personal development and/or to develop a particular project. This course may be repeated for credit as the topic varies.

RNRS 497, Ethics and Issues in Health Care, 4 Units
This course focuses on the integration of Christian faith, ethical issues, and professional concerns, which confront nurses in their work life. It also includes consideration of issues and trends in health care and nursing. Integration of such concerns as providers of health care, education of the health care professional, and consumerism with ethical concerns are investigated. This course also contains a comprehensive paper written on a bioethical issue, which meets the senior writing requirement. Each week there is a discussion period around ethical concerns, which correlates to the material presented in class.

RNRS 499, Readings, 1-4 Units
This is a program of study concentrating on assigned readings, discussions, and writing arranged between and designed by a student of upper-division standing and a full-time professor. An independent study fee is assessed for each enrollment in this class.
UNRS 105, Foundations in Professional Nursing/Aging, 6 Units
Lecture 3 units; Clinical practicum 3 units (135 hours/semester) This course focuses on the nursing process and introductory concepts crucial to professional nursing care, including interviewing, wellness, health promotion, and illness prevention. The clinical practicum includes application of concepts and acquisition of nursing knowledge and skills needed to provide healthcare to the healthy aging and hospitalized adult and aging client utilizing the nursing process to plan care based on human needs, problems of immobility, and pain.
Special Fee Applies
Prerequisite: Acceptance into the Nursing Program.
Corequisite: UNRS 105P (Practicum)

UNRS 105P, Foundations in Professional Nursing - Practicum, 0 Units
UNRS 105 Clinical Practicum
Corequisite: UNRS 105; Acceptance into the nursing program

UNRS 106, Foundations of Professional Nursing/Aging, 6 Units
This course focuses on the nursing process and introductory concepts crucial to professional nursing care, including interviewing, wellness, health promotion, and illness prevention. The clinical practicum includes application of concepts and acquisition of nursing knowledge and skills needed to provide health care to the healthy aging and hospitalized adults and aging, utilizing the nursing process to plan care based on human needs, problems of immobility, and pain.
Corequisite: UNRS 106P

UNRS 106P, Foundations of Professional Nursing/Aging Practicum, 0 Units
UNRS 106 Clinical Practicum
Corequisite: UNRS 106

UNRS 107, Foundations of Professional Nursing, 4 Units
This course focuses on the nursing process and introductory concepts crucial to professional nursing care, including interviewing, wellness, health promotion, and illness prevention. The clinical practicum includes application of concepts and acquisition of nursing knowledge and skills utilizing the nursing process to plan and provide care based on human needs, problems of immobility, and pain.
Corequisite: UNRS 107P

UNRS 107P, Foundations of Professional Nursing Practicum, 0 Units
This is the Practicum component of the Foundations of Professional Nursing course.
Corequisite: UNRS 107

UNRS 108, Fundamentals in Nursing Practice, 2 Units
This is an experiential learning course designed to teach basic nursing skills in a clinical skills or simulation laboratory setting to prepare students to deliver safe and patient-focused nursing care. Utilizing the nursing process, students perform basic skills in assessment, patient care across the admission-discharge continuum, documentation, patient-family teaching, and infection control.

UNRS 113, Pharmacology, 2 Units
Lecture, 2 units This course is designed for students who have completed organic chemistry, inorganic chemistry, and biochemistry. The content focuses on principles of pharmacology and specifics of the major drug classifications.
Prerequisite: Acceptance into the nursing program

UNRS 120, Fundamentals of Human Nutrition, 3 Units
This lecture course focuses on principles of human nutrition, including nutrient functions, metabolism, and changing needs across the life span. Students also explore nutrient deficiency and toxicity signs and symptoms, along with implications of a poor diet on the development of chronic disease. Various nutrient analysis methods are used.

UNRS 212, Nursing Care of Adults and the Aging, 6 Units
This course involves application of biological, psychosocial, and spiritual concepts to adult and aging clients experiencing the stress of an acute or chronic alteration in physical health within the medical surgical setting. The nursing process is utilized to provide care to one or two clients within the healthcare delivery system of an acute hospital, skilled nursing facility, or transitional care unit, and extending to the community. Lecture: 3 units; clinical practicum: 3 units (135 hours/semester).
Special Fee Applies
Acceptance into the nursing program; corequisite: UNRS 212P.

UNRS 212P, Nursing Care Of Adults/Aging Practicum, 0 Units
UNRS 212 Clinical Practicum
Corequisite: UNRS 212
UNRS 220, Health Assessment, 3 Units
Lecture, 2 units; Laboratory, 1 unit (45 hours): This course provides the nursing student with skills in physical, spiritual, and psychosocial assessment of adult clients. History-taking and physical-examination techniques presented in the course help the student develop strong assessment skills upon which further knowledge and practice can be built. Basic concepts related to assessment of geriatric, pediatric, and childbearing patients are included. RNs take this course in the summer.
Special Fee Applies
Corequisite: UNRS 220L; Must be accepted into the Nursing Program.

UNRS 240, Medical Spanish, 2 Units
This medical Spanish class is designed especially for nursing. Practical Spanish communication in real-life medical situations for beginners is emphasized. Pronunciation, intonation, and structure of Spanish within a framework designed to develop basic listening, speaking, reading and writing skills will be taught. Special cultural presentations supplement language study.

UNRS 260, Nutrition, 2 Units
Students in this lecture course explore the foundations of nutrition in the prevention of chronic disease. Course material covers the pathophysiology of various disease states and appropriate medical nutrition therapy, as well as nursing’s role in nutrition assessment with respect to patient weight change, intake adequacy, gastrointestinal symptoms affecting nutrient absorption, and activities of daily living. Students perform dietary recalls, nutrient analyses, and anthropometric assessments, and learn about evidence-based nutrition care for gastrointestinal diseases, cardiovascular diseases, diabetes, metabolic syndrome, energy balance and weight control, bone disease, and renal disease. Through case studies, students learn about alternate feeding methods and issues surrounding drug/nutrient interactions. Students also have opportunities to educate the community through presentations on the prevention of disease through nutrition.
Prerequisite: CHEM 123 or PRCH 123 or department approval if a non-nursing major

UNRS 270, Professional Concepts in Nursing, 3 Units
This course provides an introduction to the theories and concepts of professional nursing. The nursing process is presented and utilized as the basis for planning quality and safe patient care in various healthcare settings. Current issues and trends in nursing are discussed, the role of nursing in the health care delivery system, and concepts of evidence-based practice, informatics, group dynamics, conflict/management, and techniques to analyze and solve problems are examined.
Prerequisite: Acceptance into the nursing program

UNRS 271, Theories and Concepts in Professional Nursing, 2 Units
This course provides an introduction to the theories and concepts of professional nursing. The nursing process is presented and utilized as the basis for planning care as applied to patients. The content also includes discussion of current issues and trends in nursing and compilation of a professional portfolio.
Prerequisite: Acceptance into the nursing program

UNRS 280, Life Cycle Nutrition, 3 Units
This lecture course examines nutrient needs of individuals throughout various life stages: preconception, pregnancy, lactation, infancy, preschool years, middle childhood, pre-adolescence, adolescence, adulthood, and late adulthood. Students learn the changing nutrient requirements through the life cycle and apply this knowledge through special topic presentations and in the development of teaching tools that can be used for public education audiences. This is a service-learning course.
Prerequisite: BIOL 101, CHEM 123, PSYC 290, and UNRS 120

UNRS 281, Introduction to Global Health Care, 1 Unit
This course uses a seminar or online format to introduce students to major aspects of the global healthcare experience, such as developing an understanding of the expectations and responsibilities related to international travel, an appreciation of other cultures, their integration into another culture, their in-country experience, and their re-entry into their home country.

UNRS 282, Transcultural Health Care: Country Specific, 2-4 Units
Students in this course participate in a short-term study-away nursing experience in order to begin understanding theoretically based transcultural healthcare practices. A seminar format is utilized to stimulate discussion regarding health-related issues specific to the geographical area of study and to assist students in the formulation of personal perspectives and individual cultural values that promote high-quality professional nursing practice worldwide. Students participate as members of a healthcare team in a variety of nursing-specific learning opportunities. Lecture, 1 unit; clinical practicum, 1-3 units (45-135 hours/semester).
Special Fee Applies

UNRS 282P, Transcultural Health Care: Country Specific- Practicum, 0 Units
UNRS 282 Clinical Practicum
Prerequisite: UNRS 105, UNRS 113, UNRS 220; Corequisite UNRS 282
UNRS 105, UNRS 113, UNRS 220; Corequisite UNRS 282
UNRS 299, Statistics and Data Management for Nursing and Health Care, 3 Units
This course covers basic statistical concepts and methods of collecting, summarizing, presenting, and interpreting data for professional nurses and students pursuing healthcare professions. Among the topics covered are graphing, measures of central tendency and variability, the normal curve, hypothesis testing, correlation and regression, and topics in probability that can be applied in real-world situations. **Meets the General Education Requirement: Quantitative Literacy (Math).**
**Prerequisite:** MATH 95 or an appropriate score on the APU mathematics proficiency exam or SAT Math score of 540 or ACT Math score of 23. Admission to the School of Nursing, or Pre-Admitted Nursing status and admission to the Honors College.

UNRS 300, Complementary and Alternative Therapies: Herbs, Supplements, and Nutrition, 3 Units
This course provides an introduction to therapies currently used as complements to Western medicine. Emphasis is on naturopathic medicine and biologically based therapies such as foods, special diets, herbal remedies, and dietary supplements. The course reviews potential risks and interactions between conventional and complementary and alternative therapies. The course examines agencies devoted to informing and protecting consumers and health care practitioners.
**Prerequisite:** BIOL 101 or BIOL 151, and CHEM 123. Instructor permission required if non-nursing major.

UNRS 306, Writing 2: Theoretical Frameworks in Nursing, 3 Units
Students in this course learn to utilize a variety of genres of scientific writing while exploring, integrating, and applying theoretical models of stress, development, and health care adaptation to nursing practice. Students examine writing samples from various methodological perspectives and practice a variety of writing styles and forms of argument considered persuasive in the sciences. They also develop basic proficiency in the use of APA style.
**Meets the General Education Requirement: Writing 2: Genre, Evidence, and Persuasion.**
**Prerequisite:** C- or better in PRWR 110; acceptance into the nursing program.

UNRS 310, Mental Health Nursing, 4 Units
Lecture 2 units, Clinical practicum 2 units (90 hours); This theoretical and clinical course focuses on the dynamics of psychosocial stress within the interpersonal and intrapersonal systems of patients with acute and chronic psychiatric disorders. Short-term evaluation and treatment experiences are offered utilizing milieu, individual, group, and family therapy.
**Special Fee Applies**
**Corequisite:** UNRS 310P; Must be accepted into the Nursing Program

UNRS 310P, Mental Health Nursing Practicum, 0 Units
UNRS 310 Clinical Practicum
**Prerequisite:** Co-Requisite: UNRS 310

UNRS 312, Nursing Management of Adults, 3 Units
Lecture, 1 unit; Clinical practicum, 2 units (90 hours/semester); This course continues the application of biological, psychosocial, and spiritual concepts to adult and aging clients experiencing the stress of an acute or chronic alteration in physical health within the medical-surgical setting. Emphasis is on the application of concepts of pathophysiology and pharmacology to the nursing management of acute and chronically ill patients in the medical-surgical setting.
**Special Fee Applies**
**Corequisites:** UNRS 312, UNRS 312P and UNRS 313; Must be accepted into the Nursing Program

UNRS 312P, Nursing Management of Adults Practicum, 0 Units
UNRS 312 Clinical Practicum
**Corequisites:** UNRS 312, UNRS 312P and UNRS 313

UNRS 314, Nursing Management and Restorative Care of Adults, 6 Units
This course builds on prior knowledge of biological, psychosocial, and spiritual concepts to help adult and aging clients experiencing the stress of an acute or chronic alteration in physical health. Emphasis is on the application of concepts of pathophysiology and pharmacology to the nursing management of acute and chronically ill patients in medical-surgical and rehabilitative or restorative settings.
**Corequisite:** UNRS 314P
UNRS 314P, Nursing Management and Restorative Care of Adults Practicum, 0 Units
UNRS 314 Clinical Practicum
Corequisite: UNRS 314

UNRS 320, Cultural Aspects of Food and Nutrition, 3 Units
Students in this course examine the foodways of people around the world, exploring the health benefits and practices of various cultures, along with how the industrialization of food influences nutrition content and pricing of food. Course material also covers the effects of famine on life expectancy and how one's environment or living situation limits access to food. A food lab is included, giving students an opportunity to prepare, taste, and realize a country's particular etiquette practices when dining. Course requires field trips. This is a service-learning course.
Prerequisite: UNRS 120, SOC 358, GLBL 201; GLBL 260 or COMM 260

UNRS 367, Pathophysiology, 3 Units
Lecture, 3 hours: This course presents an introduction to human pathophysiology. Mechanisms causing alterations in cellular activity, maintenance of cellular tissue oxygenation, fluid and electrolyte balance, and neuroendocrine control of the body are included. Common pathophysiologic disorders are emphasized.
Prerequisite: Acceptance into the nursing program

UNRS 382, Community Health Nursing, 3 Units
This course focuses on the study of principles and practices involved in community health nursing, with emphasis on the role of the nurse in assessing, planning, implementing, and evaluating care of clients in a variety of community-based settings. Collaboration with community-based organizations and services that provide health promotion, disease prevention, maintenance during chronic illness, and client education services to individuals, families, and aggregates is an essential component of this course. A review of legal mandates and regulations specific to community-based care, analysis of the healthcare needs within a community, and exploration of issues such as liberty, equality, terrorism, crisis, and disasters are included. Lecture, 1 unit (1 hour/week); clinical practicum, 2 units (90 hours/semester). Meets the General Education Requirement: Civic Knowledge and Engagement.
Special Fee Applies
Prerequisite: Acceptance into the Nursing Program;
Corequisite: UNRS 382P

UNRS 382P, Community Health Nursing Practicum, 0 Units
UNRS 382 Clinical Practicum
Corequisite: UNRS 382

UNRS 383, International Health Nursing, 3-5 Units
This course focuses on clinical observation of and participation in international healthcare settings, using a cross-cultural educational experience to give students a global perspective of healthcare issues. Students develop intercultural competence as they engage with people from diverse cultures with compassion and respect, and foster a commitment to global service, scholarship, and boundary-crossing community. Lecture, 1 unit; clinical practicum, 2-4 units. Meets the General Education Requirement: Intercultural Competence.
Special Fee Applies
Acceptance into the nursing program; corequisite: UNRS 383P.

UNRS 383P, International Health Nursing Practicum, 0 Units
Lecture 1 Unit - Clinical Practicum 2-4 units: This course focuses on clinical observation and participation in international health care settings. The purpose is to broaden the student's worldview through a cross-cultural educational experience and to provide a global perspective of healthcare issues. In addition, it will provide opportunities to develop intercultural competence and foster a commitment to global service, scholarship, and boundary-crossing community.
Prerequisite: Acceptance into the nursing program

UNRS 384, Urban/Rural Health Nursing, 3-5 Units
This course focuses on clinical observation of and participation in urban/rural healthcare settings, using a cross-cultural educational experience to give students a broader perspective of healthcare issues. Students develop intercultural competence as they engage with people from diverse cultures with compassion and respect, and foster a commitment to service, scholarship, and boundary-crossing community in vulnerable urban/rural populations.
Lecture, 1 unit; clinical practicum, 2-4 units. Meets the General Education Requirement: Intercultural Competence.
Acceptance into the nursing program; corequisite: UNRS 384P.

UNRS 384P, Urban Health Nursing Practicum, 0 Units
Lecture 1 Unit - Clinical Practicum 2-4 units: This course focuses on clinical observation and participation in urban health care settings. The purpose is to broaden the student's worldview through a cross-cultural educational experience and to provide a global perspective of healthcare issues. In addition, it will provide opportunities to develop intercultural competence and will foster a commitment to service, scholarship, and boundary-crossing community in vulnerable urban populations.
Prerequisite: Acceptance into the nursing program
UNRS 386, Population and Community Health Nursing, 6 Units
This course focuses on population-based public health and community health nursing practice. The purpose is to broaden the student's worldview through a cross-cultural educational experience and gain a more global perspective of complex health care issues through civic engagement and collaboration with various clinical settings, community-based and global health care organizations that provide health promotion, disease prevention, maintenance, and support care transitions during chronic illness. All levels of prevention for the individual, family, and community systems are addressed through population-based public health and community health nursing assessment, evaluation, and interventions including client education services to individuals, families and aggregates from diverse cultures. Meets the General Education Requirement: Intercultural Competence, Civic Knowledge and Engagement.
Special Fee Applies
Corequisites: UNRS 386P

UNRS 386P, Population and Community Health Nursing Practicum, 0 Units
This course focuses on population-based public health and community health nursing practice. The purpose is to broaden the student's worldview through a cross-cultural educational experience and gain a more global perspective of complex health care issues through civic engagement and collaboration with various clinical settings, community-based and global health care organizations that provide health promotion, disease prevention, maintenance, and support care transitions during chronic illness. All levels of prevention for the individual, family, and community systems are addressed through population-based public health and community health nursing assessment, evaluation, and interventions including client education services to individuals, families and aggregates from diverse cultures.
Corequisites: UNRS 386

UNRS 402, Nursing Care in Maternal, Newborn, and Women’s Health, 4 Units
Lecture, 2 units; Clinical practicum, 2 units (90 hours/semester): This course focuses on the theoretical and clinical concepts of the childbearing patient, her infant, and her family. The students study both normal and complicated obstetrics. Birth preparation, prenatal care, intrapartal, normal neonatal, and postpartum care with concurrent clinical experiences are introduced.
Special Fee Applies
Corequisite: UNRS 402P; Must be accepted into the Nursing Program.

UNRS 402P, Nursing Care in Maternal, Newborn, and Women’s Health Practicum, 0 Units

UNRS 403, Leadership and Management in Professional Practice, 2 Units
Theory, 2 hours. This course emphasizes leadership and management theory in a number of applications and health care settings. It assists the upcoming graduate in adjusting to various organizations encountered by professional nurses serving in a variety of roles. Core concepts relevant to the health care settings are presented with an emphasis on critical thinking, character development and leadership competencies, quality outcomes, and safety goal achievement for optimal patient care.
Prerequisite: Acceptance into the Nursing Program. Note: Per the progression schedule for the Traditional BSN program students, UNRS403 is taken in the same semester as UNRS404/404P and UNRS402/402P.

UNRS 404, Nursing Care of Children and Young Adults, 4 Units
Lecture, 2 units; Clinical practicum, 2 units (90 hours/semester): This theoretical and clinical course focuses on the care of children from birth through adolescence. The effects of acute and chronic illness on growth and development are studied in the acute and community health care setting. Education of the child and family on health promotion, disease prevention, and safety issues are addressed. Ethical issues are discussed regarding the relationship of the child and family, including issues such as child abuse, informed consent, and the impact of diverse cultural and spiritual beliefs on health care decisions in the family.
Special Fee Applies
Corequisites: UNRS404P; Must be accepted into the Nursing Program. Note: Per the progression schedule for the Traditional BSN program students, UNRS403 is taken in the same semester as UNRS404/404P and UNRS402/402P.

UNRS 404P, Nursing Care of Children and Young Adults Practicum, 0 Units

UNRS 411, Advanced Nursing Care of Adults and the Aging, 5 Units
This course involves the application of pathophysiological, psychosocial, and spiritual concepts to adult and geriatric clients experiencing the stress of illness in acute settings. The area of focus is caring for critically ill clients and their families with complex health needs in a critical-care setting. Legal and ethical issues related to acute care are included. Lecture, 2 units; clinical practicum, 3 units (135 hours/semester).
Special Fee Applies
Corequisite: UNRS 411P
UNRS 411P, Advanced Nursing Care of Adults & Aging - Practicum, 0 Units

UNRS 412, Clinical Residency Nursing, 2 Units
This clinical residency is an experiential component designed as a collaborative partnership between the School of Nursing and selected healthcare settings. This residency is planned to ease the role transition from a student nurse to a beginning professional nurse. In addition, it enhances the skill and practice knowledge of the student in preparation for the NCLEX-RN examination. Clinical practicum, 90 hours/semester. Meets the General Education Requirement: Integrative and Applied Learning.
Corequisites: UNRS 411 and UNRS 411P

UNRS 414, Advanced Nursing Care of Adults, 6 Units
This course involves the application of pathophysiological, psychosocial and spiritual concepts to adult and geriatric clients experiencing the stress of acute illness. The primary focus is on caring for and managing care of critically ill clients and their families with complex health needs in a critical care setting. Throughout the semester, students prepare for transition to practice as they become more independent and proficient in communicating with and leading the healthcare team. Meets the General Education Requirement: Integrative and Applied Learning.
Corequisite: UNRS 414P

UNRS 414P, Advanced Nursing Care of Adults Clinical Practicum, 0 Units
This course is the Clinical Practicum component of the Advanced Nursing Care of Adults course.
Corequisite: UNRS 414

UNRS 425, Nursing Research, 3 Units
Lecture, 3 units: This course introduces the steps in the research process. Emphasis is placed on the principles and methods of the research process, including how this process contributes to the development of nursing knowledge and the improvement of nursing practice. This historical evolution of nursing research is examined and current issues impacting nursing research are analyzed. Ethical considerations and rights of human subjects are explored. Students have the opportunity to evaluate selected nursing studies throughout the semester in small groups with faculty input and guidance. Prerequisite: UNRS 299; Must be accepted into the Nursing Program.

UNRS 436, Fundamentals of Case Management, 3 Units
Theory, 2 units; Practicum, 1 unit: This is an introductory course for senior-level students covering the principles of case management, roles and responsibilities of the case manager, case management tools, plans and methods, issues (including legal ones), and how case management improves patient and hospital outcomes. It is designed to give an overview of what case management is and how a nurse can utilize these tools and skills to advance clinical practices. It is an elective course. Special Fee Applies. Prerequisite: Acceptance into the Nursing Program. Corequisite: UNRS 436P (Practicum)

UNRS 436P, Fund of Case Mgmt Practicum, 0 Units

UNRS 444, Clinical Specialization Elective, 1-2 Units
This is a clinical specialty course involving a collaborative partnership with selected community healthcare organizations, an intensive preceptored experience that eases the role transition from student nurse to beginning professional nurse in a specialized setting. This course also enhances the skill and practice knowledge of students in preparation for the RN licensing examination. Prerequisite: One of the following: UNRS 310 (for mental health nursing), UNRS 382 (for community health), UNRS 402 (for obstetrics), or UNRS 404 (for pediatrics). If taken for two units, instructor consent is required. Corequisite: UNRS 411

UNRS 445, Applied Pharmacology, 2 Units
This course enhances students' ability to apply knowledge acquired in the basic pharmacology course by helping them utilize critical thinking skills at a more advanced level. Emphasis is on the application of pharmacokinetics, pharmacodynamics, and pharmacotherapeutics of major drug categories used to manage common patient disorders across the life span in clinical nursing practice. Prerequisite: Acceptance into the nursing program

UNRS 495, Special Topics in Nursing, 1-4 Units
In this course, a topic of current interest to students is examined in depth. Students analyze and evaluate topics/issues to reach and express a position, enhance personal development, and/or to develop a particular project. May be repeated for credit as the topic varies. Prerequisite: Acceptance into the nursing program
UNRS 496, Writing 3: Ethics and Issues in Health Care, 4 Units
This course focuses on the integration of Christian faith, ethical concerns, and issues and trends in health care that nurses encounter in their work life. Students develop their abilities as independent thinkers in order to construct bodies of knowledge, and communicate what they are learning through reading, dialogue, debate, peer critique, presentations, and the development and refinement of written pieces. The capstone project for this course is a comprehensive research paper and formal presentation demonstrating scholarship and readiness to contribute to the nursing profession. **Meets the General Education Requirement: Writing 3: Writing in the Disciplines.**

Special Fee Applies
**Prerequisite:** Senior standing in the School of Nursing; UNRS 306

UNRS 497, Readings, 1-4 Units
This is a program of study concentrating on assigned readings, discussions, and writing arranged between and designed by a student of upper-division standing and a full-time professor. An independent study fee is assessed for each enrollment in this class.

UNRS 498, Directed Research, 1-4 Units
This course provides instruction in research design and technique, and gives students experience in the research process. The 1-unit expectation encompasses no fewer than 30 hours of work with accompanying reading, log, writing, and seminar presentation within the department or in a university research symposium. No more than 1 unit may be used to fulfill preparatory readings requirement. An independent study fee is assessed for each enrollment in this class.

**Prerequisite:** Junior or Senior Standing

UNRS 499, Thesis/Project, 1-4 Units
This is a senior-level "capstone" type of independent study/research experience, involving the student in a unique project with a sophisticated level of research, synthesis, analysis, and communication. The 1-unit expectation encompasses no fewer than 30 hours of work with accompanying readings, log, instructor discussions, and writing of summary analysis and conclusions. The thesis or project may result in formal thesis, published article, or electronic media. No more than 1 unit may be used to fulfill preparatory readings requirement. An independent study fee is assessed for each enrollment in this class.

**Prerequisite:** Upper-division writing intensive course or instructor consent; and junior or senior standing

Faculty

Interim Dean
Renee Pozza (http://www.apu.edu/faculty/rpozza/), PhD, RN, CNS, FNP-BC, FAASLD

Baccalaureate Nursing Programs

The School of Nursing baccalaureate programs are accredited by the Commission on Collegiate Nursing Education (https://www.aacnnursing.org/CCNE/) and approved by the California Board of Registered Nursing (https://www.rn.ca.gov/). The prelicensure programs enable students to apply to take the California Board of Registered Nursing examination for RN licensure, and graduates are eligible to apply for a California Public Health Nurse (PHN) certificate. The School of Nursing also offers options for the registered nurse (RN) and the licensed vocational nurse (LVN) leading to a Bachelor of Science in Nursing.

General Education Note: Nursing majors are not required to take health education as part of their General Education requirements (p. 1063).

Program Options

The School of Nursing offers:

1. Traditional Bachelor of Science in Nursing (BSN) (p. 879)
2. Bachelor of Science in Nursing (BSN) Upper-Division Transfer Program (p. 876)
3. Licensed Vocational Nurse (LVN) to Bachelor of Science in Nursing (BSN) (p. 876)
4. Licensed Vocational Nurse (LVN) to Registered Nurse (RN) (p. 876)
5. Registered Nurse (RN) to Bachelor of Science in Nursing (BSN) Degree Completion Program (p. 873)

NOTE: Students are encouraged to consult with their advisor if they have questions regarding coursework needed to meet graduation requirements.

1 Once accepted into an option, students must remain in that option for the duration of the program.

Admission to the Bachelor of Science in Nursing (BSN) Programs

Admission to the university does not guarantee admission into the School of Nursing. Students interested in admission into a School of Nursing BSN program must indicate their desire on their application to the university. Students applying to the traditional BSN program should apply through the Office of Undergraduate Admissions (https://www.apu.edu/undergraduate-admissions/); students applying to the BSN Upper-Division Transfer Program (BSN Transfer and LVN options) or the RN to BSN program should apply through the Office of Graduate and Professional Admissions (https://www.apu.edu/graduateprofessionalcenter/admissions/).

Applicants will be reviewed by a School of Nursing Admissions Committee for possible admission into the university as well as one of the BSN programs: the traditional program, the BSN Upper-Division Transfer Program (BSN Transfer and LVN options), or the RN to BSN program.

Determinations will be made and two separate letters will be sent to applicants indicating 1) whether they have been accepted into the university and 2) whether they have been accepted into one of the BSN programs. Once accepted into a program, students must remain in that program for the duration of the nursing program.
Applicants who are not accepted into one of the BSN programs may still be admitted to the university. These applicants may consider coursework in preparation for application to the Entry-Level Master of Science in Nursing (ELM) program (p. 903), designed for students who have completed a baccalaureate degree in another major but are interested in pursuing a career in nursing.

The School of Nursing reserves the right to change the curriculum and degree requirements as deemed necessary. Refer to the School of Nursing Handbook, which includes program-specific guidelines and detailed descriptions of course and program requirements.

Program Learning Outcomes

Students who successfully complete this program shall be able to:
1. Utilize a Christian worldview to integrate beliefs, values, ethics, and service in personal and professional life.
2. Provide nursing care utilizing professional knowledge and core competencies (critical thinking, communication, assessment, and technical skills) derived from a foundation of nursing science, General Education, and religious studies.
3. Demonstrate initiative for continual personal and professional growth and development.
4. Act as a patient educator and advocate to promote optimal health and well-being.
5. Function independently and collaboratively, as a leader and/or member of the healthcare team, to manage and coordinate care.

Courses

RNRS 221, Health Assessment, 3 Units
This course provides the nursing student with skills in physical and psychosocial assessment of adult clients. History-taking and physical examination techniques presented in the course help the student develop strong assessment skills upon which further knowledge and practice can be built.

RNRS 272, Professional Concepts in Nursing, 4 Units
This course is designed to provide an introduction to theories, concepts and roles that help define the profession of nursing. Utilization of the nursing process to provide safe care is analyzed. Concepts of informatics, group dynamics, conflict/management, and techniques to analyze and solve problems are examined. Evidence based nursing practice is introduced through instruction in Library/data base searches.

RNRS 298, Communication and Teamwork in Patient and Family Centered Care, 3 Units
This elective course is designed to simulate and enhance clinical experiences for the inexperienced graduate licensed RN entering the RN to BSN Accelerated Degree Program. Thirty-six hours of clinical experience will be completed in a healthcare setting with a preceptor. Concepts related to communication and teamwork are emphasized.

Prerequisite: Admission requirements for admission into the RN-BSN program apply

RNRS 299, Transition to Professional Practice, 3 Units
This is a bridge course designed to be taken by inexperienced licensed RNs who are admitted to the RN to BSN program. Completion of the course provides the new RN experience with effective decision making skills related to clinical judgment and performance in the clinical setting as well as ways to incorporate evidence based interventions in the practice setting. This course includes a clinical/simulation component with participation in an online post conference discussion board.

Prerequisite: RNRS 298

RNRS 307, Theoretical Frameworks in Nursing, 3 Units
The focus of this course is exploration and integration of theoretical models in stress, development and health care adaptation as applied to nursing practice. Through writing and experiential activities the students will express a knowledge of family assessment and analysis of the family unit utilizing a variety of theoretical models.

RNRS 321, Health Assessment, 5 Units
This course develops the nursing student's history taking and assessment skills across the life span. Analysis of health data and identification of risks, including genetics and genomics in specific groups, are emphasized. Culturally sensitive interventions and evidence-based practice are discussed to reduce risk and promote health.

RNRS 327, Nursing Research and Statistics, 4 Units
This course introduces the steps in the nursing research process, with emphasis on principles and methods. Basic statistical concepts and methods of collecting, summarizing, presenting, and interpreting data for professional nurses are addressed. Current issues impacting nursing research are analyzed. Ethical considerations and rights of human subjects are explored.

Prerequisite: The RN-BSN program is designed with a specific course sequence determined by the School of Nursing. A progression schedule is reviewed by the student and advisor after program acceptance. Courses must be taken in the assigned sequence.
RNRS 358, Writing 3: Evidence-Based Practice in Nursing and Healthcare, 3 Units
The focus of this course is to integrate evidence-based clinical practice into the current healthcare systems. The student will review and evaluate the clinical and research literature for application to practice. The process of an integrative literature review and the development of writing skills specific to the discipline of nursing will be conducted. Select research designs frequently used in practice settings will be explored. Quality improvement strategies, methods and issues will be discussed and applied to practice. Meets the General Studies Writing Three requirement.  
Prerequisite: Writing 2. Current enrollment in the RN to BSN Program is required

RNRS 368, Pathophysiology, 5 Units
This course presents an introduction to alterations in health status across the life span and their applications to nursing practice. Major pathophysiologic concepts are explored using a body systems approach. Theories relating to etiology, pathogenesis, and clinical manifestations are used to study selected disease processes. Mechanisms causing alterations in cellular function and environment, maintenance of cellular tissue oxygenation, fluid and electrolyte balance, genetics processes, and neuroendocrine control of the body are included. Concepts from anatomy and physiology courses are considered prerequisite and provide the foundation for exploring human dysfunction.

RNRS 396, Professional Practice: Ethics, Issues, and Spirituality in Health Care, 6 Units
This course focuses on the examination and application of the religious, theological, philosophical, and cultural foundations of ethics in professional nursing practice. Participants develop knowledge and skills in ethical decision making that are theoretically sound, evidence based, holistic, and applicable to current healthcare issues. The course also addresses the expanding roles and responsibilities of professional nurses in meeting the healthcare needs of a dynamic society, with attention to the spiritual formation of nurses. Meets the General Education Requirement: UP Bible Requirement.

RNRS 412, Spiritual Formation and the Profession of Nursing, 3 Units
This course guides students as they examine and articulate the Christian worldview, which can be applied personally and to the broader issues of society. This knowledge allows the students to develop and implement an integrated approach to nursing and the common good, and formulate responses to the worldview aspect of current professional and social issues.

RNRS 448, Leadership in Health Care Settings, 6 Units
This course presents concepts of organizational and systems leadership and management. Today's health care systems related to patient safety are addressed. The content examines inter-professional teamwork and collaboration, shared decision making, and major nursing roles. The quality improvement process is investigated as to its ability to continuously improve the quality & safety of the health care system. The relationship between the health care system's effectiveness and individual performance in securing patient safety and quality outcomes are identified. Integration of EBP with clinical practice and the role of Informatics to communicate, manage knowledge, mitigate error, and support decision making are developed. Health care policy, finance, and regulatory agency/environments are examined. Ninety hours of practicum are required to establish competency in this course.

RNRS 449, Theory and Practice in Community Health Settings, 6 Units
This course has two areas of focus within the community setting: the study of principles and practices involved in community health nursing and the development of skills for teaching a group of clients. The emphasis is on the role of the nurse in assessing, planning, implementing, and evaluating care of clients in a variety of community-based settings. Collaborating with community-based organizations and services that provide health restoration, maintenance, illness prevention, and client education services to individuals, families, and aggregates are essential components of this course. A review of legal mandates and regulations, as well as discussion of ethical dilemmas and issues related to community-based care in included. A multiple theoretical focus that includes concepts from systems, stress, adaptation, development, and role theory is emphasized.

RNRS 458, Writing 3: Evidence-Based Practice, Theory, and Clinical Pathways, 5 Units
The focus of this course is exploration and integration of the evidence-based practice (EBP) process, including EBP implementation and critique of clinical pathways within individual organizations, and the role of informatics in health care and its importance in evidence-based practice. Theoretical nursing and nonnursing models are reviewed, with a focus on examining how theoretical principles are reflected in professional practice. Meets the General Education Requirement: Writing 3: Writing in the Disciplines.

 RNRS 469, Improving Patient Outcomes: Quality, Safety, and Risk Management, 5 Units
The focus of this course is the implementation of quality and safety mechanisms into clinical practice to improve patient outcomes. Utilizing national standards for quality and safety in health care, students examine initiatives necessary to improve patient outcomes. Concepts of informatics, patient-centered care, leadership, inter- and intraprofessional teamwork, collaboration, and communication are addressed.
**RNRS 479, Population Health and Public Health Nursing, 4 Units**
This course focuses on population-based public health nursing practice. The assessment of systematic differences in outcomes across populations, including the complexity of interactions among health determinants (such as social environment, resource allocation, and biological pathways), provides the foundation for public health nursing practice. Exploration of how these determinants exert their influence over time and throughout the life cycle, with variations in their patterns of occurrence (including health inequities and inequalities), is central to the course. The role of the public health nurse in assessing and understanding health systems and the health status of a population is emphasized.
Corequisite: RNRS 482P

**RNRS 480, Community Health and Care Transitions, 4 Units**
This course builds on the concepts of population health and public health nursing and describes the interaction of the nurse and the client in the home and in the community. Given an assessment of a community’s priority health needs, students use course content to identify change-agent functions to promote and preserve health and to prevent disease and disability. All levels of prevention for the individual, family, and community system are addressed as community health nursing interventions. Course topics include the role of community health nursing in supporting care transitions across varied clinical and community settings, legal and regulatory considerations, and ethical issues related to community health.
Prerequisite: RNRS 479; Corequisite: RNRS 482P

**RNRS 482P, Clinical Practicum, 2 Units**
This course is the clinical component to RNRS 479 Population Health and Public Health Nursing and RNRS 480 Community Health and Care Transitions. The focus of this course is on students implementing the systematic assessment of a community health population and creating an intervention that supports health promotion and disease prevention. Students develop a strategy for change, guided by epidemiological evidence and an understanding of the complex determinants of health, for implementation in collaboration with community resources and other health professionals.
Corequisites: RNRS 479 and RNRS 480

**RNRS 495, Special Topics in Nursing, 1-4 Units**
In this course, a topic of current interest to students is examined in depth. Students analyze and evaluate topics/issues to reach and express a position, enhance personal development and/or to develop a particular project. This course may be repeated for credit as the topic varies.

**RNRS 497, Ethics and Issues in Health Care, 4 Units**
This course focuses on the integration of Christian faith, ethical issues, and professional concerns, which confront nurses in their work life. It also includes consideration of issues and trends in health care and nursing. Integration of such concerns as providers of health care, education of the health care professional, and consumerism with ethical concerns are investigated. This course also contains a comprehensive paper written on a bioethical issue, which meets the senior writing requirement. Each week there is a discussion period around ethical concerns, which correlates to the material presented in class.

**RNRS 499, Readings, 1-4 Units**
This is a program of study concentrating on assigned readings, discussions, and writing arranged between and designed by a student of upper-division standing and a full-time professor. An independent study fee is assessed for each enrollment in this class.

**UNRS 105, Foundations in Professional Nursing/Aging, 6 Units**
Lecture 3 units; Clinical practicum 3 units (135 hours/semester) This course focuses on the nursing process and introductory concepts crucial to professional nursing care, including interviewing, wellness, health promotion, and illness prevention. The clinical practicum includes application of concepts and acquisition of nursing knowledge and skills needed to provide healthcare to the healthy aging and hospitalized adult and aging client utilizing the nursing process to plan care based on human needs, problems of immobility, and pain.
Special Fee Applies
Prerequisite: Acceptance into the Nursing Program.
Corequisite: UNRS 105P (Practicum)

**UNRS 105P, Foundations in Professional Nursing - Practicum, 0 Units**
UNRS 105 Clinical Practicum
Corequisite: UNRS 105; Acceptance into the nursing program

**UNRS 106, Foundations of Professional Nursing/Aging, 6 Units**
This course focuses on the nursing process and introductory concepts crucial to professional nursing care, including interviewing, wellness, health promotion, and illness prevention. The clinical practicum includes application of concepts and acquisition of nursing knowledge and skills needed to provide health care to the healthy aging and hospitalized adults and aging, utilizing the nursing process to plan care based on human needs, problems of immobility, and pain.
Corequisite: UNRS 106P

**UNRS 106P, Foundations of Professional Nursing/Aging Practicum, 0 Units**
UNRS 106 Clinical Practicum
Corequisite: UNRS 106
UNRS 107, Foundations of Professional Nursing, 4 Units
This course focuses on the nursing process and introductory concepts crucial to professional nursing care, including interviewing, wellness, health promotion, and illness prevention. The clinical practicum includes application of concepts and acquisition of nursing knowledge and skills utilizing the nursing process to plan and provide care based on human needs, problems of immobility, and pain.
Corequisite: UNRS 107P

UNRS 107P, Foundations of Professional Nursing Practicum, 0 Units
This is the Practicum component of the Foundations of Professional Nursing course.
Corequisite: UNRS 107

UNRS 108, Fundamentals in Nursing Practice, 2 Units
This is an experiential learning course designed to teach basic nursing skills in a clinical skills or simulation laboratory setting to prepare students to deliver safe and patient-focused nursing care. Utilizing the nursing process, students perform basic skills in assessment, patient care across the admission-discharge continuum, documentation, patient-family teaching, and infection control.

UNRS 113, Pharmacology, 2 Units
Lecture, 2 units This course is designed for students who have completed organic chemistry, inorganic chemistry, and biochemistry. The content focuses on principles of pharmacology and specifics of the major drug classifications.
Prerequisite: Acceptance into the nursing program

UNRS 120, Fundamentals of Human Nutrition, 3 Units
This lecture course focuses on principles of human nutrition, including nutrient functions, metabolism, and changing needs across the life span. Students also explore nutrient deficiency and toxicity signs and symptoms, along with implications of a poor diet on the development of chronic disease. Various nutrient analysis methods are used.

UNRS 212, Nursing Care of Adults and the Aging, 6 Units
This course involves application of biological, psychosocial, and spiritual concepts to adult and aging clients experiencing the stress of an acute or chronic alteration in physical health within the medical surgical setting. The nursing process is utilized to provide care to one or two clients within the healthcare delivery system of an acute hospital, skilled nursing facility, or transitional care unit, and extending to the community. Lecture: 3 units; clinical practicum: 3 units (135 hours/semester).
Special Fee Applies
Acceptance into the nursing program; corequisite: UNRS 212P.

UNRS 212P, Nursing Care Of Adults/Aging Practicum, 0 Units
UNRS 212 Clinical Practicum
Corequisite: UNRS 212

UNRS 220, Health Assessment, 3 Units
Lecture, 2 units; Laboratory, 1 unit (45 hours): This course provides the nursing student with skills in physical, spiritual, and psychosocial assessment of adult clients. History-taking and physical-examination techniques presented in the course help the student develop strong assessment skills upon which further knowledge and practice can be built. Basic concepts related to assessment of geriatric, pediatric, and childbearing patients are included. RNs take this course in the summer.
Special Fee Applies
Corequisite: UNRS 220L; Must be accepted into the Nursing Program.

UNRS 240, Medical Spanish, 2 Units
This medical Spanish class is designed especially for nursing. Practical Spanish communication in real-life medical situations for beginners is emphasized. Pronunciation, intonation, and structure of Spanish within a framework designed to develop basic listening, speaking, reading and writing skills will be taught. Special cultural presentations supplement language study.

UNRS 260, Nutrition, 2 Units
Students in this lecture course explore the foundations of nutrition in the prevention of chronic disease. Course material covers the pathophysiology of various disease states and appropriate medical nutrition therapy, as well as nursing’s role in nutrition assessment with respect to patient weight change, intake adequacy, gastrointestinal symptoms affecting nutrient absorption, and activities of daily living. Students perform dietary recalls, nutrient analyses, and anthropometric assessments, and learn about evidence-based nutrition care for gastrointestinal diseases, cardiovascular diseases, diabetes, metabolic syndrome, energy balance and weight control, bone disease, and renal disease. Through case studies, students learn about alternate feeding methods and issues surrounding drug/nutrient interactions. Students also have opportunities to educate the community through presentations on the prevention of disease through nutrition.
Prerequisite: CHEM 123 or PRCH 123 or department approval if a non-nursing major
UNRS 270, Professional Concepts in Nursing, 3 Units
This course provides an introduction to the theories and concepts of professional nursing. The nursing process is presented and utilized as the basis for planning quality and safe patient care in various healthcare settings. Current issues and trends in nursing are discussed, the role of nursing in the health care delivery system, and concepts of evidence-based practice, informatics, group dynamics, conflict/management, and techniques to analyze and solve problems are examined.
Prerequisite: Acceptance into the nursing program

UNRS 271, Theories and Concepts in Professional Nursing, 2 Units
This course provides an introduction to the theories and concepts of professional nursing. The nursing process is presented and utilized as the basis for planning care as applied to patients. The content also includes discussion of current issues and trends in nursing and compilation of a professional portfolio.
Prerequisite: Acceptance into the nursing program

UNRS 280, Life Cycle Nutrition, 3 Units
This lecture course examines nutrient needs of individuals throughout various life stages: preconception, pregnancy, lactation, infancy, preschool years, middle childhood, pre-adolescence, adolescence, adulthood, and late adulthood. Students learn the changing nutrient requirements through the life cycle and apply this knowledge through special topic presentations and in the development of teaching tools that can be used for public education audiences. This is a service-learning course.
Prerequisite: BIOL 101, CHEM 123, PSYC 290, and UNRS 120

UNRS 281, Introduction to Global Health Care, 1 Unit
This course uses a seminar or online format to introduce students to major aspects of the global healthcare experience, such as developing an understanding of the expectations and responsibilities related to international travel, an appreciation of other cultures, their integration into another culture, their in-country experience, and their re-entry into their home country.

UNRS 282, Transcultural Health Care: Country Specific, 2-4 Units
Students in this course participate in a short-term study-away nursing experience in order to begin understanding theoretically based transcultural healthcare practices. A seminar format is utilized to stimulate discussion regarding health-related issues specific to the geographical area of study and to assist students in the formulation of personal perspectives and individual cultural values that promote high-quality professional nursing practice worldwide. Students participate as members of a healthcare team in a variety of nursing-specific learning opportunities. Lecture, 1 unit; clinical practicum, 1-3 units (45-135 hours/semester).
Special Fee Applies

UNRS 282P, Transcultural Health Care: Country Specific- Practicum, 0 Units
UNRS 282 Clinical Practicum
Prerequisite: UNRS 105, UNRS 113, UNRS 220; Corequisite UNRS 282
UNRS 105, UNRS 113, UNRS 220; Corequisite UNRS 282

UNRS 299, Statistics and Data Management for Nursing and Health Care, 3 Units
This course covers basic statistical concepts and methods of collecting, summarizing, presenting, and interpreting data for professional nurses and students pursuing healthcare professions. Among the topics covered are graphing, measures of central tendency and variability, the normal curve, hypothesis testing, correlation and regression, and topics in probability that can be applied in real-world situations. Meets the General Education Requirement: Quantitative Literacy (Math).
Prerequisite: MATH 95 or an appropriate score on the APU mathematics proficiency exam or SAT Math score of 540 or ACT Math score of 23. Admission to the School of Nursing, or Pre-Admitted Nursing status and admission to the Honors College.

UNRS 300, Complementary and Alternative Therapies: Herbs, Supplements, and Nutrition, 3 Units
This course provides an introduction to therapies currently used as complements to Western medicine. Emphasis is on naturopathic medicine and biologically based therapies such as foods, special diets, herbal remedies, and dietary supplements. The course reviews potential risks and interactions between conventional and complementary and alternative therapies. The course examines agencies devoted to informing and protecting consumers and health care practitioners.
Prerequisite: BIOL 101 or BIOL 151, and CHEM 123. Instructor permission required if non-nursing major.

UNRS 306, Writing 2: Theoretical Frameworks in Nursing, 3 Units
Students in this course learn to utilize a variety of genres of scientific writing while exploring, integrating, and applying theoretical models of stress, development, and health care adaptation to nursing practice. Students examine writing samples from various methodological perspectives and practice a variety of writing styles and forms of argument considered persuasive in the sciences. They also develop basic proficiency in the use of APA style.
Meets the General Education Requirement: Writing 2: Genre, Evidence, and Persuasion.
Prerequisite: C- or better in PRWR 110; acceptance into the nursing program.
UNRS 310, Mental Health Nursing, 4 Units
Lecture 2 units, Clinical practicum 2 units (90 hours); This theoretical and clinical course focuses on the dynamics of psychosocial stress within the interpersonal and intrapersonal systems of patients with acute and chronic psychiatric disorders. Short-term evaluation and treatment experiences are offered utilizing milieu, individual, group, and family therapy.
Special Fee Applies
Corequisite: UNRS 310P; Must be accepted into the Nursing Program

UNRS 310P, Mental Health Nursing Practicum, 0 Units
UNRS 310 Clinical Practicum

UNRS 312, Nursing Management of Adults, 3 Units
Lecture, 1 unit; Clinical practicum, 2 units (90 hours/semester): This course continues the application of biological, psychosocial, and spiritual concepts to adult and aging clients experiencing the stress of an acute or chronic alteration in physical health within the medical surgical setting. Emphasis is on the application of concepts of pathophysiology and pharmacology to the nursing management of acute and chronically ill patients in the medical-surgical setting.
Special Fee Applies
Corequisites: UNRS 312P, UNRS 313 and UNRS 313P; Must be accepted into the Nursing Program.

UNRS 312P, Nursing Management of Adults Practicum, 0 Units
UNRS 312 Clinical Practicum

UNRS 313, Restorative Nursing, 4 Units
Lecture 2 units; Clinical practicum 2 units (90 hours/semester); This course focuses on the care of an adult or geriatric client with a chronic health problem. The mental health and spiritual concepts are emphasized. Students are assigned to a rehabilitation or restorative setting.
Special Fee Applies
Corequisites: UNRS 312, UNRS 312P and UNRS 313P; Must be accepted into the Nursing Program

UNRS 313P, Restorative Nursing Practicum, 0 Units
UNRS 313 Clinical Practicum

UNRS 314, Nursing Management and Restorative Care of Adults, 6 Units
This course builds on prior knowledge of biological, psychosocial, and spiritual concepts to help adult and aging clients experiencing the stress of an acute or chronic alteration in physical health. Emphasis is on the application of concepts of pathophysiology and pharmacology to the nursing management of acute and chronically ill patients in medical-surgical and rehabilitative or restorative settings.
Corequisite: UNRS 314P

UNRS 314P, Nursing Management and Restorative Care of Adults Practicum, 0 Units
UNRS 314 Clinical Practicum

UNRS 320, Cultural Aspects of Food and Nutrition, 3 Units
Students in this course examine the foodways of people around the world, exploring the health benefits and practices of various cultures, along with how the industrialization of food influences nutrition content and pricing of food. Course material also covers the effects of famine on life expectancy and how one's environment or living situation limits access to food. A food lab is included, giving students an opportunity to prepare, taste, and realize a country's particular etiquette practices when dining. Course requires field trips. This is a service-learning course.
Prerequisite: UNRS 120, SOC 358, GLBL 201; GLBL 260 or COMM 260

UNRS 367, Pathophysiology, 3 Units
Lecture, 3 hours: This course presents an introduction to human pathophysiology. Mechanisms causing alterations in cellular activity, maintenance of cellular tissue oxygenation, fluid and electrolyte balance, and neuroendocrine control of the body are included. Common pathophysiologic disorders are emphasized.
Prerequisite: Acceptance into the nursing program
UNRS 382, Community Health Nursing, 3 Units
This course focuses on the study of principles and practices involved in community health nursing, with emphasis on the role of the nurse in assessing, planning, implementing, and evaluating care of clients in a variety of community-based settings. Collaboration with community-based organizations and services that provide health promotion, disease prevention, maintenance during chronic illness, and client education services to individuals, families, and aggregates is an essential component of this course. A review of legal mandates and regulations specific to community-based care, analysis of the healthcare needs within a community, and exploration of issues such as liberty, equality, terrorism, crisis, and disasters are included. Lecture, 1 unit (1 hour/week); clinical practicum, 2 units (90 hours/semester). Meets the General Education Requirement: Civic Knowledge and Engagement.
Special Fee Applies
Prerequisite: Acceptance into the Nursing Program;
Corequisite: UNRS 382P

UNRS 382P, Community Health Nursing Practicum, 0 Units
UNRS 382 Clinical Practicum

UNRS 383, International Health Nursing, 3-5 Units
This course focuses on clinical observation of and participation in international healthcare settings, using a cross-cultural educational experience to give students a global perspective of healthcare issues. Students develop intercultural competence as they engage with people from diverse cultures with compassion and respect, and foster a commitment to global service, scholarship, and boundary-crossing community. Lecture, 1 unit; clinical practicum, 2-4 units. Meets the General Education Requirement: Intercultural Competence.
Special Fee Applies
Acceptance into the nursing program; corequisite: UNRS 383P.

UNRS 383P, International Health Nursing Practicum, 0 Units
Lecture 1 Unit - Clinical Practicum 2-4 units: This course focuses on clinical observation and participation in international health care settings. The purpose is to broaden the student's worldview through a cross-cultural educational experience and to provide a global perspective of healthcare issues. In addition, it will provide opportunities to develop intercultural competence and foster a commitment to global service, scholarship, and boundary-crossing community.
Prerequisite: Acceptance into the nursing program

UNRS 384, Urban/Rural Health Nursing, 3-5 Units
This course focuses on clinical observation of and participation in urban/rural healthcare settings, using a cross-cultural educational experience to give students a broader perspective of healthcare issues. Students develop intercultural competence as they engage with people from diverse cultures with compassion and respect, and foster a commitment to service, scholarship, and boundary-crossing community in vulnerable urban/rural populations. Lecture, 1 unit; clinical practicum, 2-4 units. Meets the General Education Requirement: Intercultural Competence.
Acceptance into the nursing program; corequisite: UNRS 384P.

UNRS 384P, Urban Health Nursing Practicum, 0 Units
Lecture 1 Unit - Clinical Practicum 2-4 units: This course focuses on clinical observation and participation in urban health care settings. The purpose is to broaden the student's worldview through a cross-cultural educational experience and to provide a global perspective of healthcare issues. In addition, it will provide opportunities to develop intercultural competence and will foster a commitment to service, scholarship, and boundary-crossing community in vulnerable urban populations.
Prerequisite: Acceptance into the nursing program

UNRS 386, Population and Community Health Nursing, 6 Units
This course focuses on population-based public health and community health nursing practice. The purpose is to broaden the student's worldview through a cross-cultural educational experience and gain a more global perspective of complex health care issues through civic engagement and collaboration with various clinical settings, community-based and global health care organizations that provide health promotion, disease prevention, maintenance, and support care transitions during chronic illness. All levels of prevention for the individual, family, and community systems are addressed through population-based public health and community health nursing assessment, evaluation, and interventions including client education services to individuals, families and aggregates from diverse cultures. Meets the General Education Requirement: Intercultural Competence, Civic Knowledge and Engagement.
Special Fee Applies
Prerequisite: UNRS 386P
Corequisites: UNRS 386P

UNRS 386P, Population and Community Health Nursing Practicum, 0 Units
This course focuses on population-based public health and community health nursing practice. The purpose is to broaden the student's worldview through a cross-cultural educational experience and gain a more global perspective of complex health care issues through civic engagement and collaboration with various clinical settings, community-based and global health care organizations that provide health promotion, disease prevention, maintenance, and support care transitions during chronic illness. All levels of prevention for the individual, family, and community systems are addressed through population-based public health and community health nursing assessment, evaluation, and interventions including client education services to individuals, families and aggregates from diverse cultures.
Corequisites: UNRS 386
UNRS 402, Nursing Care in Maternal, Newborn, and Women’s Health, 4 Units
Lecture, 2 units; Clinical practicum, 2 units (90 hours/semester): This course focuses on the theoretical and clinical concepts of the childbearing patient, her infant, and her family. The students study both normal and complicated obstetrics. Birth preparation, prenatal care, intrapartal, normal neonatal, and postpartum care with concurrent clinical experiences are introduced.
Special Fee Applies
Corequisite: UNRS 402P; Must be accepted into the Nursing Program.

UNRS 402P, Nursing Care in Maternal, Newborn, and Women’s Health Practicum, 0 Units

UNRS 403, Leadership and Management in Professional Practice, 2 Units
Theory, 2 hours. This course emphasizes leadership and management theory in a number of applications and health care settings. It assists the upcoming graduate in adjusting to various organizations encountered by professional nurses serving in a variety of roles. Core concepts relevant to the health care settings are presented with an emphasis on critical thinking, character development and leadership competencies, quality outcomes, and safety goal achievement for optimal patient care.
Prerequisite: Acceptance into the Nursing Program. Note: Per the progression schedule for the Traditional BSN program students, UNRS403 is taken in the same semester as UNRS404/404P and UNRS402/402P.

UNRS 404, Nursing Care of Children and Young Adults, 4 Units
Lecture, 2 units; Clinical practicum, 2 units (90 hours/semester): This theoretical and clinical course focuses on the care of children from birth through adolescence. The effects of acute and chronic illness on growth and development are studied in the acute and community health care setting. Education of the child and family on health promotion, disease prevention, and safety issues are addressed. Ethical issues are discussed regarding the relationship of the child and family, including issues such as child abuse, informed consent, and the impact of diverse cultural and spiritual beliefs on health care decisions in the family.
Special Fee Applies
Corequisites: UNRS404P; Must be accepted into the Nursing Program. Note: Per the progression schedule for the Traditional BSN program students, UNRS403 is taken in the same semester as UNRS404/404P and UNRS402/402P.

UNRS 404P, Nursing Care of Children and Young Adults Practicum, 0 Units

UNRS 411, Advanced Nursing Care of Adults and the Aging, 5 Units
This course involves the application of pathophysiological, psychosocial, and spiritual concepts to adult and geriatric clients experiencing the stress of illness in acute settings. The area of focus is caring for critically ill clients and their families with complex health needs in a critical-care setting. Legal and ethical issues related to acute care are included. Lecture, 2 units; clinical practicum, 3 units (135 hours/semester).
Special Fee Applies
Corequisite: UNRS 411P

UNRS 411P, Advanced Nursing Care of Adults & Aging - Practicum, 0 Units

UNRS 412, Clinical Residency Nursing, 2 Units
This clinical residency is an experiential component designed as a collaborative partnership between the School of Nursing and selected healthcare settings. This residency is planned to ease the role transition from a student nurse to a beginning professional nurse. In addition, it enhances the skill and practice knowledge of the student in preparation for the NCLEX-RN examination. Clinical practicum, 90 hours/semester. Meets the General Education Requirement: Integrative and Applied Learning.
Corequisites: UNRS 411 and UNRS 411P

UNRS 414, Advanced Nursing Care of Adults, 6 Units
This course involves the application of pathophysiological, psychosocial and spiritual concepts to adult and geriatric clients experiencing the stress of acute illness. The primary focus is on caring for and managing care of critically ill clients and their families with complex health needs in a critical care setting. Throughout the semester, students prepare for transition to practice as they become more independent and proficient in communicating with and leading the healthcare team. Meets the General Education Requirement: Integrative and Applied Learning.
Corequisite: UNRS 414P

UNRS 414P, Advanced Nursing Care of Adults Clinical Practicum, 0 Units
This course is the Clinical Practicum component of the Advanced Nursing Care of Adults course.
Corequisite: UNRS 414

UNRS 425, Nursing Research, 3 Units
Lecture, 3 units: This course introduces the steps in the research process. Emphasis is placed on the principles and methods of the research process, including how this process contributes to the development of nursing knowledge and the improvement of nursing practice. This historical evolution of nursing research is examined and current issues impacting nursing research are analyzed. Ethical considerations and rights of human subjects are explored. Students have the opportunity to evaluate selected nursing studies throughout the semester in small groups with faculty input and guidance.
Prerequisite: UNRS 299; Must be accepted into the Nursing Program.
UNRS 436, Fundamentals of Case Management, 3 Units
Theory, 2 units; Practicum, 1 unit: This is an introductory course for senior-level students covering the principles of case management, roles and responsibilities of the case manager, case management tools, plans and methods, issues (including legal ones), and how case management improves patient and hospital outcomes. It is designed to give an overview of what case management is and how a nurse can utilize these tools and skills to advance clinical practices. It is an elective course.
Special Fee Applies
Prerequisite: Acceptance into the Nursing Program.
Corequisite: UNRS 436P (Practicum)

UNRS 436P, Fund of Case Mgmt Practicum, 0 Units

UNRS 444, Clinical Specialization Elective, 1-2 Units
This is a clinical specialty course involving a collaborative partnership with selected community healthcare organizations, an intensive preceptored experience that eases the role transition from student nurse to beginning professional nurse in a specialized setting. This course also enhances the skill and practice knowledge of students in preparation for the RN licensing examination.
Prerequisite: One of the following: UNRS 310 (for mental health nursing), UNRS 382 (for community health), UNRS 402 (for obstetrics), or UNRS 404 (for pediatrics). If taken for two units, instructor consent is required.
Corequisite: UNRS 411

UNRS 445, Applied Pharmacology, 2 Units
This course enhances students' ability to apply knowledge acquired in the basic pharmacology course by helping them utilize critical thinking skills at a more advanced level. Emphasis is on the application of pharmacokinetics, pharmacodynamics, and pharmacotherapeutics of major drug categories used to manage common patient disorders across the life span in clinical nursing practice.
Prerequisite: Acceptance into the nursing program

UNRS 495, Special Topics in Nursing, 1-4 Units
In this course, a topic of current interest to students is examined in depth. Students analyze and evaluate topics/issues to reach and express a position, enhance personal development, and/or to develop a particular project. May be repeated for credit as the topic varies.
Prerequisite: Acceptance into the nursing program

UNRS 496, Writing 3: Ethics and Issues in Health Care, 4 Units
This course focuses on the integration of Christian faith, ethical concerns, and issues and trends in health care that nurses encounter in their work life. Students develop their abilities as independent thinkers in order to construct bodies of knowledge, and communicate what they are learning through reading, dialogue, debate, peer critique, presentations, and the development and refinement of written pieces. The capstone project for this course is a comprehensive research paper and formal presentation demonstrating scholarship and readiness to contribute to the nursing profession. Meets the General Education Requirement: Writing 3: Writing in the Disciplines.
Special Fee Applies
Prerequisite: Senior standing in the School of Nursing; UNRS 306

UNRS 497, Readings, 1-4 Units
This is a program of study concentrating on assigned readings, discussions, and writing arranged between and designed by a student of upper-division standing and a full-time professor. An independent study fee is assessed for each enrollment in this class.

UNRS 498, Directed Research, 1-4 Units
This course provides instruction in research design and technique, and gives students experience in the research process. The 1-unit expectation encompasses no fewer than 30 hours of work with accompanying reading, log, writing, and seminar presentation within the department or in a university research symposium. No more than 1 unit may be used to fulfill preparatory readings requirement. An independent study fee is assessed for each enrollment in this class.
Prerequisite: Junior or Senior Standing

UNRS 499, Thesis/Project, 1-4 Units
This is a senior-level "capstone" type of independent study/research experience, involving the student in a unique project with a sophisticated level of research, synthesis, analysis, and communication. The 1-unit expectation encompasses no fewer than 30 hours of work with accompanying readings, log, instructor discussions, and writing of summary analysis and conclusions. The thesis or project may result in formal thesis, published article, or electronic media. No more than 1 unit may be used to fulfill preparatory readings requirement. An independent study fee is assessed for each enrollment in this class.
Prerequisite: Upper-division writing intensive course or instructor consent; and junior or senior standing
Department of RN to BSN

The RN to BSN (p. 874) degree completion program offers an alternative to the traditional method of pursuing a college nursing degree. The program is designed for adult learners who have an RN license or are enrolled in an accredited associate's degree in nursing (ADN) program and desire to complete a Bachelor of Science in Nursing (BSN). The program is a field-based modular design, delivered to cohort groups. Each student has an advisor who provides system guidance, directs special projects, and serves as mentor to individual learners.

Prospective students include registered nurses (RNs) working in hospitals and other areas of health care, as well as students enrolled in accredited ADN programs at community colleges.

The Bridge to BSN (https://www.apu.edu/nursing/programs/bridge-to-bsn/) option is designed for ADN students enrolled at a community college who wish to get an early start on coursework for the Bachelor of Science in Nursing (BSN) degree. BSN coursework is offered during summer sessions. After completion of their ADN program, students will complete remaining coursework to obtain their BSN from Azusa Pacific University. Admission requirements for the RN to BSN program must be met and the RN license obtained prior to taking upper-division clinical courses.

The RN to BSN Integrative Enrollment Pathway (p. 875) option is a BSN completion program offered only with select contracted community college ADN programs. Students who are formally admitted into ADN programs may apply for this BSN completion program in which they will start coursework as an APU student in semester one of their ADN program, taking courses concurrently with APU and the community college ADN program. This accelerated program allows students to complete the ADN from their community college and complete the BSN degree within two semesters of graduation from the ADN program.

The accelerated RN to BSN program is based on the same philosophy, purposes, graduate characteristics, and conceptual framework as the traditional undergraduate program. However, in recognition of the special needs and skills of the working adult, the curriculum is packaged to accommodate the adult student. The nursing courses are presented in sequence in a modular arrangement of content. Courses are designed to affirm personal and professional strengths. The teaching/learning process is collaborative—the experiences and insights that student contribute are a vital part of class activities.

Students join cohorts and progress through the courses together. Courses are taught sequentially, and the rich diversity of experiences that students contribute results in lively discussions involving shared experiences. Because students often stay with the same group throughout the program, they develop a strong rapport with other group members who act as a support system through the completion of the degree.

Classes are offered in an asynchronous online program.

Students may complete a BSN degree in approximately 15 months. In this accelerated format, a 40-semester-unit curriculum is concentrated into 60 weeks.

Admission Requirements for RN to BSN Students

A minimum of 120 semester units of credit are required for the BSN. To be admitted to the 60-week accelerated RN to BSN program, a student must:

1. Provide a copy of RN license in good standing before starting clinical courses.
2. Graduate from an accredited associate degree program or diploma nursing program.
3. Have a minimum of 70 transferable semester units from an accredited college or university with a minimum GPA of 3.0 (2.7 GPA and above considered for provisional admission; 60-69 transferable semester units considered for provisional admission).
4. Submit official transcripts from all schools attended.
5. Provide two letters of recommendation.

Admission Requirements for Bridge to BSN Students

A minimum of 120 semester units of credit are required for the BSN. To be admitted to the sequential enrollment, a student must:

1. Be currently enrolled in an accredited ADN program.
2. Have a minimum GPA of 3.0 (2.7 GPA and above considered for provisional admission).
3. Submit official transcripts from all schools attended.
4. Provide two letters of recommendation.

The program is not recommended for students who lack proficiency in basic academic skills, especially collegiate-level English communication skills.

International applicants with an F or J visa are not qualified for this program. International applicants with any other type of visa should consult with International Student Compliance (https://www.apu.edu/international/compliance/) first at +1-626-812-3055 or issimmigrationsvcs@apu.edu.
**Admission Requirements for BSN Integrative Enrollment Pathway Students**

Students who apply through the integrative enrollment pathway option must be formally accepted into a contracted community college ADN program. For the application, students need to supply unofficial transcripts, verification of acceptance into their ADN program, a personal statement, and student-information-sharing agreement. Once accepted, a progression schedule is reviewed by the student and the advisors, and courses must be taken in the assigned sequence. Students already enrolled in an ADN program do not qualify for integrative enrollment and should apply for the Bridge to BSN program. Students are required to complete 120 semester units of credit for the BSN, and official transcripts are required from all schools attended.

| Total Units | 40 |

1. Students need a minimum of 70 units of transfer credits to complete the RN-BSN degree program.
2. Meets the General Education Upper-Division Bible requirement.
3. Meets the General Education Writing 3 requirement.

**BSN Integrative Enrollment Pathway Option**

The 40-unit RN to BSN Integrative Enrollment Pathway (p. 875) option allows students to begin RN to BSN program coursework during their first semester of nursing school in an external Associate’s Degree in Nursing (ADN) program; this is in contrast to the RN to BSN bachelor’s completion program (for students who have graduated from an ADN program) and the Summer Bridge Option (for students enrolled in an ADN program who begin degree completion courses during the summer). Integrative-enrollment students must be formally accepted into an ADN program in order to apply and must maintain a 3.0 GPA during their combined coursework.

**Program Learning Outcomes**

**Program Learning Outcomes**

Students who successfully complete this program shall be able to:

1. Utilize a Christian worldview to integrate beliefs, values, ethics and service in personal and professional life.
2. Provide nursing care utilizing professional knowledge and core competencies (critical thinking, communication, assessment and technical skills) derived from a foundation of nursing science, general education and religious studies.
3. Demonstrate initiative for continual personal and professional growth and development.
Act as a patient and family educator and advocate to promote optimal health and well-being.

Function independently and collaboratively, both as a leader and/or member of a health care team to manage and coordinate care.

**RN to BSN Integrative Enrollment Pathway**

The 40-unit RN to BSN Integrative Enrollment Pathway option allows students to begin RN-BSN program coursework during their first semester of nursing school at an external Associate's Degree in Nursing (ADN) program; this is in contrast to the RN-BSN bachelor's completion program (for students who have graduated from an ADN program) and the Summer Bridge Option (for students enrolled in an ADN program who begin degree completion courses during the summer). Integrative Enrollment students need to be enrolled in an ADN program and must maintain a 3.0 GPA during their combined coursework.

Students apply for the integrative enrollment pathway after they have applied and are formally accepted into a contracted community college ADN program. Once a student is formally admitted to their ADN program, the student may then apply to the integrative enrollment pathway program at APU. For the application, students will need to supply unofficial transcripts, verification of acceptance into their ADN program, personal statement, and student information sharing agreement. Once accepted, a progression schedule is reviewed by the student and the advisors, and courses must be taken in the assigned sequence. Students already enrolled in an ADN program do not qualify for integrative enrollment and should apply for the Bridge to BSN program. Official transcripts are required from all schools attended.

---

1. Students need a minimum of 70 units of transfer credits to complete the RN-BSN degree program.
2. Meets the General Education Upper-Division Bible requirement.
3. Meets the General Education Writing 3 requirement.
Department of Upper-Division BSN Transfer

The School of Nursing offers several professional programs at the baccalaureate level designed for students who bring previous experience and learning and want to advance their nursing career and complete their degree. The BSN Upper-Division Transfer Program provides options for students with at least 48 units of transferable nursing prerequisite courses or Licensed Vocational Nurses (LVNs) to complete coursework that leads to a Bachelor of Science in Nursing.

BSN Upper-Division Transfer Program Options

• The BSN Transfer Option (p. 876) is designed for transfer students interested in pursuing a Bachelor of Science in Nursing (BSN). The program enables students with at least 48 units of transferable nursing prerequisite courses to complete the nursing major in six consecutive semesters (two years, including summers) at APU.

• LVN Options: APU’s School of Nursing offers two programs for the licensed vocational nurse (LVN)—the LVN to BSN Option (p. 876) and LVN to RN 30-Unit Option (p. 876). The School of Nursing acknowledges that licensed vocational nurses acquire formal nursing training, continuing education units, and on-the-job experiences (including military experiences) that may be assessed for academic credit. The Council for Adult and Experiential Learning (CAEL) (https://www.cael.org/) guidelines and the American Council on Education (ACE) (https://www.acenet.edu/Pages/default.aspx) are used to ensure a responsible evaluation. Students are evaluated individually. Open enrollment is available for the fall, spring, and summer semesters.

Upper-Division BSN Transfer and LVN Options

Admission Requirements for the BSN Upper-Division Transfer and LVN-to-BSN Programs

BSN Upper-Division Transfer (https://www.apu.edu/nursing/programs/bsn-transfer/) and LVN to BSN (https://www.apu.edu/nursing/programs/lvn-to-bsn/) applicants must meet the following admission requirements:

1. Submit an application to Graduate and Professional Admissions (https://www.apu.edu/graduateprofessionalcenter/admissions/) indicating interest in becoming a nursing major and pursuing the BSN degree. Include in the application the following information:
   a. Official college transcripts for all colleges attended
   b. Two letters of recommendation
   c. A one-page statement of professional goals in nursing
   d. A résumé reflecting volunteer and paid work experience within the past three years. Please include leadership positions held within volunteer organizations, community service experience, and/or employment where applicable
   e. LVN applicants must include a copy of their current LVN license

2. Submit evidence of a minimum of 48 college or university semester units of transferable nursing prerequisite course requirements prior to the semester in which the student is requesting admission. See list of courses below.

3. Submit proof of achieving a minimum cumulative college or university grade-point average of B (3.0) or better.

4. Successfully complete Human Anatomy with lab (4 units), Chemistry with lab (4 units), Human Physiology (4 units), and General Microbiology with lab (4 units) with no lower than a B- (2.7) grade-point average.

5. Provide a writing sample that demonstrates written communication skills.

6. Candidates are considered for admission into the program once they have completed the prerequisite coursework and progress through the curriculum in a predetermined sequence with an assigned group of students (cohort model). All nursing coursework assigned to a specific semester is prerequisite for progression to the next semester.

7. Eligible candidates may be interviewed by the program director and reviewed by the admissions committee.

8. Candidates accepted into the program will be notified by the admissions representative and assigned to the appropriate semester.

9. An acceptance letter will be mailed to the candidate from the School of Nursing.

Course Requirements and Sequences

All undergraduate nursing programs are designed with a specific course sequence that is determined by the School of Nursing. When each student is accepted into a program, a progression schedule is reviewed by the student and the advisor. Courses must be taken in the assigned sequence. Admission is based on a cohort model.
The Upper-Division BSN Transfer Program is based on a cohort model. Students complete the required 48 units of prerequisite coursework, then begin nursing coursework in the fall, spring, or summer semester and continue in sequence for three consecutive semesters per year.

---

1. Numbers in parentheses indicate classroom/clinical or lab units.
2. May receive academic credit for this course through competency assessment.
3. Meets the General Education Quantitative Literacy requirement.
4. Meets the General Education Writing 2 requirement.
5. Meets the General Education Requirements for Civic Knowledge and Engagement and Intercultural Competence.
6. Meets the General Education Writing 3 requirement.

**LVN to RN 30-unit Option**

Students choosing this option are admitted as terminal nondegree students. Upon completion of the requirements of the 30-unit option with a 2.0 GPA or better in all courses, students receive a certificate of completion, which establishes eligibility to take the California Board of Registered Nursing (https://www.rn.ca.gov/) examination for RN licensure as a nongraduate. Students should see a School of Nursing academic advisor for requirements. This program operates on a space-available basis for didactic and clinical coursework.

**Previous Education Credit**

Students may be awarded credit for prior learning/coursework and clinical experience, including military education and experience, through a challenge examination and/or competency testing.

**Program Learning Outcomes**

**Program Learning Outcomes**

Students who successfully complete this program shall be able to:

1. Utilize a Christian worldview to integrate beliefs, values, ethics, and service in personal and professional life.
2. Provide nursing care utilizing professional knowledge and core competencies (critical thinking, communication, and technical skills) derived from a foundation of nursing science, general education, and religious studies.
3. Demonstrate initiative for continual personal and professional growth and development.
4. Act as a patient educator and advocate to promote optimal health and well-being.
5. Function independently and collaboratively, both as a leader and/or a member of the health care team, to manage and coordinate care.
Applicants interested in the traditional Bachelor of Science in Nursing program must meet the following admission requirements:

1. Submit an application to the Office of Undergraduate Admissions (https://www.apu.edu/undergraduate-admissions/) indicating interest in becoming a nursing major and pursuing the BSN. Include in that application the following information:
   a. Copies of all high school and college transcripts;
   b. Letters of recommendation as required by the university and the School of Nursing;
   c. A one-page statement of professional goals in nursing;
   d. A résumé reflecting volunteer and work experience within the past three years, including leadership positions within volunteer organizations, community service and/or employment where applicable.

2. Complete applicable prerequisite courses with a grade of B (3.0) or better, including the following:
   a. One year of high school chemistry (or CHEM 101).
   b. One year of high school biology (or BIOL 101).
   c. Two years of high school math (algebra or geometry) with an SAT math score of 540+ or ACT math score of 23+ or an A- or higher in precalculus or B or higher in calculus or a passing score on the Assessment and Learning in Knowledge Spaces (ALEKS).

3. Submit proof of achieving the minimum high school, college, or university cumulative grade-point average of B (3.00).

4. Once a student has received a letter of acceptance into the School of Nursing, proof of the following must be provided prior to the beginning of the first nursing course (UNRS 107):
   a. Successful completion of anatomy with lab (4 units) and chemistry with lab (4 units), with a minimum B- (2.7 grade-point average) and no grade lower than a C (2.0) in each course; (Note: A student is allowed only one opportunity to repeat a single failed science course to try to raise his/her grade prior to beginning nursing (UNRS) courses). A B- (2.7) average must be obtained in all subsequent science coursework with no grade lower than a C (2.0) in each science course or the student will not be allowed to progress in his/her UNRS coursework. If a student is unable to meet the requirements of their conditional admission through the minimum science and overall college grade-point average as stated, the student may be placed on academic probation and will have two subsequent semesters to raise their GPA in order to begin nursing coursework and progress in the nursing program.
   b. Once admitted into the nursing program, students must: (1) Overall: Maintain a cumulative GPA of 3.0 (84% or B) or higher in all course work, and no lower than a 2.0 (73% or C) in any course; (2) Science: Maintain a cumulative GPA of 2.7 (80% or B-) in all science courses, and no lower than a 2.0 (73% or C) in any science course; (3) Nursing (UNRS): Maintain a cumulative GPA of 2.7 (80% or B-) or higher in core nursing courses or the student will be placed on academic probation.
   c. Receive credit or waiver for college algebra.
   d. WRIT 110 Writing 1: The Art and Craft of Writing.

\[\text{APU is waiving the SAT/ACT requirements for admission through the 2022-23 academic year.}\]

Transfer Students with Nursing Credit/Previous Education Credit

1. Transfer applicants who have completed college nursing courses in nationally accredited nursing or other health care programs are evaluated individually and may be given credit for courses that meet the requirements.

2. Up to 70 units of community college credit and additional units from a university (per registrar’s approval) may be transferred. Applicants may petition to have nursing units transferred from a nationally accredited university, but must receive administrative approval for inclusion in total credits. Students may be awarded credit for prior coursework and clinical experience, including military education and experience, through a challenge examination and/or competency testing.
International Students

International students are required to meet the same academic and admission requirements as other students in addition to the following:

1. International students must complete WRIT 110, one of the four required sciences taken at an accredited U.S. university with a minimum grade of C (2.0), and achieve a cumulative grade-point average of B (3.0) in all college courses completed at Azusa Pacific University after two semesters of full-time enrollment.

2. The admission requirement for international students with English as a second language (ESL) is a minimum TOEFL score of 80 iBT. The School of Nursing specifies that the TOEFL Test of Written English (TWE) and TOEFL Test of Spoken English (TSE) be included in the TOEFL assessment score as these are critical to success in nursing. If the student has taken the IBT (Internet-Based TOEFL), the required score is 85 percent or better.

If there are no TOEFL scores of written and spoken English, the student will be referred to an English training program for successful completion of evaluation and required testing. If deemed necessary, additional ESL courses may be required. (Information about taking the TOEFL examination can be obtained by contacting APU’s International Services [https://www.apu.edu/international/].)

NOTE: Please check with the Office of Undergraduate Admissions [https://www.apu.edu/undergraduate-admissions/] regarding residency requirements prior to application.

Requirements and Sequences for the Traditional BSN Program

All undergraduate nursing programs are designed with a specific course sequence that is determined by the School of Nursing. When each student is accepted into a program, a progression schedule is reviewed by the student and the advisor. Courses must be taken in the assigned sequence.

The Traditional BSN program is based on a cohort model. All coursework assigned to a specific semester is prerequisite for progression to the next semester. Students in the Traditional BSN program begin their nursing coursework either in the fall or spring semesters and continue in sequence for two consecutive semesters per school year. Depending on cohort admission and sequencing of the curriculum, the length of the program may be 4 or 4½ years. The coursework is as follows:

1. Required for School of Nursing Study Away Semester.
2. Elective course prior to fall 2022.

Program Learning Outcomes

Students who successfully complete this program shall be able to:
1. Utilize a Christian worldview to integrate beliefs, values, ethics, and service in personal and professional life.
2. Provide nursing care utilizing professional knowledge and core competencies (critical thinking, communication, assessment, and technical skills) derived from a foundation of nursing science, General Education, and religious studies.
3. Demonstrate initiative for continual personal and professional growth and development.
4. Act as a patient educator and advocate to promote optimal health and well-being.
5. Function independently and collaboratively, as a leader and/or member of the healthcare team, to manage and coordinate care.

Minor in International Health Nursing (Traditional BSN)

19 units

Students interested in expanding their global perspective on health and nursing care may apply to participate in a short-term transcultural health nursing experience, an international health nursing semester, or the international health nursing minor. Accepted students complete additional coursework, and a study plan is developed by the student and advisor. Contact the School of Nursing for the proposed study plan.

1  This is a short-term study-away experience with the School of Nursing.
2  This is a semester-long study-away experience with the School of Nursing.
3  Meets the General Education Intercultural Competence requirement.
4  HIST 235 meets the General Education Intercultural Competence requirement.

**Program Learning Outcomes**

**Program Learning Outcomes**

Students who successfully complete this program shall be able to:

1. Utilize a Christian worldview to integrate beliefs, values, ethics, and service in personal and professional life.
2. Provide nursing care utilizing professional knowledge and core competencies (critical thinking, communication, and technical skills) derived from a foundation of nursing science, general education, and religious studies.
3. Demonstrate initiative for continual personal and professional growth and development.
4. Act as a patient educator and advocate to promote optimal health and well-being.
5. Function independently and collaboratively, both as a leader and/or a member of the health care team, to manage and coordinate care.

**Minor in Nutrition (Traditional BSN)**

18 units

The minor in nutrition is available to any APU student interested in expanding his or her skills in this specialized area of preventative health. Emphasis within this minor is on the four pillars of a healthful lifestyle: physical activity, good diet, healthy choices, and preventative screening—all crucial for national health. Contact the School of Nursing for the proposed study plan, verification of course offerings, and program availability.

Department of Entry-Level Master of Science in Nursing

The Department of Entry-Level Master of Science in Nursing offers the Entry-Level Master of Science in Nursing (ELM), an accelerated graduate nursing program for students who desire to enter the nursing profession and hold a baccalaureate or higher degree in another discipline. This program meets the California Board of Registered Nursing (BRN) requirements for licensure and is available at the San Diego, Inland Empire, and Monrovia campus locations.

Contact the School of Nursing (https://www.apu.edu/nursing/) for more information.

Programs

- Entry-Level Master of Science in Nursing (ELM) (p. 903)
- ELM-MSN: School Nurse Services Credential (SNSC) and Family Nurse Practitioner (FNP) (p. 912)
- ELM-MSN: School Nurse Services Credential (SNSC) and Pediatric Nurse Practitioner–Primary Care (PNP-PC) (p. 913)
- ELM-MSN: Adult-Gerontology Primary Care Nurse Practitioner (AGPCNP) (p. 906)
- ELM-MSN: Adult-Gerontology or Pediatric Clinical Nurse Specialist (CNS) (p. 905)
- ELM-MSN: Family Nurse Practitioner (FNP) (p. 907)
- ELM-MSN: Pediatric Nurse Practitioner–Primary Care (PNP-PC) (p. 910)
- ELM-MSN: Psychiatric Mental Health Nurse Practitioner (PMHNP) Specialty (p. 911)
- ELM-MSN: Healthcare Administration and Leadership (p. 908)
- ELM-MSN: Nursing Education (p. 909)
- MSN-ELM with School Nurse Services Credential (SNSC) (p. 914)

Courses

**GNRS 500, Conceptual Foundations of Professional Nursing, 3 Units**

This course focuses on the introductory concepts crucial to the socialization of second career students to professional nursing. The history of nursing, the evolution of nursing in the U.S., the art and science of nursing, the legal and professional basis of nursing, the role of nursing in the health care delivery system, and current issues and trends in nursing education, practice and research are emphasized.

**GNRS 501, Theoretical Thinking in Nursing, 2 Units**

This course examines questions about the nature and construction of theory and how theoretical ideas are developed and used in nursing practice and research. Philosophical ideas underlying theory are examined, and selected theoretical models and theories are explored.

Prerequisite: Completion of undergraduate research course or instructor’s consent; admission to ELM or MSN program.

**GNRS 503, Cultural Competency in Health Care, 3 Units**

This course focuses on transforming graduate nursing students, preparing them for nursing leadership in nursing practice, nursing research, education, and public health policy for the improvement of patient healthcare outcomes in our increasingly diverse society. Students move from cultural sensitivity and awareness to critical reflection and action, challenging their assumptions and broadening their perspectives. The Essentials of Master’s Education in Nursing (American Association of Colleges of Nursing, 2011) serves as the foundation for the development of core cultural competencies.

Prerequisite: Graduate standing in the School of Nursing.

**GNRS 504, Bioethics and Healthcare Policy, 3 Units**

This course will outline the role of the healthcare leader in ensuring human rights are upheld in healthcare systems. This course focuses on bioethical analysis, decision-making and moral policy analysis, and formulation. Through course discussion, group and individual assignments, and oral and written presentations, students will analyze and apply bioethical principles to decision- and policy-making processes in the workplace and at national levels. Healthcare ethics and policy will be considered from a Christian worldview.

Prerequisite: Graduate standing

**GNRS 505, Christian Formation for Holistic Care, 3 Units**

Students engage in the process of discovering the foundational values of Azusa Pacific University that serve as guiding principles for the distinctive education they will receive. They are made aware of the Christian worldview and its implications for personal holistic development and care. With a focus on developing motivating character and integrated caregivers, the course brings heightened self-awareness, the impact of a Christian worldview on vocation, scriptural awareness especially emphasizing healing themes in the life of Christ, and the importance of spiritual growth on the journey toward formation.
GNRS 506, Spiritual Concept Analysis in Health Care, 3 Units
Scholarly research and analysis of selected concepts in the spiritual care of persons from the Judeo-Christian perspective provide a central focus to the course. Students also examine healthcare research/other healthcare literature for adequacy with respect to the concept they select. Various assignments facilitate greater student awareness of their own spiritual journey and knowledge of faith traditions other than their own. The course is conducted as a tutorial/seminar experience.
Prerequisite: Graduate standing

GNRS 507, Scientific Writing, 3 Units
This course provides opportunities for students to learn how to introduce a topic or issue, articulate a thesis, support and develop a thesis and subordinate claims, work with secondary sources, and organize an argument.

GNRS 508A, Research and Theory in Advanced Practice Nursing, 4 Units
This course prepares nurses to use theory and research evidence in advanced clinical practice. The relationship between theory and research is examined, exploring questions about the nature, construction, and use of each. Selected theoretical models and theories are explored, and students learn how ideas are developed and used in nursing practice and research. Students deepen their understanding of the research process by engaging in a systematic search, critique, and summary of research studies with direct application to nursing practice. Experience in statistical analysis of research data is included.
Prerequisite: Computer literacy, undergraduate research course, undergraduate statistics course, and graduate standing

GNRS 508B, Research and Theory in Healthcare, 4 Units
This course prepares the healthcare administrator to apply theory and research evidence in healthcare environments. The relationship between theory and research is examined, exploring questions about the nature, construction, and use of each. Selected theories are explored, and students learn how ideas are developed and used in practice and research. Students learn the fundamentals of quantitative, qualitative, and mixed methods research and deepen their understanding through systematic search, critique, and summary of research studies with application to healthcare. Students work in groups to develop a research plan addressing a healthcare-derived question. Experience in statistical analysis of research data is included.
Prerequisite: GNRS 613

GNRS 510, Family Theory in Health Care, 2 Units
The major theoretical perspectives for understanding the family as a core unit of analysis are studied. This course fosters the student's recognition of the family's responsibility for health. Factors such as family patterns and care-giving tasks of families experiencing catastrophic or chronic alteration in health care are examined. This class is offered online.
Prerequisite: Graduate standing

GNRS 511, Advanced Pediatric Health Assessment and Health Promotion, 4 Units
This course develops the graduate nurse's assessment skills and focuses on the promotion of health in the pediatric population from the newborn period through adolescence. Emphasis is on adapting and expanding the medically focused history and physical assessment to incorporate the assessment of traditional health practices and identify culturally relevant and age-appropriate health promotion strategies. Outcomes are examined in light of related theoretical concepts. Strategies for health promotion include a focus on developmental and behavioral assessments, emotional health, nutrition, counseling to modify risk factors, and screening tests/prophylaxis for early detection and prevention of disease.
Prerequisite: Undergraduate health assessment and GNRS 610;
Corequisite: Practicum

GNRS 513, Advanced Nursing Practice Role, 2 Units
This course focuses on the concepts of role development and performance competence of the nurse in advanced clinical practice within the context of a reformed health care delivery system. Emphasis is placed on the clinician, educator, clinical program manager, consultant, researcher, and case manager roles of the advanced practice nurse. The leadership aspects of the roles of advanced practice are explored in relation to health care delivery, policy formulation, and legislation. The course explores theories and issues related to the advanced nursing practice role.
Prerequisite: Graduate standing

GNRS 514, Research Proposal Writing, 2 Units
This course focuses on the application of the concepts in GNRS 508A. The goal is the completion of a research proposal that details the problem, the research purpose, questions or hypotheses to be tested, a critique of the literature, the design and methods of the study including protection of human subjects, the plans for analysis, use of the study, and the budget and personnel.
Prerequisite: GNRS 508A

GNRS 516, Integrative Disease and Symptom Management, 3 Units
Using a systems-based approach, this course provides the student with a broad-based, graduate-level overview for understanding disease processes, treatment modalities, assessment and interventional strategies for patients across the life span.

GNRS 517, Fundamentals in Nursing Practice, 2 Units
This is an experiential learning course designed to teach basic nursing skills in a clinical skills or simulation laboratory setting to prepare students to deliver safe and patient-focused nursing care. Utilizing the nursing process, students perform basic skills in assessment, patient care across the continuum, documentation, patient-family teaching, and infection control.
GNRS 518, Supervised Practicum in Health Care, 3 Units
This course prepares students to integrate and apply theory, evidence-based practice, and national guidelines and standards in practicum settings. Students select practicum areas in which, with faculty approval, they will participate in experiences led by preceptors. The purpose of the course is to equip students with current, evidence-based knowledge in a selected practice area.

GNRS 520, Theory and Practice of the Clinical Nurse Specialist in Nursing Care of Adult-Gerontology Patients, 6 Units
Critical concepts in advanced collaborative management of adult-gerontology client populations by Clinical Nurse Specialists are studied. Differential diagnosis, pharmacologic management, cultural sensitivity, adult-gerontology continuum of health and illness (i.e., wellness, health promotion, disease prevention), teaching-learning theory, and evidence-based best practices for clinical decision-making for the Adult and Geriatric population are highlighted. CNS roles, competencies, and professional issues and integrated clinical rotations will be chosen from critical care or medical-surgical adult-gerontology populations. Clinical seminar times allow students to discuss and analyze current professional issues and clinical problems in a collegial atmosphere.
Prerequisite: Academic Core and Advanced Practice Core courses, current RN license, CPR certificate, and meets health screening requirements;
Corequisite: Practicum

GNRS 521, Clinical Specialization in the Care of Adult-Gerontology Patients, 6 Units
The course prepares the student to apply concepts introduced in GNRS 520. It focuses on diagnosis and collaborative disease management of acute illness in the adult-gerontology patient by the Clinical Nurse Specialist. The integration of advanced skill development, theory and evidence based practice, disease management, clinical decision making, unit and organization management issues, professional issues and APRN role competencies are the foundation for this course. Practicum and seminars are planned to span the breadth of the students' clinical opportunities.
Prerequisite: Academic Core and Advanced Practice Core courses, GNRS 520, current RN license, CPR certificate, and meets health screening requirements;
Corequisite: Practicum

GNRS 522, Disaster Nursing and Emergency Preparedness, 3 Units
This course explores the nature of disasters and prepares nurses to respond to various types of disasters - including natural, environmental, mass casualty, public health emergencies, terrorism, and bioterrorism - by utilizing essential knowledge, skills, values, meanings, and experience in the basic competencies of emergency preparedness and disaster nursing. In accordance with the position of major nursing organizations, emphasis is placed on evidence-based best practices for personal preparedness.
Prerequisite: Comparable course, such as UNRS 312 Nursing Management of Adults, a human growth and development course, a lifespan course OR an RN licensure.

GNRS 530, Theory and Practice of the Clinical Nurse Specialist in the Care of the Pediatric Patient, 6 Units
Critical concepts in the advanced collaborative management of pediatric client populations by the Clinical Nurse Specialists are studied. Differential diagnosis, pharmacologic management, cultural sensitivity, pediatric continuum of health and illness (i.e., wellness, health promotion/disease prevention), teaching-learning theory, and evidence-based/best practices for clinical decision-making for the Pediatric population are highlighted. CNS roles, competencies, and professional issues are integrated. Clinical rotations will be chosen from critical care or medical-surgical pediatric populations. Clinical seminar times allow students to discuss and analyze current professional issues and clinical problems in a collegial atmosphere.
Prerequisite: Academic Core and Advanced Practice Core courses, current RN license, CPR certificate, and meets health screening requirements;
Corequisite: Practicum

GNRS 531, Clinical Specialization in the Care of the Pediatric Patient, 6 Units
The course prepares the student to apply concepts introduced in GNRS 530. It focuses on diagnosis and collaborative disease management of acute illness in the pediatric patient by the Clinical Nurse Specialist. The integration of advanced skill development, theory and evidence based practice disease management, clinical decision making, unit and organization management issues, professional issues and APRN role competencies are the foundation for this course. Practicum and seminars are planned to span the breadth of the students' clinical opportunities.
Prerequisite: Academic Core and Advanced Practice Core courses, GNRS 530, current RN license, CPR certificate, and meets health screening requirements;
Corequisite: Practicum

GNRS 532, Advanced Nursing Practice in Pediatrics, 6 Units
This course emphasizes physiological and psychological bases for critical and chronic conditions in children, focusing on an advanced science base for the assessment, diagnosis, and management of children and families to promote wellness. Exploration of traditional versus alternate medicine treatment plans, as well as relevant cultural, spiritual, and health promotion strategies, is incorporated.
Prerequisite: Graduate status and GNRS 590A;
Corequisite: Practicum
GNRS 533, Psychiatric Theories across the Life Span, 2 Units
This course presents neurobiologic, neuroendocrine, genomic, behavioral, and psychodynamic theories of psychiatric mental illnesses as they manifest among members of diverse cultural groups across the life span. A theoretical foundation for subsequent coursework in primary psychiatric mental health care is provided for the role of the psychiatric mental health nurse practitioner.
**Prerequisite:** Graduate standing, Advanced Practice Core

GNRS 534, Integrated Psychiatric and Health Assessment across the Life Span, 2 Units
This course teaches the role of the psychiatric mental health nurse practitioner in interviewing, assessing, and utilizing of other data collection methods to elicit, analyze, and evaluate bio-psychosocial information regarding psychiatric mental health illness as experienced and understood by the clients, across the lifespan. Assessment and integration of the effects of potential and/or existing co-morbid health problems are focused upon. Diagnostic reasoning that is based on the Diagnostic Statistical Manual is foundational in the course. Development of differential diagnoses and disease management, evidence-based practice, and health promotion that includes client and nurse practitioner collaboration is emphasized.
**Prerequisite:** Advanced Practice Core, GNRS 533 (May be taken concurrently)

GNRS 535, Psychiatric Interventions and Health Promotion across the Life Span, 6 Units
In this course students learn historical, theoretical, and contemporary evidence-based psychotherapies that promote and support client stabilization, rehabilitation, and recovery. The client as a collaborating decision making consumer and the client-therapist therapeutic alliance are central to this course. Students increase competence in assessment of psychiatric mental health illnesses, differential diagnoses and disease management, implementation of psychotherapy (individual, group, family), medication management, and health promotion interventions, including motivational interviewing. Student competence in developing and facilitating therapeutic groups as a recovery modality are included in the course. The role of the psychiatric mental health nurse practitioner in the integration and coordination of support services that impact mental health and illness is also included. Students practice verbal psychotherapeutic skills that motivate and facilitate client self-management and progression toward recovery.
**Prerequisite:** Advanced Practice Core, GNRS 533 and GNRS 534; GNRS 539 may be taken concurrently; Corequisite: Practicum

GNRS 536, Psychiatric Mental Health Care with Adults and Older Adults, 6 Units
In this course students increase their knowledge and competence in the assessment of psychiatric mental health illnesses, differential diagnoses and disease management, implementation of psychotherapy (individual, family, group), evidence-based practice, medication management, health promotion and disease prevention interventions, integration and coordination of support services, with adults and older adults.
**Prerequisite:** GNRS 533, GNRS 534, GNRS 535, GNRS 539;
**Corequisite:** Practicum

GNRS 537, Psychiatric Mental Health Care with Children and Adolescents, 6 Units
In this course, students increase competence in the role of the psychiatric mental health nurse practitioner in the assessment of psychiatric mental health illnesses, differential diagnosis and disease management, implementation of psychotherapy (individual, family, group), evidence-based practice, medication management, health promotion and disease prevention interventions, integration and coordination of support services with children, adolescents, and families.
**Prerequisite:** GNRS 533, GNRS 534, GNRS 535, GNRS 536, GNRS 539;
**Corequisite:** Practicum

GNRS 538, Psychiatric Mental Health Care with Selected Populations, 5 Units
Students increase knowledge and competence in the assessment of psychiatric and mental health illnesses, differential diagnosis and disease management, implementation of psychotherapy (individual, family, group), medication management, health promotion and disease prevention interventions, and integration and coordination of support services with a selected population. Focus is on integrating and practicing all aspects of the role of the psychiatric mental health nurse practitioner with clients who are experiencing acute and/or chronic mental health problems and psychiatric disorders.
**Prerequisite:** GNRS 533, GNRS 534, GNRS 535, GNRS 536, GNRS 539;
**Corequisite:** Practicum

GNRS 539, Psychopharmacology, 2 Units
Students in this course build upon knowledge of advanced practice nursing and provides content essential for the psychiatric mental health nurse practitioner to prescribe appropriate pharmacologic treatment in practice. Mechanisms of action, interactions, side effects, and prescribing guidelines for psychopharmaceuticals commonly utilized across the lifespan are addressed.
**Prerequisite:** GNRS 533, GNRS 534; GNRS 535 (May be taken concurrently)
GNRS 542, Advanced Concepts and Competencies in Pediatric Primary Health Care, 3 Units
This course offers a comprehensive review and synthesis of core concepts and competencies for the pediatric advanced practice nurse in the primary care setting. This culminating experience for pediatric nurse practitioner students incorporates seminar discussions and clinical practicum placement, and also allows for a discussion of developmental/behavioral issues, management of acute and chronic care illnesses seen in primary care settings, and preventative health care.
Prerequisite: Graduate standing, GNRS 532 (may be taken concurrently with instructor's permission), and GNRS 590A; Corequisite: Practicum

GNRS 543, Transitions Across the Care Continuum, 4-6 Units
This course focuses on principles and models of care and their implementation in a multidisciplinary practice environment that emphasizes healthcare delivery through integration of services and transition management. Students are introduced to decision making related to allocation of resources and services, development of protocols, and evaluation of management approaches. Evidence-based approaches to the clinical, administrative, educational, and research dimensions of patient care are emphasized. Evaluation of care management activities with the student's selected clinical population is an integral component of the course.
Prerequisite: NP students: completion of Advanced Practice Core; CNS students: completion of Advanced Practice Core and GNRS 520 or GNRS 530; HAL students: completion of MSN Core and GNRS 560.
Corequisite: Practicum

GNRS 544, Clinical Specialization Residency, 2-4 Units
This elective residency program, formed through a partnership between the School of Nursing and selected community healthcare organizations, is an intensive, precepted clinical experience that helps students transition to beginning professional nurses in a specialized setting. It enhances students’ skill and practice knowledge in preparation for the RN licensing examination, and increases their ability to perform clinical reasoning with the assigned patient population and evaluate the QSEN competencies of patient-centered care, safety, evidence-based practice, informatics, and teamwork and collaboration.
Prerequisite: ELM students must complete GNRS 573 (may be taken concurrently), but GNRS 573 is not required for nurses in community partnerships who are taking GNRS 544 for continuing education credit.

GNRS 546, Theory and Practice in Health Care Systems in the Community, 6 Units
This specialized course prepares RNs without a bachelor's degree for graduate study in nursing. A multiple theoretical focus that includes concepts from systems, stress, adaptation, developmental, and role theory is emphasized. A beginning practice in the utilization of the nursing process with an emphasis on nursing diagnosis and the nurse's role in assessing, planning, implementing, and evaluating care of clients in a variety of community settings is provided. Collaboration with community-based organizations and services that provide health restoration, maintenance, illness prevention, and client education services to individuals and families at home are essential course components. A review of legal mandates for practice and discussion of ethical dilemmas and issues related to high quality nursing care are included. Specific content varies based on the students' prior education and experience. Clinical placements are arranged to meet the individual student's needs.
Prerequisite: Undergraduate research, pathophysiology, and health assessment;
Corequisite: Practicum

GNRS 547, Nursing Leadership in Acute Care Settings, 6 Units
This is one of two clinical courses provided for the RN who seeks both a bachelor's and master's degree in nursing. The course synthesizes selected information from the generic bachelor's and master's programs for presentation in a condensed format, addressing the development and nature of today's health care systems and associated issues in the United States. Further, content familiarizes the student with several roles and responsibilities of the contemporary nurse, such as leader, consultant, teacher, manager, and client advocate. The course focuses on client needs in acute health care settings and emphasizes the relationship between the health care system and the advocate.
Prerequisite: Undergraduate research, pathophysiology, and health assessment;
Corequisite: Practicum

GNRS 548, Health Promotion Across the Lifespan, 2 Units
The course focuses on health promotion and disease prevention across the lifespan and around the globe. The course includes exploration of population health issues, environmental implications in health and health policy, impact on health promotion and the development of disease.
Prerequisite: Academic Core and Advanced Practice Core courses, current RN license, CPR certificate, and meets health screening requirements

GNRS 550A, Theory and Practice in School Nursing, 6 Units
This combined didactic and clinical course provides theoretical content and field experiences that emphasize the multifaceted role of the school nurse. Students participate in field experiences and classroom learning activities that focus on the assessment and management of children's healthcare needs in various school settings. This course equips students with the necessary tools and skills to successfully function as professional school nurses. At the conclusion of this course, students are able to successfully function as providers of health education as well as providers, planners, and coordinators of health care in school settings.
Prerequisite: GNRS 612 or instructor consent, and admission to School Nurse Services Credential program;
Corequisite: Practicum
**GNRS 554, Medical-Surgical Care of the Adult and Geriatric Patient, 5 Units**
This course introduces crucial concepts in professional nursing care, such as the nursing process, communication, therapeutic interventions, critical thinking, and critical reasoning. Course material focuses on the application of biological, psychosocial, and spiritual concepts to adult and elderly clients in various healthcare settings with acute and/or chronic illnesses. The nursing process is utilized to provide care to one or two adult clients within the healthcare delivery system. The clinical practicum focuses on the cognitive basis, scientific principles, and manipulative components of psychomotor skills used when providing nursing care.
**Prerequisite:** Admission to the ELM program, completion of all prerequisite courses for the program.
**Corequisite:** GNRS 554P

**GNRS 555, Medical Surgical Care of the Adult and Geriatric Patient, 7 Units**
This course introduces crucial concepts to professional nursing care such as nursing process, communication, therapeutic interventions, and critical thinking and clinical reasoning. The course focuses on the application of biological, psychosocial, and spiritual concepts to hospitalized adult and elderly clients with acute and/or chronic illnesses. Students will be guided in critical thinking and clinical reasoning exercises in the management of hospitalized clients. Nursing process is utilized to provide care to one or two adult clients within the health care delivery system of an acute care setting. The clinical practicum focuses on the cognitive basis, scientific principles, and manipulative component of psychomotor skills used when providing nursing care. Students have an opportunity to practice simulated clinical skills.
**Prerequisite:** Admission to the ELM program, completion of all prerequisite courses for the program;
**Corequisite:** Practicum

**GNRS 556, Intermediate Medical Surgical Care of the Adult, 7 Units**
This course is designed to build on the base of medical-surgical nursing knowledge from GNRS555. The course focuses on comprehensive nursing care to patients with acute need for continuous cardiac monitoring, pulse oximetry monitoring, or ventilator assistance in telemetry units, in restorative care setting, or long-term care setting.
**Prerequisite:** Admission to the ELM program; successful completion of GNRS 555;
**Corequisite:** Practicum

**GNRS 557, Medical Spanish for Advanced Practice Nurses, 3 Units**
This course provides non-Spanish-speaking advanced-practice nursing students with foundational knowledge of Spanish language structure and vocabulary, helping them build appropriate phrasing to facilitate communication in healthcare settings. Cultural issues relevant to health and illness in the Latino community are also addressed.
**Prerequisite:** Graduate nursing student standing, or instructor's permission

**GNRS 558, Intermediate Medical-Surgical Care of the Adult, 6 Units**
This course is designed to build on the base of medical-surgical nursing knowledge from prior nursing courses. The course focuses on comprehensive nursing care to patients with acute need for continuous cardiac monitoring, pulse oximetry monitoring, or ventilator assistance in telemetry units, restorative care settings and long-term care settings.
**Corequisite:** GNRS 558P

**GNRS 559, Audiometry for School Nurses, 3 Units**
This course provides didactic instruction via eCollege and eight hours of on-site practicum experience that emphasizes the content and clinical expertise necessary to fulfill the requirements of the State of California School Hearing Conservation Program and training for the school audiometrist. The course focuses on the physiologic process of hearing and how to assess for deficits in hearing in children of all ages. At the conclusion of the course, and after having completed successfully all learning objectives, the student is eligible to submit an Application for Registration as a School Audiometrist in the State of California (a $10 registration fee is required with the application).

**GNRS 560, Strategic Leadership in Health Care, 3 Units**
This course is designed to develop knowledge, skills and attitudes about leadership across the healthcare continuum. The student will consider the professional role of the healthcare administrator both from a leadership and a management perspective. Areas of concentration will include leadership theory, structure of healthcare institutions, systems thinking and decision-making, performance improvement including quality and safety issues, risk management and effective communication skills. Application of business skills will be integrated. Students will consider the theoretical and research background, current issues and trends, leadership and administrative implications of specific topics.

**GNRS 564, Nutrition and Therapeutics, 2 Units**
Students in this course explore the functions of nutrients and the consequences of nutrient deficiencies and excesses in the body. Course material introduces a variety of tools for planning and evaluating diets, including a computer diet analysis, and the application of nutrition concepts is interwoven into health care and fitness conditions. Students also study the prevention of chronic disease as it relates to proper nutrition and adequate exercise.
**Prerequisite:** Admission to the ELM program

**GNRS 567, Healthcare Administration and Leadership Supervised Practicum, 3 Units**
This course provides the student with the opportunity to experience the role of healthcare administrator. An individualized administration practicum in a specific area of clinical emphasis is chosen by the student and approved and monitored by the faculty and preceptor. Competencies that govern the role of the healthcare administrator are explored in depth. Students focus on the context for enacting the role of administrator in a healthcare delivery system.
**Prerequisite:** All core and role courses
GNRS 568, Healthcare Finance, 4 Units
This course is an introduction to financial concepts and skills need for healthcare leaders, managers, and executives. The student will develop skills in assessing multiple dimensions of financial performance and methods to improve the financial health of an organization in the context of current patient care system.

GNRS 569, Quality and Safety for Health Care Practice, 3 Units
This course is designed to deepen and advance students’ knowledge of, and ability to systematically apply the principles of, patient quality and safety in nursing practice. Based on national standards, the focus is on examining and applying quality and safety tools, including informatics, that can be used to improve patient care delivery across the continuum of health care.

GNRS 570, Parish Nursing/Health Ministries, 2 Units
This course provides an introduction to and overview of health ministry and parish nursing theory and practice. The philosophy of the course is that (a) the parish nursing role is that of a specialist in spiritual aspects of patient care in the congregational context, requiring the integration of graduate level theology/ministry and nursing theory and praxis; and (b) health ministry is an emerging role and trend in pastoral ministry that seeks to bring professional ministry skill to bear upon the integration of health, faith, and spirituality in the parish setting.

GNRS 571, International Health Care, 2-4 Units
This course provides students with experience in nursing care in other countries. Students prepare with coursework in the United States, then travel abroad, where they have experiences in acute and/or chronic care settings, exploring cultural, economic, systems, philosophical, and other aspects of care that influence the provision of health care in other countries. A debriefing period is provided upon return.

GNRS 573, Clinical Residency, 4 Units
The clinical residency is an internship clinical experiential program designed as a collaborative partnership between the School of Nursing and selected community in-patient health care organizations. This residency is an intensive preceptored clinical experience planned to ease the role transition from a student nurse to a beginning professional nurse in an acute-care setting. In addition, it enhances the skill and practice knowledge of the student in preparation for the RN licensing examination.
Prerequisite: Successful completion of all pre-licensure clinical courses

GNRS 575, Nursing Care in Maternal, Newborn, and Women’s Health, 4 Units
This course focuses on the theoretical and clinical concepts of the childbearing patient, her infant, and her family. The students study both normal and complicated obstetrics. Selected issues of women's health are explored. The student is introduced to birth preparation, prenatal care, normal neonatal, and postpartum care with concurrent clinical experiences.
Prerequisite: Admission to the ELM program, successful completion of semesters one and two;
Corequisite: Practicum

GNRS 576, Pharmacology, 2 Units
This course is designed for students who have completed organic chemistry, inorganic chemistry, and biochemistry. The content focuses on principles of pharmacology and specifics of the major drug classifications.
Prerequisite: Admission to the ELM program

GNRS 578, Health Assessment, 3 Units
This course provides the nursing student with skills in physical, spiritual, and psychosocial assessment of adult clients. History-taking and physical examination techniques presented in the course help the student develop strong assessment skills upon which further knowledge and practice can be built. Basic concepts related to assessment of geriatric, pediatric, and childbearing patients are included.
Prerequisite: Admission to the ELM program;
Corequisite: Practicum

GNRS 580, Gerontology, 2 Units
This course integrates research and writings about the major trends and developments in the field of gerontology as they apply to the field of nursing. The approach is interdisciplinary - course material includes information from the fields of sociology, psychology, anthropology, biological sciences, medicine, nursing, and psychiatry. Development in adulthood is viewed from multiple perspectives including cognitive, behavioral, biological, sociocultural, and spiritual, and the influences these perspectives have on the successful negotiation of age-related issues are considered. Finally, students examine aspects of human aging in contemporary American society and from a cross-cultural and ethnic perspective.
Prerequisite: Graduate standing in the School of Nursing.

GNRS 581, Primary Health Care of the Older Adult, 5 Units
GNRS 581 focuses on the role of the adult-gerontology primary care nurse practitioner in the management of the older adult including health promotion, assessment, treatment, and maintenance of common primary care health problems. The clinical practicum emphasizes the application of theory and evidence-based research for the delivery of culturally competent assessment and treatment of the older adult within the context of their families and in a variety of outpatient settings.
Prerequisite: Graduate status in the School of Nursing, completion of Advanced Practice Core courses;
Corequisite: Practicum
GNRS 582A, Pathophysiology, 2 Units
This course presents an introduction to human pathophysiology. Mechanisms causing alterations in cellular activity, maintenance of cellular tissue oxygenation, fluid and electrolyte balance, and neuroendocrine control of the body are included. Common pathophysiologic disorders are emphasized.
Prerequisite: Admission to the ELM program

GNRS 582B, Pathophysiology, 2 Units
This course continues the presentation an introduction to human pathophysiology. Mechanisms causing alterations in cellular activity, maintenance of cellular tissue oxygenation, fluid and electrolyte balance, and neuroendocrine control of the body are included. Common pathophysiologic disorders are emphasized.
Prerequisite: Admission to the ELM program, successful completion of GNRS 582A

GNRS 583, Nursing Care of Children and Young Adults, 4 Units
This theoretical and clinical course focuses on the care of children from birth through adolescence. The effects of acute and chronic illness on growth and development are studied in the acute and community health care setting. Education of the child and family on health promotion, disease prevention, and safety issues are addressed. Ethical issues are discussed regarding the relationship to the child and family, including issues such as child abuse, informed consent, and the impact of diverse cultural and spiritual beliefs on health care decisions in the family.
Prerequisite: Admission to the ELM program, successful completion of semesters one and two;
Corequisite: Practicum

GNRS 584, Mental Health Nursing, 4 Units
This theoretical and clinical course focuses on the dynamics of psychosocial stress within the interpersonal and intrapersonal systems of clients with acute and chronic psychiatric disorders.
Prerequisite: Admission to the ELM program, successful completion of semesters one and two;
Corequisite: Practicum

GNRS 586, Leadership and Management in Professional Practice, 2 Units
This course emphasizes leadership and management theory including systems theory in a number of applications and settings, equipping students with the ability to adjust to various organizations encountered by professional nurses serving in a variety of roles. Core concepts relevant to clinical settings are presented using a systems approach. Emphasis on nursing case management is included.

GNRS 587, Community Health Nursing, 5 Units
This course has two areas of focus within the community setting: the study of principles and practices involved in community health nursing, and the development of skills for teaching a group of clients. The emphasis is on the role of the nurse in assessing, planning, implementing, and evaluating care of clients in a variety of community-based settings, with a focus on care of the gerontological client. Collaboration with community-based organizations and services that provide health restoration, maintenance, illness prevention, and client education services to individuals, families, and aggregates are essential components of this course. A review of legal mandates and regulations, as well as discussion of ethical dilemmas and issues related to community-based care is included.
Prerequisite: Admission to the ELM program, successful completion of semesters one, two, and three;
Corequisite: Practicum

GNRS 588, Advanced Nursing Care of Adults - Leadership, 6 Units
This course involves the application of pathophysiological, psychosocial, and spiritual concepts to adult and geriatric clients experiencing the stress of illness in acute settings. The primary focus of the course is to care for critically ill clients and their families with complex health care needs in a critical-care setting. A second area of focus is on the utilization of leadership and management concepts/skills in providing comprehensive care to groups of clients and families. Emphasis is placed on preparing the student to practice in a beginning leadership role in managing client care. Legal and ethical issues related to acute care are included.
Prerequisite: Admission to the ELM program;
Corequisite: Practicum

GNRS 589, Adolescent Health Care, 2-4 Units
This course focuses on the growth and development of adolescents, including assessment, prevention, and management of common health and psychosocial problems in this population. Emphasis is on age-appropriate and culturally competent provision of primary health care to adolescents in a family system.
Prerequisite: Graduate status in the School of Nursing; 2-unit version of this course requires prior completion of GNRS 610, while the 4-unit version requires prior completion of GNRS 610, GNRS 611, and GNRS 511 or GNRS 612.
GNRS 590A, Primary Health Care of the Young Family, 6 Units
This combined theory and clinical course focuses on management of health care of children (from birth through adolescence) and their families. Theory and clinical experiences emphasize assessment, prevention, and management of physiological, social, emotional, intellectual, spiritual, and educational needs of the child as an individual and as a family member. The effects of culture on development, parenting, and health care practices are emphasized. The course provides theory and clinical experiences in the management of normal and common pathological conditions to prepare students for advanced nursing practice in the role of nurse practitioner.
Prerequisite: Advanced Practice Core courses;
Corequisite: Practicum

GNRS 590B, Clinical Practicum in Pediatrics, 4 Units
The student develops expanded skills in the comprehensive assessment and management of common childhood illnesses and problems and continues to gain skill in promoting child wellness. Application of theory and research is emphasized in the care of common illnesses throughout the childhood years.
Prerequisite: GNRS 511 or GNRS 612, and GNRS 590A

GNRS 590C, Primary Health Care of the Young Family for the School Nurse Services Credential, 6 Units
Using a system-based approach, this combined didactic and practical course focuses on assessment, nursing interventions, and follow-up for common illness presentations in children, as well as illness-related impact on social, emotional, and educational functioning. The effects of culture on child development, parenting, and healthcare practices is also emphasized.
Prerequisite: GNRS 612;
Corequisite: Practicum

GNRS 590D, Primary Health Care of the Young Family, 3 Units
This theory course focuses on management of health care of children (from birth through adolescence) and their families, with an emphasis on assessment, prevention, and management of physiological, social, emotional, intellectual, spiritual, and educational needs of the child as an individual and as a family member. The effects of culture on development, parenting, and health care practices are emphasized. The course provides theory in the management of normal and common pathological conditions to prepare students for advanced nursing practice in the role of nurse practitioner.
Prerequisite: Advanced Practice Core courses

GNRS 591, Primary Health Care of the Childbearing Family, 4 Units
This course focuses on the assessment and management of the primary health care needs of the reproductive family. Emphasis is placed on health promotion and maintenance, disease prevention, curative, and restorative care. Cross-cultural aspects related to parents, male and female, of the childbearing family are addressed.
Prerequisite: Advanced Practice Core courses;
Corequisite: Practicum

GNRS 592A, Primary Health Care of the Adult and Aging Family, 6 Units
This combined theory and clinical course focuses on the role of the nurse practitioner (NP) in caring for mature adults and aging family members, from young adulthood to elderly adulthood. Emphasis is placed on the management of common primary health problems of these age groups. The delivery of culturally competent primary health care interventions of young, middle-aged, and elderly adults is addressed.
Prerequisite: Advanced Practice Core courses;
Corequisite: Practicum

GNRS 592B, Primary Health Care Clinical Practicum, 2 Units
This course provides the final comprehensive clinical management experience, allowing FNP and AGNP students to apply knowledge gained throughout their course of study. Clinical conferences provide opportunity for discussion of role development issues and clinical case studies. Students engage in the clinical assessment and management of adults of diverse cultural backgrounds with routine and complex health problems in out-patient settings. Under the supervision of qualified preceptors and School of Nursing faculty, the student must complete his/her clinical hours and demonstrate mastery to perform the role of an entry-level nurse practitioner.
Prerequisite: Completion of clinical courses for the FNP or AGNP program track

GNRS 593, Psychosocial Primary Health Care of the Adult and Aging Family, 4 Units
This combined didactic and clinical course focuses on psychosocial primary health care of the mature and aging family. Didactic content and clinical experiences emphasize the advanced practice nursing role in the medical management of chronic illness with concurrent assessment for psychosocial stressors that impact the experience and management of chronic illness. Students learn to tailor patient-centered therapeutic strategies, including presence, multi-faceted functional assessment, motivational interviewing, stress reduction techniques and spiritual support to individual patients.
Prerequisite: Advanced Practice Core courses;
Corequisite: Practicum
GNRS 595, Special Topics in Nursing, 1-6 Units
In this course, a topic of current interest to students is examined in depth. Students analyze and evaluate topics/issues to reach and express a position, enhance personal development and/or to develop a particular project. If students elect this course more than once during their program, each such course must address a different topic.

Prerequisite: Graduate standing

GNRS 596, Foundations of Healthcare Informatics, 3 Units
This course provides an overview of basic concepts for practice in healthcare-oriented informatics. These core concepts include an introduction to clinical and translational informatics; foundational theory and practical application of clinical decision making and computerized decision support; healthcare systems and their organization; the special issues of administration, security, and operations of electronic records in the healthcare setting; human factors issues; information science in the healthcare domain; standards, terminologies, and the uniqueness of biomedical data; and a special focus on emerging technologies.

GNRS 597, Comprehensive Examination Directed Study, 1 Unit
This course guides the student through the process of demonstrating an integration of theoretical, clinical, and research knowledge. Critical thinking is enhanced through careful consideration of information presented during discussion. The examinations are taken as part of this seminar.

Prerequisite: Completion of all Academic Core and degree specialty courses. Final specialty course may be taken concurrently.

GNRS 598, Thesis, 1 Unit
A student initially enrolls in this option toward the latter part of the program for one unit of credit. The student registers for one unit of thesis credit each semester (two of three semesters per year) until the thesis is completed.

Prerequisite: GPA of 3.5 or above, chair's consent for thesis option, and completion of all Academic Core and Advanced Practice Core courses

GNRS 599, Readings/Independent Study in Nursing, 1-4 Units
A student may elect to pursue special interests for credit at any time during the program under the supervision of a faculty member. University policy states that the student must earn a grade in an independent study course in order to receive credit toward graduation.

Prerequisite: Graduate standing

GNRS 600, Nurse Practitioner Clinical Experience, 2-6 Units
The AGPCNP and NP programs require 765 hours of supervised direct patient care experience. Students in this course function in the role of student nurse practitioners under the direct supervision of approved preceptors, and receive feedback from their preceptors and from their clinical faculty. This course gives students an opportunity to complete the documentation necessary to be awarded clinical units. Students progressively integrate advanced-practice nursing competencies, demonstrate professional nursing behavior, and keep accurate records. Upon completion of 765 hours, students are given access to a clinical portfolio.

Prerequisite: GNRS 612 and faculty permission

GNRS 601, Primary Healthcare I: Adult and Aging, 3 Units
This course integrates knowledge from advanced pathophysiology, advanced pharmacology, and advanced health assessment and apply it to create a diagnostic hypothesis for common acute and chronic primary care health problems in adolescents, adults, and older adults. The course examines a variety of treatment options for each disease presented and for diseases that don’t respond to first-line therapy.

Prerequisite: GNRS 612
Corequisite: GNRS 600

GNRS 602, Primary Healthcare II: Population-based Health Interventions, 3 Units
Primary Healthcare II recognizes that individuals with healthcare needs belong to a variety of discrete groups. This course introduces population health principles to be integrated with psychosocial assessment, cultural competency, social determinants of health, and the nurse-client relationship to foster the development of competence to motivate patients in a way that respects their diversity and to assist them to find resources to address social vulnerabilities. Students will employ statistical analysis as well as nursing experience to analyze risk to create a patient education plan.

Prerequisite: GNRS 601
Corequisite: GNRS 600

GNRS 603, Primary Healthcare III: Restorative and Palliative Interventions, 3 Units
This course is designed to integrate disease management and communication techniques to support the physical, emotional, and spiritual transitions of chronic illness. The course examines developing a prognosis, transitioning care, interprofessional care planning, and care of the caregiver. Grounded in spiritual concepts, this course is designed to provide the student with tools to give patients and families unpleasant information that will likely evoke fear or sadness.

Prerequisite: GNRS 602
GNRS 610, Advanced Pathophysiology, 3 Units
This course builds on basic anatomy and physiology and undergraduate study of pathophysiology. It focuses on the development of an advanced understanding of the pathophysiologic mechanisms of human health disorders including those that are genetic. Diagnostic reasoning that facilitates the clustering of signs and symptoms leading to diagnosis is a key process undergirding the course. This course requires the integration of signs and symptoms, clinical testing (such as laboratory and radiologic studies), and pathophysiologic mechanisms with diagnoses. This course introduces epidemiological principles and methods to be applied to population health models.
Prerequisite: Graduate standing and undergraduate pathophysiology

GNRS 611, Advanced Pharmacology, 3 Units
This course builds upon basic knowledge in pharmacology and provides content essential for the advanced practice nurse to render appropriate pharmacological treatment in practice. Mechanisms of action, interactions, side effects, and prescribing guidelines for drugs commonly utilized across the life cycle are addressed. The course introduces the principles of pharmacogenomics and their application to clinical practice. Variations in pharmacological reactions attributed to cultural factors are emphasized. Strategies for fostering individual/family adherence to pharmacological regimens are examined. This course meets the requirements of the California Board of Registered Nursing in the application of a "furnishing number" by the advanced practice nurse in California.
Prerequisite: GNRS 610 (may be taken concurrently)

GNRS 612, Advanced Health Assessment and Diagnostic Reasoning, 4 Units
This course develops the graduate nurse's assessment skills and focus on the promotion of health in individuals across the age range and within family, community, and cultural contexts. Emphasis is on adapting and expanding the medically focused history and physical assessment to incorporate the assessment of traditional and nontraditional therapies and identify culturally relevant and age-appropriate health promotion strategies for common episodic complaints and chronic health conditions. Outcomes are examined in light of theoretical concepts. Strategies for health promotion include a focus on lifestyle, mental health, nutrition, counseling to modify risk factors, and screening tests/prophylaxis for the early detection and prevention of disease.
Prerequisite: Undergraduate health assessment and GNRS 610;
Corequisite: lab

GNRS 613, Graduate Statistics, 3 Units
This course presents the knowledge of descriptive, correlational, and inferential statistics used in research that serves as the basis for evidence-based practice. Students develop the ability to perform descriptive and inferential data analysis techniques, use software applications to aid in statistical calculations and presentation, and interpret findings.

GNRS 616, APRN Intensive II, 1 Unit
This is the second of four APRN Intensive courses that give NP students an interactive experience through out-of-classroom work. Course activities and games will evaluate the student's ability to perform the clinical role of the NP. Students will understand and develop the skills of virtuous leadership and collaboration from a biblical perspective.
Prerequisite: GNRS 615;
Corequisite: GNRS 601

GNRS 617, APRN Intensive III, 1 Unit
This is the third of the APRN intensives that give APRN students an interactive experience with out-of-classroom work that includes team activities, simulation experiences, and problem-solving activities. Topical content includes managing patients with complex co-morbidities, ethical reasoning, and advanced communication skills. Students will be observed performing the professional and clinical skills of the APRN.
Prerequisite: GNRS 616;
Corequisite: GNRS 602

GNRS 618, APRN Intensive IV, 1 Unit
This is the fourth of the APRN intensives that give APRN students an interactive experience with out-of-classroom work that includes team activities, simulation experiences, and problem-solving activities. Topical content practice-based quality improvement, office-based procedures, and certification exam preparation. Students will be observed performing the professional and clinical skills to demonstrate readiness to enter NP practice.
Prerequisite: GNRS 617; Faculty permission.

GNRS 620, Genome Science in Healthcare, 3 Units
This course covers basic genomic concepts and technologies intended for personalizing healthcare. The primary goal is to provide the student with clinically relevant knowledge that can be used in practice and for teaching other healthcare professionals, patients and families. Applications of genome science and technology are analyzed in the context of real world examples taken from a variety of clinical specialty areas to better understand the relation between genomics, health, and illness.
GNRS 622, Genome Science and Ethical Issues, 3 Units
This course examines current applications and implications of genome science and technology to healthcare, public health policy, economics, ethics, federal and state laws and societal issues. The following discussion topics are at the leading edge of healthcare and social debate: DNA biobanking, genetic profiling, and genomic technologies used in genome medicine such as stem cell research, gene therapy, and genetic enhancements. In addition, the course addresses ethics, philosophy, and theology literature to explore thoughtful discussions that cover a wide range of genome applications in healthcare and health science research.
Prerequisite: GNRS 620

GNRS 630A, Oncology Nurse Practitioner Fellowship A, 4 Units
This course is the first in a series of three fellowship courses that enhance students' critical thinking, diagnostic reasoning, and interpretation and management skills for advanced practice nursing in the field of oncology. Students gain a deeper understanding of the sciences necessary for enhanced role development, knowledge, and skills for advanced practice nursing scholarship, and practice in a designated appropriate setting under the direction of a faculty advisor in collaboration with selected clinical experts, with a focus on exploring the development and scientific underpinnings of components of expert clinical oncology practice.
Prerequisite: Enrollment in the oncology nurse practitioner fellowship certificate program.

GNRS 630B, Oncology Nurse Practitioner Fellowship B, 4 Units
This course is the second in a series of three fellowship courses that enhance students' critical thinking, diagnostic reasoning, and interpretation and management skills for advanced practice nursing in the field of oncology. Students gain a deeper understanding of the sciences necessary for enhanced role development, knowledge, and skills for advanced practice nursing scholarship, and practice in a designated appropriate setting under the direction of a faculty advisor in collaboration with selected clinical experts, with a focus on exploring the development and scientific underpinnings of components of expert clinical oncology practice.
Prerequisite: Enrollment in the oncology nurse practitioner fellowship certificate program.

GNRS 630C, Oncology Nurse Practitioner Fellowship C, 4 Units
This course is the third in a series of three fellowship courses that enhance students' critical thinking, diagnostic reasoning, and interpretation and management skills for advanced practice nursing in the field of oncology. Students gain a deeper understanding of the sciences necessary for enhanced role development, knowledge, and skills for advanced practice nursing scholarship, and practice in a designated appropriate setting under the direction of a faculty advisor in collaboration with selected clinical experts, with a focus on exploring the development and scientific underpinnings of components of expert clinical oncology practice.
Prerequisite: Enrollment in the oncology nurse practitioner fellowship certificate program.

GNRS 631, ONP: Cancer Biology and Assessment, 2 Units
This course builds on knowledge of the anatomy and physiology of DNA, RNA, and differentiated and nondifferentiated human cells. Focus is on the pathophysiologic mechanisms of human cancer disorders. Diagnostic reasoning that facilitates the clustering of signs and symptoms is a key process undergirding the course. The course also provides the foundation for the integration of diagnostic testing, physical assessment, and understanding of the predictable pathophysiology of cancer in order to stage tumors and predict metastatic risk in individuals.
Prerequisite: Admission to the Oncology Nurse Practitioner Post-Master's Certificate program.

GNRS 632, ONP: Cancer Therapeutics, 2 Units
This course builds on knowledge of the predicted behavior of human cancer. Technology in cancer treatment is evolving rapidly, and this course provides a pathophysiologic foundation for understanding cancer protocols. Current cancer protocols, classes and categories of therapeutics, technologies in development, and tumor resistance are discussed, along with the cost benefit, side effects, and availability of the covered therapeutics.
Corequisite: GNRS 631

GNRS 633, ONP: Symptom and Side Effect Burden, 2 Units
Patients with advanced cancer often suffer significant symptomatic burden and the iatrogenic complications of treatment. This course helps students develop a patient-centered approach to evidence-based management of common symptoms of cancer and side effects of treatment.
Prerequisite: GNRS 631 and GNRS 632

GNRS 634, ONP: Survivorship and the Psychosocial Impact of Cancer, 2 Units
Cancer patients and their caregivers face complicated psychological, financial, and spiritual changes, beginning at diagnosis and extending into the posttreatment phases. This course covers the common problems related to those changes, and best-practice strategies and techniques to help patients and families cope with cancer.

GNRS 635, ONP: Team-Based Care and the Role of the Oncology Nurse Practitioner, 2 Units
The clinician role of the oncology nurse practitioner requires familiarity with the incidence, prevalence, and risk assessment competencies for all common cancers. In addition, the oncology nurse practitioner must be prepared for a wide variety of leadership roles. Strategies for care coordination, designing and measuring interdisciplinary team outcomes, mentoring, collaborating with primary care providers, and rapid-cycle quality improvement are examined.
GNRS 636, ONP: Clinical Trials in Oncology Nursing, 2 Units
The advanced-practice oncology nurse practitioner is prepared to provide direct patient care, design a plan for outcome evaluation, and take a leadership role in medical and nursing oncolgical research.
Prerequisite: GNRS 610, GNRS 611, GNRS 612, and GNRS 613

GNRS 650, History of Professional Nursing: From Origins to Nursing in Transition, 3 Units
Students in this course explore conceptual and methodological issues in historical nursing research, including the use of biographic methods in nursing history and working with primary sources/archival materials/artifacts and material culture. Focus is on the origins of professional nursing up to the period of nursing in transition in the United States. Students examine ethics guidelines and standards for historical research in nursing, and critically analyze the origins of nursing and early nursing contributions to the evolution of modern health systems and interventions. Class discussion and composition facilitate critical thinking about the history of nursing as a scholarly inquiry, focusing on issues and methods of nursing historical research.

GNRS 651, History of Professional Nursing: From Colonial Times to Present Day, 3 Units
Students in this course explore the foundations of professional nursing in the United States in the context of influential historical, global, societal, and scientific events. Students examine issues faced by nurses from colonial times to today, critically analyzing nurses' contributions to the development of modern health systems and interventions. Class discussion and composition facilitate critical thinking about the history of nursing as a scholarly inquiry, since historical perspectives form the basis for analysis of contemporary healthcare issues and projected development of the nursing profession, its practice, and healthcare policy.

GNRS 660, Theories of Teaching and Instruction, 3 Units
This course analyzes selected teaching and learning models that are applicable to nursing education. Strategies for classroom and clinical teaching are examined. Research relative to nursing education is reviewed and critiqued. Design of research methods to determine effectiveness of teaching strategies is incorporated. Course development and student evaluation are emphasized. Selected faculty and nursing education issues are also explored.

GNRS 661, Leadership and Role Development in Nursing Education, 3 Units
This course includes an analysis of educational leadership and the multiple roles of the nurse educator related to teaching, scholarship, service, and practice. Theoretical perspectives and practical approaches supported by research in nursing and higher education literature, as well as the Christian educator’s role promoting faith integration, are addressed.

GNRS 662, Assessment, Curriculum, Development, and Outcomes, 3 Units
This course addresses theoretical approaches to educational assessment, the development and implementation of nursing curriculum, and student and program outcomes. Emphasis is given to the importance of incorporating Christian values in the curriculum. The course also includes critical analyses of related topics based upon current research in nursing and higher education literature.

GNRS 663, Clinical Practicum in Nursing Education, 3 Units
This practicum course builds on the academic and clinical preparation of previous courses and prepares students to teach in academic and clinical settings. Under the supervision of a preceptor, this practical classroom experience focuses on: a) writing of learning/teaching objectives, b) selecting teaching strategies and learning activities, c) designing and implementing teaching plans for units of instruction, d) evaluating student learning outcomes, and e) obtaining feedback on teaching performance from faculty mentors/preceptors, fellow students, and self-evaluation and reflection. It is recommended that students take GNRS 660, GNRS 661, and GNRS 662 prior to taking this class. GNRS 664 may be taken concurrently.

GNRS 664, Teaching and Learning Strategies for Nursing Education, 3 Units
This course equips academic nurse educators to develop and evaluate teaching and learning strategies that facilitate learning in different nursing educational settings. Course material includes examining the challenges nursing faculty face in implementing this role, and strategies to successfully navigate those challenges. Also included are two projects to prepare students for the application process of the nurse educator. It is recommended that students take GNRS 660 prior to taking this class.

GNRS 665, Special Topics, 1-4 Units
A subject of current interest is examined in depth. Students analyze and evaluate controversial issues to reach and express a reflective position. This course may be repeated for credit to a maximum of 6 units applied toward the MSN or PhD degree; each course must address a different topic.

GNRS 700, Philosophy of Science, 3 Units
This course equips students with the knowledge and critical analytic skills to comparatively evaluate the philosophical foundations of scientific theories and the influence of Western philosophical schools of thought on the development of nursing science. Course content is organized to engage students in discussion and critical analysis of the epistemological and philosophic foundations of scientific theories and the characteristics of scientific knowledge according to the received view, paradigmatic view, perceived postmodern view, and feminist tradition. Special emphasis is given to the critical debate within nursing about the nature of nursing science.
GNRS 701, Nursing Knowledge Development, 3 Units
Students in this course focus on analyzing and critiquing the theoretical and methodological processes that are utilized in theory building and knowledge development in nursing. Discussion and critique of the different stages of theory development and students’ experimentation with conceptualizing and developing their theoretical stance go hand in hand. Patterns of knowing, knowledge development, and criteria for evaluating nursing knowledge are examined in relation to the discipline's domain and the phenomena of concern in nursing.

GNRS 702, Nursing Theory, 3 Units
This course focuses on strategies for theory development such as concept analysis, conceptual mapping, and theoretical modeling as applied to the student's phenomenon of concern. It also provides critique and analysis of the major models and theories used in a variety of nursing settings in relation to existing interdisciplinary theoretical knowledge.

GNRS 703, Spirituality and Health, 3 Units
This course provides an introduction to spirituality, including spiritual experience, as it relates to individual health and illness. Communal spirituality is also considered. Differentiation is made between and among generic religious and Christian spiritualities. While the course covers theoretical aspects of spirituality and their interaction with health and illness, concentration is on the movement from theory to praxis. This lecture/seminar course is oriented toward nursing educators who seek to develop a foundation in spirituality for spiritual integration as well as for its development in nursing practice.
Prerequisite: Admission to DNP or PhD program

GNRS 704, Faith Integration and Nursing Scholarship, 3 Units
This course begins with an exploration of the nature, role, problems, and possibilities of faith integration in higher education and in the nursing curriculum at all levels of higher education. The special circumstances of faith integration and its implications for teaching in secular college settings are explored. This course further provides a critical explication of theological method and content in three domains: biblical hermeneutics, constructive theology, and ministry praxis for education. The focus of the course is on the appropriateness of theological method and knowledge for purposes of integration into nursing education and practice especially (but not exclusively) within the context of a Christian or church-affiliated college.

GNRS 705, Social Ethics and Health Policy, 3 Units
This course seeks to provide a social ethics frame of reference for health care. Medical and biological advances have contributed to a rapidly expanding amount of human control over human and natural processes, including genetic potential and behaviors. This new power raises questions of morality and highlights the need for discussion and legislation regarding the complex issues raised by developments in health care, medical technology, and science. A comprehensive social ethic places decisions about health care within the context of a fuller account of purpose and meaning in life.
Prerequisite: Admission to DNP or PhD program

GNRS 706, Methods of Inquiry, 3 Units
Students in this course explore various methods of inquiry as they focus on the difference between scientific thinking, wisdom, and alternative concepts of knowledge. Existential dilemmas intrinsic to the pursuit of truth, the exploration of the meaning of actions, the process of reason and interpretation, the perception of reality, and empirical generalizations are discussed, and their influence on the definition of research problems and designs is explored. Research designs and methods are introduced as they relate to problem definition and theory, including an overview of the principles of basic and applied experimental research, evaluation research, and the traditions and foundation of qualitative and historical research. Students are required to explore, synthesize, and debate current issues that will affect their research careers.
Prerequisite: Admission to DNP or PhD program

GNRS 707, Quantitative Nursing Research Design I, 3 Units
This course focuses on advanced multiple research designs and data collection approaches. Emphasis is on experimental and quasi-experimental designs, epidemiological methods, survey research, and evaluation and outcomes research, as well as on planning design and sampling. Inferential statistics and advanced statistical analysis methods including ANOVA and various types of multiple regression analysis are incorporated within the course content.
Prerequisite: Admission to DNP or PhD program

GNRS 708, Qualitative Nursing Research Design I, 3 Units
This course focuses on analyzing the epistemological foundations and the assumptions of qualitative research methodologies. It provides an introduction to the major qualitative research methodologies including grounded theory, phenomenology, and ethnography. Each methodology is analyzed as to its appropriateness for the research question. Experience in carrying out a pilot study in the selected methodology is provided.

GNRS 709, Advanced Statistical Analysis II, 3 Units
This course presents advanced methods of quantitative inquiry. The emphasis is on the use of factor analysis, confirmatory factor analysis, path analysis, and structural equation modeling. Assumptions of the techniques are addressed. The course provides the student experience in using statistical packages for entering and analyzing data. Reporting results of the analyses is also incorporated. Making appropriate decisions regarding which of the advanced statistical techniques to use is stressed. Critique of the advanced statistical analyses of published health care research is also emphasized.
Prerequisite: GNRS 707
GNRS 710, Advanced Qualitative Research Methods, 3 Units
This course provides advanced knowledge and training in the use of qualitative research methods including phenomenological interpretation, grounded theory interpretation, ethnographic interpretation, focus groups interpretation, and feminist interpretation. Intensive interpretive and structured approaches to analysis and methods of establishing plausibility, credibility, and adequacy of qualitative data are emphasized.
Prerequisite: GNRS 708

GNRS 711, Advanced Research Methods in the Humanities, 3 Units
This seminar and consultation course introduces PhD students to nonscientific research methodologies as used in the arts, letters, humanities and aspects of the social sciences for the (a) conduct of original dissertation research on one of the disciplines of arts, letters, humanities, or nonscientific aspects of one of the social sciences, (b) conduct humanities-based research to widen and deepen a scientific dissertation topic, or (c) to enlarge the student's methodological repertoire, knowledge, and skill. The course is intended for those whose primary research education and experience has been in scientific methods and disciplines. (Enrollment limited to eight.)
Prerequisite: (a) successful completion of GNRS 701 and GNRS 706. (b) permission of the instructor

GNRS 712, Healthcare Quality Improvement, Program Planning, and Evaluation, 3 Units
This course bridges the gap between the uptake of new health research discoveries and their translation, adaption, and implementation in practice. Course content includes the examination, integration, and application of quality improvement, program planning, and evaluation processes, strategies, and tools. The outcome of the course is a well-designed evaluation plan for an evidence-based quality improvement project.
Prerequisite: Admission to DNP or PhD program

GNRS 713, Advanced Statistical Analysis I, 3 Units
This course presents common nonparametric and parametric statistical techniques used in healthcare research. Assumptions of the techniques are addressed. Specifically, the course emphasizes t-tests, ANOVA, ANCOVA, RANCOVA, correlation, odds ratio, regression, and power analysis, and provides the student experience in using SPSS for entering and analyzing data. Reporting results of the analyses is also incorporated. Making appropriate decisions regarding which statistical techniques to use is stressed. Critique of statistical analyses of published healthcare research is also emphasized.

GNRS 715, Psychosocial Issues of Older Adults, 3 Units
This course focuses on the biological and psychosocial processes throughout adulthood and the older years. Theories of aging are examined, as well as social role changes, social stratification, and the development of institutions of the aged. The course explores both normal aging and psychopathology, and the systematic intrinsic psychological or personality changes associated with development and adaptation in later life. Other topics include clarification of the causes and prevention of health maladies in the later years, and the nature and treatment of the most common psychopathologies. The psychodynamics of institutionalization and family care of the very old are also examined.

GNRS 716, Translation of Research to Practice, 3 Units
The goal of this core course is to help prepare Doctor of Nursing Practice (DNP) nursing students to be nurse scholars and to identify strategies within a multidisciplinary model and in intraprofessional relationships that promote the ready translation of research into practice. This course exposes DNP students to evidence-based practice, quality improvement methodologies, concepts and theories, and deepens their knowledge regarding the phenomenon of interest. This prepares them for foundational competencies needed for evidence-based problem identification, PICOT writing, literature search, integrated literature review, evidence appraisal, and synthesis. There are iterative assignments to develop skill and the milestone assignment is a final integrated review and synthesis paper with in-depth knowledge of their phenomenon (vs. topic) of interest.
Prerequisite: Admission to DNP or PhD program

GNRS 717, Health Technology and Informatics, 3 Units
This course presents an overview of the evolution of health care informatics from an interdisciplinary perspective. Students learn health care informatics history, concepts, theories, legal and ethical implications, and applications within the health care industry. This course introduces the student to the information system life cycle, human factor issues in health care informatics, critical issues affecting the development and implementation of information and communication systems and technologies (clinical, administrative, and learning), knowledge management principles, professional practice trends, and emerging ICT (information and communication technology) in health care.

GNRS 718, Organizational Leadership and Strategic Planning, 3 Units
In this core course, students acquire knowledge and skill to effectively manage systems level change, empower others, and influence political processes. Advanced nursing practice leadership occurs in clinical practice with clients and staff, within healthcare institutions, professional organizations, and in healthcare policy making arenas, using knowledge of nursing and other professions to address healthcare needs and direct interprofessional activities and initiatives. To develop the leadership role, students implement strategies for creating organizational change to provide high-quality services and outcomes at reasonable costs and lead the development of a business plan for quality improvement initiatives. Students advocate for change related to financial policies that impact the relationship between economics and quality care delivery. Focus is on organizational process, including the associated management of conflict, change, promotion of safety for clients and providers, and control of risk within a dynamic healthcare environment.
Prerequisite: Admission to DNP or PhD program
GNRS 720, Wellness Promotion and Health Maintenance, 3 Units
This course focuses on the critical appraisal of theories and models of health promotion and on the evaluation of health initiatives developed for national health promotion and maintenance. Relevant risk prevention, control, and health promotion intervention strategies are emphasized. Communicable diseases; health hazards; high-risk health factors; acute and chronic illness across ethnicities, genders, and the life span; and morbidity and mortality of the nation's leading health problems are analyzed. Students' research questions are generated from a synthesis of knowledge regarding a specific phenomenon relevant to the student's individual area of study.
Prerequisite: Admission to DNP or PhD program

GNRS 721, Health Disparities and Vulnerable Populations, 3 Units
This course offers an analysis and evaluation of various topics and issues on health disparities of underserved ethnic or minority vulnerable populations as well as an analysis of research that describes, explains, and examines variables influencing health disparities and intervention strategies to reduce these disparities.

GNRS 722, Research in Nursing and Health, 3 Units
This course is team taught and reflects the research expertise and program of study of the nursing doctoral faculty. It focuses on analysis of determinants of health and illness across demographic, biological, psychological, familial/cultural, and societal dimensions. Attention is given to theoretical explanations toward promoting development of students' programs of research.

GNRS 724, Quantitative Nursing Research Design II: Psychometrics, 3 Units
This course introduces students to the methods of survey research. Course material covers practical considerations in the construction of questionnaires, including determining questionnaire content, selection of item types and wording of items, selection of an administration method, piloting questionnaires, and locating existing questionnaires. Discussions about conducting survey research focus on sample selection, analyzing information obtained from questionnaires using SPSS, evaluating questionnaires, sources of error, and how to reduce measurement error in survey research.
Prerequisite: GNRS 707

GNRS 725, Research Practicum, 1 Unit
The practicum further develops, mentors, and socializes students into the roles and activities of research scientists and scholars. Emphasis is on mentoring to facilitate student progression in research methodology, culturally appropriate research strategies, data management, and data analysis. Students can chose either a quantitative or qualitative practicum experience.

GNRS 726, Advanced Scientific Writing, 3 Units
This course provides opportunities for students to learn how to research and introduce a topic in writing, articulate a thesis statement, support and develop a literature review, work with secondary sources, and organize a written paper that can be developed into a dissertation or translational research paper.

GNRS 727, Genome Science in Clinical Cases and Disease Management, 3 Units
This course focusing on medical family history taking, constructing and analyzing the pedigree, genetic counseling, clinical decision making and clinical case management for a wide variety of inherited and acquired diseases through the lens of emerging genome science. Clinical cases are discussed from a holistic perspective including: genome science, epidemiology, genomic profiling, genetic technologies, personalized medicine, interprofessional collaboration, ethical and legal issues, and health policy.
Prerequisite: GNRS 620

GNRS 728, Genome Science Research Methods, 3 Units
This course focuses on genome research methods for understanding and translating genome science to practice and to genome related nursing research. Understanding the research methods fosters a deeper understanding of the strength and the weaknesses of the science and an ability to critique the benefits and the limitations of the science for designing nursing research. The course includes a wide range of research methods that explore genetics or genomics in human populations. A key outcome of this course is to develop a research proposal using genome methods to design nursing research aimed at improving quality of health for individuals, families and populations.
Prerequisite: GNRS 620, GNRS 622, GNRS 727

GNRS 729, Population Health and Epidemiology, 3 Units
The concept of population health includes aggregate, community, environmental/occupational, and cultural/socioeconomic definitions of health. The implementation of clinical prevention and population health activities is central to achieving the national goal of improving health status and reducing health disparities among different aggregate groups. This course covers the basic elements and methodological concepts used in the epidemiologic study of factors related to health promotion and disease prevention in human populations. It brings together considerations from several fields of investigation, such as epigenetics, epidemiology, psychology, and public health, to study the effects on health and health-related outcomes.
Prerequisite: Admission to DNP or PhD program
GNRS 730, Comparative Health Care Systems, 3 Units
This course focuses on exploring/analyzing environmental, social, cultural, political and economic determinants of health across the globe. Comparative analysis of international health care systems including governmental, nongovernmental, traditional, and faith-based organizations are emphasized. Epidemiological analysis of morbidity and mortality, analysis of health and illness responses, and health-seeking behavior across the age span and gender/ethnic variables are discussed with the intent to identify areas of research relevant to students' interest. Presented from a Christian perspective, this course investigates research and practice opportunities and responsibilities for advanced practice nurses in global arenas.

GNRS 732, DNP Clinical Residency, 0 Units
This course provides students enrolled in the Doctor of Nursing Practice (DNP) program with opportunities to develop professional nursing skills at the doctoral level. The focus of the course is to explore the development and scientific underpinnings of components of expert advanced clinical practice. Students select a population of interest for the DNP clinical residency and apply evidence-based practice and research findings in order to develop and improve practice. Over the course of the DNP program, students integrate previous nursing education and practice experiences with the DNP residency and concurrent doctoral coursework to meet the AACN Essentials of Doctoral Education for Advanced Nursing Practice and complete a DNP scholarly project. The course may be repeated to enable the student to obtain a minimum of 1,000 residency hours. Previous hours from graduate clinical courses may apply, so residency hour requirements will vary.
Prerequisite: Admission to DNP program

GNRS 733A, Residency IA, 1 Unit
This is the first in a series of three residency courses designed to enhance students’ critical thinking, diagnostic reasoning, interpretation, and management skills for advanced clinical practice. This course broadens and enhances understanding of the sciences necessary for enhanced role development, knowledge, and skills for advanced practice clinical nurse scholarship. Students practice in a designated appropriate setting under the direction of a faculty advisor in collaboration with selected clinical experts. The course focuses on exploring the development and scientific underpinnings of components of expert advanced clinical practice, and attention is given to the development of skills necessary to attain that goal. By the end of this course, students select their population of interest for their clinical residency and apply evidence-based findings to this population to identify potential areas of intervention.
Prerequisite: Admission to DNP program

GNRS 733B, Residency IB, 1 Unit
The second of a three-course sequence, this course may be taken concurrently with GNRS 733A and/or GNRS 733C with approval of the DNP director or designee. Grading: pass/fail

GNRS 733C, Residency IC, 1 Unit
The third of a three-course sequence, this course may be taken concurrently with GNRS 733A and GNRS 733B with approval of the DNP director or designee. Grading: pass/fail

GNRS 734A, Residency IIA, 1 Unit
The first of a three-course sequence, this course may be taken concurrently with GNRS 734B and GNRS 734C with approval of the DNP director or designee. Grading: pass/fail

GNRS 734B, Residency IIB, 1 Unit
The second of a three-course sequence, this course may be taken concurrently with GNRS 734A and/or GNRS 734C with approval of the DNP director or designee. Grading: pass/fail

GNRS 734C, Residency IIC, 1 Unit
This is the last of a three-course series of clinical residencies with a focus on transformative and collaborative leadership, including completion of the evidence-based practice project, assessment of project outcomes, and planned dissemination of findings. Students apply relevant clinical and research findings to develop and improve practice. Content emphasizes critical appraisal of skills and interventions necessary to ensure meaningful translation of scientific evidence into practice, including a cost-benefit analysis for implementing a change into clinical practice. The course also emphasizes the professional role of the nurse as a collaborator, leader, and provider of care with nursing colleagues and other members of the interprofessional healthcare team within the context of complex healthcare systems, preparing students to implement an advanced nursing practice role that results in practice and/or policy change at the local, state, and/or national levels.
Prerequisite: Successful completion of GNRS 733A, GNRS 733B, GNRS 733C, GNRS 734A and GNRS 734B

GNRS 735, DNP Scholarly Project Seminar, 3 Units
The DNP program requires a rigorous clinical project focused on translating scientific research to health care in a timely manner so that patients experience the best applications of science and practice. The project is a scholarly experience that implements the principles of evidence-based practice and translation under the guidance of a faculty mentor. In line with the AACN Essentials of 2007, the outcome of the DNP scholarly project is a tangible and deliverable academic product that is derived from the practice immersion experience and reviewed and evaluated by an academic committee. The project also serves as a foundation for future scholarly practice.
GNRS 736, DNP Scholarly Project Seminar: Evaluation and Dissemination, 2 Units
This course focuses on presentation to and approval of a completed DNP Scholarly Project. The DNP program requires a rigorous clinical project focused on translating scientific research to health care to improve the patients experience utilizing the best evidence of science and practice. This scholarly project is a culminating, independent experience which demonstrates the student's synthesis of coursework and lays the foundation for future scholarship.

GNRS 780, Doctoral Seminar I: Elements of a Proposal and IRB Application, 3 Units
This seminar directs the development of either a PhD dissertation or a DNP Scholarly Project proposal draft that details a problem, the research/project purpose, questions or hypotheses to be examined, a synopsis of the relevant literature, the design and methods of the study including its timeline, protection of human subjects, plans for analysis, and the budget. The seminar also includes preparation of IRB applications, and peer review and critique of student proposals.
Prerequisite: Admission to DNP or PhD program

GNRS 781, Doctoral Seminar II: Developing a Grant Proposal, 3 Units
This doctoral seminar provides students with the opportunity to acquire knowledge, skills, and insights in the writing of a grant proposal. Discussion will focus on the value of writing grant proposals, the basic principles in writing a grant proposal, the components of a grant proposal, identification of funding sources, the difference between a research and a program grant proposal, as well as administrative factors in submitting a grant proposal. Students will craft and a grant proposal in response to a Request for Funding Proposal (RFP) that aligns with the guidelines of the funding agency, and additionally, a budget plan with justification, timelines, and a bio-sketch. In addition, students will conduct a peer review of class completed grant proposals.

GNRS 782, Doctoral Seminar III: Writing for Publication, 3 Units
This seminar focuses on various aspects of writing for publication and directs the development of a manuscript suitable for publication from a previously written paper (e.g., a course term paper). This course will help the student get started on writing; identify writing styles for various forms of publication including abstracts, journal articles, papers, and books; and determine appropriate journals to consider for article submission. The student will acquire practice in reviewing and critiquing scholarly writing by others. It will also address the editorial and publication process, as well as ethical aspects of writing for publication.

GNRS 783, Doctoral Seminar IV: Developing Professional Presentations, 3 Units
This seminar course identifies approaches to developing an effective and successful presentation, helping students find their voice and showcase their areas of expertise. Discussions focus on planning as essential to deciding on the content and the order in which the information is presented. Emphasis is on developing a logical sequence, one that flows naturally and is accompanied by audiovisuals that facilitate understanding of the material.

GNRS 784, Dissertation Seminar V, 2-4 Units
This fifth dissertation seminar provides the student a forum to explore with their peers research findings, theoretical and empirical implications, and potential venues for publication of manuscripts. Format and procedures for progression in the dissertation process are also discussed. Placement of the Course: This seminar is not required if dissertation seminar requirement of 12 units has been met by GNRS 780, GNRS 781, GNRS 782, GNRS 783, and student has defended dissertation. Grading: Pass/Fail.
Prerequisite: GNRS 783

GNRS 791, Doctor of Nursing Practice Intensive I, 1 Unit
This is the first of four intensive courses that give DNP students a face-to-face interactive experience through out-of-classroom work. This course introduces students to the role of the DNP nurse in a variety of healthcare settings. Students acquire advanced practice and academic skills necessary for selecting a population of interest and applying evidence-based practice to it as part of an evidence-based DNP scholarly project consistent with the DNP role within a healthcare organizational setting.
Admission to the DNP program; corequisite: GNRS 716

GNRS 792, Doctor of Nursing Practice Intensive II, 1 Unit
This is the second of four intensive courses that give DNP students a face-to-face interactive experience through out-of-classroom work. This course helps students identify strategies within a multidisciplinary model that promotes evidence-based practice in various clinical, community, and educational settings. Students receive support and direction in collaboration with the sponsoring facility and mentor as they develop a comprehensive, site-specific DNP scholarly project proposal.
GNRS 791; corequisite: GNRS 776

GNRS 793, Doctor of Nursing Practice Intensive III, 1 Unit
This is the third of four intensive courses that give DNP students a face-to-face interactive experience through out-of-classroom work. This course equips students with the skills, competencies, and points of view needed for developing the ethical reasoning/decision-making skills necessary for conducting their DNP scholarly projects.
GNRS 792; corequisite: GNRS 771
GNRS 794, Doctor of Nursing Practice Intensive IV, 1 Unit
This is the last of four intensive courses that give DNP students a face-to-face interactive experience through out-of-classroom work. As in the other intensive experiences, course content for each student reflects the interests of the student and is designed to meet that student's needs and career goals. This course allows students, with guidance from their mentors and faculty, to complete the DNP scholarly project and finalize the written and oral scholarly reports that disseminate and integrate new knowledge. Each student's final product reflects their ability to employ effective communication and collaboration skills, take a leadership role, integrate core DNP concepts and competencies that influence healthcare quality and safety, and successfully negotiate change in healthcare delivery for individuals, families, populations, or systems across a broad spectrum of health care.
Prerequisite: GNRS 793;
Corequisite: GNRS 736

GNRS 795, Special Topics, 1-4 Units
In this course, a subject of current interest is examined in depth. Students analyze and evaluate controversial issues to reach and express a reflective position. Students may repeat the course for credit to a maximum of six units applied toward the doctoral program; each course must address a different topic.

GNRS 798, Continuous Doctoral Study, 0 Units
This course is for doctoral students working on dissertations or translational research projects. Students must re-enroll each semester until the dissertation or translational research project is completed, defended, submitted to the library, and approved.

GNRS 799, Independent Study, 1-4 Units
Students enroll in this course to pursue independent study investigating subjects and interests that lie beyond regular course offerings. The student explores topics in greater depth than in other courses, and/or initiates an individual project. Readings are pursued in accordance with a study plan, which is developed in consultation with a sponsoring doctoral faculty member and approved by the doctoral department

Entry-Level Master of Science in Nursing (ELM)

The Entry-Level Master of Science in Nursing (https://www.apu.edu/nursing/programs/entry-level-masters-in-nursing/) is an accelerated graduate nursing program designed for students who desire to enter the nursing profession and hold a baccalaureate or higher degree in other disciplines. During their first four semesters, admitted students complete all prelicensure courses (theoretical and clinical) in an accelerated format, as well as selected graduate nursing courses, followed by a clinical residency, in preparation for the RN licensure examination. Students then continue with courses and preparation leading to a Master of Science in Nursing (MSN).

This program meets the California Board of Registered Nursing (BRN) (https://www.rn.ca.gov/) requirements for licensure and is available at APU’s regional locations in Monrovia (https://www.apu.edu/monrovia/), San Diego (https://www.apu.edu/sandiego/), and the Inland Empire (https://www.apu.edu/inland/) (San Bernardino).

The ELM program prepares nurses to enter professional nursing and, subsequently, advanced practice roles. Students are prepared to take the NCLEX for RN licensure, to apply for a California PHN certificate, and to be eligible to apply for state certification, and may also apply for national certification by examination in advanced practice specialties upon successful completion of the required postlicensure courses.

Additional Requirements
At the beginning of clinical coursework, graduate students are required to provide documentation concerning certifications, results of background checks, screening tests, and immunizations. Refer to the Student Handbook and specific program manuals or course syllabi for details.

Program Requirements
The four-semesters-plus-clinical-residency prelicensure portion of this program is offered in an intensive cohort model format and must be taken in full-time study. Courses are offered primarily in a face-to-face format, on a fixed schedule, with required clinical experiences that may be scheduled Monday through Sunday on any shift.

1 Numbers in parentheses are classroom/clinical units.

2 This intensive period of clinical education and continuing preparation for practice takes place in a healthcare agency under the direct supervision of a clinical preceptor and supported by clinical faculty in the graduate program. At the same time, students review prelicensure subject matter in preparation for NCLEX examination (RN licensing exam). Successful completion of the clinical residency is required to complete the prelicensure portion of the program. The BSN is awarded at the completion of the prelicensure portion of the program.

**NOTE:** Before taking advanced practice clinical courses for completion of the MSN degree, the student must achieve the passing score required by the California BRN on the NCLEX exam.

**Postlicensure**

In addition to coursework and clinical practicums, postlicensure students are expected to have outside clinical work experience.

To ensure that credit will be given, students should request approval prior to taking coursework at outside institutions. A maximum of 6 units may be transferred in with prior approval.

Students must take 7 units of electives during this component of the program. Students' programs are planned individually according to course sequencing for their clinical specialty. As an alternative to full-time study, students may elect to complete master's degree requirements in a part-time format while taking courses each semester. Courses are offered in several modalities and will vary depending on the postlicensure specialty track. These include face-to-face, online asynchronous, and online synchronous options.

Students may elect to write a thesis or take a comprehensive exam to complete the degree. Any student who elects to write a thesis must take GNRS 514.

**Admission**

University graduate admission and program-specific requirements must be met before an application is complete (see Admission to the University (p. 1092)). Program-specific application requirements are available online (https://tracking.cirrusinsight.com/74647a2d-e9a2-412f-9b55-9959c7aaec4ec/apu-edu-graduateprofessionalcenter-admissions-requirements-program/).

International students should contact Graduate and Professional Admissions (https://www.apu.edu/graduateprofessionalcenter/admissions/) for application procedures.

**Program Learning Outcomes**

**Program Learning Outcomes**

Students who successfully complete this program shall be able to:

1. Articulate a Christian worldview, demonstrating respect for the dignity and uniqueness of others, valuing diversity, and applying spiritual concepts.

2. Engage in scholarly inquiry and critical thinking, including evaluation and application of evidence-based research.
3. Appraise and apply knowledge to develop, implement, and evaluate interventions that promote health and prevent disease.
4. Demonstrate thoughtful analysis of the legal, political, ethical, and/or financial factors impacting healthcare.
5. Use information systems and technology to communicate, manage knowledge, promote quality, mitigate error and support decision-making.
6. Demonstrate the ability to coordinate and collaborate with other health care team professionals.
7. Engage in clinical reasoning, effective communication, and act as change agents to develop professional identity and practice skill.

**ELM-MSN: Adult-Gerontology or Pediatric Clinical Nurse Specialist (CNS)**

The Master of Science in Nursing with Adult-Gerontology (https://www.apu.edu/nursing/programs/adult-cns-certificate/) or Pediatric Clinical Nurse Specialist (CNS) (https://www.apu.edu/nursing/programs/pediatric-cns-certificate/) program allows students to concentrate on one of these two clinical areas of content and practice. Nurses with advanced practice preparation may work in acute, primary, or long-term care settings. Students learn the process of developing and sustaining evidence-based practice in illness management, advancing the practice of other nurses and nursing personnel, and developing organizational or systems modifications to support and improve nursing practice. The traditional CNS roles of expert clinical practice, consultation, clinical leadership, research, and education are shaped toward producing desirable patient outcomes as the CNS works in several spheres of influence. Graduates are eligible to apply to the state of California for certification as clinical nurse specialists, and may apply for national certification through examination by the American Nurses Credentialing Center (ANCC).

Contact the School of Nursing (https://www.apu.edu/nursing/) for specific program availability and locations. Prelicensure coursework (p. 903) must be completed prior to beginning advanced practice nursing coursework.

ELM-MSN: Adult-Gerontology Primary Care Nurse Practitioner (AGPCNP)

This specialty program prepares students to be nurse practitioners for patients across the adult years in a primary healthcare setting. Graduates are eligible to apply to the state of California Board of Registered Nursing for certification as a nurse practitioner and may apply for national AGPCNP certification through examination. This advanced clinical practice specialty includes direct patient assessment, diagnosis, management and treatment, client advocacy, client/family education, consultation, and program planning, implementation, evaluation, and research.

Contact the School of Nursing for specific program availability and locations. Prelicensure coursework must be completed prior to beginning advanced practice nursing coursework.

ELM-MSN: Healthcare Administration and Leadership

The entry-level master’s option in healthcare administration and leadership prepares nurses for early to mid-level management and leadership roles in a variety of healthcare settings. Students acquire the knowledge and skills necessary to lead and manage a team of healthcare providers in organizations, functioning in areas such as operations management, project management, and healthcare consulting. The program emphasizes competencies needed for graduates to apply for the American Nurses Credentialing Center (ANCC) and American Organization for Nursing Leadership (AONL) nursing leadership certification exams.

Contact the School of Nursing for specific program availability and locations.

Prelicensure coursework must be completed prior to beginning Healthcare Administration and Leadership coursework. Students must have the equivalent of one year of RN clinical experience prior to enrollment in GNRS 567 Healthcare Administration and Leadership Supervised Practicum.

Admission

University graduate admission and program-specific requirements must be met before an application is complete (see Admission to the University (p. 1092)). Program-specific application requirements are available online (https://tracking.cirrusinsight.com/74647a2de9a2-412f-9b55-9959c7aad4ec/apu-edu-graduateprofessionalcenter-admissions-requirements-program/).

International students should contact Graduate and Professional Admissions (https://www.apu.edu/graduateprofessionalcenter/admissions/) for application procedures.

Program Learning Outcomes

Program Learning Outcomes

Students who successfully complete this program shall be able to:
1. Articulate a Christian worldview, demonstrating respect for the dignity and uniqueness of others, valuing diversity, and applying spiritual concepts.
2. Engage in scholarly inquiry and critical thinking, including evaluation and application of evidence-based research.
3. Appraise and apply knowledge to develop, implement, and evaluate interventions that promote health and prevent disease.
4. Demonstrate thoughtful analysis of the legal, political, ethical, and/or financial factors impacting health care.
5. Use information systems and other technology to communicate, manage knowledge, promote quality, mitigate error, and support decision making.
6. Demonstrate the ability to coordinate and collaborate with other healthcare team professionals.
7. Engage in clinical reasoning and effective communication, and act as a change agent to develop professional identity and practice skill.

ELM-MSN: Nursing Education

The Entry-Level Master of Science in Nursing (ELM) (p. 903) option in nursing education (https://www.apu.edu/nursing/programs/masters-in-nursing-education/) prepares nurses for teaching roles in a variety of settings, including traditional and nontraditional academic settings, online/distance settings, and clinical and community settings, using cutting-edge technology and teaching-learning methods. The program emphasizes competencies needed for students to complete the Certified Nurse Educator (CNE) certification examination, and is aligned with the American Association of Colleges of Nursing’s The Essentials of Master’s Education in Nursing (AACN, 2011) and the National League for Nursing’s Nurse Educator Competencies (NLN, 2013).

Contact the School of Nursing (https://www.apu.edu/nursing/) for specific program availability and locations. Prelicensure coursework (p. 903) must be completed prior to beginning nursing education coursework. Students must have the equivalent of one year of RN clinical experience prior to enrollment in GNRS 663.

**Total Units** 44-50

1 Units in parentheses are classroom/clinical units.
Admission

University graduate admission and program-specific requirements must be met before an application is complete (see Admission to the University (p. 1092)). Program-specific application requirements are available online (https://tracking.cirrusinsight.com/74647a2de9a2-4121-9b55-9959c7acc4ec/apu-edu-graduateprofessionalcenter-admissions-requirements-program/).

International students should contact Graduate and Professional Admissions (https://www.apu.edu/graduateprofessionalcenter/admissions/) for application procedures.

ELM-MSN: Psychiatric Mental Health Nurse Practitioner (PMHNP) Specialty

This specialty master’s program (https://www.apu.edu/nursing/programs/psychiatric-nurse-practitioner/) prepares students for roles as psychiatric mental health nurse practitioners for clients with psychiatric and mental health problems across the lifespan. Students learn to work respectfully and collaboratively with clients/consumers who are experiencing severe or chronic mental illnesses to determine biopsychosocial healthcare needs within a complex and changing environment. Theory and clinical coursework focuses on assessment; differential diagnosis and disease management; intervention planning; individual, family, and group psychotherapy; health promotion; and disease prevention. Mental-health-related policy, and the application of research and evidence-based practice, informs the psychiatric mental health nurse practitioner.

The inherent equality and worthiness of those who are vulnerable and disenfranchised; the role of spirituality; the value of diversity; and the ability to engender hope, empowerment, self-responsibility, and a meaningful role in life are threaded throughout the program. Graduates are eligible to apply to the California Board of Registered Nursing for certification as a nurse practitioner, and may apply for national PMHNP certification through examination.

Contact the School of Nursing (https://www.apu.edu/nursing/) for specific program availability and locations. Prelicensure coursework (p. 903) must be completed prior to beginning advanced practice nursing coursework.

ELM-MSN: School Nurse Services Credential (SNSC) and Family Nurse Practitioner (FNP)

This combined specialty program prepares nurses to be effective practitioners of school health and provide primary care for people of all ages in a variety of other settings. Students develop theoretical and practical expertise in nursing and education applied to basic health services in public schools (K-12). This prepares nurses to establish, maintain, and coordinate a comprehensive school health program. The advanced practice family nurse practitioner specialty includes direct client assessment, diagnosis, management and treatment, client advocacy, client/family education, consultation, program planning, implementation, evaluation, and research.

Graduates are eligible to apply to the state of California for the School Nurse Services Credential, and to apply for certification as a Family Nurse Practitioner. They are also qualified for and may seek national FNP certification by examination through specialty organizations. For details about academic core, advanced practice core, and concluding courses, see the MSN program requirements. Students must also take a state-of-California-approved audiometry course to meet the SNSC requirements.

Contact the School of Nursing for specific program availability and locations. Prelicensure coursework must be completed prior to beginning advanced practice nursing coursework.

ELM-MSN: School Nurse Services Credential (SNSC) and Pediatric Nurse Practitioner—Primary Care (PNP-PC)

This combined specialty program prepares nurses to be effective practitioners of school health and provide primary care for children in a variety of settings. Through the program, students develop theoretical and practical expertise in nursing and education applied to basic health services in the public schools (K-12). This enables them to establish, maintain, and coordinate a comprehensive school health program. The advance practice pediatric primary care nurse practitioner specialty includes direct client assessment, diagnosis, management and treatment, client advocacy, and client/family education. Graduates are eligible to apply to the state of California for the school nurse services credential. They are eligible to apply to the California Board of Registered Nursing for certification as a nurse practitioner, and may apply for national PNP certification by examination. Students must take a California-approved audiology course to meet the SNSC requirements.

Contact the School of Nursing (https://www.apu.edu/nursing/) for specific program availability and locations. Prelicensure coursework (p. 903) must be completed prior to beginning advanced practice nursing coursework.

---

1. Units in parentheses are classroom/clinical units.
2. Students contemplating a nurse practitioner certificate may substitute GNRS 590A in place of GNRS 590C if they have completed GNRS 513 and GNRS 611 in addition to GNRS 610 and GNRS 511 or GNRS 612.
3. Student must also take a California-approved audiometry course to meet the SNSC requirements.
Program Learning Outcomes

Students who successfully complete this program shall be able to:

1. Articulate a Christian worldview, demonstrating respect for the dignity and uniqueness of others, valuing diversity, and applying spiritual concepts.
2. Engage in scholarly inquiry and critical thinking, including evaluation and application of evidence-based research.
3. Appraise and apply knowledge to develop, implement, and evaluate interventions that promote health and prevent disease.
4. Demonstrate thoughtful analysis of the legal, political, ethical, and/or financial factors impacting health care.
5. Use information systems and technology to communicate, manage knowledge, promote quality, mitigate error, and support decision-making.
6. Demonstrate the ability to coordinate and collaborate with other health care team professionals.
7. Engage in clinical reasoning, effective communication, and act as change agents to develop professional identity and practice skill.
Department of Healthcare Administration

Welcome to the Department of Healthcare Administration.

The Master of Science in Healthcare Administration (p. 919) is for those with bachelor degrees in nonclinical fields who are working professionals that want to advance and are interested in management and leadership positions in healthcare settings. The program provides students with the competencies necessary to develop and implement solutions that address today’s unique challenges facing the healthcare industry. Conceptual, analytical, and experiential skills required to manage contemporary healthcare organizations are emphasized with field experience designed to advance preparation for a management role.

Courses are taught by faculty from both the School of Nursing and the School of Business and Management. The program includes topics in contemporary healthcare delivery models, leadership and management, healthcare informatics and technology, healthcare finance and business analysis, decision making and project management, legal and ethical principles in healthcare, and workforce management. Students choose a specialty track in quality and innovation, or financial management in healthcare, or international health. This Christian-value-driven, competency-based Master of Science in Healthcare Administration program provides students with the capacity to lead and manage healthcare organizations both effectively and ethically. The program is offered as asynchronous online.

The Master of Science in Nursing (MSN) in Healthcare Administration and Leadership (http://catalog.apu.edu/academics/school-nursing/healthcare-administration-leadership/healthcare-administration-leadership-msn/) is for BSN-prepared registered nurses who are looking to advance their careers and move into early- to mid-level management and leadership roles in myriad healthcare settings. The program provides values-based education to develop nursing leaders who are effective collaborators, motivated by a spirit of commitment to the profession, and have a genuine compassion for others. Students acquire the knowledge and skills necessary to lead and manage healthcare teams in organizations, functioning in areas such as operations management, project management, and healthcare consulting.

The program includes graduate nursing core courses focused on a critical analysis of nursing and healthcare research and theory, bioethics, healthcare policy, and the integration of spirituality in health care. Interdisciplinary administration and leadership coursework is offered through the School of Nursing and APU’s School of Business and Management. Content includes leadership styles and theories, strategic planning, quality improvement and patient safety, change management, effective communication and conflict resolution skills, staffing challenges and constraints, financial management, and healthcare informatics. Students apply their knowledge and develop competencies in healthcare settings during practicum experiences. Upon completion of this program, students will have had the educational content required to sit for the American Nurses Credentialing Center (https://www.nursingworld.org/ancc/) and American Organization for Nursing Leadership (https://www.aonl.org/) nurse leadership examinations.

Programs

Master’s

- Master of Science in Healthcare Administration
- Master of Science in Nursing in Healthcare Administration and Leadership (http://catalog.apu.edu/academics/school-nursing/healthcare-administration-leadership/healthcare-administration-leadership-msn/)

Certificate

- Post-Master’s Certificate in Healthcare Administration and Leadership (http://catalog.apu.edu/academics/school-nursing/healthcare-administration-leadership/healthcare-administration-leadership-post-masters-certificate/)

Courses

MHA 560, Strategic Leadership in Health Care, 3 Units

Students in this course develop knowledge, skills, and attitudes about leadership across the healthcare continuum as they consider the professional role of the healthcare administrator from leadership and management perspectives. Areas of emphasis include leadership theory, structure of healthcare institutions, systems thinking and decision making, and performance improvement including quality and safety issues, risk management, and effective communication skills. Application of business skills is integrated, and students consider the theoretical and research background, current issues and trends, and leadership and administrative implications of specific topics.

Prerequisite: Admission to the M.S. in Healthcare Administration program.

MHA 570, Quality Management, 3 Units

The course focuses on the conceptual foundation of healthcare quality, systems thinking, and the principles of healthcare quality management that include measurement, assessment, and improvement. Students use improvement models, apply tools and process techniques to communicate organizational, clinical, and safety outcomes. The integration of evidence for organizational decision-making with quality improvement processes serve as the framework for students to create a data-driven, quality management project plan. Students incorporate practical solutions to craft measurable expectations, realistic timelines, and an organized project management approach for direct application.

Prerequisite: PADM 512
MHA 571, Integrative Theories of Innovation in Health Care, 3 Units
This course helps students identify and develop skills in producing lasting innovations in healthcare settings. Course material builds on past theories of change, such as those by Lewin and Kotter, and includes other theories that support and sustain organizational change. It also features content on Rogers' diffusion of innovation theory, disruptive innovation, and strategies to promote the adoption of innovation.

MHA 574, Global Field Study in Health Care, 3 Units
This course provides a framework for graduate students to engage in field study in various countries around the world. Students participate in organizational assessment visits to healthcare organizations locally and globally to discuss the role of the administrator and how they apply and practice leadership, management, and change principles, concepts, and theories covered in the graduate curriculum. The global competency domains for healthcare leaders - leadership, communication and relationship management, professional and social responsibility, health and the healthcare environment, and business - are explored as part of the healthcare management profession.

MHA 580, Administrative Practicum, 2 Units
This course gives students the opportunity to experience the role of the healthcare administrator. Each student chooses an individualized administration practicum in a specific area of emphasis, approved and monitored by the faculty member and preceptor. Competencies that govern the role of the healthcare administrator are explored in depth, and students focus on the context for enacting the role of an administrator in a healthcare delivery system.
Prerequisite: All Academic Core and Administrative courses; MHA 597 can be taken concurrently.

MHA 586, Healthcare Analytics, Big Data, and Applied Statistics, 3 Units
This course is an introduction to healthcare data science and analysis that builds knowledge of the technical infrastructure, sources, and storage of electronic data. Statistical analysis, data mining, text analytics, and predictive analytics are explored to frame questions and inform decision making. Students utilize different information retrieval methods to answer clinical and operational questions by performing simple data analysis and visualization of healthcare data. Strategies are discussed for how to optimally use data and glean knowledge from within big data to advance healthcare organizations and demonstrate value. Students also explore Christian worldview principles demonstrating ethical data use in health informatics that respects the dignity and uniqueness of others, and the security and privacy of data.
Prerequisite: MHA 596

MHA 595, Special Topics, 3 Units
In this course, a topic of current interest to students is examined in depth. Students analyze and evaluate topics/issues to reach and express a position, enhance personal development and/or to develop a particular project. If students elect this course more than once during their program, each such course must address a different topic.

MHA 596, Foundations of Healthcare Informatics, 3 Units
This course provides an overview of basic concepts for practice in healthcare-oriented informatics. These core concepts include an introduction to clinical and translational informatics; foundational theory and practical application of clinical decision-making and computerized decision support; healthcare systems and their organization; the special issues of administration, security, and operations of electronic records in the healthcare setting; human factors issues; information science in the healthcare domain; standards, terminologies, and the uniqueness of biomedical data; and a special focus on emerging technologies.

MHA 597, Capstone, 1 Unit
Students integrate prior learning through the formulation of a case report providing strategic direction to a healthcare organization. The completed strategic plan demonstrates integration of theoretical, clinical, and research knowledge from coursework throughout the program, and is applied to a healthcare problem in an actual healthcare setting: Students perform a SWOT analysis, a review and synthesis of current literature, select an appropriate theoretical framework, determine solutions to the problem, and develop an implementation plan. Students also create an electronic professional portfolio to highlight competencies gained throughout the program. Course success is dependent upon the candidate's ability to clearly identify a healthcare problem and develop an evidence-based solution. Participation in writing assignments is required for successful completion of this course. The responsibility for deep exploration of the chosen scenario and preparation for writing the case report rests with each candidate.
Prerequisite: All Academic Core and Administrative courses must be completed; MHA 580 may be taken concurrently.

MHA 599, Readings in Healthcare Administration, 1-3 Units
A student may elect to pursue special interests for credit at any time during the program under the supervision of a faculty member. University policy states that the student must earn a grade in an independent study course in order to receive credit toward graduation.

FIN 502, Business Finance for Managers, 3 Units
This course provides an introduction to concepts and tools of business finance for managers. Students study financial statements and their interpretation, business performance measures, the management of cash and the short term financial needs of the organization, and how to make good capital budgeting decisions. Students will analyze company performance and make recommendations by applying class content to financial issues.
FIN 536, Entrepreneurial Finance, 3 Units
This course examines the financial decisions of entrepreneurs and venture capital investors based on the stages of a venture development. Topics include financial options for entrepreneurs and investors, preparations for and analysis of a new business’ financial statements, and the valuation of the venture.
Prequisite: FIN 513 (MBA students only; MBM and MSHA students have no prerequisite for this course)

FIN 567, Advanced Financial Analysis, 3 Units
Students explore the practical applications of financial management based on case studies. Major topics include financial statement analysis, financial forecasting, cost of capital estimation, capital budgeting decisions, capital structure decisions, equity financing, and mergers and acquisitions.
Prequisite: FIN 513 (MBA/Accounting students only), FIN 502 (MSHA students only)

GNRS 504, Bioethics and Healthcare Policy, 3 Units
This course will outline the role of the healthcare leader in ensuring human rights are upheld in healthcare systems. This course focuses on bioethical analysis, decision-making and moral policy analysis, and formulation. Through course discussion, group and individual assignments, and oral and written presentations, students will analyze and apply bioethical principles to decision- and policy-making processes in the workplace and at national levels. Healthcare ethics and policy will be considered from a Christian worldview.
Prequisite: Graduate standing

GNRS 506, Spiritual Concept Analysis in Health Care, 3 Units
Scholarly research and analysis of selected concepts in the spiritual care of persons from the Judeo-Christian perspective provide a central focus to the course. Students also examine healthcare research/other healthcare literature for adequacy with respect to the concept they select. Various assignments facilitate greater student awareness of their own spiritual journey and knowledge of faith traditions other than their own. The course is conducted as a tutorial/seminar experience.
Prequisite: Graduate standing

GNRS 508B, Research and Theory in Healthcare, 4 Units
This course prepares the healthcare administrator to apply theory and research evidence in healthcare environments. The relationship between theory and research is examined, exploring questions about the nature, construction, and use of each. Selected theories are explored, and students learn how ideas are developed and used in practice and research. Students learn the fundamentals of quantitative, qualitative, and mixed methods research and deepen their understanding through systematic search, critique, and summary of research studies with application to healthcare. Students work in groups to develop a research plan addressing a healthcare-derived question. Experience in statistical analysis of research data is included.
Prequisite: GNRS 613

GNRS 543, Transitions Across the Care Continuum, 4-6 Units
This course focuses on principles and models of care and their implementation in a multidisciplinary practice environment that emphasizes healthcare delivery through integration of services and transition management. Students are introduced to decision making related to allocation of resources and services, development of protocols, and evaluation of management approaches. Evidence-based approaches to the clinical, administrative, educational, and research dimensions of patient care are emphasized. Evaluation of care management activities with the student’s selected clinical population is an integral component of the course.
Prequisite: NP students: completion of Advanced Practice Core; CNS students: completion of Advanced Practice Core and GNRS 520 or GNRS 530; HAL students: completion of MSN Core and GNRS 560.
Corequisite: Practicum

GNRS 560, Strategic Leadership in Health Care, 3 Units
This course is designed to develop knowledge, skills and attitudes about leadership across the healthcare continuum. The student will consider the professional role of the healthcare administrator both from a leadership and a management perspective. Areas of concentration will include leadership theory, structure of healthcare institutions, systems thinking and decision-making, performance improvement including quality and safety issues, risk management and effective communication skills. Application of business skills will be integrated. Students will consider the theoretical and research background, current issues and trends, leadership and administrative implications of specific topics.

MGMT 561, Managing Teams and Conflict, 3 Units
This course helps the student understand small-group behavior. It uses experience-based methods, cases, reading material, and simulation, and examines role behavior, group dynamics, conflict control, leadership, and group development. It also addresses motivation and problem solving as essential elements of organizational behavior.

GNRS 567, Healthcare Administration and Leadership Supervised Practicum, 3 Units
This course provides the student with the opportunity to experience the role of healthcare administrator. An individualized administration practicum in a specific area of clinical emphasis is chosen by the student and approved and monitored by the faculty and preceptor. Competencies that govern the role of the healthcare administrator are explored in depth. Students focus on the context for enacting the role of administrator in a healthcare delivery system.
Prequisite: All core and role courses
GNRS 568, Healthcare Finance, 4 Units
This course is an introduction to financial concepts and skills needed for healthcare leaders, managers, and executives. The student will develop skills in assessing multiple dimensions of financial performance and methods to improve the financial health of an organization in the context of current patient care system.

GNRS 597, Comprehensive Examination Directed Study, 1 Unit
This course guides the student through the process of demonstrating an integration of theoretical, clinical, and research knowledge. Critical thinking is enhanced through careful consideration of information presented during discussion. The examinations are taken as part of this seminar.
Prerequisite: Completion of all Academic Core and degree specialty courses. Final specialty course may be taken concurrently.

GNRS 613, Graduate Statistics, 3 Units
This course presents the knowledge of descriptive, correlational, and inferential statistics used in research that serves as the basis for evidence-based practice. Students develop the ability to perform descriptive and inferential data analysis techniques, use software applications to aid in statistical calculations and presentation, and interpret findings.

MGMT 502, Developing Management Skills, 3 Units
This course provides an introduction to management skills necessary for the twenty-first century characterized by chaotic, transformational, and rapid-fire change. Scientific evidence demonstrates how management skills are associated with personal and organizational successes. Although management skills are applicable in most areas of your life, this course will focus on work setting management skills to help students improve their own competency in a managerial role.

MGMT 503, Business Strategy: Theory and Practice, 3 Units
This course provides a review of management as an area of theoretical development as well as a field of practice. It comprises classical management theories and modern approaches to organization and business. Main blocks of the course are functions of management, managerial processes and interaction between organizations and their environment. This course includes elements of organizational behavior. Business cases are used as application of theoretical concepts.

MGMT 516, High-Performance People Management, 3 Units
This course provides students with the social science tools needed to solve organizational problems and influence the actions of individuals, groups, and organizations. It prepares managers to understand how to best organize and motivate the human capital of the firm, manage social networks and alliances, and execute strategic change.

MGMT 517, Managing Human Capital, 3 Units
Students study the establishment of human resource objectives and requirements in an organization. Emphasis is on executive decision making in dealing with formal employee-employer relationships. Collective bargaining, organization of employees, negotiation, and administration of collective bargaining agreements are covered.
Prerequisite: HROD 500 or GNRS 560

MGMT 541, Global Business Management, 3 Units
This course focuses on the environmental and functional differences between U.S. and international business, including exporting, balance payments, strategic planning, organization of multinational firms, international financial planning and cash management, foreign exchange planning, comparative management philosophies, international marketing strategies, incorporation for international operations and external relations of the multinational corporation.

PADM 512, Healthcare Administration, 3 Units
This course covers the foundations of healthcare administration in the United States, introducing students to the structure and function of the healthcare system. Topics include theory and models of healthcare administration, public policy impacts and scarcity, partnerships and achieving equality in healthcare governance at the national, state, and local levels, community environments, and critical issues in health services. Students explore Christian faith-based alternatives for alleviating healthcare burdens, and conduct a community health system analysis.
Prerequisite: Admitted to MPA or M.S. in Healthcare Administration program, Nursing, MBA/MBM Program or permission of MPA director.

### Total Units

39

1 Students must have successfully completed a college-level statistics course to be admitted to the MSHA program.

### Program Learning Outcomes

#### Program Learning Outcomes

Students who successfully complete this program shall be able to:

1. Guided by a Christian worldview, demonstrate ethical conduct, integrity, transparency, and accountability for one’s actions, valuing diversity, and respecting the dignity and uniqueness of others.
2. Use analytical, quantitative and critical thinking skills to implement actions, foster innovation, and advance healthcare priorities.
3. Apply principles of leadership to promote teamwork and collaborative decision-making among diverse stakeholders.
4. Employ system-level thinking and communication to address healthcare delivery issues, organizational outcomes of quality and safety, efficiency, cost-effectiveness, and health equity.
5. Use information systems, data, and technology to communicate, manage risk, promote quality, and inform decision-making and strategic growth.
6. Exhibit knowledge of financial management, regulatory factors, and ethical principles to meet organizational challenges in healthcare.
7. Exemplify personal and professional accountability, a professional identity and reflective, self-directive learning for ongoing professional development.

**MSN in Healthcare Administration and Leadership**

The Master of Science in Nursing (MSN) in Healthcare Administration and Leadership (https://www.apu.edu/nursing/programs/masters-in-healthcare-administration/) is designed for BSN-prepared registered nurses who are looking to advance their careers and move into early- to midlevel management and leadership roles in a variety of healthcare settings. The program provides values-based education to develop nursing leaders who are effective collaborators, motivated by a spirit of commitment to the profession, and have a genuine compassion for others. Students will acquire the knowledge and skills necessary to lead and manage healthcare teams in organizations, functioning in areas such as operations management, project management, and healthcare consulting.

The program focuses on nursing leadership, advancing understanding of core aspects including nursing and healthcare research and theory, healthcare policy, bioethics, and spirituality. Administration and leadership coursework is interdisciplinary and offered through the School of Nursing and the School of Business and Management. Content includes leadership styles and theories, strategic planning, quality improvement and patient safety, change management, effective communication and conflict resolution skills, staffing challenges and constraints, financial management, and healthcare informatics. Students apply their knowledge and develop competencies in healthcare settings during practicum experiences. Upon completion of this program, students will have had the educational content required to sit for the American Nurses Credentialing Center (https://www.nursingworld.org/ancc/) and American Organization for Nursing Leadership (https://www.aonl.org/) nurse leadership examinations.

37

1 Units in parentheses are classroom/clinical units.

**Admission**

University graduate admission and program-specific requirements must be met before an application is complete (see Admission to the University (p. 1092)). Program-specific application requirements are available online (https://tracking.cirrusinsight.com/74647a2de9a2-412f-9b55-9959c7aac4ec/apu-edu-graduateprofessionalcenter-admissions-requirements-program/).

International students should contact Graduate and Professional Admissions (https://www.apu.edu/graduateprofessionalcenter/admissions/) for application procedures.

**Program Learning Outcomes**

**Program Learning Outcomes**

Students who successfully complete this program shall be able to:
1. Articulate a Christian worldview, demonstrating respect for the dignity and uniqueness of others, valuing diversity, and applying spiritual concepts.
2. Engage in scholarly inquiry and critical thinking, including evaluation and application of evidence-based research.
3. Appraise and apply knowledge to develop, implement, and evaluate interventions that promote health and prevent disease.
4. Demonstrate thoughtful analysis of the legal, political, ethical, and/or financial factors impacting health care.
5. Use information systems and other technology to communicate, manage knowledge, promote quality, mitigate error, and support decision making.
6. Demonstrate the ability to coordinate and collaborate with other healthcare team professionals.
7. Engage in clinical reasoning and effective communication, and act as a change agent to develop professional identity and practice skill.

Post-Master’s Certificate in Healthcare Administration and Leadership

The Post-Master’s Certificate in Healthcare Administration and Leadership (https://www.apu.edu/nursing/programs/nursing-administration-certificate/) program prepares professionals for administrative positions and leadership opportunities in nursing in a variety of healthcare settings. Coursework focuses on strategic leadership, leading change, managing teams and resources, and the business of healthcare finance and patient care delivery. This program is a way for nurses to advance their career options and builds on skills and knowledge obtained in a Master of Science in Nursing program. Note: Students must be admitted to the university before registering for this program (see Admission section below).

Admission

University graduate admission and program-specific requirements must be met before an application is complete (see Admission to the University (p. 1092)). Program-specific application requirements are available online (https://tracking.cirrusinsight.com/74647a2d-e9a2-412f-9b55-9959c7aac4ec/apu-edu-graduateprofessionalcenter-admissions-requirements-program/).

International students should contact Graduate and Professional Admissions (https://www.apu.edu/graduateprofessionalcenter/admissions/) for application procedures.
Department of Master of Science in Nursing Advanced Practice

Master of Science in Nursing (MSN)

The Department of Master of Science in Nursing Advanced Practice offers a nationally accredited Master of Science in Nursing (p. 924) program, as well as credential and certificate programs, to prepare students to assume roles as clinical nurse specialists, nurse practitioners, educators, administrators, or school nurses. The combination of theory, research, and professional development also prepares graduates for doctoral study in nursing (p. 969).

The curriculum for these programs reflects the School of Nursing mission and is aligned with professional education standards for nursing. The programs are accredited by the Commission on Collegiate Nursing Education (https://www.aacnnursing.org/CCNE/), the California Board of Registered Nursing (https://www.rn.ca.gov/), and the California Commission on Teacher Credentialing (https://www.ctc.ca.gov/). Graduates are eligible to apply for state certification or a credential in their specialty and may take national certification examinations where these are offered through specialty organizations.

Program Learning Outcomes

Graduates of the Master of Science in Nursing program will be able to:

1. Articulate a Christian worldview, demonstrating respect for the dignity and uniqueness of others, valuing diversity, and applying spiritual concepts.
2. Engage in scholarly inquiry and critical thinking, including evaluation and application of evidence-based research.
3. Appraise and apply knowledge to develop, implement, and evaluate interventions that promote health and prevent disease.
4. Demonstrate thoughtful analysis of the legal, political, ethical, and/or financial factors impacting health care.
5. Use information systems and other technology to communicate, manage knowledge, promote quality, mitigate error, and support decision making.
6. Demonstrate the ability to coordinate and collaborate with other healthcare team professionals.
7. Engage in clinical reasoning and effective communication, and act as a change agent to develop professional identity and practice skill.

Transfer of Credits

Following admission, 9 units of approved graduate work completed elsewhere may be applied toward the MSN degree. Advanced Health Assessment may be considered for transfer credit if it was taken postlicensure as a registered nurse and the student was enrolled in an advanced practice nursing program. Advanced Pharmacology may be considered for transfer credit toward GNRS 611 (formerly GNRS 594) if it was taken less than 24 months prior to the APU MSN program admit date.

Additional Requirements

During the admission process, a review of academic transcripts is performed to assess whether the applicant has completed the prerequisite courses listed below. If not, students must complete the prerequisite courses as part of their MSN program before continuing to advanced practice courses (e.g., take undergraduate health assessment before advanced health assessment; take applied statistics and a nursing research course before the advanced practice research course).

At the beginning of clinical coursework, including health assessment lab, students are required to provide documentation including RN licensure, CPR certification, TB screening, and immunizations appropriate for the clinical setting.

A student’s health status must permit him/her to safely undertake and complete clinical experience required for the degree. As a fully prepared health professional, the student is expected to take responsibility for self-evaluation of her/his health status, including an assessment of the safety and appropriateness of practice in the clinical context, for the student and the patient.
The Joint Commission (https://www.jointcommission.org/), contracted facilities, and the School of Nursing require that all graduate students undergo a background check prior to their placement at clinical sites. The cost of the background check is the responsibility of the student. International students will have additional fees based on the cost of a background check in their country.

The MSN program requires that students have ongoing clinical work experience.

Students may select additional elective courses to support their programs of study as directed by faculty.

**Programs**

- MSN with Single Specialties (p. 945)
- MSN with Credentials (p. 942)
- Post-Bachelor’s Credentials (p. 950)
- Post-Master’s Certificate Programs (p. 951)

**Courses**

**GNRS 500, Conceptual Foundations of Professional Nursing, 3 Units**
This course focuses on the introductory concepts crucial to the socialization of second career students to professional nursing. The history of nursing, the evolution of nursing in the U.S., the art and science of nursing, the legal and professional basis of nursing, the role of nursing in the health care delivery system, and current issues and trends in nursing education, practice and research are emphasized.

**GNRS 501, Theoretical Thinking in Nursing, 2 Units**
This course examines questions about the nature and construction of theory and how theoretical ideas are developed and used in nursing practice and research. Philosophical ideas underlying theory are examined, and selected theoretical models and theories are explored.

**Prerequisite:** Completion of undergraduate research course or instructor’s consent; admission to ELM or MSN program.

**GNRS 503, Cultural Competency in Health Care, 3 Units**
This course focuses on transforming graduate nursing students, preparing them for nursing leadership in nursing practice, nursing research, education, and public health policy for the improvement of patient healthcare outcomes in our increasingly diverse society. Students move from cultural sensitivity and awareness to critical reflection and action, challenging their assumptions and broadening their perspectives. The Essentials of Master’s Education in Nursing (American Association of Colleges of Nursing, 2011) serves as the foundation for the development of core cultural competencies.

**Prerequisite:** Graduate standing in the School of Nursing.

**GNRS 504, Bioethics and Healthcare Policy, 3 Units**
This course will outline the role of the healthcare leader in ensuring human rights are upheld in healthcare systems. This course focuses on bioethical analysis, decision-making and moral policy analysis, and formulation. Through course discussion, group and individual assignments, and oral and written presentations, students will analyze and apply bioethical principles to decision- and policy-making processes in the workplace and at national levels. Healthcare ethics and policy will be considered from a Christian worldview.

**Prerequisite:** Graduate standing

**GNRS 505, Christian Formation for Holistic Care, 3 Units**
Students engage in the process of discovering the foundational values of Azusa Pacific University that serve as guiding principles for the distinctive education they will receive. They are made aware of the Christian worldview and its implications for personal holistic development and care. With a focus on developing motivating character and integrated caregivers, the course brings heightened self-awareness, the impact of a Christian worldview on vocation, scriptural awareness especially emphasizing healing themes in the life of Christ, and the importance of spiritual growth on the journey toward formation.

**GNRS 506, Spiritual Concept Analysis in Health Care, 3 Units**
Scholarly research and analysis of selected concepts in the spiritual care of persons from the Judeo-Christian perspective provide a central focus to the course. Students also examine healthcare research/other healthcare literature for adequacy with respect to the concept they select. Various assignments facilitate greater student awareness of their own spiritual journey and knowledge of faith traditions other than their own. The course is conducted as a tutorial/seminar experience.

**Prerequisite:** Graduate standing

**GNRS 507, Scientific Writing, 3 Units**
This course provides opportunities for students to learn how to introduce a topic or issue, articulate a thesis, support and develop a thesis and subordinate claims, work with secondary sources, and organize an argument.
GNRS 508A, Research and Theory in Advanced Practice Nursing, 4 Units
This course prepares nurses to use theory and research evidence in advanced clinical practice. The relationship between theory and research is examined, exploring questions about the nature, construction, and use of each. Selected theoretical models and theories are explored, and students learn how ideas are developed and used in nursing practice and research. Students deepen their understanding of the research process by engaging in a systematic search, critique, and summary of research studies with direct application to nursing practice. Experience in statistical analysis of research data is included.
Prerequisite: Computer literacy, undergraduate research course, undergraduate statistics course, and graduate standing

GNRS 508B, Research and Theory in Healthcare, 4 Units
This course prepares the healthcare administrator to apply theory and research evidence in healthcare environments. The relationship between theory and research is examined, exploring questions about the nature, construction, and use of each. Selected theories are explored, and students learn how ideas are developed and used in practice and research. Students learn the fundamentals of quantitative, qualitative, and mixed methods research and deepen their understanding through systematic search, critique, and summary of research studies with application to healthcare. Students work in groups to develop a research plan addressing a healthcare-derived question. Experience in statistical analysis of research data is included.
Prerequisite: GNRS 613

GNRS 510, Family Theory in Health Care, 2 Units
The major theoretical perspectives for understanding the family as a core unit of analysis are studied. This course fosters the student's recognition of the family's responsibility for health. Factors such as family patterns and care-giving tasks of families experiencing catastrophic or chronic alteration in health care are examined. This class is offered online.
Prerequisite: Graduate standing

GNRS 511, Advanced Pediatric Health Assessment and Health Promotion, 4 Units
This course develops the graduate nurse's assessment skills and focuses on the promotion of health in the pediatric population from the newborn period through adolescence. Emphasis is on adapting and expanding the medically focused history and physical assessment to incorporate the assessment of traditional health practices and identify culturally relevant and age-appropriate health promotion strategies. Outcomes are examined in light of related theoretical concepts. Strategies for health promotion include a focus on developmental and behavioral assessments, emotional health, nutrition, counseling to modify risk factors, and screening tests/prophylaxis for early detection and prevention of disease.
Prerequisite: Undergraduate health assessment and GNRS 610;
Corequisite: Practicum

GNRS 513, Advanced Nursing Practice Role, 2 Units
This course focuses on the concepts of role development and performance competence of the nurse in advanced clinical practice within the context of a reformed health care delivery system. Emphasis is placed on the clinician, educator, clinical program manager, consultant, researcher, and case manager roles of the advanced practice nurse. The leadership aspects of the roles of advanced practice are explored in relation to health care delivery, policy formulation, and legislation. The course explores theories and issues related to the advanced nursing practice role.
Prerequisite: Graduate standing

GNRS 514, Research Proposal Writing, 2 Units
This course focuses on the application of the concepts in GNRS 508A. The goal is the completion of a research proposal that details the problem, the research purpose, questions or hypotheses to be tested, a critique of the literature, the design and methods of the study including protection of human subjects, the plans for analysis, use of the study, and the budget and personnel.
Prerequisite: GNRS 508A

GNRS 516, Integrative Disease and Symptom Management, 3 Units
Using a systems-based approach, this course provides the student with a broad-based, graduate-level overview for understanding disease processes, treatment modalities, assessment and interventional strategies for patients across the life span.

GNRS 517, Fundamentals in Nursing Practice, 2 Units
This is an experiential learning course designed to teach basic nursing skills in a clinical skills or simulation laboratory setting to prepare students to deliver safe and patient-focused nursing care. Utilizing the nursing process, students perform basic skills in assessment, patient care across the continuum, documentation, patient-family teaching, and infection control.

GNRS 518, Supervised Practicum in Health Care, 3 Units
This course prepares students to integrate and apply theory, evidence-based practice, and national guidelines and standards in practicum settings. Students select practicum areas in which, with faculty approval, they will participate in experiences led by preceptors. The purpose of the course is to equip students with current, evidence-based knowledge in a selected practice area.
GNRS 520, Theory and Practice of the Clinical Nurse Specialist in Nursing Care of Adult-Gerontology Patients, 6 Units
Critical concepts in advanced collaborative management of adult-gerontology client populations by Clinical Nurse Specialists are studied. Differential diagnosis, pharmacologic management, cultural sensitivity, adult-gerontology continuum of health and illness (i.e., wellness, health promotion, disease prevention), teaching-learning theory, and evidence-based best practices for clinical decision-making for the Adult and Geriatric population are highlighted. CNS roles, competencies, and professional issues and integrated clinical rotations will be chosen from critical care or medical-surgical adult-gerontology populations. Clinical seminar times allow students to discuss and analyze current professional issues and clinical problems in a collegial atmosphere.
Prerequisite: Academic Core and Advanced Practice Core courses, current RN license, CPR certificate, and meets health screening requirements;
Corequisite: Practicum

GNRS 521, Clinical Specialization in the Care of Adult-Gerontology Patients, 6 Units
The course prepares the student to apply concepts introduced in GNRS 520. It focuses on diagnosis and collaborative disease management of acute illness in the adult-gerontology patient by the Clinical Nurse Specialist. The integration of advanced skill development, theory and evidence based practice, disease management, clinical decision making, unit and organization management issues, professional issues and APRN role competencies are the foundation for this course. Practicum and seminars are planned to span the breadth of the students’ clinical opportunities.
Prerequisite: Academic Core and Advanced Practice Core courses, GNRS 520, current RN license, CPR certificate, and meets health screening requirements;
Corequisite: Practicum

GNRS 522, Disaster Nursing and Emergency Preparedness, 3 Units
This course explores the nature of disasters and prepares nurses to respond to various types of disasters - including natural, environmental, mass casualty, public health emergencies, terrorism, and bioterrorism - by utilizing essential knowledge, skills, values, meanings, and experience in the basic competencies of emergency preparedness and disaster nursing. In accordance with the position of major nursing organizations, emphasis is placed on evidence-based best practices for personal preparedness.
Prerequisite: Comparable course, such as UNRS 312 Nursing Management of Adults, a human growth and development course, a lifespan course OR an RN licensure.

GNRS 530, Theory and Practice of the Clinical Nurse Specialist in the Care of the Pediatric Patient, 6 Units
Critical concepts in the advanced collaborative management of pediatric client populations by the Clinical Nurse Specialists are studied. Differential diagnosis, pharmacologic management, cultural sensitivity, pediatric continuum of health and illness (i.e., wellness, health promotion/disease prevention), teaching-learning theory, and evidence-based/best practices for clinical decision-making for the Pediatric population are highlighted. CNS roles, competencies, and professional issues are integrated. Clinical rotations will be chosen from critical care or medical-surgical pediatric populations. Clinical seminar times allow students to discuss and analyze current professional issues and clinical problems in a collegial atmosphere.
Prerequisite: Academic Core and Advanced Practice Core courses, current RN license, CPR certificate, and meets health screening requirements;
Corequisite: Practicum

GNRS 531, Clinical Specialization in the Care of the Pediatric Patient, 6 Units
The course prepares the student to apply concepts introduced in GNRS 530. It focuses on diagnosis and collaborative disease management of acute illness in the pediatric patient by the Clinical Nurse Specialist. The integration of advanced skill development, theory and evidence based practice disease management, clinical decision making, unit and organization management issues, professional issues and APRN role competencies are the foundation for this course. Practicum and seminars are planned to span the breadth of the students’ clinical opportunities.
Prerequisite: Academic Core and Advanced Practice Core courses, GNRS 530, current RN license, CPR certificate, and meets health screening requirements;
Corequisite: Practicum

GNRS 532, Advanced Nursing Practice in Pediatrics, 6 Units
This course emphasizes physiological and psychological bases for critical and chronic conditions in children, focusing on an advanced science base for the assessment, diagnosis, and management of children and families to promote wellness. Exploration of traditional versus alternate medicine treatment plans, as well as relevant cultural, spiritual, and health promotion strategies, is incorporated.
Prerequisite: Graduate status and GNRS 590A;
Corequisite: Practicum

GNRS 533, Psychiatric Theories across the Life Span, 2 Units
This course presents neurobiologic, neuroendocrine, genomic, behavioral, and psychodynamic theories of psychiatric mental illnesses as they manifest among members of diverse cultural groups across the life span. A theoretical foundation for subsequent coursework in primary psychiatric mental health care is provided for the role of the psychiatric mental health nurse practitioner.
Prerequisite: Graduate standing, Advanced Practice Core
GNRS 534, Integrated Psychiatric and Health Assessment across the Life Span, 2 Units
This course teaches the role of the psychiatric mental health nurse practitioner in interviewing, assessing, and utilization of other data collection methods to elicit, analyze, and evaluate bio-psychosocial information regarding psychiatric mental health illness as experienced and understood by the clients, across the lifespan. Assessment and integration of the effects of potential and/or existing co-morbid health problems are focused upon. Diagnostic reasoning that is based on the Diagnostic Statistical Manual is foundational in the course. Development of differential diagnoses and disease management, evidence-based practice, and health promotion that includes client and nurse practitioner collaboration is emphasized. 
Prerequisite: Advanced Practice Core, GNRS 533 (May be taken concurrently)

GNRS 535, Psychiatric Interventions and Health Promotion across the Life Span, 6 Units
In this course students learn historical, theoretical, and contemporary evidence-based psychotherapies that promote and support client stabilization, rehabilitation, and recovery. The client as a collaborating decision making consumer and the client-clinician therapeutic alliance are central to this course. Students increase competence in assessment of psychiatric mental health illnesses, differential diagnoses and disease management, implementation of psychotherapy (individual, group, family), medication management, and health promotion interventions, including motivational interviewing. Student competence in developing and facilitating therapeutic groups as a recovery modality are included in the course. The role of the psychiatric mental health nurse practitioner in the integration and coordination of support services that impact mental health and illness is also included. Students practice verbal psychotherapeutic skills that motivate and facilitate client self-management and progression toward recovery. 
Prerequisite: Advanced Practice Core, GNRS 533 and GNRS 534; GNRS 539 may be taken concurrently; Corequisite: Practicum 

GNRS 536, Psychiatric Mental Health Care with Adults and Older Adults, 6 Units
In this course students increase their knowledge and competence in the assessment of psychiatric mental health illnesses, differential diagnoses and disease management, implementation of psychotherapy (individual, family, group), evidence-based practice, medication management, health promotion and disease prevention interventions, integration and coordination of support services, with adults and older adults. 
Prerequisite: GNRS 533, GNRS 534, GNRS 535, GNRS 539; Corequisite: Practicum

GNRS 537, Psychiatric Mental Health Care with Children and Adolescents, 6 Units
In this course, students increase competence in the role of the psychiatric mental health nurse practitioner in the assessment of psychiatric mental health illnesses, differential diagnosis and disease management, implementation of psychotherapy (individual, family, group), evidence-based practice, medication management, health promotion and disease prevention interventions, integration and coordination of support services with children, adolescents, and families. 
Prerequisite: GNRS 533, GNRS 534, GNRS 535, GNRS 536, GNRS 539; Corequisite: Practicum

GNRS 538, Psychiatric Mental Health Care with Selected Populations, 5 Units
Students increase knowledge and competence in the assessment of psychiatric and mental health illnesses, differential diagnosis and disease management, implementation of psychotherapy (individual, family, group), medication management, health promotion and disease prevention interventions, and integration and coordination of support services with a selected population. Focus is on integrating and practicing all aspects of the role of the psychiatric mental health nurse practitioner with clients who are experiencing acute and/or chronic mental health problems and psychiatric disorders. 
Prerequisite: GNRS 533, GNRS 534, GNRS 535, GNRS 536, GNRS 539; Corequisite: Practicum

GNRS 539, Psychopharmacology, 2 Units
Students in this course build upon knowledge of advanced practice nursing and provides content essential for the psychiatric mental health nurse practitioner to prescribe appropriate pharmacologic treatment in practice. Mechanisms of action, interactions, side effects, and prescribing guidelines for psychopharmaceuticals commonly utilized across the lifespan are addressed. 
Prerequisite: GNRS 533, GNRS 534; GNRS 535 (May be taken concurrently)

GNRS 542, Advanced Concepts and Competencies in Pediatric Primary Health Care, 3 Units
This course offers a comprehensive review and synthesis of core concepts and competencies for the pediatric advanced practice nurse in the primary care setting. This culminating experience for pediatric nurse practitioner students incorporates seminar discussions and clinical practicum placement, and also allows for a discussion of developmental/behavioral issues, management of acute and chronic care illnesses seen in primary care settings, and preventative health care. 
Prerequisite: Graduate standing, GNRS 532 (may be taken concurrently with instructor's permission), and GNRS 590A; Corequisite: Practicum
GNRS 543, Transitions Across the Care Continuum, 4-6 Units
This course focuses on principles and models of care and their implementation in a multidisciplinary practice environment that emphasizes healthcare delivery through integration of services and transition management. Students are introduced to decision making related to allocation of resources and services, development of protocols, and evaluation of management approaches. Evidence-based approaches to the clinical, administrative, educational, and research dimensions of patient care are emphasized. Evaluation of care management activities with the student’s selected clinical population is an integral component of the course.
Prerequisite: NP students: completion of Advanced Practice Core; CNS students: completion of Advanced Practice Core and GNRS 520 or GNRS 530; HAL students: completion of MSN Core and GNRS 560.
Corequisite: Practicum

GNRS 544, Clinical Specialization Residency, 2-4 Units
This elective residency program, formed through a partnership between the School of Nursing and selected community healthcare organizations, is an intensive, precepted clinical experience that helps students transition to beginning professional nurses in a specialized setting. It enhances students’ skill and practice knowledge in preparation for the RN licensing examination, and increases their ability to perform clinical reasoning with the assigned patient population and evaluate the QSEN competencies of patient-centered care, safety, evidence-based practice, informatics, and teamwork and collaboration.
Prerequisite: ELM students must complete GNRS 573 (may be taken concurrently), but GNRS 573 is not required for nurses in community partnerships who are taking GNRS 544 for continuing education credit.

GNRS 546, Theory and Practice in Health Care Systems in the Community, 6 Units
This specialized course prepares RNs without a bachelor's degree for graduate study in nursing. A multiple theoretical focus that includes concepts from systems, stress, adaptation, developmental, and role theory is emphasized. A beginning practice in the utilization of the nursing process with an emphasis on nursing diagnosis and the nurse’s role in assessing, planning, implementing, and evaluating care of clients in a variety of community settings is provided. Collaboration with community-based organizations and services that provide health restoration, maintenance, illness prevention, and client education services to individuals and families at home are essential course components. A review of legal mandates for practice and discussion of ethical dilemmas and issues related to high quality nursing care are included. Specific content varies based on the students’ prior education and experience. Clinical placements are arranged to meet the individual student's needs.
Prerequisite: Undergraduate research, pathophysiology, and health assessment;
Corequisite: Practicum

GNRS 547, Nursing Leadership in Acute Care Settings, 6 Units
This is one of two clinical courses provided for the RN who seeks both a bachelor's and master's degree in nursing. The course synthesizes selected information from the generic bachelor's and master's programs for presentation in a condensed format, addressing the development and nature of today's health care systems and associated issues in the United States. Further, content familiarizes the student with several roles and responsibilities of the contemporary nurse, such as leader, consultant, teacher, manager, and client advocate. The course focuses on client needs in acute health care settings and emphasizes the relationship between the health care system and the advocate.
Prerequisite: Undergraduate research, pathophysiology, and health assessment;
Corequisite: Practicum

GNRS 548, Health Promotion Across the Lifespan, 2 Units
The course focuses on health promotion and disease prevention across the lifespan and around the globe. The course includes exploration of population health issues, environmental implications in health and health policy, impact on health promotion and the development of disease.
Prerequisite: Academic Core and Advanced Practice Core courses, current RN license, CPR certificate, and meets health screening requirements

GNRS 550A, Theory and Practice in School Nursing, 6 Units
This combined didactic and clinical course provides theoretical content and field experiences that emphasize the multifaceted role of the school nurse. Students participate in field experiences and classroom learning activities that focus on the assessment and management of children's healthcare needs in various school settings. This course equips students with the necessary tools and skills to successfully function as professional school nurses. At the conclusion of this course, students are able to successfully function as providers of health education as well as providers, planners, and coordinators of health care in school settings.
Prerequisite: GNRS 612 or instructor consent, and admission to School Nurse Services Credential program;
Corequisite: Practicum

GNRS 554, Medical-Surgical Care of the Adult and Geriatric Patient, 5 Units
This course introduces crucial concepts in professional nursing care, such as the nursing process, communication, therapeutic interventions, critical thinking, and critical reasoning. Course material focuses on the application of biological, psychosocial, and spiritual concepts to adult and elderly clients in various healthcare settings with acute and/or chronic illnesses. The nursing process is utilized to provide care to one or two adult clients within the healthcare delivery system. The clinical practicum focuses on the cognitive basics, scientific principles, and manipulative components of psychomotor skills used when providing nursing care.
Prerequisite: Admission to the ELM program, completion of all prerequisite courses for the program.
Corequisite: GNRS 554P
GNRS 555, Medical Surgical Care of the Adult and Geriatric Patient, 7 Units
This course introduces crucial concepts to professional nursing care such as nursing process, communication, therapeutic interventions, and critical thinking and clinical reasoning. The course focuses on the application of biological, psychosocial, and spiritual concepts to hospitalized adult and elderly clients with acute and/or chronic illnesses. Students will be guided in critical thinking and clinical reasoning exercises in the management of hospitalized clients. Nursing process is utilized to provide care to one or two adult clients within the health care delivery system of an acute care setting. The clinical practicum focuses on the cognitive basis, scientific principles, and manipulative component of psychomotor skills used when providing nursing care. Students have an opportunity to practice simulated clinical skills.
Prerequisite: Admission to the ELM program, completion of all prerequisite courses for the program;
Corequisite: Practicum

GNRS 556, Intermediate Medical Surgical Care of the Adult, 7 Units
This course is designed to build on the base of medical-surgical nursing knowledge from GNRS555. The course focuses on comprehensive nursing care to patients with acute need for continuous cardiac monitoring, pulse oximetry monitoring, or ventilator assistance in telemetry units, in restorative care setting, or long-term care setting.
Prerequisite: Admission to the ELM program; successful completion of GNRS 555;
Corequisite: Practicum

GNRS 557, Medical Spanish for Advanced Practice Nurses, 3 Units
This course provides non-Spanish-speaking advanced-practice nursing students with foundational knowledge of Spanish language structure and vocabulary, helping them build appropriate phrasing to facilitate communication in healthcare settings. Cultural issues relevant to health and illness in the Latino community are also addressed.
Prerequisite: Graduate nursing student standing, or instructor's permission

GNRS 558, Intermediate Medical-Surgical Care of the Adult, 6 Units
This course is designed to build on the base of medical-surgical nursing knowledge from prior nursing courses. The course focuses on comprehensive nursing care to patients with acute need for continuous cardiac monitoring, pulse oximetry monitoring, or ventilator assistance in telemetry units, restorative care settings and long-term care settings.
Corequisite: GNRS 558P

GNRS 559, Audiometry for School Nurses, 3 Units
This course provides didactic instruction via eCollege and eight hours of on-site practicum experience that emphasizes the content and clinical expertise necessary to fulfill the requirements of the State of California School Hearing Conservation Program and training for the school audiometrist. The course focuses on the physiologic process of hearing and how to assess for deficits in hearing in children of all ages. At the conclusion of the course, and after having completed successfully all learning objectives, the student is eligible to submit an Application for Registration as a School Audiometrist in the State of California (a $10 registration fee is required with the application).

GNRS 560, Strategic Leadership in Health Care, 3 Units
This course is designed to develop knowledge, skills and attitudes about leadership across the healthcare continuum. The student will consider the professional role of the healthcare administrator both from a leadership and a management perspective. Areas of concentration will include leadership theory, structure of healthcare institutions, systems thinking and decision-making, performance improvement including quality and safety issues, risk management and effective communication skills. Application of business skills will be integrated. Students will consider the theoretical and research background, current issues and trends, leadership and administrative implications of specific topics.

GNRS 564, Nutrition and Therapeutics, 2 Units
Students in this course explore the functions of nutrients and the consequences of nutrient deficiencies and excesses in the body. Course material introduces a variety of tools for planning and evaluating diets, including a computer diet analysis, and the application of nutrition concepts is interwoven into health care and fitness conditions. Students also study the prevention of chronic disease as it relates to proper nutrition and adequate exercise.
Prerequisite: Admission to the ELM program

GNRS 567, Healthcare Administration and Leadership Supervised Practicum, 3 Units
This course provides the student with the opportunity to experience the role of healthcare administrator. An individualized administration practicum in a specific area of clinical emphasis is chosen by the student and approved and monitored by the faculty and preceptor. Competencies that govern the role of the healthcare administrator are explored in depth. Students focus on the context for enacting the role of administrator in a healthcare delivery system.
Prerequisite: All core and role courses

GNRS 568, Healthcare Finance, 4 Units
This course is an introduction to financial concepts and skills need for healthcare leaders, managers, and executives. The student will develop skills in assessing multiple dimensions of financial performance and methods to improve the financial health of an organization in the context of current patient care system.
GNRS 569, Quality and Safety for Health Care Practice, 3 Units
This course is designed to deepen and advance students’ knowledge of, and ability to systematically apply the principles of, patient quality and safety in nursing practice. Based on national standards, the focus is on examining and applying quality and safety tools, including informatics, that can be used to improve patient care delivery across the continuum of health care.

GNRS 570, Parish Nursing/Health Ministries, 2 Units
This course provides an introduction to and overview of health ministry and parish nursing theory and practice. The philosophy of the course is that (a) the parish nursing role is that of a specialist in spiritual aspects of patient care in the congregational context, requiring the integration of graduate level theology/ministry and nursing theory and praxis; and (b) health ministry is an emerging role and trend in pastoral ministry that seeks to bring professional ministry skill to bear upon the integration of health, faith, and spirituality in the parish setting.

GNRS 571, International Health Care, 2-4 Units
This course provides students with experience in nursing care in other countries. Students prepare with coursework in the United States, then travel abroad, where they have experiences in acute and/or chronic care settings, exploring cultural, economic, systems, philosophical, and other aspects of care that influence the provision of health care in other countries. A debriefing period is provided upon return.

GNRS 573, Clinical Residency, 4 Units
The clinical residency is an internship clinical experiential program designed as a collaborative partnership between the School of Nursing and selected community in-patient health care organizations. This residency is an intensive preceptored clinical experience planned to ease the role transition from a student nurse to a beginning professional nurse in an acute-care setting. In addition, it enhances the skill and practice knowledge of the student in preparation for the RN licensing examination.
Prerequisite: Successful completion of all pre-licensure clinical courses

GNRS 575, Nursing Care in Maternal, Newborn, and Women’s Health, 4 Units
This course focuses on the theoretical and clinical concepts of the childbearing patient, her infant, and her family. The students study both normal and complicated obstetrics. Selected issues of women’s health are explored. The student is introduced to birth preparation, prenatal care, normal neonatal, and postpartum care with concurrent clinical experiences.
Prerequisite: Admission to the ELM program, successful completion of semesters one and two;
Corequisite: Practicum

GNRS 576, Pharmacology, 2 Units
This course is designed for students who have completed organic chemistry, inorganic chemistry, and biochemistry. The content focuses on principles of pharmacology and specifics of the major drug classifications.
Prerequisite: Admission to the ELM program

GNRS 578, Health Assessment, 3 Units
This course provides the nursing student with skills in physical, spiritual, and psychosocial assessment of adult clients. History-taking and physical examination techniques presented in the course help the student develop strong assessment skills upon which further knowledge and practice can be built. Basic concepts related to assessment of geriatric, pediatric, and childbearing patients are included.
Prerequisite: Admission to the ELM program;
Corequisite: Practicum

GNRS 580, Gerontology, 2 Units
This course integrates research and writings about the major trends and developments in the field of gerontology as they apply to the field of nursing. The approach is interdisciplinary - course material includes information from the fields of sociology, psychology, anthropology, biological sciences, medicine, nursing, and psychiatry. Development in adulthood is viewed from multiple perspectives including cognitive, behavioral, biological, sociocultural, and spiritual, and the influences these perspectives have on the successful negotiation of age-related issues are considered. Finally, students examine aspects of human aging in contemporary American society and from a cross-cultural and ethnic perspective.
Prerequisite: Graduate standing in the School of Nursing.

GNRS 581, Primary Health Care of the Older Adult, 5 Units
GNRS 581 focuses on the role of the adult-gerontology primary care nurse practitioner in the management of the older adult including health promotion, assessment, treatment, and maintenance of common primary care health problems. The clinical practicum emphasizes the application of theory and evidence-based research for the delivery of culturally competent assessment and treatment of the older adult within the context of their families and in a variety of outpatient settings.
Prerequisite: Graduate status in the School of Nursing, completion of Advanced Practice Core courses;
Corequisite: Practicum

GNRS 582A, Pathophysiology, 2 Units
This course presents an introduction to human pathophysiology. Mechanisms causing alterations in cellular activity, maintenance of cellular tissue oxygenation, fluid and electrolyte balance, and neuroendocrine control of the body are included. Common pathophysiologic disorders are emphasized.
Prerequisite: Admission to the ELM program
GNRS 582B, Pathophysiology, 2 Units
This course continues the presentation an introduction to human pathophysiology. Mechanisms causing alterations in cellular activity, maintenance of cellular tissue oxygenation, fluid and electrolyte balance, and neuroendocrine control of the body are included. Common pathophysiologic disorders are emphasized.
Prerequisite: Admission to the ELM program, successful completion of GNRS 582A

GNRS 583, Nursing Care of Children and Young Adults, 4 Units
This theoretical and clinical course focuses on the care of children from birth through adolescence. The effects of acute and chronic illness on growth and development are studied in the acute and community health care setting. Education of the child and family on health promotion, disease prevention, and safety issues are addressed. Ethical issues are discussed regarding the relationship to the child and family, including issues such as child abuse, informed consent, and the impact of diverse cultural and spiritual beliefs on health care decisions in the family.
Prerequisite: Admission to the ELM program, successful completion of semesters one and two;
Corequisite: Practicum

GNRS 584, Mental Health Nursing, 4 Units
This theoretical and clinical course focuses on the dynamics of psychosocial stress within the interpersonal and intrapersonal systems of clients with acute and chronic psychiatric disorders.
Prerequisite: Admission to the ELM program, successful completion of semesters one and two;
Corequisite: Practicum

GNRS 586, Leadership and Management in Professional Practice, 2 Units
This course emphasizes leadership and management theory including systems theory in a number of applications and settings, equipping students with the ability to adjust to various organizations encountered by professional nurses serving in a variety of roles. Core concepts relevant to clinical settings are presented using a systems approach. Emphasis on nursing case management is included.

GNRS 587, Community Health Nursing, 5 Units
This course has two areas of focus within the community setting: the study of principles and practices involved in community health nursing, and the development of skills for teaching a group of clients. The emphasis is on the role of the nurse in assessing, planning, implementing, and evaluating care of clients in a variety of community-based settings, with a focus on care of the gerontological client. Collaboration with community-based organizations and services that provide health restoration, maintenance, illness prevention, and client education services to individuals, families, and aggregates are essential components of this course. A review of legal mandates and regulations, as well as discussion of ethical dilemmas and issues related to community-based care is included.
Prerequisite: Admission to the ELM program, successful completion of semesters one, two, and three;
Corequisite: Practicum

GNRS 588, Advanced Nursing Care of Adults - Leadership, 6 Units
This course involves the application of pathophysiological, psychosocial, and spiritual concepts to adult and geriatric clients experiencing the stress of illness in acute settings. The primary focus of the course is to care for critically ill clients and their families with complex health care needs in a critical-care setting. A second area of focus is on the utilization of leadership and management concepts/skills in providing comprehensive care to groups of clients and families. Emphasis is placed on preparing the student to practice in a beginning leadership role in managing client care. Legal and ethical issues related to acute care are included.
Prerequisite: Admission to the ELM program;
Corequisite: Practicum

GNRS 589, Adolescent Health Care, 2-4 Units
This course focuses on the growth and development of adolescents, including assessment, prevention, and management of common health and psychosocial problems in this population. Emphasis is on age-appropriate and culturally competent provision of primary health care to adolescents in a family system.
Prerequisite: Graduate status in the School of Nursing; 2-unit version of this course requires prior completion of GNRS 610, while the 4-unit version requires prior completion of GNRS 610, GNRS 611, and GNRS 511 or GNRS 612.

GNRS 590A, Primary Health Care of the Young Family, 6 Units
This combined theory and clinical course focuses on management of health care of children (from birth through adolescence) and their families. Theory and clinical experiences emphasize assessment, prevention, and management of physiological, social, emotional, intellectual, spiritual, and educational needs of the child as an individual and as a family member. The effects of culture on development, parenting, and health care practices are emphasized. The course provides theory and clinical experiences in the management of normal and common pathological conditions to prepare students for advanced nursing practice in the role of nurse practitioner.
Prerequisite: Advanced Practice Core courses;
Corequisite: Practicum
**GNRS 590B, Clinical Practicum in Pediatrics, 4 Units**
The student develops expanded skills in the comprehensive assessment and management of common childhood illnesses and problems and continues to gain skill in promoting child wellness. Application of theory and research is emphasized in the care of common illnesses throughout the childhood years.

**Prerequisite:** GNRS 511 or GNRS 612, and GNRS 590A

**GNRS 590C, Primary Health Care of the Young Family for the School Nurse Services Credential, 6 Units**
Using a system-based approach, this combined didactic and practical course focuses on assessment, nursing interventions, and follow-up for common illness presentations in children, as well as illness-related impact on social, emotional, and educational functioning. The effects of culture on child development, parenting, and healthcare practices is also emphasized.

**Prerequisite:** GNRS 612;  
**Corequisite:** Practicum

**GNRS 590D, Primary Health Care of the Young Family, 3 Units**
This theory course focuses on management of health care of children (from birth through adolescence) and their families, with an emphasis on assessment, prevention, and management of physiological, social, emotional, intellectual, spiritual, and educational needs of the child as an individual and as a family member. The effects of culture on development, parenting, and health care practices are emphasized. The course provides theory in the management of normal and common pathological conditions to prepare students for advanced nursing practice in the role of nurse practitioner.

**Prerequisite:** Advanced Practice Core courses

**GNRS 591, Primary Health Care of the Childbearing Family, 4 Units**
This course focuses on the assessment and management of the primary health care needs of the reproductive family. Emphasis is placed on health promotion and maintenance, disease prevention, curative, and restorative care. Cross-cultural aspects related to parents, male and female, of the childbearing family are addressed.

**Prerequisite:** Advanced Practice Core courses;  
**Corequisite:** Practicum

**GNRS 592A, Primary Health Care of the Adult and Aging Family, 6 Units**
This combined theory and clinical course focuses on the role of the nurse practitioner (NP) in caring for mature adults and aging family members, from young adulthood to elderly adulthood. Emphasis is placed on the management of common primary health problems of these age groups. The delivery of culturally competent primary health care interventions of young, middle-aged, and elderly adults is addressed.

**Prerequisite:** Advanced Practice Core courses;  
**Corequisite:** Practicum

**GNRS 592B, Primary Health Care Clinical Practicum, 2 Units**
This course provides the final comprehensive clinical management experience, allowing FNP and AGNP students to apply knowledge gained throughout their course of study. Clinical conferences provide opportunity for discussion of role development issues and clinical case studies. Students engage in the clinical assessment and management of adults of diverse cultural backgrounds with routine and complex health problems in out-patient settings. Under the supervision of qualified preceptors and School of Nursing faculty, the student must complete his/her clinical hours and demonstrate mastery to perform the role of an entry-level nurse practitioner.

**Prerequisite:** Completion of clinical courses for the FNP or AGNP program track

**GNRS 593, Psychosocial Primary Health Care of the Adult and Aging Family, 4 Units**
This combined didactic and clinical course focuses on psychosocial primary health care of the mature and aging family. Didactic content and clinical experiences emphasize the advanced practice nursing role in the medical management of chronic illness with concurrent assessment for psychosocial stressors that impact the experience and management of chronic illness. Students learn to tailor patient-centered therapeutic strategies, including presence, multi-faceted functional assessment, motivational interviewing, stress reduction techniques and spiritual support to individual patients.

**Prerequisite:** Advanced Practice Core courses;  
**Corequisite:** Practicum

**GNRS 595, Special Topics in Nursing, 1-6 Units**
In this course, a topic of current interest to students is examined in depth. Students analyze and evaluate topics/issues to reach and express a position, enhance personal development and/or to develop a particular project. If students elect this course more than once during their program, each such course must address a different topic.

**Prerequisite:** Graduate standing

**GNRS 596, Foundations of Healthcare Informatics, 3 Units**
This course provides an overview of basic concepts for practice in healthcare-oriented informatics. These core concepts include an introduction to clinical and translational informatics; foundational theory and practical application of clinical decision making and computerized decision support; healthcare systems and their organization; the special issues of administration, security, and operations of electronic records in the healthcare setting; human factors issues; information science in the healthcare domain; standards, terminologies, and the uniqueness of biomedical data; and a special focus on emerging technologies.
GNRS 597, Comprehensive Examination Directed Study, 1 Unit
This course guides the student through the process of demonstrating an integration of theoretical, clinical, and research knowledge. Critical thinking is enhanced through careful consideration of information presented during discussion. The examinations are taken as part of this seminar.
Prerequisite: Completion of all Academic Core and degree specialty courses. Final specialty course may be taken concurrently.

GNRS 598, Thesis, 1 Unit
A student initially enrolls in this option toward the latter part of the program for one unit of credit. The student registers for one unit of thesis credit each semester (two of three semesters per year) until the thesis is completed.
Prerequisite: GPA of 3.5 or above, chair's consent for thesis option, and completion of all Academic Core and Advanced Practice Core courses

GNRS 599, Readings/Independent Study in Nursing, 1-4 Units
A student may elect to pursue special interests for credit at any time during the program under the supervision of a faculty member. University policy states that the student must earn a grade in an independent study course in order to receive credit toward graduation.
Prerequisite: Graduate standing

GNRS 600, Nurse Practitioner Clinical Experience, 2-6 Units
The AGPCNP and NP programs require 765 hours of supervised direct patient care experience. Students in this course function in the role of student nurse practitioners under the direct supervision of approved preceptors, and receive feedback from their preceptors and from their clinical faculty. This course gives students an opportunity to complete the documentation necessary to be awarded clinical units. Students progressively integrate advanced-practice nursing competencies, demonstrate professional nursing behavior, and keep accurate records. Upon completion of 765 hours, students are given access to a clinical portfolio.
Prerequisite: GNRS 612 and faculty permission

GNRS 601, Primary Healthcare I: Adult and Aging, 3 Units
This course integrates knowledge from advanced pathophysiology, advanced pharmacology, and advanced health assessment and apply it to create a diagnostic hypothesis for common acute and chronic primary care health problems in adolescents, adults, and older adults. The course examines a variety of treatment options for each disease presented and for diseases that don't respond to first-line therapy.
Prerequisite: GNRS 612
Corequisite: GNRS 600

GNRS 602, Primary Healthcare II: Population-based Health Interventions, 3 Units
Primary Healthcare II recognizes that individuals with healthcare needs belong to a variety of discrete groups. This course introduces population health principles to be integrated with psychosocial assessment, cultural competency, social determinants of health, and the nurse-client relationship to foster the development of competence to motivate patients in a way that respects their diversity and to assist them to find resources to address social vulnerabilities. Students will employ statistical analysis as well as nursing experience to analyze risk to create a patient education plan.
Prerequisite: GNRS 601
Corequisite: GNRS 600

GNRS 603, Primary Healthcare III: Restorative and Palliative Interventions, 3 Units
This course is designed to integrate disease management and communication techniques to support the physical, emotional, and spiritual transitions of chronic illness. The course examines developing a prognosis, transitioning care, interprofessional care planning, and care of the caregiver. Grounded in spiritual concepts, this course is designed to provide the student with tools to give patients and families unpleasant information that will likely evoke fear or sadness.
Prerequisite: GNRS 602

GNRS 610, Advanced Pathophysiology, 3 Units
This course builds on basic anatomy and physiology and undergraduate study of pathophysiology. It focuses on the development of an advanced understanding of the pathophysiologic mechanisms of human health disorders including those that are genetic. Diagnostic reasoning that facilitates the clustering of signs and symptoms leading to diagnosis is a key process undergirding the course. This course requires the integration of signs and symptoms, clinical testing (such as laboratory and radiologic studies), and pathophysiologic mechanisms with diagnoses. This course introduces epidemiological principles and methods to be applied to population health models.
Prerequisite: Graduate standing and undergraduate pathophysiology

GNRS 611, Advanced Pharmacology, 3 Units
This course builds upon basic knowledge in pharmacology and provides content essential for the advanced practice nurse to render appropriate pharmacological treatment in practice. Mechanisms of action, interactions, side effects, and prescribing guidelines for drugs commonly utilized across the life cycle are addressed. The course introduces the principles of pharmacogenomics and their application to clinical practice. Variations in pharmacological reactions attributed to cultural factors are emphasized. Strategies for fostering individual/family adherence to pharmacological regimens are examined. This course meets the requirements of the California Board of Registered Nursing in the application of a “furnishing number” by the advanced practice nurse in California.
Prerequisite: GNRS 610 (may be taken concurrently)
GNRS 612, Advanced Health Assessment and Diagnostic Reasoning, 4 Units
This course develops the graduate nurse's assessment skills and focus on the promotion of health in individuals across the age range and within family, community, and cultural contexts. Emphasis is on adapting and expanding the medically focused history and physical assessment to incorporate the assessment of traditional and nontraditional therapies and identify culturally relevant and age-appropriate health promotion strategies for common episodic complaints and chronic health conditions. Outcomes are examined in light of theoretical concepts. Strategies for health promotion include a focus on lifestyle, mental health, nutrition, counseling to modify risk factors, and screening tests/prophylaxis for the early detection and prevention of disease.
Prerequisite: Undergraduate health assessment and GNRS 610;
Corequisite: lab

GNRS 613, Graduate Statistics, 3 Units
This course presents the knowledge of descriptive, correlational, and inferential statistics used in research that serves as the basis for evidence-based practice. Students develop the ability to perform descriptive and inferential data analysis techniques, use software applications to aid in statistical calculations and presentation, and interpret findings.

GNRS 616, APRN Intensive II, 1 Unit
This is the second of four APRN Intensive courses that give NP students an interactive experience through out-of-classroom work. Course activities and games will evaluate the student's ability to perform the clinical role of the NP. Students will understand and develop the skills of virtuous leadership and collaboration from a biblical perspective.
Prerequisite: GNRS 615;
Corequisite: GNRS 601

GNRS 617, APRN Intensive III, 1 Unit
This is the third of the APRN intensives that give APRN students an interactive experience with out-of-classroom work that includes team activities, simulation experiences, and problem-solving activities. Topical content includes managing patients with complex co-morbidities, ethical reasoning, and advanced communication skills. Students will be observed performing the professional and clinical skills of the APRN.
Prerequisite: GNRS 616;
Corequisite: GNRS 602

GNRS 618, APRN Intensive IV, 1 Unit
This is the fourth of the APRN intensives that give APRN students an interactive experience with out-of-classroom work that includes team activities, simulation experiences, and problem-solving activities. Topical content practice-based quality improvement, office-based procedures, and certification exam preparation. Students will be observed performing the professional and clinical skills to demonstrate readiness to enter NP practice.
Prerequisite: GNRS 617; Faculty permission.

GNRS 620, Genome Science in Healthcare, 3 Units
This course covers basic genomic concepts and technologies intended for personalizing healthcare. The primary goal is to provide the student with clinically relevant knowledge that can be used in practice and for teaching other healthcare professionals, patients and families. Applications of genome science and technology are analyzed in the context of real world examples taken from a variety of clinical specialty areas to better understand the relation between genomics, health, and illness.

GNRS 622, Genome Science and Ethical Issues, 3 Units
This course examines current applications and implications of genome science and technology to healthcare, public health policy, economics, ethics, federal and state laws and societal issues. The following discussion topics are at the leading edge of healthcare and social debate: DNA biobanking, genetic profiling, and genomic technologies used in genome medicine such as stem cell research, gene therapy, and genetic enhancements. In addition, the course addresses ethics, philosophy, and theology literature to explore thoughtful discussions that cover a wide range of genome applications in healthcare and health science research.
Prerequisite: GNRS 620

GNRS 630A, Oncology Nurse Practitioner Fellowship A, 4 Units
This course is the first in a series of three fellowship courses that enhance students' critical thinking, diagnostic reasoning, and interpretation and management skills for advanced practice nursing in the field of oncology. Students gain a deeper understanding of the sciences necessary for enhanced role development, knowledge, and skills for advanced practice nursing scholarship, and practice in a designated appropriate setting under the direction of a faculty advisor in collaboration with selected clinical experts, with a focus on exploring the development and scientific underpinnings of components of expert clinical oncology practice.
Prerequisite: Enrollment in the oncology nurse practitioner fellowship certificate program.
GNRS 630B, Oncology Nurse Practitioner Fellowship B, 4 Units
This course is the second in a series of three fellowship courses that enhance students’ critical thinking, diagnostic reasoning, and interpretation and management skills for advanced practice nursing in the field of oncology. Students gain a deeper understanding of the sciences necessary for enhanced role development, knowledge, and skills for advanced practice nursing scholarship, and practice in a designated appropriate setting under the direction of a faculty advisor in collaboration with selected clinical experts, with a focus on exploring the development and scientific underpinnings of components of expert clinical oncology practice.
Prerequisite: Enrollment in the oncology nurse practitioner fellowship certificate program.

GNRS 630C, Oncology Nurse Practitioner Fellowship C, 4 Units
This course is the third in a series of three fellowship courses that enhance students’ critical thinking, diagnostic reasoning, and interpretation and management skills for advanced practice nursing in the field of oncology. Students gain a deeper understanding of the sciences necessary for enhanced role development, knowledge, and skills for advanced practice nursing scholarship, and practice in a designated appropriate setting under the direction of a faculty advisor in collaboration with selected clinical experts, with a focus on exploring the development and scientific underpinnings of components of expert clinical oncology practice.
Prerequisite: Enrollment in the oncology nurse practitioner fellowship certificate program.

GNRS 631, ONP: Cancer Biology and Assessment, 2 Units
This course builds on knowledge of the anatomy and physiology of DNA, RNA, and differentiated and nondifferentiated human cells. Focus is on the pathophysiologic mechanisms of human cancer disorders. Diagnostic reasoning that facilitates the clustering of signs and symptoms is a key process underlying the course. The course also provides the foundation for the integration of diagnostic testing, physical assessment, and understanding of the predictable pathophysiology of cancer in order to stage tumors and predict metastatic risk in individuals.
Prerequisite: Admission to the Oncology Nurse Practitioner Post-Master’s Certificate program.

GNRS 632, ONP: Cancer Therapeutics, 2 Units
This course builds on knowledge of the predicted behavior of human cancer. Technology in cancer treatment is evolving rapidly, and this course provides a pathophysiological foundation for understanding cancer protocols. Current cancer protocols, classes and categories of therapeutics, technologies in development, and tumor resistance are discussed, along with the cost benefit, side effects, and availability of the covered therapeutics.
Corequisite: GNRS 631

GNRS 633, ONP: Symptom and Side Effect Burden, 2 Units
Patients with advanced cancer often suffer significant symptomatic burden and the iatrogenic complications of treatment. This course helps students develop a patient-centered approach to evidence-based management of common symptoms of cancer and side effects of treatment.
Prerequisite: GNRS 631 and GNRS 632

GNRS 634, ONP: Survivorship and the Psychosocial Impact of Cancer, 2 Units
Cancer patients and their caregivers face complicated psychological, financial, and spiritual changes, beginning at diagnosis and extending into the posttreatment phases. This course covers the common problems related to those changes, and best-practice strategies and techniques to help patients and families cope with cancer.

GNRS 635, ONP: Team-Based Care and the Role of the Oncology Nurse Practitioner, 2 Units
The clinician role of the oncology nurse practitioner requires familiarity with the incidence, prevalence, and risk assessment competencies for all common cancers. In addition, the oncology nurse practitioner must be prepared for a wide variety of leadership roles. Strategies for care coordination, designing and measuring interdisciplinary team outcomes, mentoring, collaborating with primary care providers, and rapid-cycle quality improvement are examined.

GNRS 636, ONP: Clinical Trials in Oncology Nursing, 2 Units
The advanced-practice oncology nurse practitioner is prepared to provide direct patient care, design a plan for outcome evaluation, and take a leadership role in medical and nursing oncological research.
Prerequisite: GNRS 610, GNRS 611, GNRS 612, and GNRS 613

GNRS 650, History of Professional Nursing: From Origins to Nursing in Transition, 3 Units
Students in this course explore conceptual and methodological issues in historical nursing research, including the use of biographic methods in nursing history and working with primary sources/archival materials/artifacts and material culture. Focus is on the origins of professional nursing up to the period of nursing in transition in the United States. Students examine ethics guidelines and standards for historical research in nursing, and critically analyze the origins of nursing and early nursing contributions to the evolution of modern health systems and interventions. Class discussion and composition facilitate critical thinking about the history of nursing as a scholarly inquiry, focusing on issues and methods of nursing historical research.
GNRS 651, History of Professional Nursing: From Colonial Times to Present Day, 3 Units
Students in this course explore the foundations of professional nursing in the United States in the context of influential historical, global, societal, and scientific events. Students examine issues faced by nurses from colonial times to today, critically analyzing nurses' contributions to the development of modern health systems and interventions. Class discussion and composition facilitate critical thinking about the history of nursing as a scholarly inquiry, since historical perspectives form the basis for analysis of contemporary healthcare issues and projected development of the nursing profession, its practice, and healthcare policy.

GNRS 660, Theories of Teaching and Instruction, 3 Units
This course analyzes selected teaching and learning models that are applicable to nursing education. Strategies for classroom and clinical teaching are examined. Research relative to nursing education is reviewed and critiqued. Design of research methods to determine effectiveness of teaching strategies is incorporated. Course development and student evaluation are emphasized. Selected faculty and nursing education issues are also explored.

GNRS 661, Leadership and Role Development in Nursing Education, 3 Units
This course includes an analysis of educational leadership and the multiple roles of the nurse educator related to teaching, scholarship, service, and practice. Theoretical perspectives and practical approaches supported by research in nursing and higher education literature, as well as the Christian educator's role promoting faith integration, are addressed.

GNRS 662, Assessment, Curriculum, Development, and Outcomes, 3 Units
This course addresses theoretical approaches to educational assessment, the development and implementation of nursing curriculum, and student and program outcomes. Emphasis is given to the importance of incorporating Christian values in the curriculum. The course also includes critical analyses of related topics based upon current research in nursing and higher education literature.

GNRS 663, Clinical Practicum in Nursing Education, 3 Units
This practicum course builds on the academic and clinical preparation of previous courses and prepares students to teach in academic and clinical settings. Under the supervision of a preceptor, this practical classroom experience focuses on: a) writing of learning/teaching objectives, b) selecting teaching strategies and learning activities, c) designing and implementing teaching plans for units of instruction, d) evaluating student learning outcomes, and e) obtaining feedback on teaching performance from faculty mentors/preceptors, fellow students, and self-evaluation and reflection. It is recommended that students take GNRS 660, GNRS 661, and GNRS 662 prior to taking this class. GNRS 664 may be taken concurrently.

GNRS 664, Teaching and Learning Strategies for Nursing Education, 3 Units
This course equips academic nurse educators to develop and evaluate teaching and learning strategies that facilitate learning in different nursing educational settings. Course material includes examining the challenges nursing faculty face in implementing this role, and strategies to successfully navigate those challenges. Also included are two projects to prepare students for the application process of the nurse educator. It is recommended that students take GNRS 660 prior to taking this class.

GNRS 695, Special Topics, 1-4 Units
A subject of current interest is examined in depth. Students analyze and evaluate controversial issues to reach and express a reflective position. This course may be repeated for credit to a maximum of 6 units applied toward the MSN or PhD degree; each course must address a different topic.

GNRS 700, Philosophy of Science, 3 Units
This course equips students with the knowledge and critical analytic skills to comparatively evaluate the philosophical foundations of scientific theories and the influence of Western philosophical schools of thought on the development of nursing science. Course content is organized to engage students in discussion and critical analysis of the epistemological and philosophic foundations of scientific theories and the characteristics of scientific knowledge according to the received view, paradigmatic view, perceived postmodern view, and feminist tradition. Special emphasis is given to the critical debate within nursing about the nature of nursing science.

GNRS 701, Nursing Knowledge Development, 3 Units
Students in this course focus on analyzing and critiquing the theoretical and methodological processes that are utilized in theory building and knowledge development in nursing. Discussion and critique of the different stages of theory development and students' experimentation with conceptualizing and developing their theoretical stance go hand in hand. Patterns of knowing, knowledge development, and criteria for evaluating nursing knowledge are examined in relation to the discipline's domain and the phenomena of concern in nursing.

GNRS 702, Nursing Theory, 3 Units
This course focuses on strategies for theory development such as concept analysis, conceptual mapping, and theoretical modeling as applied to the student's phenomenon of concern. It also provides critique and analysis of the major models and theories used in a variety of nursing settings in relation to existing interdisciplinary theoretical knowledge.
GNRS 703, Spirituality and Health, 3 Units
This course provides an introduction to spirituality, including spiritual experience, as it relates to individual health and illness. Communal spirituality is also considered. Differentiation is made between and among generic religious and Christian spiritualities. While the course covers theoretical aspects of spirituality and their interaction with health and illness, concentration is on the movement from theory to praxis. This lecture/seminar course is oriented toward nursing educators who seek to develop a foundation in spirituality for spiritual integration as well as for its development in nursing practice.
Prerequisite: Admission to DNP or PhD program

GNRS 704, Faith Integration and Nursing Scholarship, 3 Units
This course begins with an exploration of the nature, role, problems, and possibilities of faith integration in higher education and in the nursing curriculum at all levels of higher education. The special circumstances of faith integration and its implications for teaching in secular college settings are explored. This course further provides a critical explication of theological method and content in three domains: biblical hermeneutics, constructive theology, and ministry praxis for education. The focus of the course is on the appropriation of theological method and knowledge for the purposes of integration into nursing education and practice especially (but not exclusively) within the context of a Christian or church-affiliated college.

GNRS 705, Social Ethics and Health Policy, 3 Units
This course seeks to provide a social ethics frame of reference for health care. Medical and biological advances have contributed to a rapidly expanding amount of human control over human and natural processes, including genetic potential and behaviors. This new power raises questions of morality and highlights the need for discussion and legislation regarding the complex issues raised by developments in health care, medical technology, and science. A comprehensive social ethic places decisions about health care within the context of a fuller account of purpose and meaning in life.
Prerequisite: Admission to DNP or PhD program

GNRS 706, Methods of Inquiry, 3 Units
Students in this course explore various methods of inquiry as they focus on the difference between scientific thinking, wisdom, and alternative concepts of knowledge. Existential dilemmas intrinsic to the pursuit of truth, the exploration of the meaning of actions, the process of reason and interpretation, the perception of reality, and empirical generalizations are discussed, and their influence on the definition of research problems and designs is explored. Research designs and methods are introduced as they relate to problem definition and theory, including an overview of the principles of basic and applied experimental research, evaluation research, and the traditions and foundation of quantitative and historical research. Students are required to explore, synthesize, and debate current issues that will affect their research careers.
Prerequisite: Admission to DNP or PhD program

GNRS 707, Quantitative Nursing Research Design I, 3 Units
This course focuses on advanced multiple research designs and data collection approaches. Emphasis is on experimental and quasi-experimental designs, epidemiological methods, survey research, and evaluation and outcomes research, as well as on planning design and sampling. Inferential statistics and advanced statistical analysis methods including ANOVA and various types of multiple regression analysis are incorporated within the course content.
Prerequisite: Admission to DNP or PhD program

GNRS 708, Qualitative Nursing Research Design I, 3 Units
This course focuses on analyzing the epistemological foundations and the assumptions of qualitative research methodologies. It provides an introduction to the major qualitative research methodologies including grounded theory, phenomenology, and ethnography. Each methodology is analyzed as to its appropriateness for the research question. Experience in carrying out a pilot study in the selected methodology is provided.

GNRS 709, Advanced Statistical Analysis II, 3 Units
This course presents advanced methods of quantitative inquiry. The emphasis is on the use of factor analysis, confirmatory factor analysis, path analysis, and structural equation modeling. Assumptions of the techniques are addressed. The course provides the student experience in using statistical packages for entering and analyzing data. Reporting results of the analyses is also incorporated. Making appropriate decisions regarding which of the advanced statistical techniques to use is stressed. Critique of the advanced statistical analyses of published health care research is also emphasized.
Prerequisite: GNRS 707

GNRS 710, Advanced Qualitative Research Methods, 3 Units
This course provides advanced knowledge and training in the use of qualitative research methods including phenomenological interpretation, grounded theory interpretation, ethnographic interpretation, focus groups interpretation, and feminist interpretation. Intensive interpretive and structured approaches to analysis and methods of establishing plausibility, credibility, and adequacy of qualitative data are emphasized.
Prerequisite: GNRS 708

GNRS 711, Advanced Research Methods in the Humanities, 3 Units
This seminar and consultation course introduces PhD students to non-scientific research methodologies as used in the arts, letters, humanities and aspects of the social sciences for the (a) conduct of original dissertation research on one of the disciplines of arts, letters, humanities, or non-scientific aspects of one of the social sciences, (b) conduct humanities-based research to widen and deepen a scientific dissertation topic, or (c) to enlarge the student's methodological repertoire, knowledge, and skill. The course is intended for those whose primary research education and experience has been in scientific methods and disciplines. (Enrollment limited to eight.)
Prerequisite: (a) successful completion of GNRS 701 and GNRS 706, (b) permission of the instructor
GNRS 712, Healthcare Quality Improvement, Program Planning, and Evaluation, 3 Units
This core course bridges the gap between the uptake of new health research discoveries and their translation, adaption, and implementation in practice. Course content includes the examination, integration, and application of quality improvement, program planning, and evaluation processes, strategies, and tools. The outcome of the course is a well-designed evaluation plan for an evidence-based quality improvement project.
Prerequisite: Admission to DNP or PhD program

GNRS 713, Advanced Statistical Analysis I, 3 Units
This course presents common nonparametric and parametric statistical techniques used in healthcare research. Assumptions of the techniques are addressed. Specifically, the course emphasizes t-tests, ANOVA, ANCOVA, RANCOVA, correlation, odds ratio, regression, and power analysis, and provides the student experience in using SPSS for entering and analyzing data. Reporting results of the analyses is also incorporated. Making appropriate decisions regarding which statistical techniques to use is stressed. Critique of statistical analyses of published healthcare research is also emphasized.

GNRS 715, Psychosocial Issues of Older Adults, 3 Units
This course focuses on the biological and psychosocial processes throughout adulthood and the older years. Theories of aging are examined, as well as social role changes, social stratification, and the development of institutions of the aged. The course explores both normal aging and psychopathology, and the systematic intrinsic psychological or personality changes associated with development and adaptation in later life. Other topics include clarification of the causes and prevention of health maladies in the later years, and the nature and treatment of the most common psychopathologies. The psychodynamics of institutionalization and family care of the very old are also examined.

GNRS 716, Translation of Research to Practice, 3 Units
The goal of this core course is to help prepare Doctor of Nursing Practice (DNP) nursing students to be nurse scholars and to identify strategies within a multidisciplinary model and in intraprofessional relationships that promote the ready translation of research into practice. This course exposes DNP students to evidence-based practice, quality improvement methodologies, concepts and theories, and deepens their knowledge regarding the phenomenon of interest. This prepares them for foundational competencies needed for evidence-based problem identification, PICOT writing, literature search, integrated literature review, evidence appraisal, and synthesis. There are iterative assignments to develop skill and the milestone assignment is a final integrated review and synthesis paper with in-depth knowledge of their phenomenon (vs. topic) of interest.
Prerequisite: Admission to DNP or PhD program

GNRS 717, Health Technology and Informatics, 3 Units
This course presents an overview of the evolution of health care informatics from an interdisciplinary perspective. Students learn health care informatics history, concepts, theories, legal and ethical implications, and applications within the health care industry. This course introduces the student to the information system life cycle, human factor issues in health care informatics, critical issues affecting the development and implementation of information and communication systems and technologies (clinical, administrative, and learning), knowledge management principles, professional practice trends, and emerging ICT (information and communication technology) in health care.

GNRS 718, Organizational Leadership and Strategic Planning, 3 Units
In this core course, students acquire knowledge and skill to effectively manage systems level change, empower others, and influence political processes. Advanced nursing practice leadership occurs in clinical practice with clients and staff, within healthcare institutions, professional organizations, and in healthcare policy making arenas, using knowledge of nursing and other professions to address healthcare needs and direct interprofessional activities and initiatives. To develop the leadership role, students implement strategies for creating organizational change to provide high-quality services and outcomes at reasonable costs and lead the development of a business plan for quality improvement initiatives. Students advocate for change related to financial policies that impact the relationship between economics and quality care delivery. Focus is on organizational process, including the associated management of conflict, change, promotion of safety for clients and providers, and control of risk within a dynamic healthcare environment.
Prerequisite: Admission to DNP or PhD program

GNRS 720, Wellness Promotion and Health Maintenance, 3 Units
This course focuses on the critical appraisal of theories and models of health promotion and on the evaluation of health initiatives developed for national health promotion and maintenance. Relevant risk prevention, control, and health promotion intervention strategies are emphasized. Communicable diseases; health hazards; high-risk health factors; acute and chronic illness across ethnicities, genders, and the life span; and morbidity and mortality of the nation’s leading health problems are analyzed. Students’ research questions are generated from a synthesis of knowledge regarding a specific phenomenon relevant to the student’s individual area of study.
Prerequisite: Admission to DNP or PhD program

GNRS 721, Health Disparities and Vulnerable Populations, 3 Units
This course offers an analysis and evaluation of various topics and issues on health disparities of underserved ethnic or minority vulnerable populations as well as an analysis of research that describes, explains, and examines variables influencing health disparities and intervention strategies to reduce these disparities.
GNRS 722, Research in Nursing and Health, 3 Units
This course is team taught and reflects the research expertise and program of study of the nursing doctoral faculty. It focuses on analysis of determinants of health and illness across demographic, biological, psychological, familial/cultural, and societal dimensions. Attention is given to theoretical explanations toward promoting development of students’ programs of research.

GNRS 724, Quantitative Nursing Research Design II: Psychometrics, 3 Units
This course introduces students to the methods of survey research. Course material covers practical considerations in the construction of questionnaires, including determining questionnaire content, selection of item types and wording of items, selection of an administration method, piloting questionnaires, and locating existing questionnaires. Discussions about conducting survey research focus on sample selection, analyzing information obtained from questionnaires using SPSS, evaluating questionnaires, sources of error, and how to reduce measurement error in survey research.
Prerequisite: GNRS 707

GNRS 725, Research Practicum, 1 Unit
The practicum further develops, mentors, and socializes students into the roles and activities of research scientists and scholars. Emphasis is on mentoring to facilitate student progression in research methodology, culturally appropriate research strategies, data management, and data analysis. Students can chose either a quantitative or qualitative practicum experience.

GNRS 726, Advanced Scientific Writing, 3 Units
This course provides opportunities for students to learn how to research and introduce a topic in writing, articulate a thesis statement, support and develop a literature review, work with secondary sources, and organize a written paper that can be developed into a dissertation or translational research paper.

GNRS 727, Genome Science in Clinical Cases and Disease Management, 3 Units
This course focusing on medical family history taking, constructing and analyzing the pedigree, genetic counseling, clinical decision making and clinical case management for a wide variety of inherited and acquired diseases through the lens of emerging genome science. Clinical cases are discussed from a holistic perspective including; genome science, epidemiology, genomic profiling, genetic technologies, personalized medicine, interprofessional collaboration, ethical and legal issues, and health policy.
Prerequisite: GNRS 620

GNRS 728, Genome Science Research Methods, 3 Units
This course focuses on genome research methods for understanding and translating genome science to practice and to genome related nursing research. Understanding the research methods fosters a deeper understanding of the strength and the weaknesses of the science and an ability to critique the benefits and the limitations of the science for designing nursing research. The course includes a wide range of research methods that explore genetics or genomics in human populations. A key outcome of this course is to develop a research proposal using genome methods to design nursing research aimed at improving quality of health for individuals, families and populations.
Prerequisite: GNRS 620, GNRS 622, GNRS 727

GNRS 729, Population Health and Epidemiology, 3 Units
The concept of population health includes aggregate, community, environmental/occupational, and cultural/socioeconomic definitions of health. The implementation of clinical prevention and population health activities is central to achieving the national goal of improving health status and reducing health disparities among different aggregate groups. This course covers the basic elements and methodological concepts used in the epidemiologic study of factors related to health promotion and disease prevention in human populations. It brings together considerations from several fields of investigation, such as epigenetics, epidemiology, psychology, and public health, to study the effects on health and health-related outcomes.
Prerequisite: Admission to DNP or PhD program

GNRS 730, Comparative Health Care Systems, 3 Units
This course focuses on exploring/analyzing environmental, social, cultural, political and economic determinants of health across the globe. Comparative analysis of international health care systems including governmental, nongovernmental, traditional, and faith-based organizations are emphasized. Epidemiological analysis of morbidity and mortality, analysis of health and illness responses, and health-seeking behavior across the age span and gender/ethnic variables are discussed with the intent to identify areas of research relevant to students’ interest. Presented from a Christian perspective, this course investigates research and practice opportunities and responsibilities for advanced practice nurses in global arenas.
Prerequisite: Admission to DNP program

GNRS 732, DNP Clinical Residency, 0 Units
This course provides students enrolled in the Doctor of Nursing Practice (DNP) program with opportunities to develop professional nursing skills at the doctoral level. The focus of the course is to explore the development and scientific underpinnings of components of expert advanced clinical practice. Students select a population of interest for the DNP clinical residency and apply evidence-based practice and research findings in order to develop and improve practice. Over the course of the DNP program, students integrate previous nursing education and practice experiences with the DNP residency and concurrent doctoral coursework to meet the AACN Essentials of Doctoral Education for Advanced Nursing Practice and complete a DNP scholarly project. The course may be repeated to enable the student to obtain a minimum of 1,000 residency hours. Previous hours from graduate clinical courses may apply, so residency hour requirements will vary.
Prerequisite: Admission to DNP program
GNRS 733A, Residency IA, 1 Unit
This is the first in a series of three residency courses designed to enhance students' critical thinking, diagnostic reasoning, interpretation, and management skills for advanced clinical practice. This course broadens and enhances understanding of the sciences necessary for enhanced role development, knowledge, and skills for advanced practice clinical nurse scholarship. Students practice in a designated appropriate setting under the direction of a faculty advisor in collaboration with selected clinical experts. The course focuses on exploring the development and scientific underpinnings of components of expert advanced clinical practice, and attention is given to the development of skills necessary to attain that goal. By the end of this course, students select their population of interest for their clinical residency and apply evidence-based findings to this population to identify potential areas of intervention.
Prerequisite: Admission to DNP program

GNRS 733B, Residency IB, 1 Unit
The second of a three-course sequence, this course may be taken concurrently with GNRS 733A and/or GNRS 733C with approval of the DNP director or designee. Grading: pass/fail

GNRS 733C, Residency IC, 1 Unit
The third of a three-course sequence, this course may be taken concurrently with GNRS 733A and GNRS 733B with approval of the DNP director or designee. Grading: pass/fail

GNRS 734A, Residency IIA, 1 Unit
The first of a three-course sequence, this course may be taken concurrently with GNRS 734B and GNRS 734C with approval of the DNP director or designee. Grading: pass/fail

GNRS 734B, Residency IIB, 1 Unit
The second of a three-course sequence, this course may be taken concurrently with GNRS 734A and/or GNRS 734C with approval of the DNP director or designee. Grading: pass/fail

GNRS 734C, Residency IIC, 1 Unit
This is the last of a three-course series of clinical residencies with a focus on transformative and collaborative leadership, including completion of the evidence-based practice project, assessment of project outcomes, and planned dissemination of findings. Students apply relevant clinical and research findings to develop and improve practice. Content emphasizes critical appraisal of skills and interventions necessary to ensure meaningful translation of scientific evidence into practice, including a cost-benefit analysis for implementing a change into clinical practice. The course also emphasizes the professional role of the nurse as a collaborator, leader, and provider of care with nursing colleagues and other members of the interprofessional healthcare team within the context of complex healthcare systems, preparing students to implement an advanced nursing practice role that results in practice and/or policy change at the local, state, and/or national levels.
Prerequisite: Successful completion of GNRS 733A, GNRS 733B, GNRS 733C, GNRS 734A and GNRS 734B

GNRS 735, DNP Scholarly Project Seminar, 3 Units
The DNP program requires a rigorous clinical project focused on translating scientific research to health care in a timely manner so that patients experience the best applications of science and practice. The project is a scholarly experience that implements the principles of evidence-based practice and translation under the guidance of a faculty mentor. In line with the AACN Essentials of 2007, the outcome of the DNP scholarly project is a tangible and deliverable academic product that is derived from the practice immersion experience and reviewed and evaluated by an academic committee. The project also serves as a foundation for future scholarly practice.

GNRS 736, DNP Scholarly Project Seminar: Evaluation and Dissemination, 2 Units
This course focuses on presentation to and approval of a completed DNP Scholarly Project. The DNP program requires a rigorous clinical project focused on translating scientific research to health care to improve the patients experience utilizing the best evidence of science and practice. This scholarly project is a culminating, independent experience which demonstrates the student's synthesis of coursework and lays the foundation for future scholarship.

GNRS 780, Doctoral Seminar I: Elements of a Proposal and IRB Application, 3 Units
This seminar directs the development of either a PhD dissertation or a DNP Scholarly Project proposal draft that details a problem, the research/project purpose, questions or hypotheses to be examined, a synopsis of the relevant literature, the design and methods of the study including its timeline, protection of human subjects, plans for analysis, and the budget. The seminar also includes preparation of IRB applications, and peer review and critique of student proposals.
Prerequisite: Admission to DNP or PhD program

GNRS 781, Doctoral Seminar II: Developing a Grant Proposal, 3 Units
This doctoral seminar provides students with the opportunity to acquire knowledge, skills, and insights in the writing of a grant proposal. Discussion will focus on the value of writing grant proposals, the basic principles in writing a grant proposal, the components of a grant proposal, identification of funding sources, the difference between a research and a program grant proposal, as well as administrative factors in submitting a grant proposal. Students will craft and a grant proposal in response to a Request for Funding Proposal (RFP) that aligns with the guidelines of the funding agency, and additionally, a budget plan with justification, timelines, and a bio-sketch. In addition, students will conduct a peer review of class completed grant proposals.
GNRS 782, Doctoral Seminar III: Writing for Publication, 3 Units
This seminar focuses on various aspects of writing for publication and directs the development of a manuscript suitable for publication from a previously written paper (e.g., a course term paper). This course will help the student get started on writing; identify writing styles for various forms of publication including abstracts, journal articles, papers, and books; and determine appropriate journals to consider for article submission. The student will acquire practice in reviewing and critiquing scholarly writing by others. It will also address the editorial and publication process, as well as ethical aspects of writing for publication.

GNRS 783, Doctoral Seminar IV: Developing Professional Presentations, 3 Units
This seminar course identifies approaches to developing an effective and successful presentation, helping students find their voice and showcase their areas of expertise. Discussions focus on planning as essential to deciding on the content and the order in which the information is presented. Emphasis is on developing a logical sequence, one that flows naturally and is accompanied by audiovisuals that facilitate understanding of the material.

GNRS 784, Dissertation Seminar V, 2-4 Units
This fifth dissertation seminar provides the student a forum to explore with their peers research findings, theoretical and empirical implications, and potential venues for publication of manuscripts. Format and procedures for progression in the dissertation process are also discussed. Placement of the Course: This seminar is not required if dissertation seminar requirement of 12 units has been met by GNRS 780, GNRS 781, GNRS 782, GNRS 783, and student has defended dissertation. Grading: Pass/Fail.
Prerequisite: GNRS 783

GNRS 791, Doctor of Nursing Practice Intensive I, 1 Unit
This is the first of four intensive courses that give DNP students a face-to-face interactive experience through out-of-classroom work. This course introduces students to the role of the DNP nurse in a variety of healthcare settings. Students acquire advanced practice and academic skills necessary for selecting a population of interest and applying evidence-based practice to it as part of an evidence-based DNP scholarly project consistent with the DNP role within a healthcare organizational setting.
Admission to the DNP program; corequisite: GNRS 716

GNRS 792, Doctor of Nursing Practice Intensive II, 1 Unit
This is the second of four intensive courses that give DNP students a face-to-face interactive experience through out-of-classroom work. This course helps students identify strategies within a multidisciplinary model that promotes evidence-based practice in various clinical, community, and educational settings. Students receive support and direction in collaboration with the sponsoring facility and mentor as they develop a comprehensive, site-specific DNP scholarly project proposal.
GNRS 791; corequisite: GNRS 780

GNRS 793, Doctor of Nursing Practice Intensive III, 1 Unit
This is the third of four intensive courses that give DNP students a face-to-face interactive experience through out-of-classroom work. This course equips students with the skills, competencies, and points of view needed for developing the ethical reasoning/decision-making skills necessary for conducting their DNP scholarly projects.
GNRS 792; corequisite: GNRS 780

GNRS 794, Doctor of Nursing Practice Intensive IV, 1 Unit
This is the last of four intensive courses that give DNP students a face-to-face interactive experience through out-of-classroom work. As in the other intensive experiences, course content for each student reflects the interests of the student and is designed to meet that student's needs and career goals. This course allows students, with guidance from their mentors and faculty, to complete the DNP scholarly project and finalize the written and oral scholarly reports that disseminate and integrate new knowledge. Each student's final product reflects their ability to employ effective communication and collaboration skills, take a leadership role, integrate core DNP concepts and competencies that influence healthcare quality and safety, and successfully negotiate change in healthcare delivery for individuals, families, populations, or systems across a broad spectrum of health care.
Prerequisite: GNRS 793;
Corequisite: GNRS 736

GNRS 795, Special Topics, 1-4 Units
In this course, a subject of current interest is examined in depth. Students analyze and evaluate controversial issues to reach and express a reflective position. Students may repeat the course for credit to a maximum of six units applied toward the doctoral program; each course must address a different topic.

GNRS 798, Continuous Doctoral Study, 0 Units
This course is for doctoral students working on dissertations or translational research projects. Students must re-enroll each semester until the dissertation or translational research project is completed, defended, submitted to the library, and approved.

GNRS 799, Independent Study, 1-4 Units
Students enroll in this course to pursue independent study investigating subjects and interests that lie beyond regular course offerings. The student explores topics in greater depth than in other courses, and/or initiates an individual project. Readings are pursued in accordance with a study plan, which is developed in consultation with a sponsoring doctoral faculty member and approved by the doctoral department.
**Master of Science in Nursing (MSN) with Credentials**

- MSN and Family Nurse Practitioner (FNP) and School Nurse Services Credential (SNSC) (p. 942)
- MSN and Pediatric Nurse Practitioner–Primary Care (PNP-PC) and School Nurse Services Credential (SNSC) (p. 943)
- MSN with School Nurse Services Credential (SNSC) (p. 944)

**MSN and Family Nurse Practitioner (FNP) and School Nurse Services Credential (SNSC)**

This combined specialty program (https://www.apu.edu/nursing/programs/msn-snsf-fnp/) prepares nurses to be effective practitioners of school health and provide primary care for people of all ages in a variety of settings. Through the program, students develop theoretical and practical expertise in nursing and education applied to basic health services in the public schools (K-12). This enables them to establish, maintain, and coordinate a comprehensive school health program. The advanced practice family nurse practitioner specialty includes direct client assessment, diagnosis, management and treatment, client advocacy, and client/family education. Graduates are eligible to apply to the state of California for the School Nurse Services Credential; they are also eligible to apply to the California Board of Registered Nursing for certification as a nurse practitioner, and may apply for national FNP certification through examination.

Students must also take a California-approved audiometry course to meet SNSC requirements.

Admission

University graduate admission and program-specific requirements must be met before an application is complete (see Admission to the University (p. 1092). Program-specific application requirements are available online (https://tracking.cirrusinsight.com/74647a2d-e9a2-412f-9b55-9959c7aac4ec/apu-edu-graduateprofessionalcenter-admissions-requirements-program/).

International students should contact Graduate and Professional Admissions (https://www.apu.edu/graduateprofessionalcenter/admissions/) for application procedures.

MSN and Pediatric Nurse Practitioner—Primary Care (PNP-PC) and School Nurse Services Credential (SNSC)

This combined specialty program (https://www.apu.edu/nursing/programs/msn-snscc-pnp/) prepares nurses to be effective practitioners of school health and provide primary care for children in a variety of other settings. Through the program, students develop theoretical and practical expertise in nursing and education applied to basic health services in the public schools (K-12). This enables them to establish, maintain, and coordinate a comprehensive school health program. The advanced practice pediatric nurse practitioner-primary care specialty includes direct client assessment, diagnosis, management and treatment, client advocacy, and client/family education. Graduates are eligible to apply to California for the School Nurse Services Credential. They are also eligible to apply to the California Board of Registered Nursing for certification as a nurse practitioner, and may apply for national PNP certification through examination.

Students must also take a California-approved audiometry course to meet SNSC requirements.

| - or -   |                                                                      |       |
| GNRS 598 | Thesis                                                               | 3     |
| & GNRS 514| and Research Proposal Writing                                       |       |

**Total Units for the MSN with SNSC** ²                                                                 | 39-41  |

¹ Numbers in parentheses are classroom/clinical units.

² Students must also take a California-approved audiometry course to meet SNSC requirements.
Admission

University graduate admission and program-specific requirements must be met before an application is complete (see Admission to the University (p. 1082)). Program-specific application requirements are available online (https://tracking.cirrusinsight.com/74647a2e-9a2e-4121-9b55-9599c7aad4ec/apu-edu-graduateprofessionalcenter-admissions-requirements-program/).

International students should contact Graduate and Professional Admissions (https://www.apu.edu/graduateprofessionalcenter/admissions/) for application procedures.

Program Learning Outcomes

Students who successfully complete this program shall be able to:
1. Articulate a Christian worldview, demonstrating respect for the dignity and uniqueness of others, valuing diversity, and applying spiritual concepts.
2. Engage in scholarly inquiry and critical thinking, including evaluation and application of evidence-based research.
3. Appraise and apply knowledge to develop, implement, and evaluate interventions that promote health and prevent disease.
4. Demonstrate thoughtful analysis of the legal, political, ethical, and/or financial factors impacting health care.
5. Use information systems and technology to communicate, manage knowledge, promote quality, mitigate error and support decision-making.
6. Demonstrate the ability to coordinate and collaborate with other health care team professionals.
7. Engage in clinical reasoning, effective communication, and act as change agents to develop professional identity and practice skill.

Master of Science in Nursing (MSN) with Single Specialties

- Adult-Gerontology or Pediatric Clinical Nurse Specialist (CNS) (p. 945)
- Adult-Gerontology Primary Care Nurse Practitioner (AGPCNP) (p. 947)
- Family Nurse Practitioner (FNP) (p. 948)
- Pediatric Nurse Practitioner–Primary Care (PNP-PC) (p. 948)
- Psychiatric Mental Health Nurse Practitioner (PMHNP) (p. 949)

Adult-Gerontology or Pediatric Clinical Nurse Specialist (CNS)

The Master of Science in Nursing with Adult-Gerontology or Pediatric Clinical Nurse Specialist (CNS) program (https://www.apu.edu/nursing/programs/msn-cns/) allows students to concentrate on one of these two clinical areas of content and practice. Nurses with advanced practice preparation may work in acute, primary, or long-term care settings. Students learn the process of developing and sustaining evidence-based practice in illness management, advancing the practice of other nurses and nursing personnel, and developing organizational or systems modifications to support and improve nursing practice. The traditional CNS roles of expert clinical practice, consultation, clinical leadership, research, and education are shaped toward producing desirable patient outcomes as the CNS works in several spheres of influence. Graduates are eligible to apply to the state of California for certification as clinical nurse specialists, and may apply for national certification through examination by the American Nurses Credentialing Center (ANCC) (https://www.nursingworld.org/ancc/).

Admission

University graduate admission and program-specific requirements must be met before an application is complete (see Admission to the University (p. 1092)). Program-specific application requirements are available online (https://tracking.cirrusinsight.com/74647a2de9a2-4121-b955-9959c7aacc4ec/apu-edu-graduateprofessionalcenter-admissions-requirements-program/).

International students should contact Graduate and Professional Admissions (https://www.apu.edu/graduateprofessionalcenter/admissions/) for application procedures.

Adult-Gerontology Primary Care Nurse Practitioner (AGPCNP)

The Master of Science in Nursing with Adult-Gerontology Primary Care Nurse Practitioner (AGPCNP) program (https://www.apu.edu/nursing/programs/msn-np/) prepares students to provide primary care to the young adult, adult, and older adult age spectrum across the continuum of care from wellness to illness, in settings that include community health centers and clinics, private medical practices, long-term care facilities, and patient homes. Graduates are eligible to apply to the state of California Board of Registered Nursing (https://www.rn.ca.gov/) for certification as a nurse practitioner and may apply for national AGPCNP certification through examination.

Admission

University graduate admission and program-specific requirements must be met before an application is complete (see Admission to the University (p. 1092)). Program-specific application requirements are available online (https://tracking.cirrusinsight.com/74647a2de9a2-4121-b955-9959c7aacc4ec/apu-edu-graduateprofessionalcenter-admissions-requirements-program/).

International students should contact Graduate and Professional Admissions (https://www.apu.edu/graduateprofessionalcenter/admissions/) for application procedures.
Family Nurse Practitioner (FNP)

This specialty program (https://www.apu.edu/nursing/programs/msn-np/) prepares students to be nurse practitioners for patients across the human lifespan in a primary healthcare setting. This advanced clinical practice specialty includes direct patient assessment, diagnosis, management, and treatment; client advocacy; and client/family education. Graduates are eligible to apply to the California Board of Registered Nursing (https://www.rn.ca.gov/) for certification as a nurse practitioner and may apply for national FNP certification through examination.

Total Units: 45-47

1 Units in parentheses are classroom/clinical units.

Admission

University graduate admission and program-specific requirements must be met before an application is complete (see Admission to the University (p. 1092)). Program-specific application requirements are available online (https://tracking.cirrusinsight.com/74647a2d-e9a2-4121-9b55-9959c7aac4ec/apu-edu-graduateprofessionalcenter-admissions-requirements-program/).

International students should contact Graduate and Professional Admissions (https://www.apu.edu/graduateprofessionalcenter/admissions/) for application procedures.

Pediatric Nurse Practitioner–Primary Care (PNP-PC)

The Master of Science in Nursing (MSN) with a Pediatric Nurse Practitioner–Primary Care (PNP-PC) specialty (https://www.apu.edu/nursing/programs/msn-np/) prepares students to be nurse practitioners with children and families in primary health care settings. This advanced practice specialty
includes direct client assessment, diagnosis, management and treatment, client advocacy, and client/family education. Graduates are eligible to apply to the state of California Board of Registered Nursing (https://www.rn.ca.gov/) for certification as a nurse practitioner, and may apply for national PNP-PC certification through examination.

### Admission

University graduate admission and program-specific requirements must be met before an application is complete (see Admission to the University (p. 1092)). Program-specific application requirements are available online (https://tracking.cirrusinsight.com/74647a2d-e9a2-412f-9b55-9959c7aac4ec/apu-edu-graduateprofessionalcenter-admissions-requirements-program/).

International students should contact Graduate and Professional Admissions (https://www.apu.edu/graduateprofessionalcenter/admissions/) for application procedures.

### Psychiatric Mental Health Nurse Practitioner (PMHNP)

This specialty master’s program (https://www.apu.edu/nursing/programs/msn-np/) prepares students as psychiatric mental health nurse practitioners for clients with psychiatric and mental health problems across the lifespan. Graduates are prepared to work respectfully and collaboratively with clients/consumers who are experiencing severe or chronic mental illnesses to determine biopsychosocial healthcare needs within a complex and changing environment. Theory and clinical coursework focus on assessment; differential diagnosis and disease management; intervention planning; individual, family, and group psychotherapy; health promotion; and disease prevention.

The inherent equality and worthiness of those who are vulnerable and disenfranchised, the role of spirituality, the value of diversity, and the ability to engender hope, empowerment, self-responsibility, and a meaningful role in life are threaded throughout the program. Graduates are
eligible to apply to the California Board of Registered Nursing (https://www.rn.ca.gov/) for certification as a nurse practitioner, and may apply for national PMHNP certification through examination.

Total required for the MSN with PMHNP 54-56

¹ Units shown in parentheses are classroom/clinical units.

Admission

University graduate admission and program-specific requirements must be met before an application is complete (see Admission to the University (p. 1092)). Program-specific application requirements are available online (https://tracking.cirrusinsight.com/74647a2d-e9a2-412f-9b55-9959c7aac4ec/apu-edu-graduateprofessionalcenter-admissions-requirements-program/).

International students should contact Graduate and Professional Admissions (https://www.apu.edu/graduateprofessionalcenter/admissions/) for application procedures.

Post-Bachelor’s Credentials

• School Nurse Services Credential (SNSC) (a nondegree post-bachelor’s program) (p. 950)

School Nurse Services Credential (SNSC)

This specialty (nondegree) program (https://www.apu.edu/nursing/programs/school-nurse-services-credential/) includes core academic courses and those required for the school nurse services credential, preparing registered nurses who have completed a bachelor’s degree to be effective practitioners of school health. Students develop theoretical and practical expertise in nursing and education applied to basic health services in the public schools (K-12), learning to establish, maintain, and coordinate a comprehensive school health program. This includes planning health programs, assessing the health of children, providing health care and health referral, and contributing to the formulation and evaluation of health policy. To maximize children’s ability to learn in school, candidates for the credential emphasize child health maintenance, illness prevention, restoration of health, and childhood wellness. This program is approved by the California Commission on Teacher Credentialing (CTC) (https://www.ctc.ca.gov/).
Admission requirements (https://www.apu.edu/nursing/programs/school-nurse-services-credential/admission/) are the same as those for the Master of Science in Nursing program. Students must also take a California-approved audiometry course to meet SNSC requirements.

### Admission

University graduate admission and program-specific requirements must be met before an application is complete (see Admission to the University (p. 1092)). **Program-specific application requirements are available online (https://tracking.cirrusinsight.com/74647a2de9a2-412f-9b55-9959c7aac4ec/apu-edu-graduateprofessionalcenter-admissions-requirements-program/).**

International students should contact Graduate and Professional Admissions (https://www.apu.edu/graduateprofessionalcenter/admissions/) for application procedures.

### Program Learning Outcomes

#### Program Learning Outcomes

Students who successfully complete this program shall be able to:

1. Articulate a Christian worldview, demonstrating respect for the dignity and uniqueness of others, valuing diversity, and applying spiritual concepts.
2. Engage in scholarly inquiry and critical thinking, including evaluation and application of evidence-based research.
3. Appraise and apply knowledge to develop, implement, and evaluate interventions that promote health and prevent disease.
4. Demonstrate thoughtful analysis of the legal, political, ethical, and/or financial factors impacting health care.
5. Use information systems and technology to communicate, manage knowledge, promote quality, mitigate error and support decision-making.
6. Demonstrate the ability to coordinate and collaborate with other health care team professionals.
7. Engage in clinical reasoning, effective communication, and act as change agents to develop professional identity and practice skill.

### Post-Master’s Certificate Programs

The School of Nursing offers certificate programs to prepare nurses for advanced practice, education, and administrative roles. The curriculum for these programs reflects the School of Nursing mission and philosophy, and professional education standards for nursing. The programs are accredited by the Commission on Collegiate Nursing Education (https://www.aacnnursing.org/CCNE/) and the California Board of Registered Nursing (https://www.rn.ca.gov/). The following are offered:

- Adult-Gerontology Clinical Nurse Specialist (CNS) Certificate (p. 952)
- Adult-Gerontology Primary Care Nurse Practitioner (AGPCNP) Certificate (p. 953)
- Family Nurse Practitioner (FNP) Certificate (p. 954)
- Post-Master's Certificate in Healthcare Administration and Leadership (http://catalog.apu.edu/academics/school-nursing/healthcare-administration-leadership/healthcare-administration-leadership-post-masters-certificate/)
- Nursing Education Certificate (p. 956)
- Oncology Nurse Practitioner Certificate (p. 956)
• Pediatric Clinical Nurse Specialist (CNS) Certificate (p. 957)
• Pediatric Nurse Practitioner–Primary Care (PNP-PC) Certificate (p. 958)
• Psychiatric Mental Health Nurse Practitioner (PMHNP) Certificate (p. 959)

Prerequisites
1. Master's degree in nursing
2. Completion of a graduate research course
3. Completion of an undergraduate health assessment course

Admission
University graduate admission and program-specific requirements must be met before an application is complete (see Admission to the University (p. 1092)). Program-specific application requirements are available online (https://tracking.cirrusinsight.com/74647a2d-e9a2-412f-9b55-9959c7aac4ec/apu-edu-graduateprofessionalcenter-admissions-requirements-program/).

International students should contact Graduate and Professional Admissions (https://www.apu.edu/graduateprofessionalcenter/admissions/) for application procedures.

Adult-Gerontology Clinical Nurse Specialist (CNS) Certificate

The Adult-Gerontology Clinical Nurse Specialist (CNS) Certificate (https://www.apu.edu/nursing/programs/adult-cns-certificate/) program is a nondegree course credit option for nurses with a master's degree in nursing. This program provides theory and clinical experiences to prepare nurses to apply to the state of California Board of Registered Nursing for certification and to apply for national certification as an adult clinical nurse specialist (CNS) by examination. **Note:** Students must be admitted to the university before registering for this program (see Admission section below).

1 Students may be given transfer credits for previous content completed in a master's degree program.

7. Engage in clinical reasoning, effective communication, and act as change agents to develop professional identity and practice skill.

Adult-Gerontology Primary Care Nurse Practitioner (AGPCNP) Certificate

The Adult-Gerontology Primary Care Nurse Practitioner (AGPCNP) Certificate (https://www.apu.edu/nursing/programs/gerontology-nurse-practitioner/) program is designed as a nondegree course credit option for nurses with a master’s degree in nursing. This program prepares students to provide primary care to the young adult, adult, and older adult age spectrum across the continuum of care from wellness to illness, in settings including community health centers and clinics, private medical practices, long-term care facilities, and patient homes. Graduates are eligible to apply to the state of California Board of Registered Nursing for certification as a nurse practitioner, and may apply for the national AGPCNP certification examination. 

Note: Students must be admitted to the university before registering for this program (see Admission section below).

1 Students may be given credits for previous content completed in a master’s degree program. Students who hold current California certification as a nurse practitioner or nurse midwife, and students who hold a master’s degree in nursing and/or national certification as a clinical nurse specialist (CNS), may challenge or request a waiver of the coursework required for the Adult-Gerontology Primary Care Nurse Practitioner (AGPCNP) program, as appropriate to the student’s current specialty. Petitions for challenge or waiver of courses must be initiated upon admission and approved by the MSN chair. Students must show proof of current nurse practitioner, nurse midwife, or clinical nurse specialist certification.

Family Nurse Practitioner (FNP) Certificate

The Family Nurse Practitioner (FNP) Certificate program (https://www.apu.edu/nursing/programs/fnp-certificate/) is a nondegree course credit option for nurses with a master’s degree in nursing. This program prepares students with primary healthcare skills through didactic education and clinical supervision. Nurses are eligible to apply to the California Board of Registered Nursing for certification as a nurse practitioner, and may apply for national FNP certification through examination. Students must be admitted into the university before registering for this program.

1 Students may be given transfer credits for previous content completed in a master’s degree program. Students who hold current California certification as a nurse practitioner or nurse midwife, and students who hold a master’s degree in nursing and/or national certification as a clinical nurse specialist (CNS), may challenge or request waiver of the coursework required for the Family Nurse Practitioner program, as appropriate to the student’s current specialty. Petitions for challenge or waiver of courses must be initiated upon admission and approved by the MSN chair. Students must show proof of current nurse practitioner, nurse midwife, or clinical nurse specialist certification.

Post-Master’s Certificate in Healthcare Administration and Leadership

The Post-Master’s Certificate in Healthcare Administration and Leadership (https://www.apu.edu/nursing/programs/nursing-administration-certificate/) program prepares professionals for administrative positions and leadership opportunities in nursing in a variety of healthcare settings. Coursework focuses on strategic leadership, leading change, managing teams and resources, and the business of healthcare finance and patient care delivery. This program is a way for nurses to advance their career options and builds on skills and knowledge obtained in a Master of Science in Nursing program. Note: Students must be admitted to the university before registering for this program (see Admission section below).

**Oncology Nurse Practitioner Post-Master’s Certificate**

The oncology nurse practitioner predoctoral fellowship program (https://www.apu.edu/nursing/programs/oncology-nurse-practitioner/) is designed for licensed nurse practitioners interested in providing high-quality care across the illness span to cancer patients and their families. To maximize survivorship and minimize distress, candidates are prepared to address the unique physiologic and psychosocial needs of cancer patients across the illness span in a program that emphasizes screening, surveillance, diagnosing, staging, and team-building. The curriculum is based on Oncology Nursing Society competencies, and students participate in 540 hours of supervised direct patient care experiences in multiple specialty services at a comprehensive cancer care center. Candidates enrolled in Azusa Pacific’s Doctor of Nursing Practice program may apply these hours toward the
residency requirement and may petition to apply didactic units toward the specialty courses. Candidates for the certificate meet the eligibility criteria for the Advanced Oncology Certified Nurse Practitioner examination offered by the Oncology Nursing Certification Corporation.

**Prerequisites**
- Master’s degree in nursing that includes advanced pathophysiology, advanced pharmacology, and advanced health assessment.
- Experience in oncology nursing.
- Current California nurse practitioner license.

**Total Units**: 24

**Admission**

University graduate admission and program-specific requirements must be met before an application is complete (see Admission to the University (p. 1092)). Program-specific application requirements are available online (https://tracking.cirrusinsight.com/74647a2d-e9a2-412f-9b55-9959c7aac4ec/apu-edu-graduateprofessionalcenter-admissions-requirements-program/).

International students should contact Graduate and Professional Admissions (https://www.apu.edu/graduateprofessionalcenter/admissions/) for application procedures.

**Program Learning Outcomes**

**Program Learning Outcomes**

Students who successfully complete this program shall be able to:

1. Articulate a Christian worldview, demonstrating respect for the dignity and uniqueness of others, valuing diversity, and applying spiritual concepts.
2. Engage in scholarly inquiry and critical thinking, including evaluation and application of evidence-based research.
3. Appraise and apply knowledge to develop, implement, and evaluate interventions that promote health and prevent disease.
4. Demonstrate thoughtful analysis of the legal, political, ethical, and/or financial factors impacting healthcare.
5. Use information systems and technology to communicate, manage knowledge, promote, quality, mitigate error and support decision making.
6. Demonstrate the ability to coordinate and collaborate with other health care team professionals.
7. Engage in clinical reasoning, effective communication, and act as a change agent to develop professional identity and practice skill.

**Pediatric Clinical Nurse Specialist (CNS) Certificate**

The Pediatric Clinical Nurse Specialist (CNS) Certificate (https://www.apu.edu/nursing/programs/pediatric-cns-certification/) program is a nondegree course credit option for nurses with a master’s degree in nursing. Pediatric clinical nurse specialists influence best-practice care of pediatric populations across the care continuum through direct care and as consultants and educators. This program provides theory and clinical experiences to prepare nurses to apply to the state of California for certification as a CNS. Graduates may also apply for national certification as a pediatric CNS through examination. **Note: Students must be admitted to the university before registering for this program (see Admission section below).**

**Pediatric Nurse Practitioner–Primary Care (PNP-PC) Certificate**

The Pediatric Nurse Practitioner–Primary Care (PNP-PC) Certificate program is a nondegree course credit option for nurses with a master’s degree in nursing. This program prepares students with primary healthcare skills through didactic education and clinical supervision. Nurses who complete this program are eligible to apply to the California Board of Registered Nursing for certification as a nurse practitioner, and may apply for national PNP-PC certification through examination. Note: Students must be admitted to the university before registering for this program (see Admission section below).

1 Students may be given transfer credits for previous content completed in a master’s degree program. Students who hold current California certification as a nurse practitioner or nurse midwife, and students who hold a master’s degree in nursing and/or national certification as a clinical nurse specialist (CNS), may challenge or request waiver of the coursework required for the Pediatric Nurse Practitioner program, as appropriate to the student’s current specialty. Petitions for challenge or waiver of courses must be initiated upon admission and approved by the MSN chair. Students must show proof of current nurse practitioner, nurse midwife, or clinical nurse specialist certification.

2 This requirement is waived for 1992-96 APU master’s graduates, as the content was integrated in the clinical courses.

## Admission

University graduate admission and program-specific requirements must be met before an application is complete (see Admission to the University (p. 1092)). Program-specific application requirements are available online (https://tracking.cirrusinsight.com/74647a2d-e9a2-412f-9b55-9559c7aad4ec/apu-edu-graduateprofessionalcenter-admissions-requirements-program/).

International students should contact Graduate and Professional Admissions (https://www.apu.edu/graduateprofessionalcenter/admissions/) for application procedures.

## Program Learning Outcomes

### Program Learning Outcomes

Students who successfully complete this program shall be able to:

1. Articulate a Christian worldview, demonstrating respect for the dignity and uniqueness of others, valuing diversity, and applying spiritual concepts.
2. Engage in scholarly inquiry and critical thinking, including evaluation and application of evidence-based research.
3. Appraise and apply knowledge to develop, implement, and evaluate interventions that promote health and prevent disease.
4. Demonstrate thoughtful analysis of the legal, political, ethical, and/or financial factors impacting healthcare.
5. Use information systems and technology to communicate, manage knowledge, promote quality, mitigate error and support decision-making.
6. Demonstrate the ability to coordinate and collaborate with other health care team professionals.
7. Engage in clinical reasoning, effective communication, and act as change agents to develop professional identity and practice skill.

## Psychiatric Mental Health Nurse Practitioner (PMHNP) Certificate

The Psychiatric Mental Health Nurse Practitioner Certificate program (https://www.apu.edu/nursing/programs/psychiatric-nurse-practitioner/) is a nondegree course credit option for nurses with a master’s degree in nursing.1 This program prepares students as psychiatric mental health nurse practitioners for clients with psychiatric and mental health problems across the lifespan. Nurses are eligible to apply to the California Board of Registered Nursing (https://www.rn.ca.gov/) for certification as a nurse practitioner, and may apply for national PMHNP certification through examination. **Note:** Students must be admitted to the university before registering for this program (see Admission section below).

1 Students may be given transfer credits for previous content completed in a master’s degree program. Students who hold current California certification as a nurse practitioner or nurse midwife, and students who hold a master’s degree in nursing and/or national certification as a clinical...
nurse specialist (CNS), may challenge or request waiver of the coursework required for the Psychiatric Mental Health Nurse Practitioner program, as appropriate to the student’s current specialty. Petitions for challenge or waiver of courses must be initiated upon admission and approved by the MSN chair. Students must show proof of current nurse practitioner, nurse midwife, or clinical nurse specialist certification.

### Admission

University graduate admission and program-specific requirements must be met before an application is complete (see Admission to the University (p. 1092)). Program-specific application requirements are available online ([https://tracking.cirrusinsight.com/74647a2d-e9a2-412f-9b55-9959c7aac4ec/apu-edu-graduateprofessionalcenter-admissions-requirements-program/](https://tracking.cirrusinsight.com/74647a2d-e9a2-412f-9b55-9959c7aac4ec/apu-edu-graduateprofessionalcenter-admissions-requirements-program/)).

International students should contact Graduate and Professional Admissions ([https://www.apu.edu/graduateprofessionalcenter/admissions/](https://www.apu.edu/graduateprofessionalcenter/admissions/)) for application procedures.

### Program Learning Outcomes

#### Program Learning Outcomes

Students who successfully complete this program shall be able to:

1. Articulate a Christian worldview, demonstrating respect for the dignity and uniqueness of others, valuing diversity, and applying spiritual concepts.
2. Engage in scholarly inquiry and critical thinking, including evaluation and application of evidence-based research.
3. Appraise and apply knowledge to develop, implement, and evaluate interventions that promote health and prevent disease.
4. Demonstrate thoughtful analysis of the legal, political, ethical, and/or financial factors impacting healthcare.
5. Use information systems and technology to communicate, manage knowledge, promote quality, mitigate error and support decision-making.
6. Demonstrate the ability to coordinate and collaborate with other health care team professionals.
7. Engage in clinical reasoning, effective communication, and act as change agents to develop professional identity and practice skill.
Department of Nursing Education

The Master of Science in Nursing (MSN) in Nursing Education (p. 961) prepares nurses for teaching roles in a variety of settings, including traditional and nontraditional academic settings, online/distance settings, and clinical and community settings, using cutting-edge technology and teaching-learning methods. The program emphasizes competencies needed for students to complete the Certified Nurse Educator (CNE) certification examination, and is aligned with the American Association of Colleges of Nursing’s *The Essentials of Master’s Education in Nursing* (AACN, 2011) and the National League for Nursing’s *Nurse Educator Competencies* (NLN, 2022).

**Admission**

University graduate admission and program-specific requirements must be met before an application is complete (see Admission to the University (p. 1092)). Program-specific application requirements are available online (https://tracking.cirrusinsight.com/74647a2d-e9a2-4121-9b35-9959c7aac4ec/apu-edu-graduateprofessionalcenter-admissions-requirements-program/).

International students should contact Graduate and Professional Admissions (https://www.apu.edu/graduateprofessionalcenter/admissions/) for application procedures.
Department of Public Health

Master of Public Health (MPH)

The Department of Public Health offers a Master of Public Health (p. 966) program that provides students with competencies required to understand the unique challenges inherent to public health practice and education. The curriculum reflects the School of Nursing mission and emphasizes the conceptual, analytical, and experiential skills required to serve in the public health sector. Throughout the program, an emphasis is placed on the five core areas of public health: biostatistics, epidemiology, environmental health sciences, health policy and management, and social and behavioral sciences. There are also seven cross-cutting areas interwoven into the curriculum: communication, diversity and culture, leadership, professionalism and ethics, program planning and assessment, public health biology, and systems thinking.

Students may choose from various electives that cover different public health areas of interest: biostatistics and epidemiology, social and behavioral science, public health policy, healthcare administration, health promotion and education, international health, environmental health, and disaster health and emergency preparedness. Students should check with the department regarding elective availability, then meet with an advisor to develop a course plan that is consistent with their desired electives.

Transfer of Credits

Following admission, 9 units of approved graduate work completed elsewhere may be applied toward the MPH degree.

Additional Requirements

At the beginning of clinical coursework, including the field practicum, students are required to provide documentation of TB screening and immunizations appropriate for the clinical or field practicum setting.

A student’s health status must permit him/her to safely undertake and complete clinical (field practicum) experience required for the degree. As a fully prepared public health practitioner, the student is expected to take responsibility for self-evaluation of her/his health status, including an assessment of the safety and appropriateness of practice in the clinical context.

The Joint Commission (https://www.jointcommission.org/), contracted facilities, and the School of Nursing require that all graduate students undergo a background check prior to their placement at clinical and field practicum sites. The cost of the background check is the responsibility of the student. International students have additional fees based on the cost of a background check in their country.

Students may select additional elective courses to support their programs of study as directed by faculty.

Programs

- Master of Public Health (p. 966)

Courses

GSPH 504, Bioethics and Healthcare Policy, 3 Units

This course will outline the role of the healthcare leader in ensuring human rights are upheld in healthcare systems. This course focuses on bioethical analysis, decision-making and moral policy analysis, and formulation. Through course discussion, group and individual assignments, and oral and written presentations, students will analyze and apply bioethical principles to decision- and policy- making processes in the workplace and at national levels. Healthcare ethics and policy will be considered from a Christian worldview.

GSPH 506, Spiritual Concept Analysis in Health Care, 3 Units

This course focuses on scholarly research and analysis of selected concepts in the spiritual care of people from the Judeo-Christian perspective. Students also examine healthcare research/other healthcare literature for adequacy with respect to the concept they select. Various assignments facilitate greater student awareness of their own spiritual journeys and knowledge of faith traditions other than their own. The course is conducted as a tutorial/seminar experience.

GSPH 508C, Research and Theory in Health Care, 3 Units

This course prepares the healthcare practitioner to apply theory and research evidence in healthcare environments. The relationship between theory and research is examined as students consider questions about the nature, construction, and use of each. Selected theories are explored, and students learn how ideas are developed and used in practice and research. Students also learn the fundamentals of quantitative, qualitative, and mixed-methods research and deepen their understanding through systematic search, critique, and summary of research studies with application to health care. Students work in groups to develop a research plan addressing a healthcare-derived question. Experience in statistical analysis of research data is included.
GSPH 510, Social Determinants of Health, 3 Units
A central focus of the public health field is understanding the etiology, occurrence, and distribution of health outcomes (morbidity and mortality). One growing area of importance within the field is examining how health and disease are influenced and maintained by social, economic, and political risk factors - called social determinants of health. This course provides a macro-level overview of concepts, research, and theoretical models of social determinants of health. Through interactive lectures, readings, and assignments, students are exposed to major areas of study linked to social determinants of health, with discussions centered on the following key questions: What social factors are the greatest challenge to health outcomes within local communities? What does it mean to use a social determinants lens when studying health outcomes among diverse multicultural populations? What are health disparities and how might they best be addressed? What behavioral lifestyle factors commonly interplay with social determinants of health?

GSPH 512, Health, Culture, and Diversity, 3 Units
This course covers the issues of health disparities in the United States and the development of culturally competent programs. Students examine what is meant by culture, the ways in which culture and health issues intersect, and how public health efforts can benefit by understanding and working with cultural processes.

GSPH 514, Research Proposal Writing, 2 Units
This course focuses on the application of the concepts in GSPH 508C Research and Theory in Health Care. The goal is the completion of a research proposal that details the problem, the research purpose, questions or hypotheses to be tested, a critique of the literature, the design and methods of the study including protection of human subjects, the plans for analysis, use of the study, and the budget and personnel. **Prerequisite:** GSPH 508C

GSPH 515, Health Care Entrepreneurship, 3 Units
The course provides an opportunity to combine the strengths of public health training with new and existing approaches to social innovation and entrepreneurship from a Christian perspective. Students have opportunities to imagine solutions and mobilize resources to advance the public good and strengthen public health service. Course material introduces entrepreneurial concepts and tools to develop skills for use in various business environments.

GSPH 518, Population Health Management, 3 Units
This course covers important topics in the effective management of public health departments and agencies. Students develop knowledge and skills to fulfill roles in public health management as leaders, administrators, fundraisers, and internal and external communicators. Course content includes ways to be an effective coach to maximize the team's performance, the essentials of effective partnerships, how to create and sustain public health initiatives using business skills, how to run meetings, ways to manage electronic correspondence, and effective strategies to keep the public health organization running smoothly.

GSPH 519, Global Health Systems, 3 Units
This course examines international health systems in terms of infrastructure and function. Students examine the benefits and risks of universal healthcare, third party reimbursement systems, and global availability and access to medical services.

GSPH 520, Public Policy, the Health Care System, and Public Health Policy in the United States, 3 Units
This course is designed to provide students with an overview of public policy, health care systems and public health policy process in the United States. Students will gain an understanding of how the healthcare system works and how United States public health care policy has been developed. Review and analysis of current various proposals for healthcare reform will be conducted.

GSPH 521, Poverty and Health Policy, 3 Units
This course examines the nature and extent of poverty, health equity, and policy primarily in the United States. It considers possible causes and consequences, and the antipoverty effects of existing and proposed policies. This course will discuss labor markets, culture, and discrimination in shaping poverty. Also, it will explore how health policies seek to ameliorate poverty and other forms of social disadvantage throughout the life course. Finally, we explore the public health implications regarding poverty, inequality, and policy.

GSPH 522, Cultural Inclusivity in Health Care, 3 Units
In this course, students explore the topics and tools necessary for the application of cultural inclusivity processes in various healthcare settings. Curriculum includes an overview of demographic changes in the United States, cultural inclusivity, diversity related to specific groups, and the paradigm of cultural and linguistic diversity. Attention is also given to the costs, time, and skill sets associated with the process of moving a healthcare organization toward cultural inclusivity.

GSPH 525, Epidemiology, 3 Units
This course covers the application of epidemiological procedures to the understanding of the occurrence and control of conditions such as infections and chronic diseases, mental disorders, community and environmental health hazards, unintentional injuries, and geriatric problems. Other topics include quantitative aspects of epidemiology, including data sources, measures of morbidity and mortality, evaluation of association and causality, study design, and screening for disease. **Prerequisite:** Undergraduate statistics and biology courses.
GSPH 526, Public Health Biology, 3 Units
Human health problems comprise a wide range of infectious, degenerative, neoplastic, and genetically based disease factors. In addition to these factors, human disease results from a wide range of environmental and socially caused pathologies. This course presents the basic scientific and biomedical concepts of modern public health problems and explores the mechanisms and models of the major categories of disease. An integrative approach using knowledge of nutrition, exercise, mind-body, and spiritual practices is explored. The biologic principles presented in this course are foundations to developing and implementing public health disease prevention, control, or management programs in the students' future.

GSPH 527, Advanced Biostatistics and Epidemiology, 3 Units
This course focuses on the application of statistical approaches in epidemiologic research, covering data management and selection of the appropriate statistical model. Regression analysis including linear regression, logistic regression, Poisson regression, and Cox regression is reviewed. Content also covers basic concepts in survival analysis including censoring, survival function, and hazard function. Epidemiologic methods for assessing causation, including mediation analysis, propensity score matching, and instrumental variable analysis, are also covered. Students learn to apply different analytic approaches using public databases.

GSPH 528, Infectious Disease Epidemiology, 3 Units
This course covers key methods for practicing infectious disease epidemiology, including study design, interpretation of data, and assessment of validity. Course content covers methods in infectious disease epidemiology, airborne transmission, diarrheal diseases, blood and body fluids as reservoirs of infectious disease, vector-borne/zoonotic diseases, and parasitic diseases. Students learn how to apply content and use problem-solving skills to develop effective prevention strategies.

GSPH 530, Principles and Practices of Toxicology, 3 Units
This course examines essential issues in environmental health, including the scientific and historical foundations, regulatory and policy issues, models and tools for assessing community environmental health, and an overview of select issues and implications of the environment on national and global health. Topics explored include select environmental pollutants in the air, water, soil, and food sources; hazardous waste, risk assessment and communication; and issues of environmental justice and vulnerable populations, nationally and globally.

GSPH 531, Advanced Environmental Health, 3 Units
This course examines concepts and issues in occupational health and safety, identifying the significance to workers and public health. Students study social influences, historical events of worker injuries, industrial hygiene, and applicable principles of toxicology, worker quality of life, and safety in the workplace.

GSPH 532, Global Health, 3 Units
Students in this course examine global health issues, emerging priorities, and worldwide challenges affecting population health and disease. They also address opportunities in and challenges to international health, holistically examine determinants of human health, and plan, implement, and evaluate programs and potential solutions to promote international prevention interventions and optimal human health worldwide, with a focus on global health equity.

GSPH 533, Public Health Communication, 3 Units
This course provides an overview of the use of communication strategies to inform and influence individual and community health decisions, with a focus on how communication concepts, theories, and methods are used for public health promotion and practice. Health communication theories include models of persuasive communications/mass media effects, social marketing, interpersonal communications, risk perceptions, and diffusion of innovations. Students work in pairs to develop/evaluate a health communication intervention that addresses a current public health issue within a specific target group.

GSPH 534, Principles and Practices of Toxicology, 3 Units
Students in this course examine the principles of toxicology, including dose-response relationships, toxicokinetics, mechanisms and methods of toxicity, select exposures to toxic substances and accompanying toxidromes, the use of antidotes, and relevance to public health.

GSPH 535, Assessment, Program Planning, and Evaluation, 3 Units
Assessment, program planning, and evaluation bridges the gap between conceptual definitions, conceptual frameworks, and practice. Students take the lead in translating evidence-based research findings to evaluation of existing and proposed public health programs in order to assess and address population health needs. Students develop a program and evaluation plan that includes evidence-based and best practices, a logic model, and formative and summative evaluation.

GSPH 536, Theories of Health Behavior, 3 Units
This course helps students develop a knowledge foundation of health behavior theories and skills for developing theoretically based behavior-change programs. Given that a major focus of public health promotion, education, and prevention programs is on "changing health behavior," there is an ongoing quest to understand why people do what they do to (a) improve or maintain their health, and/or (b) worsen their health. Through lectures, readings, and assignments, students critically review and apply a range of health behavior theories that target the intrapersonal, interpersonal, and community levels.
GSPH 555, Infectious Diseases and Public Health, 3 Units
Students in this course examine the role of infectious diseases in regional, national, and global public health. Students study the historical context and surveillance of communicable diseases, as well as emerging issues in the field. Course content also includes the identification and management of infectious diseases, with students using case studies and proposing threats along with opportunities in prevention, education, and health promotion.

GSPH 560, Strategic Leadership in Health Care, 3 Units
This course is designed to develop knowledge, skills and attitudes about leadership across the healthcare continuum. The student will consider the professional role of the healthcare administrator both from a leadership and a management perspective. Areas of concentration will include leadership theory, structure of healthcare institutions, systems thinking and decision-making, performance improvement including quality and safety issues, risk management and effective communication skills. Application of business skills will be integrated. Students will consider the theoretical and research background, current issues and trends, leadership and administrative implications of specific topics.

GSPH 561, Public Health Across the Disaster Cycle, 3 Units
Students in this course evaluate the roles of public health in natural and human-caused disasters, from "simple" to complex humanitarian events. Using case studies, students analyze the functions of public health agencies and practitioners in the context of institutional systems and the disaster cycle (prevention/preparedness, response, recovery, and mitigation). Field trips outside of class hours may be required.

GSPH 566, Politics and Policies in Disaster Health and Emergency Preparedness, 3 Units
Students in this course evaluate existing governmental and institutional policies related to disaster health and emergency management (DHEM) within political systems. Implementation and evaluation of policy are analyzed and applied.

GSPH 568, Health Care Finance, 3 Units
This course is an introduction to financial concepts and skills needed for healthcare leaders, managers, and executives. Students develop skills in assessing multiple dimensions of financial performance and learn methods to improve the financial health of an organization in the context of the current patient care system.

GSPH 571, International Health Care, 2-4 Units
This course provides students with experience in nursing care in other countries. Students prepare with coursework in the United States, then travel abroad, where they have experiences in acute and/or chronic care settings, exploring cultural, economic, systems, philosophical, and other aspects of care that influence the provision of health care in other countries. A debriefing period is provided upon return.

GSPH 581, Disaster Health and Emergency Management Principles and Practices, 3 Units
Students in this course examine the practice of emergency management and the evolving field of disaster health. Content addresses traditional and current perspectives related to understanding disaster cycles and the relationship between disaster research and practice.

GSPH 593, Field Practicum, 3 Units
In this integrative learning experience, students complete hours in the field applying coursework and classroom learning in a real-world setting under the guidance and supervision of faculty and community-based preceptors, preparing them for professional careers in public health.

GSPH 594, Additional Field Practicum Experience, 1-5 Units
This field practicum elective gives students the opportunity to complete additional hours of practicum experience, allowing them to directly apply course content, public health knowledge, and skills acquired from the MPH program, under the guidance and supervision of faculty and community-based preceptors. This experience enriches classroom activity with practical understanding, and give students the chance to demonstrate an integration of coursework into a real-world setting, preparing them for a professional career in public health.
Prerequisite: GSPH 593

GSPH 595, Special Topics in Public Health, 1-6 Units
In this course, a topic of current interest to students is examined in depth. Students analyze and evaluate topics/issues to reach and express a position, enhance personal development and/or to develop a particular project. If students elect this course more than once during their program, each such course must address a different topic.
Prerequisite: Graduate standing

GSPH 597, Capstone, 1 Unit
This guided-study course provides a summative experience for completion of the Master in Public Health program and guides the student through the process of demonstrating an integration of theoretical, clinical, and research knowledge from course work throughout the program to the solution of a major public health problem in this culminating project. Each graduate candidate will identify a unique health problem in an actual healthcare setting to address, perform a thorough review and synthesis of current literature, select an appropriate theoretical framework, and develop a creative and innovative solution to the problem. Candidates will meet regularly throughout the semester with course faculty to prepare for and discuss their progress and will submit their work for publication or comparable external review format at the end of the semester.
Prerequisite: Completion of all Academic Core and Specialty courses
GSPH 598, Thesis, 1 Unit
This course is the second part of a two-course sequence (after GSPH 514 Research Proposal Writing) that supports student development of a thesis in the Master of Public Health program. The thesis has served as an option to the master's capstone project.
Prerequisite: GSPH 514

GSPH 599, Readings in Public Health, 1-3 Units
A student may elect to pursue special interests for credit at any time during the program under the supervision of a faculty member. This course is an independent study, arranged with a faculty member of the Department of Public Health.
Prerequisite: Graduate standing

GSPH 613, Graduate Statistics, 3 Units
This course presents the knowledge of descriptive, correlational, and inferential statistics used in research that serves as the basis for evidence-based practice. Students develop the ability to perform descriptive and inferential data analysis techniques, use software applications to aid in statistical calculations and presentation, and interpret findings.
Prerequisite: Undergraduate statistics and biology courses.

Faculty
Chair
Marissa Brash (http://www.apu.edu/faculty/mbrash/), DrPH, EdD, CPH

Professor
Teresa Dodd-Butera (http://www.apu.edu/faculty/tbutera/), PhD, RN, DABAT

Associate Professors
Marissa Brash (http://www.apu.edu/faculty/mbrash/), DrPH, EdD, CPH
Sanggon Nam (http://www.apu.edu/faculty/snam/), PhD

Assistant Professors
Christina Bivona-Tellez (http://www.apu.edu/nursing/faculty/cbivonatellez/), DNP, MPH, RN, NEA-BC
Brianna Pack (http://www.apu.edu/faculty/bpack/), MBA
Koy Parada (http://www.apu.edu/nursing/faculty/kparada/), MPH, PhD(c)

Master of Public Health (MPH)

APU's Master of Public Health program (https://www.apu.edu/nursing/programs/mph-degree/) is accredited by the WASC Senior College and University Commission (WSCUC) (https://www.wscuc.org/) and is applying for accreditation from the Council on Education for Public Health (CEPH) (https://ceph.org/) accreditation as an MPH program with a health equity specialization. As part of the program, students select 9 units of elective coursework, which allows students to group three electives of their choice to fit their public health interests and/or career goals.

& GSPH 514  
and Research Proposal Writing  

**Elective Group (Choose One)**  
9  

### Biostatistics and Epidemiology Electives
- GSPH 527  
  Advanced Biostatistics and Epidemiology  
- GSPH 532  
  Infectious Disease Epidemiology  
Select one of the following:  
- GSPH 546  
  Principles and Practices of Toxicology  
- GSPH 555  
  Infectious Diseases and Public Health  
- GSPH 571  
  International Health Care  
- GNRS 596  
  Foundations of Healthcare Informatics  
- PADM 505  
  Public Sector Research Methods  
- STAT 551  
  Data Visualization  
- STAT 553  
  Data Mining  
- STAT 571  
  Applied Multivariate Analysis  

### International Health Electives
- GSPH 512  
  Health, Culture, and Diversity  
- GSPH 519  
  Global Health Systems  
Select one of the following:  
- GSPH 522  
  Cultural Inclusivity in Health Care  
- GSPH 543  
  Public Health Communication  
- GSPH 550  
  Assessment, Program Planning, and Evaluation  
- GSPH 571  
  International Health Care  

### Social and Behavioral Science Electives
- GSPH 522  
  Cultural Inclusivity in Health Care  
- GSPH 551  
  Theories of Health Behavior  
Select one of the following:  
- GSPH 512  
  Health, Culture, and Diversity  
- GSPH 520  
  Public Policy, the Health Care System, and Public Health Policy in the United States  
- GSPH 521  
  Poverty and Health Policy  
- GSPH 543  
  Public Health Communication  
- GSPH 550  
  Assessment, Program Planning, and Evaluation  
- GSPH 571  
  International Health Care  
- PADM 502  
  Organizations and Behavior  

### Public Health Policy Electives
- GSPH 520  
  Public Policy, the Health Care System, and Public Health Policy in the United States  
- GSPH 521  
  Poverty and Health Policy  
Select one of the following:  
- GSPH 566  
  Politics and Policies in Disaster Health and Emergency Preparedness  
- GSPH 571  
  International Health Care  
- PADM 503  
  The Policy Process  

### Healthcare Administration Electives
- GSPH 518  
  Population Health Management  
- GSPH 568  
  Health Care Finance  
Select one of the following:  
- GSPH 515  
  Health Care Entrepreneurship  
- GSPH 550  
  Assessment, Program Planning, and Evaluation  
- GSPH 571  
  International Health Care  
- GSPH 581  
  Disaster Health and Emergency Management Principles and Practices
### Program Learning Outcomes

Students who successfully complete this program shall be able to:

1. Articulate a Christian worldview, demonstrating respect for the dignity and uniqueness of others, valuing diversity and integrity, and applying spiritual concepts.
2. Engage in evidence-based methods to understand and address public health issues, using critical reasoning, scholarly inquiry, knowledge of peer-reviewed scientific literature, bioinformatics, and data analysis.
3. Design population-based policies and programs that promote health, prevent disease, and address social equity issues.
4. Apply principles of leadership to promote interprofessional collaboration and decision-making among diverse stakeholders.
5. Utilize systems-level thinking and communication in response to public health issues - analyzing and synthesizing policies and programs that address efficiency, cost-effectiveness, and health equity.

---

**Admission**

University graduate admission and program-specific requirements must be met before an application is complete (see Admission to the University (p. 1092)). Program-specific application requirements are available online ([https://tracking.cirrusinsight.com/74647a2d-e9a2-412f-9b55-9959c7aac4ec/apu-edu-graduateprofessionalcenter-admissions-requirements-program/](https://tracking.cirrusinsight.com/74647a2d-e9a2-412f-9b55-9959c7aac4ec/apu-edu-graduateprofessionalcenter-admissions-requirements-program/)). International students should contact Graduate and Professional Admissions ([https://www.apu.edu/graduateprofessionalcenter/admissions/](https://www.apu.edu/graduateprofessionalcenter/admissions/)) for application procedures.
Department of Doctoral Studies

The Department of Doctoral Studies offers two doctoral programs, the Doctor of Philosophy (PhD) in Nursing and the Doctor of Nursing Practice (DNP). Scholarship is fundamental to both programs. The PhD is a research-based program that primarily prepares students to conduct independent research and disseminate their findings. The DNP program is clinically focused and provides graduates with the expertise to assess nursing research evidence, evaluate the impact of nursing research on nursing practice (evidence-based practice), and take a leadership role in making changes in the healthcare environment to enhance the quality of care. The department also offers a Bachelor of Science in Nursing (BSN) to DNP pathway that allows RNs with a BSN to enter directly into the DNP program without first earning an MSN degree.

Programs

- Doctor of Philosophy (PhD) in Nursing (p. 992)
- Bachelor of Science in Nursing (BSN) to Doctor of Nursing Practice (DNP) Pathway (p. 990)
- Doctor of Nursing Practice (DNP) (p. 987)

Courses

**GNRS 500, Conceptual Foundations of Professional Nursing, 3 Units**
This course focuses on the introductory concepts crucial to the socialization of second career students to professional nursing. The history of nursing, the evolution of nursing in the U.S., the art and science of nursing, the legal and professional basis of nursing, the role of nursing in the health care delivery system, and current issues and trends in nursing education, practice and research are emphasized.

**GNRS 501, Theoretical Thinking in Nursing, 2 Units**
This course examines questions about the nature and construction of theory and how theoretical ideas are developed and used in nursing practice and research. Philosophical ideas underlying theory are examined, and selected theoretical models and theories are explored.

**Prerequisite:** Completion of undergraduate research course or instructor's consent; admission to ELM or MSN program.

**GNRS 503, Cultural Competency in Health Care, 3 Units**
This course focuses on transforming graduate nursing students, preparing them for nursing leadership in nursing practice, nursing research, education, and public health policy for the improvement of patient healthcare outcomes in our increasingly diverse society. Students move from cultural sensitivity and awareness to critical reflection and action, challenging their assumptions and broadening their perspectives. The Essentials of Master's Education in Nursing (American Association of Colleges of Nursing, 2011) serves as the foundation for the development of core cultural competencies.

**Prerequisite:** Graduate standing in the School of Nursing.

**GNRS 504, Bioethics and Healthcare Policy, 3 Units**
This course will outline the role of the healthcare leader in ensuring human rights are upheld in healthcare systems. This course focuses on bioethical analysis, decision-making and moral policy analysis, and formulation. Through course discussion, group and individual assignments, and oral and written presentations, students will analyze and apply bioethical principles to decision- and policy-making processes in the workplace and at national levels. Healthcare ethics and policy will be considered from a Christian worldview.

**Prerequisite:** Graduate standing

**GNRS 505, Christian Formation for Holistic Care, 3 Units**
Students engage in the process of discovering the foundational values of Azusa Pacific University that serve as guiding principles for the distinctive education they will receive. They are made aware of the Christian worldview and its implications for personal holistic development and care. With a focus on developing motivating character and integrated caregivers, the course brings heightened self-awareness, the impact of a Christian worldview on vocation, scriptural awareness especially emphasizing healing themes in the life of Christ, and the importance of spiritual growth on the journey toward formation.

**GNRS 506, Spiritual Concept Analysis in Health Care, 3 Units**
Scholarly research and analysis of selected concepts in the spiritual care of persons from the Judeo-Christian perspective provide a central focus to the course. Students also examine healthcare research/other healthcare literature for adequacy with respect to the concept they select. Various assignments facilitate greater student awareness of their own spiritual journey and knowledge of faith traditions other than their own. The course is conducted as a tutorial/seminar experience.

**Prerequisite:** Graduate standing

**GNRS 507, Scientific Writing, 3 Units**
This course provides opportunities for students to learn how to introduce a topic or issue, articulate a thesis, support and develop a thesis and subordinate claims, work with secondary sources, and organize an argument.
GNRS 508A, Research and Theory in Advanced Practice Nursing, 4 Units
This course prepares nurses to use theory and research evidence in advanced clinical practice. The relationship between theory and research is examined, exploring questions about the nature, construction, and use of each. Selected theoretical models and theories are explored, and students learn how ideas are developed and used in nursing practice and research. Students deepen their understanding of the research process by engaging in a systematic search, critique, and summary of research studies with direct application to nursing practice. Experience in statistical analysis of research data is included.
Prerequisite: Computer literacy, undergraduate research course, undergraduate statistics course, and graduate standing

GNRS 508B, Research and Theory in Healthcare, 4 Units
This course prepares the healthcare administrator to apply theory and research evidence in healthcare environments. The relationship between theory and research is examined, exploring questions about the nature, construction, and use of each. Selected theories are explored, and students learn how ideas are developed and used in practice and research. Students learn the fundamentals of quantitative, qualitative, and mixed methods research and deepen their understanding through systematic search, critique, and summary of research studies with application to healthcare. Students work in groups to develop a research plan addressing a healthcare-derived question. Experience in statistical analysis of research data is included.
Prerequisite: GNRS 613

GNRS 510, Family Theory in Health Care, 2 Units
The major theoretical perspectives for understanding the family as a core unit of analysis are studied. This course fosters the student's recognition of the family's responsibility for health. Factors such as family patterns and care-giving tasks of families experiencing catastrophic or chronic alteration in health care are examined. This class is offered online.
Prerequisite: Graduate standing

GNRS 511, Advanced Pediatric Health Assessment and Health Promotion, 4 Units
This course develops the graduate nurse's assessment skills and focuses on the promotion of health in the pediatric population from the newborn period through adolescence. Emphasis is on adapting and expanding the medically focused history and physical assessment to incorporate the assessment of traditional health practices and identify culturally relevant and age-appropriate health promotion strategies. Outcomes are examined in light of related theoretical concepts. Strategies for health promotion include a focus on developmental and behavioral assessments, emotional health, nutrition, counseling to modify risk factors, and screening tests/prophylaxis for early detection and prevention of disease.
Prerequisite: Undergraduate health assessment and GNRS 610;
Corequisite: Practicum

GNRS 513, Advanced Nursing Practice Role, 2 Units
This course focuses on the concepts of role development and performance competence of the nurse in advanced clinical practice within the context of a reformed health care delivery system. Emphasis is placed on the clinician, educator, clinical program manager, consultant, researcher, and case manager roles of the advanced practice nurse. The leadership aspects of the roles of advanced practice are explored in relation to health care delivery, policy formulation, and legislation. The course explores theories and issues related to the advanced nursing practice role.
Prerequisite: Graduate standing

GNRS 514, Research Proposal Writing, 2 Units
This course focuses on the application of the concepts in GNRS 508A. The goal is the completion of a research proposal that details the problem, the research purpose, questions or hypotheses to be tested, a critique of the literature, the design and methods of the study including protection of human subjects, the plans for analysis, use of the study, and the budget and personnel.
Prerequisite: GNRS 508A

GNRS 516, Integrative Disease and Symptom Management, 3 Units
Using a systems-based approach, this course provides the student with a broad-based, graduate-level overview for understanding disease processes, treatment modalities, assessment and interventional strategies for patients across the life span.

GNRS 517, Fundamentals in Nursing Practice, 2 Units
This is an experiential learning course designed to teach basic nursing skills in a clinical skills or simulation laboratory setting to prepare students to deliver safe and patient-focused nursing care. Utilizing the nursing process, students perform basic skills in assessment, patient care across the continuum, documentation, patient-family teaching, and infection control.

GNRS 518, Supervised Practicum in Health Care, 3 Units
This course prepares students to integrate and apply theory, evidence-based practice, and national guidelines and standards in practicum settings. Students select practicum areas in which, with faculty approval, they will participate in experiences led by preceptors. The purpose of the course is to equip students with current, evidence-based knowledge in a selected practice area.
GNRS 520, Theory and Practice of the Clinical Nurse Specialist in Nursing Care of Adult-Gerontology Patients, 6 Units
Critical concepts in advanced collaborative management of adult-gerontology client populations by Clinical Nurse Specialists are studied. Differential
diagnosis, pharmacologic management, cultural sensitivity, adult-gerontology continuum of health and illness (i.e., wellness, health promotion, disease
prevention), teaching-learning theory, and evidence-based best practices for clinical decision-making for the Adult and Geriatric population are
highlighted. CNS roles, competencies, and professional issues and integrated clinical rotations will be chosen from critical care or medical-surgical adult-
gerontology populations. Clinical seminar times allow students to discuss and analyze current professional issues and clinical problems in a collegial
atmosphere.
Prerequisite: Academic Core and Advanced Practice Core courses, current RN license, CPR certificate, and meets health screening requirements;
Corequisite: Practicum

GNRS 521, Clinical Specialization in the Care of Adult-Gerontology Patients, 6 Units
The course prepares the student to apply concepts introduced in GNRS 520. It focuses on diagnosis and collaborative disease management of acute
illness in the adult-gerontology patient by the Clinical Nurse Specialist. The integration of advanced skill development, theory and evidence based
practice, disease management, clinical decision making, unit and organization management issues, professional issues and APRN role competencies
are the foundation for this course. Practicum and seminars are planned to span the breadth of the students’ clinical opportunities.
Prerequisite: Academic Core and Advanced Practice Core courses, GNRS 520, current RN license, CPR certificate, and meets health screening
requirements;
Corequisite: Practicum

GNRS 522, Disaster Nursing and Emergency Preparedness, 3 Units
This course explores the nature of disasters and prepares nurses to respond to various types of disasters - including natural, environmental, mass
casualty, public health emergencies, terrorism, and bioterrorism - by utilizing essential knowledge, skills, values, meanings, and experience in the basic
competencies of emergency preparedness and disaster nursing. In accordance with the position of major nursing organizations, emphasis is placed on
evidence-based best practices for personal preparedness.
Prerequisite: Comparable course, such as UNRS 312 Nursing Management of Adults, a human growth and development course, a lifespan course OR
an RN licensure.

GNRS 530, Theory and Practice of the Clinical Nurse Specialist in the Care of the Pediatric Patient, 6 Units
Critical concepts in the advanced collaborative management of pediatric client populations by the Clinical Nurse Specialists are studied. Differential
diagnosis, pharmacologic management, cultural sensitivity, pediatric continuum of health and illness (i.e., wellness, health promotion/disease
prevention), teaching-learning theory, and evidence-based/best practices for clinical decision-making for the Pediatric population are highlighted. CNS
roles, competencies, and professional issues are integrated. Clinical rotations will be chosen from critical care or medical-surgical pediatric populations.
Clinical seminar times allow students to discuss and analyze current professional issues and clinical problems in a collegial atmosphere.
Prerequisite: Academic Core and Advanced Practice Core courses, current RN license, CPR certificate, and meets health screening requirements;
Corequisite: Practicum

GNRS 531, Clinical Specialization in the Care of the Pediatric Patient, 6 Units
The course prepares the student to apply concepts introduced in GNRS 530. It focuses on diagnosis and collaborative disease management of acute
illness in the pediatric patient by the Clinical Nurse Specialist. The integration of advanced skill development, theory and evidence based practice
disease management, clinical decision making, unit and organization management issues, professional issues and APRN role competencies are the
foundation for this course. Practicum and seminars are planned to span the breadth of the students’ clinical opportunities.
Prerequisite: Academic Core and Advanced Practice Core courses, GNRS 530, current RN license, CPR certificate, and meets health screening
requirements;
Corequisite: Practicum

GNRS 532, Advanced Nursing Practice in Pediatrics, 6 Units
This course emphasizes physiological and psychological bases for critical and chronic conditions in children, focusing on an advanced science base for
the assessment, diagnosis, and management of children and families to promote wellness. Exploration of traditional versus alternate medicine treatment
plans, as well as relevant cultural, spiritual, and health promotion strategies, is incorporated.
Prerequisite: Graduate status and GNRS 590A;
Corequisite: Practicum

GNRS 533, Psychiatric Theories across the Life Span, 2 Units
This course presents neurobiologic, neuroendocrine, genomic, behavioral, and psychodynamic theories of psychiatric mental illnesses as they manifest
among members of diverse cultural groups across the life span. A theoretical foundation for subsequent coursework in primary psychiatric mental health
care is provided for the role of the psychiatric mental health nurse practitioner.
Prerequisite: Graduate standing, Advanced Practice Core
GNRS 534, Integrated Psychiatric and Health Assessment across the Life Span, 2 Units
This course teaches the role of the psychiatric mental health nurse practitioner in interviewing, assessing, and utilization of other data collection methods to elicit, analyze, and evaluate bio-psychosocial information regarding psychiatric mental health illness as experienced and understood by the clients, across the lifespan. Assessment and integration of the effects of potential and/or existing co-morbid health problems are focused upon. Diagnostic reasoning that is based on the Diagnostic Statistical Manual is foundational in the course. Development of differential diagnoses and disease management, evidence-based practice, and health promotion that includes client and nurse practitioner collaboration is emphasized.
Prerequisite: Advanced Practice Core, GNRS 533 (May be taken concurrently)

GNRS 535, Psychiatric Interventions and Health Promotion across the Life Span, 6 Units
In this course students learn historical, theoretical, and contemporary evidence-based psychotherapies that promote and support client stabilization, rehabilitation, and recovery. The client as a collaborating decision making consumer and the client-clinician therapeutic alliance are central to this course. Students increase competence in assessment of psychiatric mental health illnesses, differential diagnoses and disease management, implementation of psychotherapy (individual, group, family), medication management, and health promotion interventions, including motivational interviewing. Student competence in developing and facilitating therapeutic groups as a recovery modality are included in the course. The role of the psychiatric mental health nurse practitioner in the integration and coordination of support services that impact mental health and illness is also included. Students practice verbal psychotherapeutic skills that motivate and facilitate client self-management and progression toward recovery.
Prerequisite: Advanced Practice Core, GNRS 533 and GNRS 534; GNRS 539 may be taken concurrently;
Corequisite: Practicum

GNRS 536, Psychiatric Mental Health Care with Adults and Older Adults, 6 Units
In this course students increase their knowledge and competence in the assessment of psychiatric mental health illnesses, differential diagnoses and disease management, implementation of psychotherapy (individual, family, group), evidence-based practice, medication management, health promotion and disease prevention interventions, integration and coordination of support services, with adults and older adults.
Prerequisite: GNRS 533, GNRS 534, GNRS 535, GNRS 539;
Corequisite: Practicum

GNRS 537, Psychiatric Mental Health Care with Children and Adolescents, 6 Units
In this course, students increase competence in the role of the psychiatric mental health nurse practitioner in the assessment of psychiatric mental health illnesses, differential diagnosis and disease management, implementation of psychotherapy (individual, family, group), evidence-based practice, medication management, health promotion and disease prevention interventions, integration and coordination of support services with children, adolescents, and families.
Prerequisite: GNRS 533, GNRS 534, GNRS 535, GNRS 536, GNRS 539;
Corequisite: Practicum

GNRS 538, Psychiatric Mental Health Care with Selected Populations, 5 Units
Students increase knowledge and competence in the assessment of psychiatric and mental health illnesses, differential diagnosis and disease management, implementation of psychotherapy (individual, family, group), medication management, health promotion and disease prevention interventions, and integration and coordination of support services with a selected population. Focus is on integrating and practicing all aspects of the role of the psychiatric mental health nurse practitioner with clients who are experiencing acute and/or chronic mental health problems and psychiatric disorders.
Prerequisite: GNRS 533, GNRS 534, GNRS 535, GNRS 536, GNRS 539;
Corequisite: Practicum

GNRS 539, Psychopharmacology, 2 Units
Students in this course build upon knowledge of advanced practice nursing and provides content essential for the psychiatric mental health nurse practitioner to prescribe appropriate pharmacologic treatment in practice. Mechanisms of action, interactions, side effects, and prescribing guidelines for psychopharmaceuticals commonly utilized across the lifespan are addressed.
Prerequisite: GNRS 533, GNRS 534; GNRS 535 (May be taken concurrently)

GNRS 542, Advanced Concepts and Competencies in Pediatric Primary Health Care, 3 Units
This course offers a comprehensive review and synthesis of core concepts and competencies for the pediatric advanced practice nurse in the primary care setting. This culminating experience for pediatric nurse practitioner students incorporates seminar discussions and clinical practicum placement, and also allows for a discussion of developmental/behavioral issues, management of acute and chronic care illnesses seen in primary care settings, and preventative health care.
Prerequisite: Graduate standing, GNRS 532 (may be taken concurrently with instructor's permission), and GNRS 590A;
Corequisite: Practicum
GNRS 543, Transitions Across the Care Continuum, 4-6 Units
This course focuses on principles and models of care and their implementation in a multidisciplinary practice environment that emphasizes healthcare delivery through integration of services and transition management. Students are introduced to decision making related to allocation of resources and services, development of protocols, and evaluation of management approaches. Evidence-based approaches to the clinical, administrative, educational, and research dimensions of patient care are emphasized. Evaluation of care management activities with the student's selected clinical population is an integral component of the course.
**Prerequisite:** NP students: completion of Advanced Practice Core; CNS students: completion of Advanced Practice Core and GNRS 520 or GNRS 530; HAL students: completion of MSN Core and GNRS 560.
**Corequisite:** Practicum

GNRS 544, Clinical Specialization Residency, 2-4 Units
This elective residency program, formed through a partnership between the School of Nursing and selected community healthcare organizations, is an intensive, precepted clinical experience that helps students transition to beginning professional nurses in a specialized setting. It enhances students' skill and practice knowledge in preparation for the RN licensing examination, and increases their ability to perform clinical reasoning with the assigned patient population and evaluate the QSEN competencies of patient-centered care, safety, evidence-based practice, informatics, and teamwork and collaboration.
**Prerequisite:** ELM students must complete GNRS 573 (may be taken concurrently), but GNRS 573 is not required for nurses in community partnerships who are taking GNRS 544 for continuing education credit.

GNRS 546, Theory and Practice in Health Care Systems in the Community, 6 Units
This specialized course prepares RNs without a bachelor's degree for graduate study in nursing. A multiple theoretical focus that includes concepts from systems, stress, adaptation, developmental, and role theory is emphasized. A beginning practice in the utilization of the nursing process with an emphasis on nursing diagnosis and the nurse's role in assessing, planning, implementing, and evaluating care of clients in a variety of community settings is provided. Collaboration with community-based organizations and services that provide health restoration, maintenance, illness prevention, and client education services to individuals and families at home are essential course components. A review of legal mandates for practice and discussion of ethical dilemmas and issues related to high quality nursing care are included. Specific content varies based on the students' prior education and experience. Clinical placements are arranged to meet the individual student's needs.
**Prerequisite:** Undergraduate research, pathophysiology, and health assessment;
**Corequisite:** Practicum

GNRS 547, Nursing Leadership in Acute Care Settings, 6 Units
This is one of two clinical courses provided for the RN who seeks both a bachelor's and master's degree in nursing. The course synthesizes selected information from the generic bachelor's and master's programs for presentation in a condensed format, addressing the development and nature of today's health care systems and associated issues in the United States. Further, content familiarizes the student with several roles and responsibilities of the contemporary nurse, such as leader, consultant, teacher, manager, and client advocate. The course focuses on client needs in acute health care settings and emphasizes the relationship between the health care system and the advocate.
**Prerequisite:** Undergraduate research, pathophysiology, and health assessment;
**Corequisite:** Practicum

GNRS 548, Health Promotion Across the Lifespan, 2 Units
The course focuses on health promotion and disease prevention across the lifespan and around the globe. The course includes exploration of population health issues, environmental implications in health and health policy, impact on health promotion and the development of disease.
**Prerequisite:** Academic Core and Advanced Practice Core courses, current RN license, CPR certificate, and meets health screening requirements

GNRS 550A, Theory and Practice in School Nursing, 6 Units
This combined didactic and clinical course provides theoretical content and field experiences that emphasize the multifaceted role of the school nurse. Students participate in field experiences and classroom learning activities that focus on the assessment and management of children's healthcare needs in various school settings. This course equips students with the necessary tools and skills to successfully function as professional school nurses. At the conclusion of this course, students are able to successfully function as providers of health education as well as providers, planners, and coordinators of health care in school settings.
**Prerequisite:** GNRS 612 or instructor consent, and admission to School Nurse Services Credential program;
**Corequisite:** Practicum

GNRS 554, Medical-Surgical Care of the Adult and Geriatric Patient, 5 Units
This course introduces crucial concepts in professional nursing care, such as the nursing process, communication, therapeutic interventions, critical thinking, and critical reasoning. Course material focuses on the application of biological, psychosocial, and spiritual concepts to adult and elderly clients in various healthcare settings with acute and/or chronic illnesses. The nursing process is utilized to provide care to one or two adult clients within the healthcare delivery system. The clinical practicum focuses on the cognitive basics, scientific principles, and manipulative components of psychomotor skills used when providing nursing care.
**Prerequisite:** Admission to the ELM program, completion of all prerequisite courses for the program.
**Corequisite:** GNRS 554P
GNRS 555, Medical Surgical Care of the Adult and Geriatric Patient, 7 Units
This course introduces crucial concepts to professional nursing care such as nursing process, communication, therapeutic interventions, and critical thinking and clinical reasoning. The course focuses on the application of biological, psychosocial, and spiritual concepts to hospitalized adult and elderly clients with acute and chronic illnesses. Students will be guided in critical thinking and clinical reasoning exercises in the management of hospitalized clients. Nursing process is utilized to provide care to one or two adult clients within the health care delivery system of an acute care setting. The clinical practicum focuses on the cognitive basis, scientific principles, and manipulative component of psychomotor skills used when providing nursing care. Students have an opportunity to practice simulated clinical skills.

Prerequisite: Admission to the ELM program, completion of all prerequisite courses for the program;
Corequisite: Practicum

GNRS 556, Intermediate Medical Surgical Care of the Adult, 7 Units
This course is designed to build on the base of medical-surgical nursing knowledge from GNRS555. The course focuses on comprehensive nursing care to patients with acute need for continuous cardiac monitoring, pulse oximetry monitoring, or ventilator assistance in telemetry units, in restorative care setting, or long-term care setting.

Prerequisite: Admission to the ELM program; successful completion of GNRS 555;
Corequisite: Practicum

GNRS 557, Medical Spanish for Advanced Practice Nurses, 3 Units
This course provides non-Spanish-speaking advanced-practice nursing students with foundational knowledge of Spanish language structure and vocabulary, helping them build appropriate phrasing to facilitate communication in healthcare settings. Cultural issues relevant to health and illness in the Latino community are also addressed.

Prerequisite: Graduate nursing student standing, or instructor's permission

GNRS 558, Intermediate Medical-Surgical Care of the Adult, 6 Units
This course is designed to build on the base of medical-surgical nursing knowledge from prior nursing courses. The course focuses on comprehensive nursing care to patients with acute need for continuous cardiac monitoring, pulse oximetry monitoring, or ventilator assistance in telemetry units, restorative care settings and long-term care settings.

Corequisite: GNRS 558P

GNRS 559, Audiometry for School Nurses, 3 Units
This course provides didactic instruction via eCollege and eight hours of on-site practicum experience that emphasizes the content and clinical expertise necessary to fulfill the requirements of the State of California School Hearing Conservation Program and training for the school audiometrist. The course focuses on the physiologic process of hearing and how to assess for deficits in hearing in children of all ages. At the conclusion of the course, and after having completed successfully all learning objectives, the student is eligible to submit an Application for Registration as a School Audiometrist in the State of California (a $10 registration fee is required with the application).

GNRS 560, Strategic Leadership in Health Care, 3 Units
This course is designed to develop knowledge, skills and attitudes about leadership across the healthcare continuum. The student will consider the professional role of the healthcare administrator both from a leadership and a management perspective. Areas of concentration will include leadership theory, structure of healthcare institutions, systems thinking and decision-making, performance improvement including quality and safety issues, risk management and effective communication skills. Application of business skills will be integrated. Students will consider the theoretical and research background, current issues and trends, leadership and administrative implications of specific topics.

GNRS 564, Nutrition and Therapeutics, 2 Units
Students in this course explore the functions of nutrients and the consequences of nutrient deficiencies and excesses in the body. Course material introduces a variety of tools for planning and evaluating diets, including a computer diet analysis, and the application of nutrition concepts is interwoven into health care and fitness conditions. Students also study the prevention of chronic disease as it relates to proper nutrition and adequate exercise.

Prerequisite: Admission to the ELM program

GNRS 567, Healthcare Administration and Leadership Supervised Practicum, 3 Units
This course provides the student with the opportunity to experience the role of healthcare administrator. An individualized administration practicum in a specific area of clinical emphasis is chosen by the student and approved and monitored by the faculty and preceptor. Competencies that govern the role of the healthcare administrator are explored in depth. Students focus on the context for enacting the role of administrator in a healthcare delivery system.

Prerequisite: All core and role courses

 GNRS 568, Healthcare Finance, 4 Units
This course is an introduction to financial concepts and skills needed for healthcare leaders, managers, and executives. The student will develop skills in assessing multiple dimensions of financial performance and methods to improve the financial health of an organization in the context of current patient care system.
GNRS 569, Quality and Safety for Health Care Practice, 3 Units
This course is designed to deepen and advance students’ knowledge of, and ability to systematically apply the principles of, patient quality and safety in nursing practice. Based on national standards, the focus is on examining and applying quality and safety tools, including informatics, that can be used to improve patient care delivery across the continuum of health care.

GNRS 570, Parish Nursing/Health Ministries, 2 Units
This course provides an introduction to and overview of health ministry and parish nursing theory and practice. The philosophy of the course is that (a) the parish nursing role is that of a specialist in spiritual aspects of patient care in the congregational context, requiring the integration of graduate level theology/ministry and nursing theory and praxis; and (b) health ministry is an emerging role and trend in pastoral ministry that seeks to bring professional ministry skill to bear upon the integration of health, faith, and spirituality in the parish setting.

GNRS 571, International Health Care, 2-4 Units
This course provides students with experience in nursing care in other countries. Students prepare with coursework in the United States, then travel abroad, where they have experiences in acute and/or chronic care settings, exploring cultural, economic, systems, philosophical, and other aspects of care that influence the provision of health care in other countries. A debriefing period is provided upon return.

GNRS 573, Clinical Residency, 4 Units
The clinical residency is an internship clinical experiential program designed as a collaborative partnership between the School of Nursing and selected community in-patient health care organizations. This residency is an intensive preceptoried clinical experience planned to ease the role transition from a student nurse to a beginning professional nurse in an acute-care setting. In addition, it enhances the skill and practice knowledge of the student in preparation for the RN licensing examination.
Prerequisite: Successful completion of all pre-licensure clinical courses

GNRS 575, Nursing Care in Maternal, Newborn, and Women’s Health, 4 Units
This course focuses on the theoretical and clinical concepts of the childbearing patient, her infant, and her family. The students study both normal and complicated obstetrics. Selected issues of women’s health are explored. The student is introduced to birth preparation, prenatal care, normal neonatal, and postpartum care with concurrent clinical experiences.
Prerequisite: Admission to the ELM program, successful completion of semesters one and two;
Corequisite: Practicum

GNRS 576, Pharmacology, 2 Units
This course is designed for students who have completed organic chemistry, inorganic chemistry, and biochemistry. The content focuses on principles of pharmacology and specifics of the major drug classifications.
Prerequisite: Admission to the ELM program

GNRS 578, Health Assessment, 3 Units
This course provides the nursing student with skills in physical, spiritual, and psychosocial assessment of adult clients. History-taking and physical examination techniques presented in the course help the student develop strong assessment skills upon which further knowledge and practice can be built. Basic concepts related to assessment of geriatric, pediatric, and childbearing patients are included.
Prerequisite: Admission to the ELM program;
Corequisite: Practicum

GNRS 580, Gerontology, 2 Units
This course integrates research and writings about the major trends and developments in the field of gerontology as they apply to the field of nursing. The approach is interdisciplinary - course material includes information from the fields of sociology, psychology, anthropology, biological sciences, medicine, nursing, and psychiatry. Development in adulthood is viewed from multiple perspectives including cognitive, behavioral, biological, sociocultural, and spiritual, and the influences these perspectives have on the successful negotiation of age-related issues are considered. Finally, students examine aspects of human aging in contemporary American society and from a cross-cultural and ethnic perspective.
Prerequisite: Graduate standing in the School of Nursing.

GNRS 581, Primary Health Care of the Older Adult, 5 Units
GNRS 581 focuses on the role of the adult-gerontology primary care nurse practitioner in the management of the older adult including health promotion, assessment, treatment, and maintenance of common primary care health problems. The clinical practicum emphasizes the application of theory and evidence-based research for the delivery of culturally competent assessment and treatment of the older adult within the context of their families and in a variety of outpatient settings.
Prerequisite: Graduate status in the School of Nursing, completion of Advanced Practice Core courses;
Corequisite: Practicum

GNRS 582A, Pathophysiology, 2 Units
This course presents an introduction to human pathophysiology. Mechanisms causing alterations in cellular activity, maintenance of cellular tissue oxygenation, fluid and electrolyte balance, and neuroendocrine control of the body are included. Common pathophysiologic disorders are emphasized.
Prerequisite: Admission to the ELM program
GNRS 582B, Pathophysiology, 2 Units
This course continues the presentation an introduction to human pathophysiology. Mechanisms causing alterations in cellular activity, maintenance of cellular tissue oxygenation, fluid and electrolyte balance, and neuroendocrine control of the body are included. Common pathophysiologic disorders are emphasized.
Prerequisite: Admission to the ELM program, successful completion of GNRS 582A

GNRS 583, Nursing Care of Children and Young Adults, 4 Units
This theoretical and clinical course focuses on the care of children from birth through adolescence. The effects of acute and chronic illness on growth and development are studied in the acute and community health care setting. Education of the child and family on health promotion, disease prevention, and safety issues are addressed. Ethical issues are discussed regarding the relationship to the child and family, including issues such as child abuse, informed consent, and the impact of diverse cultural and spiritual beliefs on health care decisions in the family.
Prerequisite: Admission to the ELM program, successful completion of semesters one and two; Co-requisite: Practicum

GNRS 584, Mental Health Nursing, 4 Units
This theoretical and clinical course focuses on the dynamics of psychosocial stress within the interpersonal and intrapersonal systems of clients with acute and chronic psychiatric disorders.
Prerequisite: Admission to the ELM program, successful completion of semesters one and two; Co-requisite: Practicum

GNRS 586, Leadership and Management in Professional Practice, 2 Units
This course emphasizes leadership and management theory including systems theory in a number of applications and settings, equipping students with the ability to adjust to various organizations encountered by professional nurses serving in a variety of roles. Core concepts relevant to clinical settings are presented using a systems approach. Emphasis on nursing case management is included.

GNRS 587, Community Health Nursing, 5 Units
This course has two areas of focus within the community setting: the study of principles and practices involved in community health nursing, and the development of skills for teaching a group of clients. The emphasis is on the role of the nurse in assessing, planning, implementing, and evaluating care of clients in a variety of community-based settings, with a focus on care of the gerontological client. Collaboration with community-based organizations and services that provide health restoration, maintenance, illness prevention, and client education services to individuals, families, and aggregates are essential components of this course. A review of legal mandates and regulations, as well as discussion of ethical dilemmas and issues related to community-based care is included.
Prerequisite: Admission to the ELM program, successful completion of semesters one, two, and three; Co-requisite: Practicum

GNRS 588, Advanced Nursing Care of Adults - Leadership, 6 Units
This course involves the application of pathophysiological, psychosocial, and spiritual concepts to adult and geriatric clients experiencing the stress of illness in acute settings. The primary focus of the course is to care for critically ill clients and their families with complex health care needs in a critical-care setting. A second area of focus is on the utilization of leadership and management concepts/skills in providing comprehensive care to groups of clients and families. Emphasis is placed on preparing the student to practice in a beginning leadership role in managing client care. Legal and ethical issues related to acute care are included.
Prerequisite: Admission to the ELM program; Co-requisite: Practicum

GNRS 589, Adolescent Health Care, 2-4 Units
This course focuses on the growth and development of adolescents, including assessment, prevention, and management of common health and psychosocial problems in this population. Emphasis is on age-appropriate and culturally competent provision of primary health care to adolescents in a family system.
Prerequisite: Graduate status in the School of Nursing; 2-unit version of this course requires prior completion of GNRS 610, while the 4-unit version requires prior completion of GNRS 610, GNRS 611, and GNRS 511 or GNRS 612.

GNRS 590A, Primary Health Care of the Young Family, 6 Units
This combined theory and clinical course focuses on management of health care of children (from birth through adolescence) and their families. Theory and clinical experiences emphasize assessment, prevention, and management of physiological, social, emotional, intellectual, spiritual, and educational needs of the child as an individual and as a family member. The effects of culture on development, parenting, and health care practices are emphasized. The course provides theory and clinical experiences in the management of normal and common pathological conditions to prepare students for advanced nursing practice in the role of nurse practitioner.
Prerequisite: Advanced Practice Core courses; Co-requisite: Practicum
GNRS 590B, Clinical Practicum in Pediatrics, 4 Units
The student develops expanded skills in the comprehensive assessment and management of common childhood illnesses and problems and continues to gain skill in promoting child wellness. Application of theory and research is emphasized in the care of common illnesses throughout the childhood years.
Prerequisite: GNRS 511 or GNRS 612, and GNRS 590A

GNRS 590C, Primary Health Care of the Young Family for the School Nurse Services Credential, 6 Units
Using a system-based approach, this combined didactic and practical course focuses on assessment, nursing interventions, and follow-up for common illness presentations in children, as well as illness-related impact on social, emotional, and educational functioning. The effects of culture on child development, parenting, and healthcare practices is also emphasized.
Prerequisite: GNRS 612; Corequisite: Practicum

GNRS 590D, Primary Health Care of the Young Family, 3 Units
This theory course focuses on management of health care of children (from birth through adolescence) and their families, with an emphasis on assessment, prevention, and management of physiological, social, emotional, intellectual, spiritual, and educational needs of the child as an individual and as a family member. The effects of culture on development, parenting, and health care practices are emphasized. The course provides theory in the management of normal and common pathological conditions to prepare students for advanced nursing practice in the role of nurse practitioner.
Prerequisite: Advanced Practice Core courses

GNRS 591, Primary Health Care of the Childbearing Family, 4 Units
This course focuses on the assessment and management of the primary health care needs of the reproductive family. Emphasis is placed on health promotion and maintenance, disease prevention, curative, and restorative care. Cross-cultural aspects related to parents, male and female, of the childbearing family are addressed.
Prerequisite: Advanced Practice Core courses; Corequisite: Practicum

GNRS 592A, Primary Health Care of the Adult and Aging Family, 6 Units
This combined theory and clinical course focuses on the role of the nurse practitioner (NP) in caring for mature adults and aging family members, from young adulthood to elderly adulthood. Emphasis is placed on the management of common primary health problems of these age groups. The delivery of culturally competent primary health care interventions of young, middle-aged, and elderly adults is addressed.
Prerequisite: Advanced Practice Core courses; Corequisite: Practicum

GNRS 592B, Primary Health Care Clinical Practicum, 2 Units
This course provides the final comprehensive clinical management experience, allowing FNP and AGNP students to apply knowledge gained throughout their course of study. Clinical conferences provide opportunity for discussion of role development issues and clinical case studies. Students engage in the clinical assessment and management of adults of diverse cultural backgrounds with routine and complex health problems in out-patient settings. Under the supervision of qualified preceptors and School of Nursing faculty, the student must complete his/her clinical hours and demonstrate mastery to perform the role of an entry-level nurse practitioner.
Prerequisite: Completion of clinical courses for the FNP or AGNP program track

GNRS 593, Psychosocial Primary Health Care of the Adult and Aging Family, 4 Units
This combined didactic and clinical course focuses on psychosocial primary health care of the mature and aging family. Didactic content and clinical experiences emphasize the advanced practice nursing role in the medical management of chronic illness with concurrent assessment for psychosocial stressors that impact the experience and management of chronic illness. Students learn to tailor patient-centered therapeutic strategies, including presence, multi-faceted functional assessment, motivational interviewing, stress reduction techniques and spiritual support to individual patients.
Prerequisite: Advanced Practice Core courses; Corequisite: Practicum

GNRS 595, Special Topics in Nursing, 1-6 Units
In this course, a topic of current interest to students is examined in depth. Students analyze and evaluate topics/issues to reach and express a position, enhance personal development and/or to develop a particular project. If students elect this course more than once during their program, each such course must address a different topic.
Prerequisite: Graduate standing

GNRS 596, Foundations of Healthcare Informatics, 3 Units
This course provides an overview of basic concepts for practice in healthcare-oriented informatics. These core concepts include an introduction to clinical and translational informatics; foundational theory and practical application of clinical decision making and computerized decision support; healthcare systems and their organization; the special issues of administration, security, and operations of electronic records in the healthcare setting; human factors issues; information science in the healthcare domain; standards, terminologies, and the uniqueness of biomedical data; and a special focus on emerging technologies.
GNRS 597, Comprehensive Examination Directed Study, 1 Unit
This course guides the student through the process of demonstrating an integration of theoretical, clinical, and research knowledge. Critical thinking is enhanced through careful consideration of information presented during discussion. The examinations are taken as part of this seminar.
Prerequisite: Completion of all Academic Core and degree specialty courses. Final specialty course may be taken concurrently.

GNRS 598, Thesis, 1 Unit
A student initially enrolls in this option toward the latter part of the program for one unit of credit. The student registers for one unit of thesis credit each semester (two of three semesters per year) until the thesis is completed.
Prerequisite: GPA of 3.5 or above, chair's consent for thesis option, and completion of all Academic Core and Advanced Practice Core courses

GNRS 599, Readings/Independent Study in Nursing, 1-4 Units
A student may elect to pursue special interests for credit at any time during the program under the supervision of a faculty member. University policy states that the student must earn a grade in an independent study course in order to receive credit toward graduation.
Prerequisite: Graduate standing

GNRS 600, Nurse Practitioner Clinical Experience, 2-6 Units
The AGPCNP and NP programs require 765 hours of supervised direct patient care experience. Students in this course function in the role of student nurse practitioners under the direct supervision of approved preceptors, and receive feedback from their preceptors and from their clinical faculty. This course gives students an opportunity to complete the documentation necessary to be awarded clinical units. Students progressively integrate advanced-practice nursing competencies, demonstrate professional nursing behavior, and keep accurate records. Upon completion of 765 hours, students are given access to a clinical portfolio.
Prerequisite: GNRS 612 and faculty permission

GNRS 601, Primary Healthcare I: Adult and Aging, 3 Units
This course integrates knowledge from advanced pathophysiology, advanced pharmacology, and advanced health assessment and apply it to create a diagnostic hypothesis for common acute and chronic primary care health problems in adolescents, adults, and older adults. The course examines a variety of treatment options for each disease presented and for diseases that don't respond to first-line therapy.
Prerequisite: GNRS 612
Corequisite: GNRS 600

GNRS 602, Primary Healthcare II: Population-based Health Interventions, 3 Units
Primary Healthcare II recognizes that individuals with healthcare needs belong to a variety of discrete groups. This course introduces population health principles to be integrated with psychosocial assessment, cultural competency, social determinants of health, and the nurse-client relationship to foster the development of competence to motivate patients in a way that respects their diversity and to assist them to find resources to address social vulnerabilities. Students will employ statistical analysis as well as nursing experience to analyze risk to create a patient education plan.
Prerequisite: GNRS 601
Corequisite: GNRS 600

GNRS 603, Primary Healthcare III: Restorative and Palliative Interventions, 3 Units
This course is designed to integrate disease management and communication techniques to support the physical, emotional, and spiritual transitions of chronic illness. The course examines developing a prognosis, transitioning care, interprofessional care planning, and care of the caregiver. Grounded in spiritual concepts, this course is designed to provide the student with tools to give patients and families unpleasant information that will likely evoke fear or sadness.
Prerequisite: GNRS 602

GNRS 610, Advanced Pathophysiology, 3 Units
This course builds on basic anatomy and physiology and undergraduate study of pathophysiology. It focuses on the development of an advanced understanding of the pathophysiologic mechanisms of human health disorders including those that are genetic. Diagnostic reasoning that facilitates the clustering of signs and symptoms leading to diagnosis is a key process undergirding the course. This course requires the integration of signs and symptoms, clinical testing (such as laboratory and radiologic studies), and pathophysiologic mechanisms with diagnoses. This course introduces epidemiological principles and methods to be applied to population health models.
Prerequisite: Graduate standing and undergraduate pathophysiology

GNRS 611, Advanced Pharmacology, 3 Units
This course builds upon basic knowledge in pharmacology and provides content essential for the advanced practice nurse to render appropriate pharmacological treatment in practice. Mechanisms of action, interactions, side effects, and prescribing guidelines for drugs commonly utilized across the life cycle are addressed. The course introduces the principles of pharmacogenomics and their application to clinical practice. Variations in pharmacological reactions attributed to cultural factors are emphasized. Strategies for fostering individual/family adherence to pharmacological regimens are examined. This course meets the requirements of the California Board of Registered Nursing in the application of a “furnishing number” by the advanced practice nurse in California.
Prerequisite: GNRS 610 (may be taken concurrently)
GNRS 612, Advanced Health Assessment and Diagnostic Reasoning, 4 Units
This course develops the graduate nurse's assessment skills and focus on the promotion of health in individuals across the age range and within family, community, and cultural contexts. Emphasis is on adapting and expanding the medically focused history and physical assessment to incorporate the assessment of traditional and nontraditional therapies and identify culturally relevant and age-appropriate health promotion strategies for common episodic complaints and chronic health conditions. Outcomes are examined in light of theoretical concepts. Strategies for health promotion include a focus on lifestyle, mental health, nutrition, counseling to modify risk factors, and screening tests/prophylaxis for the early detection and prevention of disease.
Prerequisite: Undergraduate health assessment and GNRS 610;
Corequisite: Lab

GNRS 613, Graduate Statistics, 3 Units
This course presents the knowledge of descriptive, correlational, and inferential statistics used in research that serves as the basis for evidence-based practice. Students develop the ability to perform descriptive and inferential data analysis techniques, use software applications to aid in statistical calculations and presentation, and interpret findings.

GNRS 616, APRN Intensive II, 1 Unit
This is the second of four APRN Intensive courses that give NP students an interactive experience through out-of-classroom work. Course activities and games will evaluate the student's ability to perform the clinical role of the NP. Students will understand and develop the skills of virtuous leadership and collaboration from a biblical perspective.
Prerequisite: GNRS 615;
Corequisite: GNRS 601

GNRS 617, APRN Intensive III, 1 Unit
This is the third of the APRN intensives that give APRN students an interactive experience with out-of-classroom work that includes team activities, simulation experiences, and problem-solving activities. Topical content includes managing patients with complex co-morbidities, ethical reasoning, and advanced communication skills. Students will be observed performing the professional and clinical skills of the APRN.
Prerequisite: GNRS 616;
Corequisite: GNRS 602

GNRS 618, APRN Intensive IV, 1 Unit
This is the fourth of the APRN intensives that give APRN students an interactive experience with out-of-classroom work that includes team activities, simulation experiences, and problem-solving activities. Topical content practice-based quality improvement, office-based procedures, and certification exam preparation. Students will be observed performing the professional and clinical skills to demonstrate readiness to enter NP practice.
Prerequisite: GNRS 617; Faculty permission.

GNRS 620, Genome Science in Healthcare, 3 Units
This course covers basic genomic concepts and technologies intended for personalizing healthcare. The primary goal is to provide the student with clinically relevant knowledge that can be used in practice and for teaching other healthcare professionals, patients and families. Applications of genome science and technology are analyzed in the context of real world examples taken from a variety of clinical specialty areas to better understand the relation between genomics, health, and illness.

GNRS 622, Genome Science and Ethical Issues, 3 Units
This course examines current applications and implications of genome science and technology to healthcare, public health policy, economics, ethics, federal and state laws and societal issues. The following discussion topics are at the leading edge of healthcare and social debate: DNA biobanking, genetic profiling, and genomic technologies used in genome medicine such as stem cell research, gene therapy, and genetic enhancements. In addition, the course addresses ethics, philosophy, and theology literature to explore thoughtful discussions that cover a wide range of genome applications in healthcare and health science research.
Prerequisite: GNRS 620

GNRS 630A, Oncology Nurse Practitioner Fellowship A, 4 Units
This course is the first in a series of three fellowship courses that enhance students' critical thinking, diagnostic reasoning, and interpretation and management skills for advanced practice nursing in the field of oncology. Students gain a deeper understanding of the sciences necessary for enhanced role development, knowledge, and skills for advanced practice nursing scholarship, and practice in a designated appropriate setting under the direction of a faculty advisor in collaboration with selected clinical experts, with a focus on exploring the development and scientific underpinnings of components of expert clinical oncology practice.
Prerequisite: Enrollment in the oncology nurse practitioner fellowship certificate program.
GNRS 630B, Oncology Nurse Practitioner Fellowship B, 4 Units
This course is the second in a series of three fellowship courses that enhance students' critical thinking, diagnostic reasoning, and interpretation and management skills for advanced practice nursing in the field of oncology. Students gain a deeper understanding of the sciences necessary for enhanced role development, knowledge, and skills for advanced practice nursing scholarship, and practice in a designated appropriate setting under the direction of a faculty advisor in collaboration with selected clinical experts, with a focus on exploring the development and scientific underpinnings of components of expert clinical oncology practice.
Prerequisite: Enrollment in the oncology nurse practitioner fellowship certificate program.

GNRS 630C, Oncology Nurse Practitioner Fellowship C, 4 Units
This course is the third in a series of three fellowship courses that enhance students' critical thinking, diagnostic reasoning, and interpretation and management skills for advanced practice nursing in the field of oncology. Students gain a deeper understanding of the sciences necessary for enhanced role development, knowledge, and skills for advanced practice nursing scholarship, and practice in a designated appropriate setting under the direction of a faculty advisor in collaboration with selected clinical experts, with a focus on exploring the development and scientific underpinnings of components of expert clinical oncology practice.
Prerequisite: Enrollment in the oncology nurse practitioner fellowship certificate program.

GNRS 631, ONP: Cancer Biology and Assessment, 2 Units
This course builds on knowledge of the anatomy and physiology of DNA, RNA, and differentiated and nondifferentiated human cells. Focus is on the pathophysiologic mechanisms of human cancer disorders. Diagnostic reasoning that facilitates the clustering of signs and symptoms is a key process underlying the course. The course also provides the foundation for the integration of diagnostic testing, physical assessment, and understanding of the predictable pathophysiology of cancer in order to stage tumors and predict metastatic risk in individuals.
Prerequisite: Admission to the Oncology Nurse Practitioner Post-Master's Certificate program.

GNRS 632, ONP: Cancer Therapeutics, 2 Units
This course builds on knowledge of the predicted behavior of human cancer. Technology in cancer treatment is evolving rapidly, and this course provides a pathophysiological foundation for understanding cancer protocols. Current cancer protocols, classes and categories of therapeutics, technologies in development, and tumor resistance are discussed, along with the cost benefit, side effects, and availability of the covered therapeutics.
Corequisite: GNRS 631

GNRS 633, ONP: Symptom and Side Effect Burden, 2 Units
Patients with advanced cancer often suffer significant symptomatic burden and the iatrogenic complications of treatment. This course helps students develop a patient-centered approach to evidence-based management of common symptoms of cancer and side effects of treatment.
Prerequisite: GNRS 631 and GNRS 632

GNRS 634, ONP: Survivorship and the Psychosocial Impact of Cancer, 2 Units
Cancer patients and their caregivers face complicated psychological, financial, and spiritual changes, beginning at diagnosis and extending into the posttreatment phases. This course covers the common problems related to those changes, and best-practice strategies and techniques to help patients and families cope with cancer.

GNRS 635, ONP: Team-Based Care and the Role of the Oncology Nurse Practitioner, 2 Units
The clinician role of the oncology nurse practitioner requires familiarity with the incidence, prevalence, and risk assessment competencies for all common cancers. In addition, the oncology nurse practitioner must be prepared for a wide variety of leadership roles. Strategies for care coordination, designing and measuring interdisciplinary team outcomes, mentoring, collaborating with primary care providers, and rapid-cycle quality improvement are examined.

GNRS 636, ONP: Clinical Trials in Oncology Nursing, 2 Units
The advanced-practice oncology nurse practitioner is prepared to provide direct patient care, design a plan for outcome evaluation, and take a leadership role in medical and nursing oncological research.
Prerequisite: GNRS 610, GNRS 611, GNRS 612, and GNRS 613

GNRS 650, History of Professional Nursing: From Origins to Nursing in Transition, 3 Units
Students in this course explore conceptual and methodological issues in historical nursing research, including the use of biographic methods in nursing history and working with primary sources/archival materials/artifacts and material culture. Focus is on the origins of professional nursing up to the period of nursing in transition in the United States. Students examine ethics guidelines and standards for historical research in nursing, and critically analyze the origins of nursing and early nursing contributions to the evolution of modern health systems and interventions. Class discussion and composition facilitate critical thinking about the history of nursing as a scholarly inquiry, focusing on issues and methods of nursing historical research.
GNRS 651, History of Professional Nursing: From Colonial Times to Present Day, 3 Units
Students in this course explore the foundations of professional nursing in the United States in the context of influential historical, global, societal, and scientific events. Students examine issues faced by nurses from colonial times to today, critically analyzing nurses' contributions to the development of modern health systems and interventions. Class discussion and composition facilitate critical thinking about the history of nursing as a scholarly inquiry, since historical perspectives form the basis for analysis of contemporary healthcare issues and projected development of the nursing profession, its practice, and healthcare policy.

GNRS 660, Theories of Teaching and Instruction, 3 Units
This course analyzes selected teaching and learning models that are applicable to nursing education. Strategies for classroom and clinical teaching are examined. Research relative to nursing education is reviewed and critiqued. Design of research methods to determine effectiveness of teaching strategies is incorporated. Course development and student evaluation are emphasized. Selected faculty and nursing education issues are also explored.

GNRS 661, Leadership and Role Development in Nursing Education, 3 Units
This course includes an analysis of educational leadership and the multiple roles of the nurse educator related to teaching, scholarship, service, and practice. Theoretical perspectives and practical approaches supported by research in nursing and higher education literature, as well as the Christian educator's role promoting faith integration, are addressed.

GNRS 662, Assessment, Curriculum, Development, and Outcomes, 3 Units
